Morningstar - ★★★

Objective and investment policy

The Fund aims to provide capital growth, with the potential for some income over the long term.

Performance target: To outperform the IA Mixed Investment 20-60% Shares sector average, after the deduction of charges, over any 5 year period.

The Fund invests in Collective Investment Schemes (other funds including those managed by Janus Henderson and Exchange Traded Funds) to provide diversified exposure to a range of assets including shares (equities) of companies, bonds issued by companies and governments, and to a lesser extent, alternative assets such as property, commodities, private equity and hedge funds. The Fund will invest globally while maintaining a core exposure to UK assets.

The Fund is actively managed with reference to the IA Mixed Investment 20-60% Shares sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target and limits the level of exposure the Fund may have to company shares. The investment manager has a high degree of freedom to choose individual investments for the Fund and to vary allocations between asset types within the constraints of the sector.

Additional information

Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk.

What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- Shares can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- The Fund invests in other funds (including exchange traded funds and investment trusts/companies), which may introduce more risky assets, derivative usage and other risks, as well as contributing to a higher level of ongoing charges.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

Important information

Fund size at 12pm on last business day of month. Funds worthy of Square Mile recommendation's may be rated as AAA, AA or A. Square Mile expects any active fund to add value over a corresponding passive strategy where such an option exists and this should be reflected in the fund's objective. This added value is provided by the production of relatively high risk adjusted returns over a suitable time period. When rating funds Square Miles constantly ask themselves whether they would be happy to invest our own money in the funds. The Square Mile A rating is assigned to funds in which they have confidence that the fund over an investment cycle will meet its stated objectives. Ranges that have successfully gone through the RSMR's rigorous and robust methodology will be awarded their Rated Fund Range designation. In giving this rating, RSMR are confirming that their research shows Janus Henderson Investors to have a sound investment process for the fund range, and that their analysis of the performance and risk of the range of funds is in line with their expectations. One of the primary reasons for separating out ranges from the sector funds that form RSMR's usual reviews is to provide a simpler process for advisers and provide analysis and guidance from a more practical perspective. By assessing the core processes against objectives and targets rather than emphasising the peer group, RSMR feel they can identify those fund ranges in a way that advisers can then utilise across a range of clients or risk profiles more effectively and consistently. All the fund ranges that have been awarded a rating will be listed on the RSMR website, where you will also find a factsheet for each range. All this information should enable you to understand the fund ranges that are available, and the key differences between them, meaning you can then determine which, if any, is most suitable for you. † 100% of the Annual Management Charge is taken from capital. * Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. ** Peer group benchmark: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) forms the basis of the Fund's performance target and can be a useful performance comparison against other funds with similar aims. The sector also limits the Fund's exposure to shares of companies (also sometimes referred to as equities) to a range of 20-60%. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Unless otherwise indicated all figures sourced from Morningstar, Datastream, BNP Paribas and Janus Henderson Investors. Please note the views, opinions and forecasts expressed in this document are based on Janus Henderson Investors research, analysis and house views at the time of publication. Third party data is believed to be reliable, but its completeness and accuracy is not guaranteed. Please read all scheme documents before investing. Before entering into an investment agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment adviser. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially than those shown on this document. Nothing in this document is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. Any investment application will be made solely on the basis of the information contained in the Prospectus (including all relevant covering documents), which will contain investment restrictions. This document is intended as a summary only and potential investors must read the prospectus, and where relevant, the key investor information document before investing.
