**iShares Diversified Commodity Swap UCITS
ETF**

A sub-fund of iShares VI plc

USD (Acc) Share Class

ISIN: IE00BDFL4P12

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Bloomberg Commodity USD Total Return Index, the Fund's benchmark index (Index).
 - ▶ The Index is designed to measure the performance of the return on commodity futures contracts comprised within the Bloomberg Commodity Index (BCOM) combined with the notional value of such futures invested at the most recent weekly auction rate for 3 Month US Treasury Bills. BCOM is designed to be a highly liquid and diversified benchmark for commodities investments, representing energy, agriculture, industrial metals, precious metals and livestock sectors. BCOM is designed to provide broad based exposure to commodities as an asset class, since no single commodity or commodity sector is dominant. BCOM is weighted based on the production of the underlying commodities (i.e. the higher the volume of production of a commodity, the higher the weighting of that commodity in the BCOM) and on the liquidity of the futures contracts on the underlying commodities. With the exception of several metals contracts (i.e. aluminium, lead, tin, nickel and zinc) that trade on the London Metal Exchange and the contract for Brent crude oil, each of the commodities that are available for inclusion in the Index is the subject of at least one futures contract that trades on a US exchange.
 - ▶ The Fund invests in financial derivative instruments (FDIs) and will in particular invest in unfunded total return swaps in order to achieve its investment objective. A swap agreement is typically used to achieve a specified return determined by an underlying such as a return on an index.
 - ▶ The Fund may also invest in equity securities (e.g. shares), fixed income securities (e.g. bonds) and collective investment schemes to meet its payment obligations under the swaps.
 - ▶ The Fund intends to replicate the performance of the Index by gaining an indirect exposure, via FDIs, to the individual constituents of the Index.
 - ▶ Recommendation: This Fund may not be appropriate for short-term investment.
 - ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
 - ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
 - ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.
- For more information on the Fund, Share Class, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- The prices of commodities tend to experience greater variations than other asset classes (e.g. equities or fixed income securities). Investments in commodities are therefore potentially riskier than other types of investments.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements (i.e. counterparty risk) and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. If any swap counterparty fails to provide sufficient assets as security for amounts owed to the Fund, there might be an increased counterparty risk exposure at a given time.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
