STATEMENT BY DIRECTORS

This statement specifies the responsibility of the Board of Directors in compiling the Consolidated Financial Report of Wisdom Marine Lines Co., Limited (Cayman) (the “Company”) and its subsidiaries (together the “Group”).

In addition to the disclosure of accounting information, a complete consolidated financial report shall include the roles of each segment of the Group and their future development, so that the readers of the Financial Report can fully understand the future development and potential risk of the Group. In respect of the full and complete disclosure of accounting procedures and financial information, the Board has responsibility to review the Group’s strategies, important business plans, and risk management policies, to set operational targets, and to monitor the results of operations, in order to comply with relevant regulations, protect company interests, and avoid potential fraud within the Group. We have provided the relevant financial information for every financial report year, and disclosed the consolidated assets, liabilities, financial structure and operating performance in a truthful, fair and objective manner. Our disclosure is based on the principles of consistency and going concern assumption, and we make fair judgments and estimations regarding accrual items at the end of each year, in order to prevent erroneous information in the consolidated financial report.

The Board of Directors and management reviewed the consolidated financial report of the Company and its subsidiaries for 2018 and 2017 on 22 February 2019. The consolidated financial report have been prepared in accordance with International Financial Reporting Standards, International Accounting Standards and Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee, and give a true and fair view of the consolidated financial position of the Group as at 31 December 2018 and 2017 and the consolidated results and changes in equity of the Group for the years then ended, and there is no fraudulent or concealed information.

The Board of Directors has, on the date of this statement, authorized these financial statements for issue.

Audit Report of Independent Auditors

Independent Auditors' Report Translated from Chinese

To the Board of Directors and Stockholders of
Wisdom Marine Lines Co., Limited (Cayman)

Opinion

We have audited the accompanying consolidated balance sheets of Wisdom Marine Lines Co., Limited (Cayman) (the "Company") and its subsidiaries (together the "Group") as of 31 December 2018 and 2017, and the related consolidated statements of comprehensive income, changes in equity and cash flows for the years ended 31 December 2018 and 2017, and notes to the consolidated financial statements, including the summary of significant accounting policies (together "the consolidated financial statements").

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of 31 December 2018 and 2017, and their consolidated financial performance and cash flows for the years ended 31 December 2018 and 2017, in conformity with the requirements of the International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee or the former Standing Interpretations Committee.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company and its subsidiaries in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China (the "Norm"), and we have fulfilled our other ethical responsibilities in accordance with the Norm. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of 2018 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Impairment of property, plant and equipment

As at 31 December 2018, the amount of the Group's property, plant and equipment was \$2,741,207,097, which accounted for 95% of total assets. The management assessed if there is any indication that an asset may be impaired on balance sheet date. If there is any indication that an asset may be impaired, the Group should evaluate the recoverable amount of the cash-generating-unit (CGU), to which the asset belongs. The property, plant and equipment of the Group mainly consists of vessel equipment. The subsidiaries of the Company took the one-vessel-one-company strategy to manage vessels, and the main CGU for each subsidiary is their vessels. With the view that the amount of property, plant and equipment being material and the calculation of recoverable amount involving numerous assumptions and estimates, we have determined the impairment of property, plant and equipment as a key audit matter. The audit procedures we conducted regarding the impairment of property, plant and equipment included but not limited to the following, evaluating the appropriateness of the accounting policy for impairment of property, plant and equipment; inspecting the impairment evaluation report provided by the Group and assess the reasonableness of the identification of indication of impairment and the assumptions used, including identification of CGU, estimation of cash flows and discount rate. We also evaluated the disclosure regarding to property, plant and equipment in Note 5 and 6 of the consolidated financial statement.

Valuation of the put option embedded in bond payable

As at 31 December 2018, the amount of the Group's financial liabilities at fair value through profit or loss was \$2,488,564, which accounted for 0% of total assets. The fair value measurement hierarchy of the put option embedded in bond payable is categorized as Level 3. The measurement of Level 3 investment uses unobservable inputs. The management measured the put option based on source data from external valuation institute. As the external valuation has significant impact on the estimates of fair value, we determined the issue to be a key audit matter. The audit procedures we conducted regarding the valuation of the put option included but not limited to the following, comparing the report provided by internal experts with the report and related documents provided by the management; evaluating the reasonableness of the valuation methods and key valuation assumptions used by external valuation institute; conducting the recalculation and comparing the result with the one provided by the management. We also evaluated the disclosure regarding to valuation of the put option in Note 5, 6 and 12 of the consolidated financial statement.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the requirements of the International Financial Reporting Standards, International Accounting Standards, Interpretations developed by the International Financial Reporting Interpretations Committee and Interpretations developed by the Standing Interpretations Committee and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability to continue as a going concern of the Company and its subsidiaries, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including audit committee or supervisors, are responsible for overseeing the financial reporting process of the Company and its subsidiaries.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Company and its subsidiaries.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability to continue as a going concern of the Company and its subsidiaries. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and its subsidiaries to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the accompanying notes, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of 2018 consolidated financial statements and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
31 DECEMBER 2018 AND 2017

(In US Dollars Unless Stated Otherwise)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

1. History and organization

Wisdom Marine Lines Co., Limited (Cayman) (the “Company”) was incorporated in the Cayman Islands on 21 October 2008 as a tax-exempt company with limited liability under the Companies Act, Cap 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. The Company and its subsidiaries (the “Group”) primarily provide marine cargo transportation services, service related to the maintenance, vessel leasing, and shipping agency and management services. On 1 December 2010, the Company was approved and listed on Taiwan Stock Exchange (TWSE).

The Company’s ultimate parent company: None.

2. Date and procedures of authorization of financial statements for issue

The consolidated financial statements were authorized for issue by the board of directors on 22 February 2019.

3. Newly issued or revised standards and interpretations

(1) Except for the following, the accounting policies applied in these consolidated financial statements are consistent with those applied in the consolidated financial statements for the year ended 31 December 2017. Shown below are the standards and interpretations effective for annual periods beginning on or after 1 January 2018.

A. *IFRS 15 “Revenue from Contracts with Customers” (including Amendments to IFRS 15 “Clarifications to IFRS 15 Revenue from Contracts with Customers”)*

IFRS 15 replaces IAS 11 *Construction Contracts*, IAS 18 *Revenue* and related Interpretations. In accordance with the transition provision in IFRS 15, the Group elected to recognize the cumulative effect of initially applying IFRS 15 at the date of initial application (1 January 2018). The Group also elected to apply this standard retrospectively only to contracts that are not completed contracts at the date of initial application.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

The Group's principal activities are rendering of services. The impacts arising from the adoption of IFRS 15 on the Group are summarized as follows:

- (a) Please refer to Note 4 for the accounting policies before or after 1 January 2018.
- (b) Before 1 January 2018, revenue from rendering of services was recognized by reference to the stage of completion which was measured by reference to the proportion that contract cost incurred for work performed to date bear to the estimated total contract costs. Starting from 1 January 2018, in accordance with IFRS 15, the Group recognized revenue when (or as) the Group satisfies a performance obligation by transferring a promised service to a customer and also by reference to the stage of completion. IFRS 15 has no significant impact on the Group's revenue recognition from rendering of services. However, for some rendering of services contracts, part of the consideration was received from customers upon signing the contract, then the Group has the obligation to provide the services subsequently. Before 1 January 2018, the Group recognized the consideration received in advance from customers under other current liabilities. Starting from 1 January 2018, in accordance with IFRS 15, it should be recognized as contract liabilities. For some contracts, if the Group has the right to render services to customers but does not has a right to an amount of consideration that is unconditional, these contracts should be presented as contract assets. It is different from the accounting treatment of recognizing trade receivables before the date of initial application. Besides, loss allowance for contract assets was assessed in accordance with IFRS 9.
- (c) Please refer to Note 4 and Note 6 for additional disclosure note required by IFRS 15.

B. IFRS 9 "Financial Instruments"

IFRS 9 replaces IAS 39 *Financial Instruments: Recognition and Measurement*. In accordance with the transition provision in IFRS 9, the Group elected not to restate prior periods at the date of initial application (1 January 2018). The adoption of IFRS 9 has the following impacts on the Group:

- (a) The Group adopted IFRS 9 since 1 January 2018 and it adopted IAS 39 before 1 January 2018. Please refer to Note 4 for more details on accounting policies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Note:

- i. In accordance with IAS 39, available-for-sale financial assets are bonds of listed companies. Details are described as follow:

The cash flow characteristics for bonds investments are solely payments of principal and interest on the principal amount outstanding. In accordance with IFRS 9, the assessment of the business model is based on the facts and circumstances that existed as at 1 January 2018. These financial assets are managed to achieve the business model's objective by both collecting contractual cash flows and selling financial assets, and they should be reclassified to financial assets measured at fair value through other comprehensive income. As at 1 January 2018, available-for-sale investments of \$1,028,103 were reclassified to financial assets measured at fair value through other comprehensive income of \$1,028,103. This reclassification did not result any difference in the carrying amount. Besides, in accordance with IFRS 9, there was no adjustment arised from the assessment of impairment losses for the aforementioned assets as at 1 January 2018.

- ii. In accordance with IAS 39, the cash flow characteristics for held-to-maturity investments and loans and receivables are solely payments of principal and interest on the principal amount outstanding. The assessment of the business model is based on the facts and circumstances that exited as at 1 January 2018. These financial assets were measured at amortized cost as they were held within a business model whose objective was to hold financial assets in order to collect contractual cash flows. Besides, in accordance with IFRS 9, there was no adjustment arised from the assessment of impairment losses for the aforementioned assets as at 1 January 2018. Therefore, there is no impact on the carrying amount as at 1 January 2018. As at 1 January 2018, financial assets held-to-maturity investments of \$614,211 were reclassified to financial assets measured at amortized cost of \$614,211.

- (d) Please refer to Note 4, Note 6 and Note 12 for the related disclosures required by IFRS 7 and IFRS 9.

C. IFRIC 22 “*Foreign Currency Transactions and Advance Consideration*”

The interpretation clarifies that when applying paragraphs 21 and 22 of IAS 21 “The Effects of Changes in Foreign Exchange Rates”, in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration.

The Group has no relevant transaction or event. Aforementioned standards and interpretations have no material impact on the Group.

(2) The following standards or interpretations issued by IASB are not yet effective:

A. IFRS 16 “*Leases*”

The new standard requires lessees to account for all leases under a single on-balance sheet model (subject to certain exemptions). Lessor accounting still uses the dual classification approach: operating lease and finance lease.

B. IFRIC 23 “*Uncertainty Over Income Tax Treatments*”

The Interpretation clarifies application of recognition and measurement requirements in IAS 12 “Income Taxes” when there is uncertainty over income tax treatments.

C. IAS 28 “*Investment in Associates and Joint Ventures*” — Amendments to IAS 28

The amendments clarify that an entity applies IFRS 9 to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture before it applies IAS 28, and in applying IFRS 9, does not take account of any adjustments that arise from applying IAS 28.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

D. Prepayment Features with Negative Compensation (Amendments to IFRS 9)

The amendment allows financial assets with prepayment features that permit or require a party to a contract either to pay or receive reasonable compensation for the early termination of the contract, to be measured at amortized cost or at fair value through other comprehensive income.

E. Improvements to International Financial Reporting Standards (2015-2017 cycle):

IFRS 3 “Business Combinations”

The amendments clarify that an entity that has joint control of a joint operation shall remeasure its previously held interest in a joint operation when it obtains control of the business.

IFRS 11 “Joint Arrangements”

The amendments clarify that an entity that participates in, but does not have joint control of, a joint operation does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.

IAS 12 “Income Taxes”

The amendments clarify that an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

IAS 23 “Borrowing Costs”

The amendments clarify that an entity should treat as part of general borrowings any borrowing made specifically to obtain an asset when the asset is ready for its intended use or sale.

F. Plan Amendment, Curtailment or Settlement (Amendments to IAS 19)

The amendments clarify that when a change in a defined benefit plan is made (such as amendment, curtailment or settlement, etc.), the entity should use the updated assumptions to remeasure its net defined benefit liability or asset.

G. IFRS 10 “Consolidated Financial Statements” and IAS 28 “Investments in Associates and Joint Ventures” — Sale or Contribution of Assets between an Investor and its Associate or Joint Ventures

The amendments address the inconsistency between the requirements in IFRS 10 *Consolidated Financial Statements* and IAS 28 *Investments in Associates and Joint Ventures*, in dealing with the loss of control of a subsidiary that is contributed to an associate or a joint venture. IAS 28 restricts gains and losses arising from contributions of non-monetary assets to an associate or a joint venture to the extent of the interest attributable to the other equity holders in the associate or joint ventures. IFRS 10 requires full profit or loss recognition on the loss of control of the subsidiary. IAS 28 was amended so that the gain or loss resulting from the sale or contribution of assets that constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized in full. IFRS 10 was also amended so that the gains or loss resulting from the sale or contribution of a subsidiary that does not constitute a business as defined in IFRS 3 between an investor and its associate or joint venture is recognized only to the extent of the unrelated investors’ interests in the associate or joint venture. The effective date of the amendments has been postponed indefinitely, but early adoption is allowed.

H. IFRS 17 “Insurance Contracts”

IFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects (including recognition, measurement, presentation and disclosure requirements). The core of IFRS 17 is the General (building block) Model, under this model, on initial recognition, an entity shall measure a group of insurance contracts at the total of the fulfilment cash flows and the contractual service margin. The fulfilment cash flows comprise of the following:

- (1) estimates of future cash flows;
- (2) Discount rate: an adjustment to reflect the time value of money and the financial risks related to the future cash flows, to the extent that the financial risks are not included in the estimates of the future cash flows; and
- (3) a risk adjustment for non-financial risk.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

The carrying amount of a group of insurance contracts at the end of each reporting period shall be the sum of the liability for remaining coverage and the liability for incurred claims. Other than the General Model, the standard also provides a specific adaptation for contracts with direct participation features (the Variable Fee Approach) and a simplified approach (Premium Allocation Approach) mainly for short-duration contracts.

I. *Definition of a Business* (Amendments to IFRS 3)

The amendments clarify the definition of a business in IFRS 3 Business Combinations. The amendments are intended to assist entities to determine whether a transaction should be accounted for as a business combination or as an asset acquisition.

IFRS 3 continues to adopt a market participant's perspective to determine whether an acquired set of activities and assets is a business. The amendments clarify the minimum requirements for a business; add guidance to help entities assess whether an acquired process is substantive; and narrow the definitions of a business and of outputs; etc.

J. *Definition of a Material* (Amendments to IAS 1 and 8)

The main amendment is to clarify new definition of material. It states that "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity." The amendments clarify that materiality will depend on the nature or magnitude of information. An entity will need to assess whether the information, either individually or in combination with other information, is material in the context of the financial statements. A misstatement of information is material if it could reasonably be expected to influence decisions made by the primary users.

The abovementioned standards and interpretations issued by IASB are not yet effective at the date when the Group's financial statements were authorized for issue. As the Group is still currently determining the potential impact of the standards and interpretations listed under B~C, E~G and J it is not practicable to estimate their impact on the Group at this point in time. Apart from the potential impact of the standards and interpretations listed under A, which is described below, all other standards and interpretations have no material impact on the Group.

(a) *IFRS 16 "Leases"*

IFRS 16 "Leases" replaces IAS 17 "Leases", IFRIC 4 "Determining whether an Arrangement contains a Lease", SIC-15 "Operating Leases - Incentives" and SIC-27 "Evaluating the Substance of Transactions Involving the Legal Form of a Lease". The impact arising from the adoption of IFRS 16 on the Group are summarized as follows:

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

A. For the definition of a lease, the Group elects not to reassess whether a contract is, or contains, a lease at the date of initial application (1 January 2019) in accordance with the transition provision in IFRS 16. Instead, the Group is permitted to apply IFRS 16 to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 but not to apply IFRS 16 to contracts that were not previously identified as containing a lease applying IAS 17 and IFRIC 4.

The Group is a lessee and elects not to restate comparative information in accordance with the transition provision in IFRS 16. Instead, the Group recognizes the cumulative effect of initially applying IFRS 16 as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the date of initial application.

(a) Leases classified as operating leases

For leases that were classified as operating leases applying IAS 17, the Group expects to measure and recognize those leases as lease liability on 1 January 2019 at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate on 1 January 2019 and; the Group chooses, on a lease-by-lease basis, to measure the right-of-use asset at either:

1. its carrying amount as if IFRS 16 had been applied since the commencement date, but discounted using the lessee's incremental borrowing rate on 1 January 2019; or
- ii. an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognized in the balance sheet immediately before 1 January 2019.

The Group expects the right-of-use asset will increase by \$869,748 and the lease liability will increase by \$861,446 on 1 January 2019.

(b) Leases classified as finance leases

For leases that were classified as finance leases applying IAS 17, the Group expects to reclassify the lease asset of \$90,950,456 and the lease payable of \$86,458,202 as measured by IAS 17 to the right-of-use asset of \$90,950,456 and the lease liability of \$86,458,202, respectively, on 1 January 2019.

B. The additional disclosures of lessee and lessor required by IFRS 16 will be disclosed in the relevant notes.

4. Summary of significant accounting policies

(1) Statement of compliance

The consolidated financial statements of the Group for the year ended 31 December 2018 and 2017 have been prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board.

(2) Basis of preparation

A. Basis of measurement

The consolidated financial statements have been prepared under the historical cost convention, except for those financial instruments that are measured at fair value with changes therein shown in the consolidated financial statements.

B. Functional and presentation currency

The functional currency of each Group entities is determined based on the primary economic environment in which the entities operate. The Group's consolidated financial statements are presented in US Dollar, which is the Company's functional currency and presentation currency. However in order to comply with the listing requirement in Taiwan, the Group translates its results and financial position into the presentation currency, New Taiwan Dollar (in thousands of NTD), in accordance with paragraph 38 of IAS 21 "The Effects of Changes in Foreign Exchange Rates". Statement of financial position presented is translated at the closing rate at the date of that statement of financial position. Statement of comprehensive income is translated at exchange rates at the dates of transactions. Equity transactions are translated at exchange rates at the dates of transactions.

(3) Basis of consolidation

A. Preparation principle of consolidated financial statements

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- (a) power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- (b) exposure, or rights, to variable returns from its involvement with the investee, and
- (c) the ability to use its power over the investee to affect its returns

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee
- (b) rights arising from other contractual arrangements
- (c) the Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Subsidiaries are fully consolidated from the acquisition date, being the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the parent company, using uniform accounting policies. All intra-group balances, income and expenses, unrealized gains and losses and dividends resulting from intra-group transactions are eliminated in full.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction.

Total comprehensive income of the subsidiaries is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

If the Group loses control of a subsidiary, it:

- (a) derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- (b) derecognizes the carrying amount of any non-controlling interest;
- (c) recognizes the fair value of the consideration received;
- (d) recognizes the fair value of any investment retained;
- (e) recognizes any surplus or deficit in profit or loss; and
- (f) reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss.

(4) Foreign currency transactions

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency closing rate of exchange ruling at the reporting date. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

All exchange differences arising on the settlement of monetary items or on translating monetary items are taken to profit or loss in the period in which they arise except for the following:

- A. Exchange differences arising from foreign currency borrowings for an acquisition of a qualifying asset to the extent that they are regarded as an adjustment to interest costs are included in the borrowing costs that are eligible for capitalization.
- B. Foreign currency items within the scope of IFRS 9 *Financial Instruments* (Before January 1, 2018: IAS 39 *Financial Instruments: Recognition and Measurement*) are accounted for based on the accounting policy for financial instruments.
- C. Exchange differences arising on a monetary item that forms part of a reporting entity's net investment in a foreign operation is recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss is recognized in other comprehensive income. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss is recognized in profit or loss.

(5) Translation of financial statements in foreign currency

The assets and liabilities of foreign operations are translated at the closing rate of exchange prevailing at the reporting date and their income and expenses are translated at an average rate for the period. The exchange differences arising on the translation are recognized in other comprehensive income. On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss when the gain or loss on disposal is recognized.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

The following partial disposals are accounted for as disposals:

- A. when the partial disposal involves the loss of control of a subsidiary that includes a foreign operation; and
- B. when the retained interest after the partial disposal of an interest in a joint arrangement or a partial disposal of an interest in an associate that includes a foreign operation is a financial asset that includes a foreign operation.

On the partial disposal of a subsidiary that includes a foreign operation that does not result in a loss of control, the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is re-attributed to the non-controlling interests in that foreign operation. In partial disposal of an associate or jointly controlled entity that includes a foreign operation that does not result in a loss of significant influence or joint control, only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Any goodwill and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and expressed in its functional currency.

(6) Current and non-current distinction

An asset is classified as current when:

- A. The Group expects to realize the asset, or intends to sell or consume it, in its normal operating cycle
- B. The Group holds the asset primarily for the purpose of trading
- C. The Group expects to realize the asset within twelve months after the reporting period
- D. The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when:

- A. The Group expects to settle the liability in its normal operating cycle
- B. The Group holds the liability primarily for the purpose of trading
- C. The liability is due to be settled within twelve months after the reporting period
- D. The Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(7) Cash and cash equivalents

Cash and cash equivalents comprises cash on hand, demand deposits and short-term, highly liquid time deposits or investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Time deposits which mature over three months are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. They are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value, therefore they are reported as cash and cash equivalents.

(8) Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities within the scope of IFRS 9 Financial Instruments (Before 1 January 2018: IAS 39 Financial Instruments: Recognition and Measurement) are recognized initially at fair value plus or minus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

A. Financial instruments: Recognition and Measurement

The accounting policy from 1 January 2018 as follow:

The Group accounts for regular way purchase or sales of financial assets on the trade date.

The Group classified financial assets as subsequently measured at amortized cost or fair value through other comprehensive income on the basis of both:

- (a) the Group's business model for managing the financial assets and
- (b) the contractual cash flow characteristics of the financial asset.

Financial assets measured at amortized cost

A financial asset is measured at amortized cost if both of the following conditions are met and presented as note receivables, trade receivables financial assets measured at amortized cost and other receivables etc., on balance sheet as at the reporting date:

- (a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Such financial assets are subsequently measured at amortized cost (the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount and the maturity amount and adjusted for any loss allowance) and is not part of a hedging relationship. A gain or loss is recognized in profit or loss when the financial asset is derecognized, through the amortization process or in order to recognize the impairment gains or losses.

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

- (a) purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
- (b) financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Financial asset measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

- (a) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- (b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Recognition of gain or loss on a financial asset measured at fair value through other comprehensive income are described as below:

- (a) A gain or loss on a financial asset measured at fair value through other comprehensive income recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

- (b) When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- (c) Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:
 - i. Purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortized cost of the financial asset from initial recognition.
 - ii. Financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortized cost of the financial asset in subsequent reporting periods.

Besides, for certain equity investments within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Group made an irrevocable election to present the changes of the fair value in other comprehensive income at initial recognition. Amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss (when disposal of such equity instrument, its cumulated amount included in other components of equity is transferred directly to the retained earnings) and these investments should be presented as financial assets measured at fair value through other comprehensive income on the balance sheet. Dividends on such investment are recognized in profit or loss unless the dividends clearly represents a recovery of part of the cost of investment.

The accounting policy before 1 January 2018 as follow:

The Group accounts for regular way purchase or sales of financial assets on the trade date.

Financial assets of the Group are classified as financial assets at fair value through profit or loss, available-for-sale financial assets, held-to-maturity investments and loans and receivables. The Group determines the classification of its financial assets at initial recognition.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading and financial assets designated as at fair value through profit or loss. A financial asset is classified as held for trading if:

- (a) it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- (b) on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- (c) it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial asset at fair value through profit or loss; or a financial asset may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

- (a) it eliminates or significantly reduces a measurement or recognition inconsistency; or
- (b) a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the key management personnel.

Financial assets at fair value through profit or loss are measured at fair value with changes in fair value recognized in profit or loss. Dividends or interests on financial assets at fair value through profit or loss are recognized in profit or loss (including those received during the period of initial investment).

Available-for-sale financial assets

Available-for-sale investments are non-derivative financial assets that are designated as available-for-sale or those not classified as financial assets at fair value through profit or loss, held-to-maturity financial assets, or loans and receivables.

Foreign exchange gains and losses and interest calculated using the effective interest method relating to monetary available-for-sale financial assets, or dividends on an available-for-sale equity instrument, are recognized in profit or loss. Subsequent measurement of available-for-sale financial assets at fair value is recognized in equity until the investment is derecognized, at which time the cumulative gain or loss is recognized in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

If equity instrument investments do not have quoted prices in an active market and their fair value cannot be reliably measured, then they are classified as financial assets measured at cost on balance sheet and carried at cost net of accumulated impairment losses, if any, as at the reporting date.

Held-to-maturity financial assets

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the Group has the positive intention and ability to hold it to maturity, other than those that are designated as available-for-sale, classified as financial assets at fair value through profit or loss, or meet the definition of loans and receivables.

After initial measurement held-to-maturity financial assets are measured at amortized cost using the effective interest method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or transaction costs. The effective interest method amortization is recognized in profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market other than those that the Group upon initial recognition designates as available for sale, classified as at fair value through profit or loss, or those for which the holder may not recover substantially all of its initial investment.

Loans and receivables are separately presented on the balance sheet as receivables or debt instrument investments for which no active market exists. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fee or transaction costs. The effective interest method amortization is recognized in profit or loss.

B. Impairment of financial assets

The accounting policy from 1 January 2018 as follow:

The Group is recognizes a loss allowance for expected credit losses on debt instrument investments measured at fair value through other comprehensive income and financial asset measured at amortized cost. The loss allowance on debt instrument investments measured at fair value through other comprehensive income is recognized in other comprehensive income and not reduce the carrying amount in the statement of financial position.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

The Group measures expected credit losses of a financial instrument in a way that reflects:

- (a) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- (b) the time value of money; and
- (c) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The loss allowance is measured as follows:

- (a) At an amount equal to 12-month expected credit losses: the credit risk on a financial asset has not increased significantly since initial recognition or the financial asset is determined to have low credit risk at the reporting date. In addition, the Group measures the loss allowance for a financial asset at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date that condition is no longer met.
- (b) At an amount equal to the lifetime expected credit losses: the credit risk on a financial asset has increased significantly since initial recognition or financial asset that is purchased or originated credit-impaired financial asset.
- (c) For trade receivables or contract assets arising from transactions within the scope of IFRS 15, the Group measures the loss allowance at an amount equal to lifetime expected credit losses.

At each reporting date, the Group needs to assess whether the credit risk on a financial asset has been increased significantly since initial recognition by comparing the risk of a default occurring at the reporting date and the risk of default occurring at initial recognition. Please refer to Note 12 for further details on credit risk.

The accounting policy before 1 January 2018 as follows:

The Group assesses at each reporting date whether there is any objective evidence that a financial asset other than the financial assets at fair value through profit or loss is impaired. A financial asset is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more loss events that has occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset. The carrying amount of the financial asset impaired, other than receivables impaired which are reduced through the use of an allowance account is reduced directly and the amount of the loss is recognized in profit or loss.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Loss events include:

- (a) significant financial difficulty of the issuer or obligor; or
- (b) a breach of contract, such as a default or delinquency in interest or principal payments; or
- (c) it becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- (d) the disappearance of an active market for that financial asset because of financial difficulties.

For held-to-maturity financial assets and loans and receivables, the Group first assesses individually whether objective evidence of impairment exists individually for financial asset that are individually significant, or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows. The present value of the estimated future cash flows is discounted at the financial assets original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate. Interest income is accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Receivables together with the associated allowance are written off when there is no realistic prospect of future recovery. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is credited to profit or loss.

C. Derecognition of financial assets

A financial asset is derecognized when:

- (a) The rights to receive cash flows from the asset have expired
- (b) The Group has transferred the asset and substantially all the risks and rewards of the asset have been transferred
- (c) The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the consideration received or receivable including any cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss.

D. Financial liabilities and equity

Classification between liabilities or equity

The Group classifies the instrument issued as a financial liability or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. The transaction costs of an equity transaction are accounted for as a deduction from equity (net of any related income tax benefit) to the extent they are incremental costs directly attributable to the equity transaction that otherwise would have been avoided.

Compound instruments

The Group evaluates the terms of the convertible bonds issued to determine whether it contains both a liability and an equity component. Furthermore, the Group assesses if the economic characteristics and risks of the put and call options contained in the convertible bonds are closely related to the economic characteristics and risk of the host contract before separating the equity element.

For the liability component excluding the derivatives, its fair value is determined based on the rate of interest applied at that time by the market to instruments of comparable credit status. The liability component is classified as a financial liability measured at amortized cost before the instrument is converted or settled.

For the embedded derivative that is not closely related to the host contract (for example, if the exercise price of the embedded call or put option is not approximately equal on each exercise date to the amortized cost of the host debt instrument), it is classified as a liability component and subsequently measured at fair value through profit or loss unless it qualifies for an equity component. The equity component is assigned the residual amount after deducting from the fair value of the instrument as a whole the amount separately determined for the liability component. Its carrying amount is not re-measured in the subsequent accounting periods. If the convertible bond issued does not have an equity component, it is accounted for as a hybrid instrument in accordance with the requirements under IFRS 9 *Financial Instruments* (before 1 January 2018: IAS 39 *Financial Instruments: Recognition and Measurement*).

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Transaction costs are apportioned between the liability and equity components of the convertible bond based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

On conversion of a convertible bond before maturity, the carrying amount of the liability component being the amortized cost at the date of conversion is transferred to equity.

Financial liabilities

Financial liabilities within the scope of IFRS 9 *Financial Instruments* (before 1 January 2018: IAS 39 *Financial Instruments: Recognition and Measurement*) are classified as financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost upon initial recognition.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. A financial liability is classified as held for trading if:

- (a) it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- (b) on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking; or
- (c) it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

If a contract contains one or more embedded derivatives, the entire hybrid (combined) contract may be designated as a financial liability at fair value through profit or loss; or a financial liability may be designated as at fair value through profit or loss when doing so results in more relevant information, because either:

- (a) it eliminates or significantly reduces a measurement or recognition inconsistency; or
- (b) a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the key management personnel.

Gains or losses on the subsequent measurement of liabilities at fair value through profit or losses including interest paid are recognized in profit or loss.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Financial liabilities at amortized cost

Financial liabilities measured at amortized cost include interest bearing loans and borrowings that are subsequently measured using the effective interest rate method after initial recognition. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate method amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or transaction costs.

Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified (whether or not attributable to the financial difficulty of the debtor), such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

E. Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

(9) Derivative instrument

The Group uses derivative instruments to hedge its foreign currency risks. A derivative is classified in the balance sheet as financial assets or liabilities at fair value through profit or loss (held for trading) except for derivatives that are designated effective hedging instruments which are classified as derivative financial assets or liabilities for hedging.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognized in equity.

Before 1 January 2018, derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are separated from the host contract and accounted for as a derivative. The aforementioned policy are applicable to host contracts as financial liabilities or non-financial assets since 1 January 2018.

(10) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- A. In the principal market for the asset or liability, or
- B. In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

(11) Inventories

Inventories are bunker oil and are carried at the lower of cost or net realizable value. The cost of fuel is determined using the “weighted-average” cost method. Net realizable value is the determined based on the estimated selling price in the ordinary course of business, less the estimated selling expenses at the end of the period.

(12) Investments accounted for using equity method

The Group’s investment in its associate is accounted for using equity method other than those that meet the criteria to be classified as held for sale. An associate is an entity over which the Group has significant influence.

Under equity method, the investment in the associate or an investment in a joint venture is carried in the balance sheet at cost and adjusted thereafter for the post-acquisition change in the Group’s share of net assets of the associate. After the interest in the associate is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the Group’s related interest in the associate.

When the associate issues new stock, and the Group’s interest in an associate is reduced or increased as the Group fails to acquire shares newly issued in the associate proportionately to its original ownership interest, the increase or decrease in the interest in the associate is recognized in Additional Paid in Capital and Investment accounted for using equity method. When the interest in the associate is reduced, the cumulative amounts previously recognized in other comprehensive income are reclassified to profit or loss or other appropriate items. The aforementioned capital surplus recognized is reclassified to profit or loss on a pro rata basis when the Group disposes the associate.

The financial statements of the associate are prepared for the same reporting period as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired in accordance with IAS 28 *Investments in Associates and Joint Ventures* (before 1 January 2018: IAS 39 *Financial Instruments: Recognition and Measurement*). If this is the case the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognizes the amount in the 'share of profit or loss of an associate' in the statement of comprehensive income in accordance with IAS 36 *Impairment of Assets*. In determining the value in use of the investment, the Group estimates:

- A. Its share of the present value of the estimated future cash flows expected to be generated by the associate, including the cash flows from the operations of the associate and the proceeds on the ultimate disposal of the investment; or
- B. The present value of the estimated future cash flows expected to arise from dividends to be received from the investment and from its ultimate disposal.

Because goodwill that forms part of the carrying amount of an investment in an associate is not separately recognized, it is not tested for impairment separately by applying the requirements for impairment testing goodwill in IAS 36 *Impairment of Assets*.

Upon loss of significant influence over the associate, the Group measures and recognizes any retaining investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retaining investment and proceeds from disposal is recognized in profit or loss. Furthermore, if an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the entity continues to apply equity method and does not remeasure the retained interest.

(13) Property, plant and equipment

Property, plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of dismantling and removing the item and restoring the site on which it is located and borrowing costs for construction in progress if the recognition criteria are met. Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. When significant parts of property, plant and equipment are required to be replaced in intervals, the Group recognized such parts as individual assets with specific useful lives and depreciation, respectively. The carrying amount of those parts that are replaced is derecognized in accordance with the derecognition provisions of IAS 16 *Property, plant and equipment*. When a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

All major components of the vessels are depreciated on a straight-line basis over the useful life of the assets. Depreciation is based on cost less the estimated residual value. The residual value is estimated as the lightweight tonnage of each vessel multiplied by scrap value per ton.

The dry-docking cost, including acquisition of a new vessel, is separated from the remaining cost of the vessel. These two cost elements are recognized and depreciated separately. For the building of new vessels, the initial dry-docking cost is also segregated and capitalized separately.

The Group has a long-term plan for dry-docking of the vessels. Dry-docking cost is capitalized and depreciated until the next planned dry-docking. Other capitalized improvements are depreciated over the estimated economic life.

The carrying values of vessels and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable. Valuations are performed frequently to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. The residual values, useful lives, and depreciation methods are reviewed, and adjusted if appropriate, at the end of each reporting period, except for those cases which are of little consequence.

A vessel or item of equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from derecognition of an asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated income statement in the year the asset is derecognized.

Expenditures on the building of new vessels are capitalized as vessels under construction as they are paid. Capitalized value is reclassified from vessel under construction to vessels upon delivery from the dock. The total acquisition cost of a vessel is determined based on the sum of installments paid plus the costs incurred during the construction period. Borrowing costs that are attributable to the construction of the vessels are capitalized as part of the vessel. The interest rate is based on the weighted-average borrowing costs for the Group, limited to the total borrowing costs incurred in the period.

Depreciation is calculated on a straight-line basis over the estimated economic lives of the following assets:

| | |
|------------------|-------------|
| vessels | 15-25 years |
| vessel equipment | 3-5 years |
| dry-dockings | 2.5 years |
| other | 3-10 years |

The assets residual values, useful lives and methods of depreciation are reviewed at each financial year end and adjusted prospectively, if appropriate.

(14) Leases

Group as a lessee

Finance leases which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized in profit or loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

(15) Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is any indication that an asset in the scope of IAS 36 *Impairment of Assets* may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's ("CGU") fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or cash-generating unit's recoverable amount. A previously recognized impairment loss is reversed only if there has been an increase in the estimated service potential of an asset which in turn increases the recoverable amount. However, the reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years.

An impairment loss of continuing operations or a reversal of such impairment loss is recognized in profit or loss.

(16) Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract or the expected net cost of continuing with the contract. Before a provision is established, the Group recognizes any impairment loss on the assets associated with that contract.

(17) Revenue recognition

The accounting policy from 1 January 2018 as follow:

Hire Revenue

Hire revenue is recognized when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably. The revenue is measured at the fair value of consideration that the Group has received or had the right to receive. The revenue is recognized on a time proportion basis over the lease term.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

Freight Revenue and Vessel Management Revenue

The Group's revenue arising from contracts with customers are rendering of services, including shipping services and vessel management services. Such services are separately priced or negotiated, and provided based on contract periods. As the Group provides the services over the contract period, so that the customers simultaneously receive and consume the benefits provided by the Group. Accordingly, the performance obligations are satisfied over time, and the related revenue are recognized by reference to the stage of completion over the period.

Most of the contractual considerations of the Group are received on average during the contract period after the provision of services. When the Group has performed the services to customers but does not has a right to an amount of consideration that is unconditional, these contracts should be presented as contract assets. However, for some rendering of services contracts, part of the consideration was received from customers upon signing the contract, and the Group has the obligation to provide the services subsequently; accordingly, these amounts are recognized as contract liabilities.

The period between the transfers of contract liabilities to revenue is usually within one year, thus, no significant financing component is arised.

The accounting policy before 1 January 2018 as follow:

Revenue is recognized when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably. The revenue is measured at the fair value of consideration that the Group has received or had the right to receive. The revenue is recognized on the following basis:

- (a) From freight, on a percentage of completion basis;
- (b) From chartering hire, on a time proportion basis over the lease term;
- (c) From vessel management, in the period in which the vessels are managed in accordance with the respective agreement;
- (d) Revenue is recognized when persuasive evidence exists, usually in the form of an executed sales agreement, that the significant risks and rewards of ownership have been transferred to the customer.

(18) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

(19) Post-employment benefits

(a) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss during which services are rendered by employees.

(b) Defined benefit plans

Post-employment benefit plan that is classified as a defined benefit plan uses the Projected Unit Credit Method to measure its obligations and costs based on actuarial assumptions. Re-measurements, comprising of the effect of the actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets, excluding net interest, are recognized as other comprehensive income with a corresponding debit or credit to retained earnings in the period in which they occur.

Past service costs are recognized in profit or loss on the earlier of:

- i. the date of the plan amendment or curtailment, and
- ii. the date that the Group recognizes restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset, both as determined at the start of the annual reporting period, taking account of any changes in the net defined benefit liability (asset) during the period as a result of contribution and benefit payment.

(c) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(20) Income taxes

Income tax expense (income) is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Current income tax relating to items recognized in other comprehensive income or directly in equity is recognized in other comprehensive income or equity and not in profit or loss.

The income tax for undistributed earnings is recognized as income tax expense in the subsequent year when the distribution proposal is approved by the Shareholders' meeting.

Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- i. Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- ii. In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- i. Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- ii. In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax assets and deferred tax liabilities reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity. Deferred tax assets are reassessed at each reporting date and are recognized accordingly.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current income tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

5. Significant accounting judgments, estimates and assumptions

The preparation of the Group's consolidated financial statements require management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumption and estimate could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods. Please find the details as below:

(1) Fair value of financial instruments

Where the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be derived from active markets, they are determined using valuation techniques including the income approach (for example the discounted cash flows model) or market approach. Changes in assumptions about these factors could affect the reported fair value of the financial instruments. Please refer to Note 12 for more details.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

(2) Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date less incremental costs that would be directly attributable to the disposal of the asset or cash generating unit. The value in use calculation is based on a discounted cash flow model. The cash flows projections are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

(3) Useful lives and depreciation of vessels

Management determines the estimated useful lives and related depreciation charges for its vessels. This estimate is based on the historical experience of the actual useful lives of vessels of similar nature and functions. It could change significantly as a result of technical innovations and competitor actions in response to severe industry activities. Management will increase the depreciation charge where useful lives are less than previously estimated lives, or it will write down technically obsolete or non-strategic assets that have been abandoned or sold. Management assesses the scrap value according to the characteristics of the Group's vessels and the market research from Clarkson and Demolition Market.

The Group determines the depreciation amount of vessels based on the estimated useful lives and residual values, which are reviewed at each reporting date. The principal assumptions for the Group's estimation of the useful lives and residual values include those related to the mode of operations, government regulations, and scrap value of vessels in future.

(4) Provision for losses from accidents

Provision for losses from accidents is made based on an assessment of the outcome of negotiations, arbitration or litigation, and the recoverability of losses from insurance companies, which requires management's judgment and estimates. Where the actual outcome or expectation in the future differs from the original estimate, such differences will have an impact on the carrying amount of the provisions and losses incurred in accidents/write-back in the period in which such estimate is changed.

Note: The Group adopted IFRS 9 since 1 January 2018. The Group elected not to restate prior periods in accordance with the transition provision in IFRS 9.

The Group's risk control activities and hedging strategy relate primarily to the Group's operating activities. As the Group has variable interest rate loan with bank, its future cash flows are exposed to interest rate risks and subject to interest rate fluctuations. In order to manage interest rate risks, the Group engages in interest rate swap contract to hedge the interest risk for better control and measurement of such risks. These interest rate swap contracts are cash flow hedges.

(22) Income tax

- A. Pursuant to the rules and regulations of the local authority, the Group is not subject to any income tax, except for WELL and WII. The Company has no issue of Integrated Income Tax. Interim period income tax expense is accrued using the tax rate that would be applicable to expected total annual earnings, that is, the estimated average annual effective income tax rate applied to the pre-tax income of the interim period. As a result, the Group does not disclose the reconciliation between accounting profit and taxable income.
- B. Based on the amendments to the Income Tax Act announced on 7 February 2018, applicable corporate income tax rate of WELL and WMI for the year ended 31 December 2018 has changed from 17% to 20%. The corporate income surtax on undistributed retained earnings has changed from 10% to 5%.
- C. For the years ended 31 December 2018 and 2017, the components of income tax expenses(benefits) of WELL and WII were as follows:

B. Financial risk management objectives and policies

The Group's principal financial risk management objective is to manage the market risk, credit risk and liquidity risk related to its operating activities. The Group identifies measures and manages the aforementioned risks based on the Group's policy and risk appetite.

The Group has established appropriate policies, procedures and internal controls for financial risk management. Before entering into significant transactions, due approval process by the Group's board of directors and audit committee must be carried out based on related protocols and internal control procedures. The Group complies with its financial risk management policies at all times.

C. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of the changes in market prices. Market prices comprise currency risk, interest rate risk and other price risk (such as equity risk).

In practice, it is rarely the case that a single risk variable will change independently from other risk variable, there is usually interdependencies between risk variables. However the sensitivity analysis disclosed below does not take into account the interdependencies between risk variables.

Foreign currency risk

The Group is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the respective functional currencies of Group entities, primarily USD and Japanese Yen.

The foreign currency sensitivity analysis of the possible change in foreign exchange rates on the Group's profit is performed on significant monetary items denominated in foreign currencies as at the end of the reporting period. The Group's foreign currency risk is mainly related to the volatility in the exchange rates for foreign currency Yen. The information of the sensitivity analysis is as follows:

When USD strengthens/weakens against foreign currency Yen by 10%, the profit for the years ended 31 December 2018 and 2017 decreases/increases by \$3,371,548 and \$3,946,298, respectively; the equity decreases/increases by \$0 and \$0, respectively.

Interest rate risk

Interest rate risk is managed by the Group on an ongoing basis with the primary objective of limiting the extent to which net interest expense could be affected by an adverse movement in interest rates. The Group's has no financial liabilities at fair value through profit or loss bearing fixed interest payable. The Group does not use financial derivatives to hedge against interest rate risk.

The interest rate sensitivity analysis is performed on items exposed to interest rate risk as at the end of the reporting period, including investments and borrowings with variable interest rates and interest rate swaps. At the reporting date, a change of 0.25% of interest rate in a reporting period could cause the profit for the years ended 31 December 2018 and 2017 to increase/decrease by \$4,718,281 and \$4,679,922, respectively; the equity decreases /increases by \$48,752 and \$73,392, respectively.

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

Equity price risk

The fair value of the Group's conversion rights of the Euro-convertible bonds issued are susceptible to market price risk arising from uncertainties about future values of the investment securities. The conversion rights of the Euro-convertible bonds issued are classified as financial liabilities at fair value through profit or loss as it does not satisfy the definition of an equity component. Please refer to Note 12(h) for sensitivity analysis information of other equity instruments or derivatives that are linked to such equity instruments whose fair value measurement is categorized under Level 3.

D. Credit risk management

(a) Financial assets subject to credit risk include cash and cash equivalent and accounts receivable. Cash is deposited in large bank institutions, while accounts receivable are disclosed at net amount after deducting allowance for expected credit losses. Per industry practice, most hire revenue are received in advance. In addition, the Group manages credit risks through reviewing credit rating of individual client and limiting the overall risk. The credit risk of accounts receivable and the credit concentration risk are insignificant.

(b) The risk exposure of credit risk

The book value of financial assets represents the maximum amount of credit risk exposure. On the reported date, the maximum amount of credit risk exposure is as follows:

| | <u>31 December 2018</u> | <u>31 December 2017</u> |
|---|-------------------------|-------------------------|
| Cash and cash equivalents | \$25,940,070 | \$40,856,106 |

G. Fair values of financial instruments

- (a) The methods and assumptions applied in determining the fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following methods and assumptions were used by the Group to measure or disclose the fair values of financial assets and financial liabilities:

WISDOM MARINE LINES CO., LIMITED (CAYMAN) AND ITS SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT'D)

English Translation of Consolidated Financial Statements Originally Issued in Chinese

- (i) The carrying amount of cash and cash equivalents, accounts receivables, held-to-maturity financial assets, accounts payable and other current liabilities approximate their fair value due to their short maturities.
- (ii) Fair value of debt instruments without market quotations, bank loans, bonds payable and other non-current liabilities are determined based on the counterparty prices or valuation method. The valuation method uses DCF method as a basis, and the assumptions such as the interest rate and discount rate are primarily based on relevant information of similar instrument (such as yield curves published by the GreTai Securities Market, average prices for fixed rate commercial paper published by Reuters and credit risk, etc.)
- (iii) The fair value of derivatives which are not options and without market quotations, is determined based on the counterparty prices or discounted cash flow analysis using interest rate yield curve for the contract period. Fair value of option-based derivative financial instruments is obtained using the counterparty prices or appropriate option pricing model (for example, Binomial Tree model) or other valuation method (for example, Monte Carlo Simulation).

(b) Fair value of financial instruments measured at amortized cost

The carrying amount of the Group's financial assets (including held-to-maturity investments, loans and receivables) and liabilities measured at amortized cost approximate their fair value.

(c) Fair value measurement hierarchy for financial instruments

Please refer to Note 12.I for fair value measurement hierarchy for financial instruments of the Group.

H. Derivative financial instruments

The Group's derivative financial instruments include and embedded derivatives. The related information for derivative financial instruments not qualified for hedge accounting and not yet settled as at 31 December 2018 and 2017 is as follows:

Embedded derivatives

The embedded derivatives arising from issuing convertible bonds have been separated from the host contract and carried at fair value through profit or loss. Please refer to Note 6.(13) for further information on this transaction.

The counterparties for the aforementioned derivatives transactions are well known local or overseas banks, as they have sound credit ratings, the credit risk is insignificant.

I. Fair value measurement hierarchy

(a) Fair value measurement hierarchy

All asset and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, based on the lowest level input that is significant to the fair value measurement as a whole. Level 1, 2 and 3 inputs are described as follows:

Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3 – Unobservable inputs for the asset or liability

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization at the end of each reporting period.

(b) Fair value measurement hierarchy of the Group's assets and liabilities

The Group does not have assets that are measured at fair value on a non-recurring basis. Fair value measurement hierarchy of the Group's assets and liabilities measured at fair value on a recurring basis is as follows:

As at 31 December 2018

| | Level 1 | Level 2 | Level 3 | Total |
|---|-----------|-----------|-------------|-------------|
| Financial assets | \$- | \$149,271 | \$- | \$149,271 |

Transfers between Level 1 and Level 2 during the period

During the years ended 31 December 2018 and 2017, there were no transfers between Level 1 and Level 2 fair value measurements.

Reconciliation for fair value measurements in Level 3 of the fair value hierarchy for movements during the period is as follows:

| | Liabilities |
|---|---|
| | At fair value through profit or loss |
| | Derivatives |
| Beginning balances as at 31 December 2017 | \$3,009,409 |

Valuation process used for fair value measurements categorized within Level 3 of the fair value hierarchy

The external evaluation institute ensures the results of the valuation are in line with market conditions, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. The group's accounting department analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies at each reporting date.

J. Significant assets and liabilities denominated in foreign currencies

The Group is mainly affected by the impact of fluctuation in the currency exchange rate for US Dollar or Japanese Yen. The Group's significant exposure to foreign currency risk was as follows:

Note 2: The exchange rates under the monetary items are the spot rate.

For the year ended 31 December 2018 and 2017, the Group had foreign exchange gains (losses) of \$718,695 and \$(1,030,003) respectively.

K. Capital management

The capital risk management is established to ensure the Group's ability to continue to operate as a going concern. Under this risk management, the Group may adjust dividend payment to the shareholders, reduce the capital for redistribution to shareholders, issue new shares, adjust capital expenditure plan and dispose assets to settle any liabilities in order to maintain or adjust capital structure according to operating needs, investment purpose and market environment. The Group's capital structures is consisted of net liabilities (borrowings excluding the amount of cash and cash equivalents) and equity (common stock, capital surplus and other equity).
