BNY MELLON
INVESTMENT MANAGEMENT

BNY MELLON LONG GILT FUND

INSTITUTIONAL SHARES (ACCUMULATION) (ISIN: GB00B01X1269)
A SUB-FUND OF BNY MELLON INVESTMENT FUNDS
THIS FUND IS MANAGED BY BNY MELLON FUND MANAGERS LIMITED

OBJECTIVES AND INVESTMENT POLICY

OBJECTIVE AND POLICY

To maximise returns through investment in securities issued or guaranteed by the UK Government or the Governments of foreign countries or corporate bodies.

The Fund will:

- invest in government bonds that have a payment period of 10 years plus (i.e. long-dated gilts); and
- be actively managed which means the investment manager has discretion over the selection of investments subject to the investment objective and policies disclosed in the Prospectus. The FTSE Actuaries UK Conventional Gilts Over 15 Years Index is used as a comparator against which to measure the performance of the Fund. The portfolio holdings of the Fund will not be limited to components of this Index and the investment manager will use its discretion to invest outside the Index in pursuit of the Fund's investment objective.

The Fund may:

- invest up to 10% in other collective investment schemes; and
- use derivatives (financial instruments whose value is derived from other assets) with the aim of risk or cost reduction or to generate additional capital or income.

Treatment of income: net income from investments will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each working day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 250,000.

RISK AND REWARD PROFILE

Lower risk
Potentially lower reward

Higher risk
Potentially higher reward

1	2	3	4	**5**	6	7

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 5 because its historical value has shown moderately high volatility. With a Fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Geographic Concentration Risk:** The Fund primarily invests in a single market which may have a significant impact on the value of the Fund.
- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
