RISK AND REWARD PROFILE

The Risk and Reward profile demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data (the past 5 years), may change over time and may not be a reliable indication of the future risk profile of the Fund.

The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

Past performance is not a reliable guide to future performance. The lowest category does not mean risk free.

INVESTING IN THE FUND CARRIES THE FOLLOWING MAIN RISKS:

Currency risk: The Fund invests in overseas assets, denominated in currencies other than Sterling. Changes in exchange rates may have a negative impact on the value of your investment.

Default risk: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Emerging Markets risk: The Fund may invest in emerging markets which can involve a higher element of risk due to less well regulated markets and the potential for political and economic instability.

Focus risk: The Fund's value may fall where it has concentrated exposure to an issuer or type of security that is heavily affected by an adverse event.

Funds of funds – Liquidity risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

Investment risk: The Fund invests in equities and bonds globally. Share prices can rise or fall due to a number of factors affecting global stock markets.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Prospectus.
