IFSL Sinfonia Adventurous Growth Portfolio Class A

A Sub-fund of the IFSL Sinfonia OEIC (ISIN Income: GB00B2R2YT91) (ISIN Accumulation: GB00B2R2YS84)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The Fund aims to increase the value of your investment over a period of at least 5 years. This will be achieved through a combination of capital growth, which is profit on the investments held, and income, which is money paid out of investments through distribution payments and interest on funds held.

The Fund will be actively managed which means the investment manager decides which investments to buy or sell, and when.

At least 70% of the Fund will be invested in other funds with exposure to a range of asset classes across global markets. The asset class exposure is likely to include higher-risk investments such as shares in companies with lower exposure to lower- and medium-risk investments such as bonds and property, resulting in a blend of assets to create a mainly medium to high risk profile.

The Fund may also invest up to 30% directly in shares in companies, bonds (loans typically issued by companies and governments), money market instruments (shorter term loans) and cash.

The Fund may use derivatives (instruments whose returns are linked to another

asset, market or other variable factor), or forward transactions to manage currency exposure (hedging) for efficient portfolio management. Other funds purchased may have the ability to use derivatives to varying degrees.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be managed so it is eligible for inclusion in the IA Mixed Investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- The Fund has exposure to bonds, the prices of which will be impacted by factors

including; changes in interest rates, inflation expectations and perceived credit quality.

- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with higher credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

- The Fund may invest a large part of its assets in other funds for which investment decisions are made independently of the Fund. If these investment managers perform poorly, the value of your investment is likely to be adversely affected. Investment in other Funds may also lead to duplication of fees and commissions.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/03/2020. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 23 - 25 of the Fund's Prospectus, which is available at www.ifslfunds.com.
