Fund objective

The investment objective is to achieve a positive absolute return over any 36 month period in all market conditions. By investing in the fund, capital is at risk. There is no guarantee that the fund will deliver positive returns over this, or any, time period.

Performance

Investors are invited to compare the fund's performance against the Sterling Over Night Index Average (SONIA) 1 Month. Comparison against this rate will allow investors to determine whether the fund has delivered total returns in excess of cash. SONIA gives an indication of what a cash investment could have provided.

The comparison should be performed over at least a 36-month period to provide the most appropriate comparison.
