Vanguard USD Emerging Markets Government Bond UCITS ETF (the "Fund")

A sub-fund of Vanguard Funds PLC

(USD) ACCUMULATING
ISIN: IE00BGYWCB81
Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund seeks to track the performance of the Bloomberg Barclays EM USD Sovereign + Quasi-Sov Index (the "Index").
- The Fund invests in a representative sample of bonds included in the Index in order to closely match the Index's capital and income return.
- The Index measures the performance of a broad spread of US dollar denominated bonds issued by emerging market governments and public bodies.
- Bonds in the Index have maturities of greater than one year and no credit rating constraints.
- To a lesser extent the Fund may invest in similar types of bonds outside the Index.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations.
- The base currency of the Fund is USD.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- ETF Shares are listed on one or more stock exchange(s). Subject to certain exceptions set out in the prospectus, investors who are not Authorised Participants may only sell ETF Shares through a company that is a member of a relevant stock exchange at any time when that stock exchange is open for business.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in the Supplement) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11628

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see the supplement for the Fund ("Supplement") and Appendix 6 of the Vanguard Funds plc prospectus (the "Prospectus") on our website at https://global.vanguard.com

Risk and reward profile

Lower risk ← → Higher risk

Typically lower rewards — Typically higher rewards

1	2	**3**	4	5	6	7

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

  - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.

  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.

  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.
