Jupiter Monthly Alternative Income Fund I-Class

I-Class Income Units, ISIN: GB00B4M78461

The Manager is Jupiter Unit Trust Managers Limited.

Objectives and investment policy

Objective
The Fund objective is to provide a level of income, net of fees, that is at least 3% per annum higher than the Consumer Price Index, together with prospects of capital growth over the long term (at least five years).

Policy
At least 70% of the Fund is invested in shares of closed-ended investment companies listed on the London Stock Exchange that offer a range of exposures, particularly to alternative asset classes. Up to 30% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by Jupiter and its associates), cash and near cash.

Strategy
The fund manager seeks to identify securities with stable, long-term predictable cash flows. The Fund will have a bias to well-diversified alternative assets that provide income, such as Real Estate, Infrastructure, Specialist Lending, Private Equity and others. The fund manager is focused on seeking to manage the risk of sharp falls in performance and inflation risk. Furthermore, the alternative nature of the fund provides lower correlation to traditional asset classes such as equities and bonds.

Benchmarks
Target benchmark - CPI + 3% p.a. over rolling three years

The Consumer Price Index is an inflationary indicator published monthly by the UK Office for National Statistics that measures the change in the cost of a fixed basket of products and services, including housing, electricity, food, and transportation and is a good relative measure to assess real capital appreciation.

Active Management
The Fund is actively managed. This means the fund manager is taking investment decisions with the intention of achieving the Fund's investment objective; this may include decisions regarding asset selection, regional allocation, sector views and overall level of exposure to the market. The fund manager is not in any way constrained by a benchmark in their portfolio positioning.

Any income arising in relation to this share class will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk Typically higher rewards, higher risk

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.
- Close-ended funds, including investment trusts, can borrow money and use the proceeds to invest (a process known as 'gearing'). Gearing will accentuate any gains or losses in the value of the closed-ended fund and the value of the Fund may rise and fall by large amounts over short periods of time.
- Most of the closed-ended funds in which the Fund invests are smaller companies. Such companies may be more volatile and may be less liquid (i.e. be more difficult to sell) than larger companies.
- During difficult market conditions there may not be enough investors to buy and sell certain investments. This may have an impact on the value of the Fund.
- A portion of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.

- The value of income payments will fluctuate.

Charges

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.94%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
- The ongoing charges figure excludes the costs of buying or selling assets for the Fund (unless those assets are shares of another fund). A change to the Fund's charging structure took effect on 29/05/2020. The ongoing charges figure with effect from that date is fixed. The annual report and accounts for the Fund will include details of the exact charges made.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.
