Risk warning

Values may fall as well as rise and investors may not get back the full amount invested. Income from investments may fluctuate. Income payments may constitute a return of capital in whole or in part. Income may be achieved by foregoing future capital growth. Changes in rates of exchange may have an adverse effect on the value, price or income of investments. The Fund may invest in warrants; small movements in the price of the asset to which the warrant relates may result in a disproportionately large movement in the price of the warrant which may cause volatility.
