

ASI UK Income Unconstrained Equity Fund

(From 7 August 2019 the fund name was amended from Standard Life Investments UK Equity Income Unconstrained Fund to ASI UK Income Unconstrained Equity Fund)

Platform 1 Income GBP

31 May 2020

Objective

To generate income and some growth over the long term (5 years or more) by investing in UK equities (company shares).

Performance Target: To exceed both the IA UK Equity Income Sector Average return (after charges) over 1 year and to be top quartile over rolling three year periods together with delivering a yield greater than that of the FTSE All-Share Index over rolling three year periods. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target/comparator for the fund based on the investment policy of the fund and the constituents of the index/sector.

Portfolio securities

- The fund will invest at least 70% in equities and equity related securities of companies listed, incorporated or domiciled in the UK or companies that derive a significant proportion of their revenues or profits from UK operations or have a significant proportion of their assets there.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments), money-market instruments, and cash.

Performance

Cumulative and annualised performance

	1 month	6 months	Year to date	1 year	3 years (p.a.)	5 years (p.a.)
Fund (Net) (%)	-1.18	-23.22	-25.98	-21.42	-8.63	-4.30
Performance target (%)	1.18	-18.03	-21.12	-12.41	-13.67	-1.36
Portfolio constraining benchmark (%)	3.42	-16.06	-18.76	-11.16	-2.87	1.35
Sector Ranking	83/87	70/86	66/86	81/86	77/81	73/74
Quartile	4	4	4	4	4	4

Discrete annual returns - year to 31/5

	2020	2019	2018	2017	2016
Fund (Net) (%)	-21.42	-10.07	7.95	9.27	-3.72
Performance target (%)	-12.41	-5.12	3.88	19.19	-4.14
Portfolio constraining benchmark (%)	-11.16	-3.17	6.53	24.52	-6.31
Sector Ranking	81/86	80/84	11/81	77/77	37/74
Quartile	4	4	1	4	2

Performance Data: Share Class Platform 1 Inc GBP. Source: Aberdeen Standard Investments (Fund & Benchmark) and Morningstar (Sector). Basis: Total Return, NAV to NAV, UK Net/Gross Income Reinvested. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark.

These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

Past performance is not a guide to future returns and future returns are not guaranteed.

Bloomberg	SLUEP11 LN
Domicile	United Kingdom

Risk and reward profile

Lower risk Typically lower rewards Higher risk Typically higher rewards

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- A concentrated portfolio may be more volatile and less liquid than a more broadly diversified one. The funds investments are concentrated in a particular country or sector.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Management process

- The management team use their discretion (active management) to maintain a concentrated asset mix at sector and stock level.
- Their primary focus is on stock selection using research techniques to select individual holdings. The research process is focused on identifying companies where the management team have a different view of a company's prospects to that of the market, and which align with their views regarding future economic and business conditions.
- The combined average yield on assets in the fund is expected to be higher than the broad UK equity market as represented by the FTSE All-Share Index
- In seeking to achieve the Performance Target, the FTSE All-Share is used as a reference point for portfolio construction and as a basis for setting risk constraints. The expected variation ('tracking error') between the returns of the fund and the index, is not ordinarily expected to exceed 10%. Due to the income nature of the management process, the Funds performance profile may deviate significantly from the FTSE All-Share Index.

Top ten holdings (%)

John Laing	6.0
British American Tobacco	5.4
GlaxoSmithKline	3.8
GVC Holdings	3.7
Diversified Gas & Oil	3.5

Derivative usage

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as Efficient Portfolio Management).
- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the funds existing allocations to company shares.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.aberdeenstandard.com The Prospectus also contains a glossary of key terms used in this document.

¹The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.00% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

²The Historic Yield as at 30/04/2020 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. The fund charges 100% of the annual management charge to capital. This has the effect of increasing distributions for the year and constraining the fund's capital performance to an equivalent extent.

³These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

The funds Authorised Corporate Director is Aberdeen Standard Fund Managers Limited.

The fund is a sub-fund of Aberdeen Standard OEIC V, an authorised open-ended investment company (OEIC).

The information contained in this document should not be considered as an offer, solicitation or investment recommendation to deal in the shares of any securities or financial instruments. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to: <http://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf>

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not be sustained in future and is no indication of future performance. For detailed information about the Morningstar Analyst Rating for Funds, please visit <http://global.morningstar.com/>
