

Boost Brent Oil ETC (BRND)

Investment Objective

Boost Brent Oil ETC is a fully collateralised, UCITS eligible ETC. The ETC provides a total return comprised of the performance of the NASDAQ Commodity Brent Crude Oil ER index, which reflects an investment in front-month Brent crude futures, plus the interest revenue earned on the collateralised amount.

For example, if the index rises by 1% over a day, then the ETC will rise by 1%, excluding fees. However if the index falls by 1% over a day, then the ETC will fall by 1%, excluding fees.

Key Features

- Liquid. Trades like an equity on exchange, with multiple authorised participants (APs) and market makers (MMs)
- You cannot lose more than the amount invested
- Simple to trade, no need for futures
- Transparent structure with world class service providers and fully collateralised
- Boost is independent and managed by industry experts

Boost Issuer PLC (the "Issuer") issues products under a Prospectus ("Boost Prospectus") approved by the Central Bank of Ireland, drawn up in accordance with the Directive 2003/71/EC. The Boost Prospectus has been passported to various European jurisdictions including the UK, Italy and Germany and is available on our website.

Boost Exchange Traded Products ("ETPs") are suitable for financially sophisticated investors who wish to take a short-term view on the underlying indices and can understand the risks of investing in products offering daily leveraged or daily short exposures.

An investment in ETPs is dependent on the performance of the underlying index, less costs, but it is not expected to match that performance precisely. ETPs involve numerous risks including among others, general market risks relating to the relevant underlying index, credit risks on the provider of index swaps utilised in the ETP, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks.

The information contained on this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of shares in the United States or any province or territory thereof, where neither the Issuer nor any securities issued by it are authorised or registered for distribution and where no prospectus of the Issuer has been filed with any securities commission or regulatory authority. No document or information on this document should be taken, transmitted or distributed (directly or indirectly) into the United States. Neither the Issuer, nor any securities issued by it, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.

ETPs offering daily leveraged or daily short exposures ("Leveraged ETPs") are products which feature specific risks that prospective investors should understand before investing in them. Higher volatility of the underlying indices and holding periods longer than a day may have an adverse impact on the performance of Leveraged ETPs. As such, Leveraged ETPs are intended for financially sophisticated investors who wish to take a short-term view on the underlying indices and understand the risks of investing in products offering daily leveraged or daily short exposures. Investors should refer to the section entitled "Risk Factors" and "Economic Overview of the ETP Securities" in the Boost Prospectus for further details of these and other risks associated with an investment in Leveraged ETPs and consult their financial advisors as needed. Neither WisdomTree, nor the Issuer has assessed the suitability of any Leveraged ETPs for investors other than the relevant Authorised Participants.
