BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Corporate Bond Fund

INSTITUTIONAL SHARES W (INCOME) (ISIN: GB00B8KCZN97)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To generate a return through a combination of income and capital returns. The Fund targets the outperformance of the Markit iBoxx GBP Collateralized & Corporate Index by 1.5% per annum before fees on a rolling annualised three year basis (meaning a period of three years, no matter which day you start on). However, performance is not guaranteed and a capital loss may occur.

POLICY

The Fund will:

- invest anywhere in the world;
- typically invest at least 80% of its assets in sterling denominated (or hedged back to sterling) investment grade (as rated by Standard and Poor's or similar agencies) corporate debt securities; and
- limit investment in collective investment schemes to 10%.

The Fund may:

- invest in cash and cash-like investments;
- invest in bonds with low credit ratings (i.e. Sub-investment grade bonds as rated by Standard and Poor's or similar agencies); and
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income.

Benchmark: The Fund will measure its performance before fees against the Markit iBoxx GBP Collateralized & Corporate Index +1.5% per annum (the "Benchmark") on a rolling annualised three year basis. The Fund will use the Benchmark as a target for the Fund's performance to match or exceed because the index represents the investment grade fixed income market for sterling-denominated bonds and outperformance of the index by 1.5% is commensurate with the Investment Manager's approach.

The Fund is actively managed, which means the Investment Manager has discretion to invest outside the Benchmark, subject to the investment objective and policy as disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: income from investments will be paid to shareholders quarterly on or before 28 February, 31 May, 31 August and 30 November.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 10,000,000.

Risk and Reward Profile

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 4 because its historical value has shown moderate volatility. With a Fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Performance Aim Risk:** The performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for returns to vary significantly.
- **Currency Risk:** This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large

movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Real Estate Investment Trust (REITs) Risk:** The Fund is subject to risks associated with investing in real estate which may include but is not limited to liquidity constraints arising from difficulties with the disposal of the underlying properties, fluctuations in the value of underlying properties, defaults by borrowers or tenants, market saturation, changes in general and local economic conditions, decreases in market rates for rents, increases in competition, property taxes, capital expenditures or operating expenses and other economic, political or regulatory occurrences affecting companies in the real estate industry.
- **CoCo's Risk:** Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to

derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
