SIXTIETH RESOLUTION

The shareholders' meeting confers full powers on the bearer of a copy of or extract of the various documents submitted to the present meeting and of the minutes of the said meeting in order to carry out all formalities required by law.

Statutory auditor's report

STATUTORY AUDITOR'S REPORT ON THE FINANCIAL STATEMENTS For the year ended 31 October 2018

SICAV MULTI UNITS FRANCE

UCITS ESTABLISHED IN THE FORM OF A VARIABLE CAPITAL
INVESTMENT COMPANY WITH COMPARTMENTS

Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management Company

LYXOR INTERNATIONAL ASSET MANAGEMENT

17, cours Valmy

75886 PARIS CEDEX 18

Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of MULTI UNITS FRANCE Mutual Fund (SICAV), a UCITS established in the form of a variable capital investment company with compartments, for the year ended 31 October 2018.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the UCITS established in the form of a variable capital investment company with compartments at 31 October 2018 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our responsibilities under these standards are described in the section “*Statutory Auditor’s responsibilities for the audit of the financial statements*” in this report.

Independence

We conducted our audit engagement in accordance with the applicable rules on independence, from 1 November 2017 and up to the date of this report, and in particular we did not provide any non-audit services prohibited under Article 5, paragraph 1 of Regulation (EU) No. 537/2014 or by the auditors' professional code of ethics.

SICAV MULTI UNITS FRANCE

Justification of our assessments - Key audit matters

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the key matters as regards to the risk of material misstatement that, in our professional judgement, were the most significant for the audit of the financial statements and our responses to these risks.

These assessments were made as part of our audit of the financial statements, taken as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

Key audit matters	Audit response to cover these risks
<p>The main risks of the fund relate to the financial instruments in its portfolio.</p> <p>Any error in valuing or recording these financial instruments could lead to a misstatement in the calculation of the CIU's net asset value and in the financial statements.</p> <p>We therefore focused our work on the valuation and existence of the financial instruments in the portfolio.</p> <p>Valuation of financial instruments traded on a regulated or equivalent market</p> <p>Valuation of the CIU's financial instruments traded on a regulated or equivalent market is not complex as it is based primarily on listed prices provided by independent sources.</p> <p>However, the related amounts are significant and could lead to a material misstatement.</p> <p>The value of the financial instruments traded on a regulated or equivalent market is recorded in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We compared the year-end valuation of the CIU's financial instruments traded on a regulated or equivalent market with observable prices obtained from market databases.</p>

SICAV MULTI UNITS FRANCE

<p>Valuation of financial contracts traded over the counter</p> <p>As part of its investment strategy, the CIU uses over-the-counter swaps. The valuation of these swaps is not observable on a regulated or equivalent market. The valuation of over-the-counter swaps is therefore a key audit matter.</p> <p>The value of the swap is recorded under the line item "financial contracts" in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The commitment related to the swap is presented in the off-balance sheet statement. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We verified that the swap's valuation as recorded at year-end agreed to the value communicated by the counterparty to the swap.</p> <p>We gained an understanding of the internal control procedure performed by the management company over swaps valuation. We verified that this procedure had been applied at year-end.</p>
<p>Existence of financial instruments</p> <p>The portfolio's financial instruments are held in custody or maintained by the CIU's depository. The depository certifies the existence of financial instruments at year-end.</p> <p>There is nonetheless a risk that these financial instruments could be inaccurately or only partially recorded in the CIU's accounting.</p> <p>The existence of these financial instruments is a key audit matter as the related amounts are material and could lead to a material misstatement.</p>	<p>We verified the existence of the portfolio's financial instruments by reviewing the fund's reconciliation between the CIU's financial instruments held at year-end and these identified by the depository in an account opened in the fund's name. Any material differences were examined, if applicable using trade tickets or contracts.</p>

Verification of the management report and other documents addressed to unit-holders

In accordance with professional standards applicable in France, we have also performed the specific verifications required by French law.

Information given in the management report and in other documents addressed to shareholders on the financial situation and annual accounts

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report, and in the documents addressed to the unit-holders with respect to the financial position and the financial statements.

SICAV MULTI UNITS FRANCE

Corporate governance report

We certify the existence, in the corporate governance report, of the information required by Article L. 225-37-4 of the French Commercial Code.

Disclosures arising from other legal and regulatory requirements

Appointment of the Statutory Auditors

We were appointed as Statutory Auditor of MULTI UNITS FRANCE Mutual Fund (SICAV), a UCITS established in the form of a variable capital investment company with compartments, by the management company on 23 October 2013.

At 31 October 2018, our firm was in the fifth consecutive year of its engagement, i.e. the fifth year following the admission of the CIU's securities for trading on a regulated market.

Responsibilities of management and those charged with governance for the financial statements

It is the management company's responsibility to prepare the CIU's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the CIU's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the CIU or to cease operations.

It is the management company's responsibility to monitor the preparation of financial information and oversee the efficiency of the internal control and risk management system and the internal audit system relating to the preparation and processing of financial and accounting information.

These financial statements have been prepared by the management company.

Statutory Auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

SICAV MULTI UNITS FRANCE

As indicated in article L.823-10-1 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

As part of an audit conducted in accordance with professional standards applicable in France, the Statutory Auditor uses professional judgement throughout the entire audit.

He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the CIU's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Taking into account the time required for completing our work, this report is signed as of the date of the electronic signature.

Statutory auditor's special report

**STATUTORY AUDITOR'S SPECIAL REPORT
ON THE REGULATED AGREEMENTS
General meeting for the approval of the financial statements
for the fiscal year ending on 31 October 2018**

SICAV MULTI UNITS FRANCE
UCITS ESTABLISHED IN THE FORM OF A VARIABLE CAPITAL
INVESTMENT COMPANY WITH COMPARTMENTS
Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management Company
LYXOR INTERNATIONAL ASSET MANAGEMENT
17, cours de Valmy
92800 PUTEAUX

To the Shareholders,

In our capacity as statutory auditor for your company, we present to you our report on the regulated agreements.

It is our responsibility to provide you, on the basis of the information given to us, with the characteristics and material provisions of the agreements of which we have been informed or that we may have discovered during our mission, without having to express an opinion as to their usefulness or merit or to seek out the existence of other agreements. It is up to you, according to the terms of article R.225-31 of the French Commercial code, to assess the importance of signing these contracts with a view to approving them.

It is also our responsibility, where applicable, to further provide you with the information indicated in article R.225-31 of the French Commercial code relative to the performance, during the elapsed fiscal year, of agreements already approved by the general meeting.

We have implemented the due diligence reviews that we considered necessary in view of the professional doctrine of the Compagnie nationale des commissaires aux comptes (the French National Society of Statutory Auditors) relative to this mission.

AGREEMENTS SUBMITTED FOR THE APPROVAL OF THE GENERAL MEETING

We hereby inform you that we have not been made aware of any authorised agreement during the elapsed fiscal year that would require the approval of the general meeting in application of the provisions of article L. 225-38 of the French Commercial code.

AGREEMENTS ALREADY APPROVED BY THE GENERAL MEETING

We hereby inform you that we have not been made aware of any agreement already approved by the general meeting performance of which continued during the elapsed fiscal year.

Neuilly sur Seine, 28 February 2019

Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

The aggregation of the annual accounts is presented in euros.

The income statement presented only takes into account Compartments that are active at the balance sheet date.

The Compartments in the GBP currency have been converted to euros at the rate applicable on 31 October 2018 (WMC Reuters).

The Compartments in the USD currency have been converted to euros at the rate applicable on 31 October 2018 (WMC Reuters).

On 31 October 2018, the Multi Units France mutual fund was made up of 55 Compartments:

- Compartment No. 1: LYXOR BEL 20 TR (DR) UCITS ETF
- Compartment No. 2: LYXOR FTSE ALL SHARE UCITS ETF
- Compartment No. 3: LYXOR FTSE 250 UCITS ETF
- Compartment No. 4: Lyxor BTP Daily (2x) Leveraged UCITS ETF

annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BEL 20 TR (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BEL 20 TR (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities from eurozone countries.

At least 60% of the LYXOR BEL 20 TR (DR) UCITS ETF Compartment (hereinafter the “Compartment”) is permanently exposed in one or several markets of equities that have been issued in one or several eurozone countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to reproduce the evolution of the Bel 20 NRTM index (the “Benchmark Indicator”), listed in euros, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.20%.

Benchmark indicator:

The Benchmark Indicator is the Bel 20TM NR (Net Return) index (net dividends reinvested).

The Benchmark Indicator is a basket index disseminated in real-time, which monitors the continuous evolution of the prices of the 20 most liquid Belgian equities. The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the “free float” while using the FTSE free float system. The Benchmark Indicator is continuously disseminated in real-time, but the official closing index is only disseminated after 5:40 p.m.

The monitored performance is that of the index closing prices.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components will be available at the following Internet site: <https://www.euronext.com>

Benchmark indicator revision and composition:

The Benchmark indicator is revised annually.

The exact composition and the Euronext’s revision rules of the Benchmark indicator are available on the Internet site: <https://www.euronext.com>. The above-mentioned rebalancing frequency has no impact on the costs within the framework of the implementation of the Investment strategy.

Benchmark indicator publication:

The Benchmark Indicator is available in real time via Reuters and Bloomberg. Reuters code: .BFXP

Bloomberg code: BELPRX

The Benchmark Indicator’s closing price is available on the Internet site: <https://www.euronext.com>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Euronext administrator of the Bel 20 NR™ benchmark index has until 01.01.2020 to apply for authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the management company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its financial manager by delegation, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument ("FFI"). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of balance sheet assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's internet site at www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009. The Compartment will be mainly invested in securities making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy.

Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment. Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the “Agent”) to provide the following services in connection with the Compartment’s temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment’s behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment’s behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment’s management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment’s gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment’s annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment’s overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment’s annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment’s counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Contracts constituting financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter and in the context of temporary acquisitions and sales of securities, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;

- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

Counterparty risk

Subsidiarily the Compartment may have recourse to FFI.

In such hypothesis, the Compartment will be exposed to the risk of bankruptcy, the risk of payment default or any other default of any counterparty with which it has entered into a contract or a transaction. It will be in particular exposed to the counterparty risk resulting from its use of FFI traded over-the-counter. In compliance with UCITS regulations, the counterparty risk cannot exceed 10% of the total value of the Compartment's assets per counterparty.

When Société Générale is involved as a counterparty of the FFI and/or with respect to all temporary securities sales operations, conflicts of interest can arise between the Compartment's Management Company and the counterparty. The Management Company manages these conflicts of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

Risk of concentration

The Compartment reproduces the performance of the Benchmark Indicator concentrated on a limited number of underlying securities. The exposure to such a low-diversified Benchmark Indicator may lead to a volatility higher than that of a more diversified index as well as a higher liquidity risk in the case of deterioration of the liquidity or a suspension of listing of one or more components of the Benchmark Indicator.

Risk linked to recourse to derivative instruments

The Compartment may have recourse to FFI traded over-the-counter or listed FFI that notably can take the form of future exchange contracts. The recourse to FFI may involve a series of risks, at the level of the FFI and especially the following risks: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk linked to the tax regime, risk linked to the regulations, operational risk and liquidity risk. These risks may affect directly a FFI and may lead to an adjustment or to the early termination of the FFI transaction which may possibly affect the net asset value of the Compartment.

Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and financial futures. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework.

Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Currency risk linked to the Compartment listing

The Compartment may be listed on certain markets of multilateral trading facilities in a currency other than that of the Benchmark Indicator. Investors buying the Compartment in a currency other than that of the Benchmark Indicator are exposed to currency risk. Therefore, the value of the investment made in a currency other than that of the Benchmark Indicator may be reduced in spite of an increase of the value of the benchmark Indicator, due to exchange rate fluctuations.

Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Belgian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

Base currency: EUR.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of BEL20 Private Return index EUR (Ticker: BELPRX).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BEL 20 TR (DR) UCITS ETF - Dist	FR0000021842	EUR	-13.78% ⁽¹⁾	-13.54%		141.10%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.1639% for the sub-fund. The Tracking Error target for the year was 0.2%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on [Lyxor website](http://Lyxor.com).

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag 0%
Orange Flag 23%
Yellow Flag 17%
Green Flag 60%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	98%
439	450	233	Scope 1 reported (vs estimated)	99%
			Scope2 reported (vs estimated)	91%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	12%
Thermal Coal	0%
Natural Gas	12%
Oil	12%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0020
Oil (MMBOE)	0.0005

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	232.6
Gas	655.3
Total	887.8

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	887.8

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	12.4%	6.4%	7.7%
Some efforts	59.3%	69.1%	49.7%
Limited efforts/Information	13.1%	12.1%	12.4%
No effort/No evidence	15.3%	12.5%	30.2%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	21%
20-49.9%	0%
50-100%	7%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	26.2%
Energy Efficiency	26.2%
Green Building	1.9%
Pollution Prevention	13.8%
Sustainable Water	6.4%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.8%
Energy Efficiency	0.9%
Green Building	0.1%
Pollution Prevention	5.8%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	10.95

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	3,674,645.17	-	-	-	-
% of assets under management	10.95	-	-	-	-

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians		1
1	Name	SOCIETE GENERALE
	Amount	4,200,757.88

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU may use techniques for efficient management of portfolios, in compliance with the provisions of article R214-18 of the [French] Monetary and Financial Code, and in particular, temporary sales of securities.

- Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the CIU.

- Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the CIU.

The revenues generated by the securities lending transactions (from which direct and indirect operational costs borne by the Agent and, as the case may be, by the management company, must be deducted) must be paid to the CIU in question. Insofar as these indirect or direct costs do not increase the operating costs of the CIU, they were excluded from current expenses.

7.1. Earnings

	Securities lending	Securities borrowing	Repo operations	Reverse repo operations	TRS
CIU (absolute value)	29,261.37	-	-	-	-
CIU (% of total earnings)	65.00	-	-	-	-

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.50% per year

Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	2,159,616.23	-	-	-
Debts	-	-	-	-
Financial accounts	43.70	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	6,577.14
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	6,577.14
-	-
-	-
-	-
-	-
Other operations	-
Debts	15,475.26
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Account payable	15,238.71
Miscellaneous debtors and creditors	236.55
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	59,500	3,301,888.76	168,638	10,087,399.57
Subscription / redemption commission		2,309.71		4,036.57
Remittances		-		-
Commissions acquired by the Compartment		2,309.71		4,036.57

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.50
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	-

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	33,548,411.56	46,985,650.69	42,548,753.25	42,132,739.17	37,708,609.65
Number of outstanding equities	646,374	755,512	793,346	790,646	825,409
Net asset value	51.9024	62.1904	53.632	53.289	45.6847
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	1.87	1.91	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-0.25	10.37	-1,96	6.96	9.15

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 31 July 2002.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR FTSE ALL SHARE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR FTSE ALL SHARE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of European Union Countries.

At least 60% of the LYXOR FTSE ALL SHARE UCITS ETF Compartment ("the Compartment") is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution.

The Board of directors will take all necessary measures to be eligible for the "Distributing Status" (section 760 ICTA) in the United Kingdom. The Compartment will distribute at least 85% of its earnings (including the "UK equivalent profits") and will ask the HMRC for "Distributing Status" (status as a distributor).

Management objective:

The Compartment's management objective is reproduce the evolution of the FTSE ALL SHARE™ index (the "Benchmark Indicator") listed in pounds sterling (GBP), regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.06%.

Benchmark indicator:

The Benchmark Indicator is the FTSE ALL SHARE™ Gross Total Return index (gross dividends reinvested).

The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

The Benchmark Indicator monitors the continuous evolution of the equity prices of the main companies in the United Kingdom listed on the London Stock Exchange (LSE).

The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the "free float" while using the FTSE free float system. Consequently, the number of securities included in the composition of the basket comprising the Benchmark Indicator may change over time. No component may represent more than 15% of the Benchmark Indicator.

The composition of the Benchmark Indicator is reviewed each year, using the FTSE methodology.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftse.com.

The Benchmark Indicator is calculated and published in real-time by the company FTSE.

The monitored performance is that of the Benchmark Indicator closing prices.

Benchmark indicator revision and composition

The Benchmark Indicator is designed to represent over 98% of the total market capitalisation of the UK market.

The FTSE methodology and calculation method are based on a variable number of companies in the Benchmark Indicator.

The Benchmark Indicator is revised quarterly.

The exact composition and the revision rules of the Benchmark Indicator published by Euronext are available on the Internet site: www.ftse.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Bloomberg code: FTPPTALL

Reuters code: .TFTAS

The Benchmark Indicator's closing price is available on the FTSE Internet site: www.ftse.com.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the FTSE International Limited director of the FTSE ALL SHARE™ benchmark index is registered in the register directors and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the management company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Non-cash collateral will not be sold, reinvested or pledged.

At the manager's discretion, cash collateral may either be:

- (i) Deposited in an authorised institution
- (ii) Invested in high-quality government bonds
- (iii) Used for reverse repurchase transactions, provided that these are entered into with credit institutions that are subject to prudential supervision and that the UCITS is able to withdraw the total amount of its cash collateral and the accrued interest at any time.
- (iv) Invested in short-term money market funds that meet the guidelines for a common EU definition of money market funds.

The reinvestment of cash collateral must meet the diversification requirements that apply to non-cash collateral.

Counterparty selection policy

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the index, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator’s components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator’s performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities markets of United Kingdom.

The amount that it is reasonable to invest in this Compartment depends on each investor’s personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of FTSE UK Series FTSE All Share GBP (Ticker: FTPTTALL).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
LYXOR FTSE ALL SHARE UCITS ETF	FR0010438150	GBP	-1.75% ⁽¹⁾	-1.47%		71.53%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

The Tracking Error is 0.0164% for the sub-fund. The Tracking Error target for the year was 0.06%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	93%
148	163	146	Scope 1 reported (vs estimated)	98%
			Scope2 reported (vs estimated)	98%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	23%
Thermal Coal	6%
Natural Gas	18%
Oil	19%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	1 363
Gas (MMBOE)	0.0051
Oil (MMBOE)	0.0054

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	2 482.8
Thermal Coal	2 490.4
Oil	2 340.0
Gas	1 064.1
Total	8 977.3

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M invested	
Thermal Coal	2 490.4
Oil Sands	187.6
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	2 677.9
Other	6 299.3

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	18.1%	13.2%	12.9%
Some efforts	69.7%	83.5%	66.3%
Limited efforts/information	2.5%	2.0%	7.9%
No effort/no evidence	9.7%	1.3%	12.7%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	19%
20-49.9%	2%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	20.6%
Energy Efficiency	7.6%
Green Building	3.1%
Pollution Prevention	1.6%
Sustainable Water	3.2%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.3%
Energy Efficiency	0.3%
Green Building	0.6%
Pollution Prevention	0.5%
Sustainable Water	0.2%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	7,620,847.28
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	171,806.34

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.40% per year

appendix

Accounting currency

The Compartment's accounting is carried out in pounds sterling (GBP).

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution.

The Board of directors will take all necessary measures to be eligible for the "Distributing Status" (section 760 ICTA) in the United Kingdom. The Compartment will distribute at least 85% of its earnings (including the "UK equivalent profits") and will ask the HMRC for "Distributing Status" (status as a distributor).

LYXOR UCITS ETF FTSE ALL SHARE in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE International Limited (hereinafter "FTSE"), London Stock Exchange Plc, The Financial Times Limited or Euronext N.V. or its subsidiaries (hereinafter "NYSE Euronext") (hereinafter collectively referred to as the "Holders").

The Holders grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the FTSE ALL SHARE™ index (hereinafter the "Index") and/or relative to the level at which the said Index may be at any given moment or day, or of any other type.

The index is calculated by or in the name of FTSE or NYSE Euronext. The Holders will not be liable (whether on the basis of negligence or any other basis) for any error affecting the Index with regard to any party, and they will have no obligation to inform anyone of any possible error affecting the index.

"FTSE™", "FT-SE®" and "Footsie®" are trademarks of the London Stock Exchange Plc and of The Financial Times Limited; they are used under licence by FTSE International Limited (hereinafter "FTSE"). "Eurofirst" is a trademark jointly owned by FTSE and Euronext N.V.

2. Evolution of the net assets

	31.10.2018	31.10.2017
Currency	GBP	GBP
Net assets at the start of the fiscal year	8,911,037.51	12,276,351.10

Treasury Bonds	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by non-financial issuers	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by bank issuers	-	-
Negotiable EUropean Medium Term Note (NEU MTN)	-	-
Other instruments	-	-

3.1.3 Breakdown of the "Sale operations on financial instruments" item by instrument type

	Securities received in pension sold	Securities borrowed sold	Securities acquired with redemption right sold	Short sales
Equities	-	-	-	-
Bonds	-	-	-	-
Debt securities	-	-	-	-
Other investments	-	-	-	-

LYXOR FTSE ALL SHARE UCITS ETF
(compartment of the Multi Units France Sicav)

3.1.4 Breakdown of the off-balance sheet headings by market type (notably rates, equities)

	Rate	Equities	Exchange	Other
Hedging operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-
Other operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	4,771,536.35
Other commitments	-	-	-	-

3.2 Breakdown by rate types of the asset, liability and off-balance sheet items

	Fixed rate	Variable rate	Revisable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	0.14
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0.14	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	USD	EUR	JPY	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	2,999,258.11	2,429,484.23	1,198,879.28	1,058,530.40
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	98,542.77	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	212,572.69
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	184,704.88
Account receivable	27,867.81
-	-
-	-
-	-
Other operations	-
Debts	215,340.74
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	111,454.51
Account payable	101,118.18
Accrued expenses	2,768.05
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	-	-	215,800	1,126,950.76
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the CIU		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.40
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	36,005.94

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	-	-	-	-

	31.10.2018	31.10.2017
Allocation of the earnings	GBP	GBP
Sums still to be allocated		
Carried forward	-	-
Earnings	-31,434.50	-33,862.75
Total	-31,434.50	-33,862.75
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	-31,434.50	-33,862.75
Total	-31,434.50	-33,862.75
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	-	-

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	-	-

	31.10.2018	31.10.2017
Allocation of the net capital gains and losses	GBP	GBP
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	450,742.46	1,869,030.42
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	450,742.46	1,869,030.42
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	450,742.46	1,869,030.42
Total	450,742.46	1,869,030.42
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency GBP	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	7,620,847.28	8,911,037.51	12,276,351.10	20,912,231.90	17,894,570.36
Number of outstanding equities	1,450,315	1,666,115	2,595,015	4,945,615	4,344,431
Net asset value	5.2546	5.3483	4.7307	4.2284	4.1189
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	0.28	1.10	-0.09	0.13	0.28

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 3 April 2007.

4. Inventory as of 31.10.2018

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR FTSE 250 UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR FTSE 250 UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of European Union Countries.

At least 60% of the LYXOR FTSE 250 UCITS ETF Compartment (“the Compartment”) is continuously exposed in one or several markets of equities issued in one or several European Union countries including any eurozone markets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The management company reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is an exposure to the United Kingdom equities market by reproducing the evolution of the FTSE 250TM index (the “Benchmark Indicator”), listed in pounds sterling (GBP), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator:

The Benchmark Indicator is the FTSE 250TM Gross Total Return index (gross dividends reinvested).

The Benchmark Indicator is an equities index calculated, maintained and published by the supplier of international indices, FTSE.

The Benchmark Indicator monitors the continuous evolution of the equity prices of the main companies in the United Kingdom listed on the London Stock Exchange (LSE) which are not already included in the FTSE 100TM index.

The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the “free float” while using the FTSE free float system. No component may represent more than 15% of the index.

The FTSE methodology and its calculation method entail the index being made up of a fixed number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components will be available on the Internet site: www.ftse.com.

The monitored performance is that of the Benchmark Indicator closing prices in GBP.

Benchmark indicator revision and composition

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by FTSE and available on the Internet site: www.ftse.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .TFTMC

Bloomberg code: FTPTT250

The Benchmark Indicator's closing price is available on the Internet site: www.ftse.com.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the FTSE International Limited director of the FTSE ALL SHARE™ benchmark index is registered in the register directors and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the management company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the European equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities markets of United Kingdom.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 February 2007.*
- *Compartment creation date: 3 April 2007.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of FTSE UK Series FTSE 250 TR GBP (Ticker: FTPTT250).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
LYXOR FTSE 250 UCITS ETF	FR0010438135	GBP	-4.33% ⁽¹⁾	-3.98%		111.86%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

The Tracking Error is 0.0194% for the sub-fund. The Tracking Error target for the year was 0.05%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

LYXOR FTSE 250 UCITS ETF
(compartment of the Multi Units France Sicav)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	0%
Orange Flag	3%
Yellow Flag	8%
Green Flag	87%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	77%
109	170	174	Scope 1 reported (vs estimated)	99%
			Scope2 reported (vs estimated)	92%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	3%
Thermal Coal	0%
Natural Gas	3%
Oil	3%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0003
Oil (MMBOE)	0.0007

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	297.6
Gas	84.3
Total	381.9

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	381.9

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.6%	0.6%	3.5%
Some efforts	44.5%	81.7%	42.6%
Limited efforts/Information	6.3%	11.2%	1.5%
No effort/No evidence	48.0%	6.5%	51.3%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	19%
20-49.9%	5%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	10.6%
Energy Efficiency	16.3%
Green Building	9.6%
Pollution Prevention	3.2%
Sustainable Water	8.3%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.7%
Energy Efficiency	0.9%
Green Building	1.8%
Pollution Prevention	0.8%
Sustainable Water	0.4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	8,183,046.11
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	268,168.00

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.35% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in pounds sterling (GBP).

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The management company reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency GBP	31.10.2018	31.10.2017	30.10.2015	31.10.2014	31.10.2013
Net assets	8,183,046.11	9,329,196.31	7,808,160.72	10,569,224.07	9,661,340.84
Number of outstanding equities	347,508	379,008	374,708	532,308	549,708
Net asset value	23.5477	24.6147	20.8379	19.8554	17.5754
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-1.53	5.35	-0.92	1.19	2.38

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 3 April 2007.

annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BTP DAILY (2X) LEVERAGED is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor BTP Daily (2x) Leveraged UCITS ETF Compartment (hereafter the “Compartment”) is continuously exposed to rate securities listed in euros.

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be exposed, upwards or downwards, with a daily x2 leverage, to the performance of the Italian government bonds market while reproducing the evolution of the SGI daily leveraged BTP strategy index (the “Benchmark Indicator”) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor’s.

The Benchmark Indicator provides an exposure to the increase or decrease of the market evolution for Italian government bonds, for which the Long-Term Euro-BTP futures are a representative indicator, with a daily x2 leverage. As such, should the Long-Term Euro-BTP futures rise on a given market day, the Compartment’s net asset value will increase twofold on that same market day and, should the Long-Term Euro-BTP futures fall on a given market day, the Compartment’s net asset value will decrease twofold on that same market day.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the daily performance of the Long-Term Euro-BTP futures, plus interest (EONIA) collected each day on the valuation of the previous evening’s 5:40 p.m. fixing of the Long-Term Euro-BTP futures.

It is therefore an index that represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the Benchmark Indicator drops by more than 40% during a market day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator's calculation methodology is not based on a direct investment to the BTP obligations, but is rather based on an indirect investment via futures contracts, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark indicator revision and composition:

The Benchmark Indicator is calculated each day, using the official closing fixing of the Long-Term Euro-BTP future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SGIXDLBT

Bloomberg code: SGIXDLBT

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the S&P Dow Jones director of the SGI daily leveraged BTP benchmark index has until 01.01.2020 to request approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Interest rate sensitivity range within which the UCITS is managed:	Between 14 and 22
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The investment in the assets of undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

- o Senior debt,
- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS):

100% of the assets under management.

- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS):

up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged.

The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value.

The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying BTP futures at the Benchmark Indicator. For example, if the underlying BTP futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying BTP futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying BTP futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Negative scenario 1: Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	10%	100	20%	100	x2
day 2	-11%	110	-22%	120	x2
		97.9		93.6	
Whole period	-2.10%		-6.40%		x3.05

Negative scenario 2: Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	-5%	100	-10%	100	x2
day 2	6%	95	12%	90	x2
		100.7		100.8	
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3: Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	20%	100	40%	100	x2
day 2	-16%	120	-32%	140	x2
		100.8		95.2	
Whole period	0.80%		-4.80%		x-6

- Risk that the Compartment's management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company.

The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of bonds may be affected.

Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of bonds.

Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator. When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the Italian State.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with a daily amplifying x2 leverage, upward or downward, to the Italian government bonds market while reproducing the evolution of the Benchmark Indicator. The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 6 April 2011.*
- *Compartment creation date: 27 April 2011.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of SGI Daily Leveraged BTP EUR (Ticker: SGIXDLBT).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BTP Daily (2x) Leveraged UCITS ETF - Acc	FR0011023639	EUR	-16.60% ⁽¹⁾	-16.11%		141.92%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

The Tracking Error is 0.0039% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaitre/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	18,120,054.29
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

	Securities lending	Securities borrowing	Repo operations	Reverse repo operations	TRS
Tripartite	-	-	-	-	-
Central counterparty	-	-	-	-	-
Bilateral	-	-	-	-	18,120,054.29

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	541,907.51

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.40% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	1,065,841.78
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlements sales	908,614.57
Account receivable	157,197.92
Coupons receivable	29.29
-	-
-	-
Other operations	-
Debts	1,072,282.68
Future currency exchange operations:	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	666,200.11
Account payable	399,612.38
Accrued expenses	6,470.19
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	75,000	19,595,972.50	45,000	11,866,634.00
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.40
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	398,126.19

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	18,120,054.29	13,023,967.59	13,780,531.73	18,401,644.45	11,915,550.23
Number of outstanding equities	74,900	44,900	51,900	71,900	55,300
Net asset value	241.9232	290.066	265.5208	255.9338	215.471
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-46.94	17.29	13.23	43.30	58.78

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

rapport

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France mutual fund)

Compartments / feeder	LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor Bund Daily (2x) Leveraged UCITS ETF Compartment (hereafter the “Compartment”) is continuously exposed to rate securities listed in euros.

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type strategy index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be exposed with a daily x2 leverage, upwards or downwards, to the performance of the German government bonds market with an average maturity of 10 years while reproducing the evolution of the SGI Daily Leveraged Bund strategy index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the SGI Daily Leveraged Bund index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the SGI Daily Leveraged Bund index.

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor’s.

The Benchmark Indicator provides an exposure to the increase or decrease of the market evolution for German government bonds with an average maturity of 10 years, for which the Bund future are a representative indicator, with a daily x2 leverage. As such, should the Bund future rise on a given market day, the Compartment’s net asset value will increase twofold on that same market day and, should the Bund future fall on a given market day, the Compartment’s net asset value will decrease twofold on that same market day.

The Bund future is a representative indicator of the market for German government bonds, with the average maturity of 10 years. The Bund futures are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the daily performance of the Bund future, plus interest (EONIA) collected each day on the valuation of the previous evening’s 5:40 p.m. fixing of the Bund future.

It is therefore an index that represents a long selling strategy with an amplifying x2 leverage on the Bund future, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a market day (i.e. if the intraday decline of the Bund future, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator's calculation methodology is not based on a direct investment to the Bund obligations, but is rather based on an indirect investment via futures contracts, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark indicator revision and composition

The Benchmark Indicator's revision depends on that of the Bund.

More information on the index's construction methodology is available on the Internet at: www.sgindex.fr

Benchmark indicator publication

The Benchmark Indicator is calculated each day, using the official closing fixing of the Bund future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SGIXDLBU

Bloomberg code: SGIXDLBU

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the S&P Dow Jones director of the SGI Daily Leveraged Bund benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the German government bonds market with an average maturity of 10 years for which the Benchmark Indicator is a representative indicator.

The financial securities held as assets by the Compartment will mainly be securities that made up the Benchmark Indicator as well as other international equities of all economic sectors, listed on all markets, including small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by a non-member State of the OECD. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The aforementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the UCITS is managed:	Between 14 and 22
Currencies in which securities held by the Compartment are listed:	Euro: up to 100% of net assets Others: up to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : up to 100% of net assets Emerging countries: 0% of net assets

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The aforementioned securities will be bonds chosen on the basis of criteria:

1) Of eligibility, in particular:

- Senior debt,
- Fixed maturity,
- Maximum residual maturity,
- Minimum issuing amount,
- Requirement of a minimal threshold in S&P rating or equivalent.

2) Of diversification, in particular:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in the assets of undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the securities held as assets by the Compartment (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment’s assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying Bund futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying Bund futures at the Benchmark Indicator.

For example, if the underlying Bund futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the ETF will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying Bund futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying Bund futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France mutual fund)

Negative scenario 1: Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	10%	100	20%	100	x2
day 2	-11%	110	-22%	120	x2
		97.9		93.6	
Whole period	-2.10%		-6.40%		x3.05

Negative scenario 2: Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	-5%	100	-10%	100	x2
day 2	6%	95	12%	90	x2
		100.7		100.8	
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3: Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	20%	100	40%	100	x2
day 2	-16%	120	-32%	140	x2
		100.8		95.2	
Whole period	0.80%		-4.80%		x-6

- Risk that the management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the financial manager by delegation and the FFI's counterparty. The financial manager by delegation manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the index, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the German State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the German State.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with an amplifying x2 leverage, upward or downward, to the German state bonds market with an average maturity of 10 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.
The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of SGI Daily Leveraged Bund EUR (Ticker: SGIXDLBU).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Bund Daily (2x) Leveraged UCITS ETF - Acc	FR0011023654	EUR	3.10% ⁽¹⁾	3.50%		141.58%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

The Tracking Error is 0.0034% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaitre/mentions-reglementaires/>

(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	22,467,270.58
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

1	Name	ITALIAN STATE
	Amount	393,590.88
2	Name	DEUTSCHE POST
	Amount	139,502.78

Tripartite	-	-	-	-	-
Central counterparty	-	-	-	-	-
Bilateral	-	-	-	-	22,467,270.58

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	673,908.31

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.20% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

appendix

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Net asset value	241,5835	234.3201	226.6762	203.3137	183.7495
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	8.40	-2.35	23.16	22.33	29.91

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BTP DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BTP DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the Italian government bonds market while reproducing the evolution of the SGI daily double short BTP strategy index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the SGI daily double short BTP strategy index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is the SGI Daily Double Short BTP strategy index.

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor’s.

The Benchmark Indicator provides an inverse exposure to the increase or decrease of the market evolution for Italian government bonds, for which the Long-Term Euro-BTP futures are a representative indicator, with a daily x2 leverage. As such, should the Long-Term Euro-BTP futures fall on a given market day, the Compartment’s net asset value will increase twofold on that same market day and, should the Long-Term Euro-BTP futures rise on a given market day, the Compartment’s net asset value will decrease twofold on that same market day and shareholders will not benefit from any increase of the Benchmark Indicator.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to twice the inverse daily performance of the Long-Term Euro-BTP futures, plus interest (EONIA) collected each day on the valuation of the previous evening’s 5:40 p.m. fixing of the Long-Term Euro-BTP futures.

The Benchmark Indicator represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a market day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The monitored performance is that of the fixing of the Benchmark Indicator at 5:40 p.m., in euros.

As the Benchmark Indicator’s calculation methodology is not based on a direct exposure to the BTP bonds, but is rather based on an indirect exposure via futures contracts, the Compartment’s performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark indicator publication

The Benchmark Indicator is calculated each day, using the official closing fixing of the Long-Term Euro-BTP future at 5:40 pm.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available via Reuters and Bloomberg. Reuters code: .SGIXDSBT

Bloomberg code: SGIXDSBT

Benchmark indicator revision and composition

The Benchmark Indicator is revised each day.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy. The revision of the Benchmark Indicator depends on the revision of the Long-Term Euro-BTP futures.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the S&P Dow Jones director of the SGI daily double short BTP benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is inversely exposed with a daily amplifying x2 leverage, upward or downward, to the daily performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

The Compartment's sensitivity to the interest rate is between 14 and 22.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The investment in the assets of undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria of eligibility, in particular:

- o Senior debt,
- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.

Of diversification, in particular:

- o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives guarantee in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;

(ii) Invested in government bonds of highest grade;

(iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;

(iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

Risk of daily readjustment of the leverage

Investors are doubly inversely exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the opposite of the performance of the underlying BTP futures at the Benchmark Indicator. For example, if the underlying BTP futures of the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the underlying BTP futures of the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying BTP futures of the Benchmark Indicator depreciate by 10% a given banking day then is appreciate by 6% the next banking day, they will have depreciated by a total of 4.6%, while the Compartment will be appreciated (before deduction of the applicable fees) by 5.6% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	10%	100	-20%	100	x2
day 2	-5%	104.5	10%	88	x2
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2:

Case in which the resulting negative leverage is less than 2 within the scenario of a decrease of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	-10%	100	20%	100	x2
day 2	6%	90	-12%	120	x-2
		95.4		105.6	
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show a decrease over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is positive over the period

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	5%	100	-10%	100	x-2
day 2	-5%	105	10%	90	x2
		99.75		99	
Whole period	-0.25%		-1.00%		x 4

Risk that the Compartment's management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator.

These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator. When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

Credit risk

It represents the potential risk of improvement of the issuer credit quality that could notably led to an improvement of the rating assigned by rating agencies to the issuer, which would have a positive impact on the price of the issuer's bonds and thus have a negative impact on the net asset value of the Compartment. The Compartment is exposed to the credit risk of the Italian State.

Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with a daily amplifying x2 leverage, upward or downward, to the Italian government bonds market while reproducing the evolution of the Benchmark Indicator.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As this product is an arbitration product, this Compartment could not be suitable for investors that wish to make a medium or long-term investment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 12 April 2011.*
- *Compartment creation date: 27 April 2011.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of SGI Daily Dble Short BTP EUR (Ticker: SGIXDSBT).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BTP Daily (-2x) Inverse UCITS ETF - Acc	FR0011023621	EUR	12.29% ⁽¹⁾	12.95%		-71.59%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0040% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	291,047,748.49
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	8,744,869.20

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.40% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	15,627,980.44
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlements sales	9,330,128.30
Account receivable	6,297,852.14
-	-
-	-
-	-
Other operations	-
Debts	15,737,728.26
Future currency exchange operations:	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	13,309,061.90
Account payable	2,318,918.54
Accrued expenses	109,747.82
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	8,040,000	208,837,654.50	22,866,000	593,428,366.00
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.40
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	5,289,413.85

Currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	291,047,748.49	634,371,664.35	422,879,297.40	169,930,349.45	178,466,656.96
Number of outstanding equities	10,243,000	25,069,000	14,722,000	5,533,000	4,727,000
Net asset value	28.4143	25.305	28.7243	30.7121	37.7547
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	3.87	-5.54	0.08	-7.54	-15.70

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR MSCI INDONESIA UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR MSCI INDONESIA UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor MSCI Indonesia UCITS ETF Compartment (“the Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the classes of Acc and C-USD equities: Capitalisation of all the amounts available for distribution.

For the class of Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is reproduce the evolution of the MSCI Indonesia Net Total Return index (the “Benchmark Indicator”) listed in USD, regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the MSCI Indonesia Net Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The Benchmark Indicator is the MSCI Indonesia Net Total Return index (net dividends reinvested).

The Benchmark Indicator is an equities index that is calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator is comprised exclusively of Indonesian securities (Indonesia) and retains the fundamental characteristics of the MSCI indices, namely: adjustment of the market capitalisation of the securities included in the Benchmark Indicator on the basis of the free-float and sector-based classification according to the GICS (Global Industry Classification Standard) classification.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator in USD.

Benchmark indicator revision and composition

The objective of the Benchmark Indicator is to represent 85% of the capitalization adjusted on the basis of the float, of each group of industries of the Indonesian market.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalization of the Indonesian market, while also reflecting the market’s economic diversity.

The MSCI indices are also reviewed quarterly in order to take into account the changes that impact the capitalisation of a value (number of securities and float) or its sectorial classification. The main changes in the capital structure of a company may be implemented in real time (merger and acquisition, large rights issues or initial public offerings, etc.).

The exact composition and the revision rules of the Benchmark Indicator are published by NYSE-Euronext and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .MIID00000NUS

Bloomberg code: M0ID

The Benchmark Indicator's closing price is available on the Internet site: www.mscibarra.com

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited administrator of the MSCI Indonesia Net Total Return Benchmark Index is registered in the register directors and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets.

The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to a Benchmark Indicator with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached.

indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the compartment.

- Exchange risk linked to the Acc class

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Indonesian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MSCI INDONESIA Net USD (Ticker: M0ID).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor MSCI Indonesia UCITS ETF - Acc	FR0011067511	EUR	-11.27% ⁽¹⁾	-10.83% ⁽³⁾	-2.74% ⁽²⁾	6.95%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

⁽²⁾ "Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency."

⁽³⁾ "When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date)."

The Tracking Error is 0.0340% for the sub-fund. The Tracking Error target for the year was 0.1%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Orange Flag 16%
Yellow Flag 0%
Green Flag 83%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
242	581	464	Scope 1 reported (vs estimated)	81%
			Scope 2 reported (vs estimated)	58%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	20%
Thermal Coal	18%
Natural Gas	2%
Oil	2%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	7 389
Gas (MMBOE)	0.0009
Oil (MMBOE)	0.0010

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	1 293.6
Thermal Coal	13 495.6
Oil	428.3
Gas	290.6
Total	15 508.1

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	13 495.6
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	13 495.6
Other	2 012.5

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	62.4%	76.9%	6.8%
Limited efforts/Information	12.8%	15.8%	3.9%
No effort/No evidence	24.8%	7.4%	89.3%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	11%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.5%
Energy Efficiency	11.2%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.0%
Energy Efficiency	0.2%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	37,217,392.48
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	1,000,764.59

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility. The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes Acc, Dist and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.55% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the classes of Acc and C-USD equities: Capitalisation of all the amounts available for distribution.

For the class of Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year.

The realised net capital gain will be capitalised.

appendix

LYXOR ETF MSCI Indonesia (the “fund”) is in no way sponsored, endorsed, sold or promoted by MSCI Inc. Net assets at the end of the fiscal year	37,217,392.48	42,252,305.25

3. Information supplements

3.1 Financial instruments: breakdown by the instrument's legal or economic type

3.1.1 Breakdown of the "Bonds and similar securities" item by instrument type

	Negotiated on a regulated or similar market	Not negotiated on a regulated or similar market
Indexed bonds	-	-
Convertible bonds	-	-
Fixed-rate bonds	-	-
Variable-rate bonds	-	-
Zero coupon bonds	-	-
Equity interests	-	-
Other instruments	-	-

3.1.2 Breakdown of the "Debt instruments" item by legal or economic instrument type

	Negotiated on a regulated or similar market	Not negotiated on a regulated or similar market
Treasury Bonds	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by non-financial issuers	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by bank issuers	-	-
Negotiable EUropean Medium Term Note (NEU MTN)	-	-
Other instruments	-	-

3.1.3 Breakdown of the "Sale operations on financial instruments" item by instrument type

	Securities received in pension sold	Securities borrowed sold	Securities acquired with redemption right sold	Short sales
Equities	-	-	-	-
Bonds	-	-	-	-
Debt securities	-	-	-	-
Other investments	-	-	-	-

LYXOR MSCI INDONESIA UCITS ETF
(compartment of the Multi Units France Sicav)

3.1.4 Breakdown of the off-balance sheet headings by market type (notably rates, equities)

	Rate	Equities	Exchange	Other
Hedging operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-
Other operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	34,798,000.00
Other commitments	-	-	-	-

3.2 Breakdown by rate types of the asset, liability and off-balance sheet items

	Fixed rate	Variable rate	Revisable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	1.67
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	1.67	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	USD	JPY	CHF	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	13,704,298.62	6,202,424.91	2,755,784.27	184,071.21
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	897,447.43
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	886,927.43
Account receivable	10,520.00
-	-
-	-
-	-
Other operations	-
Debts	915,289.85
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	897,447.43
Accrued expenses	17,842.42
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year:				
Equity Acc / FR0011067511	63,829	8,120,086.15	44,800	5,069,921.03
Equity C-USD / FR0011070374	-	-	31,337	2,243,040.64
Equity Dist / FR0011070382	-	-	-	-
Equity D-EUR / FR0011070366	-	-	-	-
Subscription / redemption commission by equity category:		Amount		Amount
Equity Acc / FR0011067511		-		-
Equity C-USD / FR0011070374		-		-
Equity Dist / FR0011070382		-		-
Equity D-EUR / FR0011070366		-		-
Remittances by equity category:		Amount		Amount
Equity Acc / FR0011067511		-		-
Equity C-USD / FR0011070374		-		-
Equity Dist / FR0011070382		-		-
Equity D-EUR / FR0011070366		-		-
Commissions acquired by the Compartment by equity category:		Amount		Amount
Equity Acc / FR0011067511		-		-
Equity C-USD / FR0011070374		-		-
Equity Dist / FR0011070382		-		-
Equity D-EUR / FR0011070366		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	%
Equity category:	
Equity Acc / FR0011067511	0.55
Equity C-USD / FR0011070374	0.55
Equity Dist / FR0011070382	-
Equity D-EUR / FR0011070366	-
Performance commissions (variable fees): amount of costs for the fiscal year	Amount
Equity category:	
Equity Acc / FR0011067511	-
Equity C-USD / FR0011070374	-
Equity Dist / FR0011070382	-
Equity D-EUR / FR0011070366	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-
- CIU 3	-
- CIU 4	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1	Current value of the financial instruments that are the subject of temporary acquisition:	
	- Financial instruments sold under forward repurchase agreements	-
	- Other temporary operations	-
3.9.2	Current value of the financial instruments comprising security deposits:	
	Financial instruments received as guarantees and not included in the balance sheet:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
	Financial estimates given as guarantees and maintained in their original item:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
3.9.3	Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
	- CIU securities	-
	- Swaps	304,257.80

LYXOR THAILAND (SET50 NET TR) UCITS ETF

rapport
annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR THAILAND (SET50 NET TR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor Thailand (SET50 NET TR) UCITS ETF Compartment (hereafter the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the classes of Acc and C-USD equities: Capitalisation of all the amounts available for distribution.

For the classes Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year.

The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is an exposure to the Thai equities market by reproducing the evolution of the SET50 NET Total Return index (the “Benchmark Indicator “), listed in Thai Baht (THB), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the SET50 NET Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark Indicator is the SET50 NET Total Return index, (net dividends reinvested).

The Benchmark Indicator is the benchmark index of the Stock Exchange of Thailand. It is comprised of the 50 main securities listed in the Stock Exchange of Thailand, in terms of market capitalisation adjusted on the basis of the free-float and the liquidity.

The SET50 NET Total Return index was initially created in 1950 to serve as an underlying asset for derivative instruments. It is maintained by the Stock Exchange of Thailand. The SET's Index Committee is responsible for specifying the index’s selection criteria, its components and methodology.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.set.or.th

The monitored performance is that of the Benchmark Indicator.

Benchmark indicator revision and composition

The Benchmark Indicator is reviewed twice a year in June and in December with effective date on the first business day of the following day.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.set.or.th

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

SET50 NET Total Return index publication:

The SET50 Net Total Return index is calculated daily using the index's closing price.

The SET50 NET Total Return index is available:

Reuters code: .SET50NETRI

Bloomberg code: SET50NTR

The Benchmark Indicator's closing price is available on the Internet site: www.set.or.th

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Stock Exchange of Thailand administrator of the SET50 NET Total Return benchmark index has until 01.01.2020 to request approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - Subordination to the main market indices or to the Benchmark Indicator,
 - Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - Geographical area,
 - Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged.

The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial manager. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to such index with low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the equity class

For C-USD and Dist equity classes:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the USD/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the USD/THB (Baht offshore) exchange rate applicable to foreign investors.

For Acc equity class:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the EUR/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the EUR/THB (Baht offshore) exchange rate applicable to foreign investors.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber wishing to be exposed to the Thai equities market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The latest annual documents and asset composition are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy – 92987 Paris La Defense Cedex - France.*
- *Creation date of the Multi Units France Compartment: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 June 2011.*
- *Compartment creation date: 4 July 2011.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of SET50 net TRI THB (Ticker:SET50NTR).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor MSCI Thailand UCITS ETF – Acc	FR0011067529	EUR	6.21% ⁽¹⁾	6.62% ⁽³⁾	-3.08% ⁽²⁾	104.52%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

⁽²⁾ “Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency.”

⁽³⁾ “When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date).”

The Tracking Error is 0.0650% for the sub-fund. The Tracking Error target for the year was 0.1%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy.
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products.
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy.
- MSCI and Sustainalytics ESG research to integrate ESG issues.
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	0%
Orange Flag	20%
Yellow Flag	5%
Green Flag	71%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	92%
350	589	577	Scope 1 reported (vs estimated)	100%
			Scope2 reported (vs estimated)	95%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	21%
Thermal Coal	16%
Natural Gas	20%
Oil	19%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	2 244
Gas (MMBOE)	0.0029
Oil (MMBOE)	0.0008

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

IC02e/\$M invested	
Metallurgical Coal	1 289.2
Thermal Coal	4 099.3
Oil	325.8
Gas	780.3
Total	6 664.1

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

IC02e/\$M invested	
Thermal Coal	4 099.3
Oil Sands	0.0
Shale Oil or Shale Gas	189.4
Sum High Impact Reserves	4 288.7
Other	2 395.3

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	4.1%
Some efforts	87.8%	82.3%	60.3%
Limited efforts/Information	7.0%	1.3%	2.8%
No effort/No evidence	25.1%	6.4%	32.7%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	13%
20-49.9%	2%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	7.3%
Energy Efficiency	11.3%
Green Building	4.7%
Pollution Prevention	6.1%
Sustainable Water	1.2%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	1.0%
Energy Efficiency	1.3%
Green Building	0.0%
Pollution Prevention	0.1%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	18,472,592.61
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	433,766.08

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the calculation date of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the net asset value calculation date. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the net asset value calculation date. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The financial manager independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the financial manager's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities in Undertakings for Collective Investment in Transferable Securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes Acc, Dist, and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.45% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the classes of Acc and C-USD equities: Capitalisation of all the amounts available for distribution.

For the classes Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year.

The realised net capital gain will be capitalised.

appendix

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

FISCAL YEAR ENDING ON: 31.10.2018

LYXOR MSCI ALL COUNTRY WORLD UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR MSCI ALL COUNTRY WORLD UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR MSCI ALL COUNTRY WORLD UCITS ETF Compartment ("the Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

Equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is an exposure to the equity markets of emerging and developed countries and to replicate the MSCI AC World Index (ACWI) Net Total Return index (the "Benchmark indicator"), listed in US Dollars (USD), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.07%.

Benchmark indicator:

The Benchmark Indicator is the MSCI AC World Index (ACWI) Net Total Return index, (net dividends reinvested). The Benchmark Indicator is an equities index that is calculated and published by the international supplier of indices, MSCI.

The Benchmark Indicator is a free float-adjusted market capitalization weighted index created to measure the investable universe and the performance of the companies of the developed and emerging markets. The Benchmark Indicator was created to cover large and mid-capitalisations and is constructed using the MSCI Global Investable Market Index (GIMI) methodology in order to meet criteria in terms of size, liquidity and free-float adjusted market capitalisation.

The MSCI methodology and its calculation method entail the Benchmark Indicator being made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator in USD.

Benchmark indicator revision and composition

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com

Benchmark indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg. Reuters code: .MIWD00000NUS

Bloomberg code: M1WD

The Benchmark Indicator's closing price is available on the Internet site: www.msci.com

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited administrator of the MSCI AC World Index (ACWI) Net Total Return Reference Index is registered in the register directors and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;

(d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;

(e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Exchange risk linked to the C-EUR and D-EUR equity classes

The value of the aforesaid equity classes is calculated in euro (EUR) and the Benchmark Indicator is an index denominated in US dollars (USD). Consequently, the value of the C-EUR and D-EUR equities may vary from one day to the next as a result of exchange rate fluctuations (EUR/USD). At the time of subscriptions/redemptions, the bearer's yield/capital would thus increase or decrease due to the fact that it is converted back into euro given its exposure to the risk linked to the increase as well as decrease of the euro against the US Dollar.

Exchange risk linked to the Benchmark Indicator

The Compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the Compartment.

Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed to the markets of developed and emerging countries.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.
- Creation date of the Multi Units France Sicav: 4 March 2002.
- Compartment approval date by the AMF (Financial Markets Authority): 1 September 2011.
- Compartment creation date: 5 September 2011.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MSCI AC World NR USD (Ticker: M1WD).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
LYXOR MSCI ALL COUNTRY WORLD UCITS ETF - C-EUR	FR0011079466	EUR	2.07% ⁽¹⁾	2.28% ⁽³⁾	-2.74% ⁽²⁾	134.05%
LYXOR MSCI ALL COUNTRY WORLD UCITS ETF - C-USD	FR0011093418	USD	-0.72% ⁽¹⁾	-0.52%		87.92%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

⁽²⁾ "Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency".

⁽³⁾ "When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date)".

The Tracking Error is 0.0187% for the sub-fund. The Tracking Error target for the year was 0.07%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag 4%
Orange Flag 25%
Yellow Flag 34%
Green Flag 37%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
146	221	200	Scope 1 reported (vs estimated)	83%
			Scope2 reported (vs estimated)	80%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	9%
Thermal Coal	3%
Natural Gas	7%
Oil	7%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	473
Gas (MMBOE)	0.0034
Oil (MMBOE)	0.0027

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	495.1
Thermal Coal	884.0
Oil	1 231.7
Gas	999.1
Total	3 684.8

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	884.0
Oil Sands	282.7
Shale Oil or Shale Gas	192.1
Sum High Impact Reserves	1 358.8
Other	2 345.8

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	5.3%	4.8%	5.1%
Some efforts	75.7%	86.8%	63.5%
Limited efforts/Information	3.4%	2.6%	2.5%
No effort/No evidence	15.6%	5.8%	28.9%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	26%
20-49.9%	4%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	12.5%
Energy Efficiency	26.1%
Green Building	2.8%
Pollution Prevention	5.0%
Sustainable Water	4.8%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.5%
Energy Efficiency	2.5%
Green Building	0.3%
Pollution Prevention	0.2%
Sustainable Water	0.2%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	405,669,353.90
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	27,864,019.34

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.45% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

Equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

LYXOR MSCI ALL COUNTRY WORLD UCITS ETF (the "Fund") is in no way sponsored, endorsed, sold or promoted by MSCI Inc. MSCI or its subsidiaries are the owners of certain names, registered trademarks and of the MSCI indices that are determined, composed and calculated by MSCI without discussion with Lyxor International Asset Management or the Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices is required to take into consideration the needs of Lyxor International Asset Management or of the bearers of the Compartment's equities when determining, composing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices makes any decision regarding the launch date, the price, the quantity of the Compartment's equities, or even the determination and calculation of the formula used to establish the Compartment's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices assumes any liability or obligation with regard to the administration, management or marketing of the Compartment.

THOUGH MSCI OBTAINS INFORMATION FOR INTEGRATION OR USE IN THE CALCULATION OF THE INDICES FROM SOURCES THAT MSCI CONSIDERS TO BE RELIABLE, NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OR CALCULATION OF THE MSCI INDICES GUARANTEES THE ACCURACY AND/OR EXHAUSTIVE NATURE OF THE INDICES OR OF ANY INCLUDED DATA. NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OF A CALCULATION FOR THE MSCI INDICES GIVES ANY EXPRESS OR IMPLICIT GUARANTEE REGARDING THE RESULTS THAT MAY BE OBTAINED BY THE HOLDER OF A MSCI LICENCE, THE CUSTOMERS OF THE SAID LICENSEE AS WELL AS THE COUNTERPARTS, BEARERS OF THE FUND OR ANY OTHER PERSON OR ENTITY, BASED ON THE USAGE OF THE INDICES OR OF ANY DATA INCLUDED WITH REGARD TO THE RIGHTS GRANTED BY LICENCE OR FOR ANY OTHER USAGE. NEITHER MSCI NOR ANY OTHER PARTY GIVES EXPRESS OR IMPLICIT GUARANTEES AND MSCI REJECTS ALL GUARANTEES REGARDING THE COMMERCIAL VALUE OR ADEQUACY FOR SPECIFIC USAGE OF THE INDICES OR INCLUDED DATA. NOTWITHSTANDING THE ABOVE, UNDER NO CIRCUMSTANCES MAY MSCI OR ANY OTHER PARTY BE HELD LIABLE WITH REGARD TO ANY DAMAGES, WHETHER DIRECT, INDIRECT OR OTHER (INCLUDING THE LOSS OF EARNINGS), EVEN IN CASE OF KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

2. Evolution of the net assets

	31.10.2018	31.10.2017
Currency	EUR	EUR
Net assets at the start of the fiscal year	187,537,358.37	115,120,929.33
Subscriptions (including subscription commission acquired by the Compartment)	338,298,027.39	201,459,533.53
Redemptions (less the redemption commission acquired by the Compartment)	-120,692,326.49	-148,370,302.50
Capital gains generated on deposits and financial instruments	46,558,907.43	35,058,697.09
Capital losses generated on deposits and financial instruments	-53,896,785.43	-14,351,330.87
Capital gains generated on financial contracts	1,204,744,246.38	511,626,246.51
Capital losses generated on financial contracts	-1,185,362,450.26	-523,115,151.12
Negotiation fees	-	-
Exchange differentials	12,993,112.49	-2,272,203.04
Changes to the estimate difference of the deposits and financial instruments:		
- <i>Estimate difference fiscal year N</i>	-32,677,031.75	5,083,283.97

Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0.46	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	USD	JPY	CHF	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	149,396,605.61	36,648,779.29	7,922,840.97	238,906.77
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	2,447,932.86
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	43,306,260.05
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	43,306,260.05
-	-
-	-
-	-
-	-
Other operations	-
Debts	43,485,470.63
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	39,414,739.46
Account payable	3,891,520.59
Accrued expenses	179,210.58
-	-
-	-
Other operations	-

3.6 Shareholders' equity

Number of equities issued/redeemed during the fiscal year:	Number of equities	Subscriptions	Number of equities	Redemptions
		Amount		Amount
EQUITY C-EUR / FR0011079466	1,366,391	320,658,792.09	501,001	114,525,556.28
EQUITY C-USD / FR0011093418	106,637	17,639,235.30	36,100	6,166,770.21
Subscription / redemption commission by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466		-		-
EQUITY C-USD / FR0011093418		-		-
Remittances by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466		-		-
EQUITY C-USD / FR0011093418		-		-
Commissions acquired by the Compartment by equity category:		Amount		Amount
EQUITY C-EUR / FR0011079466		-		-
EQUITY C-USD / FR0011093418		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	%
Equity category:	
EQUITY C-EUR / FR0011079466	0.45
EQUITY C-USD / FR0011093418	0.45
Performance commissions (variable fees): amount of costs for the fiscal year	Amount
Equity category:	
EQUITY C-EUR / FR0011079466	-
EQUITY C-USD / FR0011093418	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-
- CIU 3	-
- CIU 4	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1	Current value of the financial instruments that are the subject of temporary acquisition:	
	- Financial instruments sold under forward repurchase agreements	-
	- Other temporary operations	-
3.9.2	Current value of the financial instruments comprising security deposits:	
	Financial instruments received as guarantees and not included in the balance sheet:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
	Financial estimates given as guarantees and maintained in their original item:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
3.9.3	Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
	- CIU securities	-
	- Swaps	15,740,079.40

LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 1-3Y (DR) UCITS ETF

rapport

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 1-3Y (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The LYXOR EuroMTS Highest Rated Macro-Weighted Govt Bond 1-3Y (DR) UCITS ETF Compartment (see hereafter the “Compartment”) is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to be exposed, upwards and downwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro Weighted Government Bond 1-3Y (Mid Price) Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a “Total Return” type index, (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to “AAA” or similar by the three rating agencies S&P, Moody’s and Fitch.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998. As explained below, the initial index components were selected using the same criteria as those used for “FTSE MTS Eurozone Government Broad” indices (except for the credit-rating criterion):

The Benchmark Indicator comprises at least 5 issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that at least 5 issuers are maintained in the Benchmark Indicator.

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds.

The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;
- Listed on the FTSE MTS platform;
- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- Maturity exceeds one year;
- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

The Benchmark Indicator composition is revised monthly.

The complete methodology is available at www.ftse.com

The performance tracked is the closing index price at 5:30 pm (CET).

Benchmark indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRA5=

Bloomberg code: FMMPHRA5

The Benchmark Indicator's closing price is available on the Internet: www.ftse.com.

Benchmark indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the FTSE MTS Administrator of the FTSE MTS Highest Rated Macro-Weighted Government Bond 1-3Y (Mid Price) Index is recorded in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 1-3Y (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Interest rate sensitivity range within which the compartment is managed:	Between 1 and 4
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 20% of the assets of the Compartment.

Expected proportion of assets under management which may be subject to securities financing transactions: 0% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the "Agent") to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected.

This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Counterparty risk

The Compartment may use FFI on an ancillary basis.

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to "AAA" or similar by the three rating agencies S&P, Moody's and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers.

The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The latest annual documents and asset composition are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy – 92987 Paris La Defense Cedex - France.

- Compartment approval date by the AMF (Financial Markets Authority): 8 November 2011.
- Compartment creation date: 25 November 2011.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MTS Mid Price Highest Rated Macro-Weighted 1-3 yrs EUR (Ticker: FMMPHRA5).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond 1-3Y (DR) UCITS ETF - Acc	FR0011146315	EUR	-0.78% ⁽¹⁾	-0.63%		2.02%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.0085% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales
0	0	249

Portfolio rated by weight	100%
Scope 1 reported (vs estimated)	0%
Scope2 reported (vs estimated)	0%
Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO₂ using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

IC02e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

IC02e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	0.0%	0.0%	0.0%
Limited efforts/information	0.0%	0.0%	0.0%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the Compartment)

In the course of the fiscal year, the CIU did not perform financing operations subject to the Securities Financing Transactions Regulation, i.e. repos, securities or commodities lending/borrowing transactions, buy-sell back or sell-buy back transactions, margin lending transactions, or total return swaps (TRS).

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.165% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;	The amount of the transaction	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment

Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 5070, 8021 Zürich.

Calculation of the Total Expense Ratio (in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct.

Average fortune of the fund for the period from 01/11/17 to 31/10/18: 56,291,345.21

Management commission of the fund: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report	Half-yearly report	Annual report
	31/10/2017	30/04/2018	31/10/2018

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond 3-5Y (DR) UCITS ETF Compartment (see hereafter the “Compartment”) is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to be exposed, upwards and downwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro-Weighted Government Bond 3-5Y (Mid Price) Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a “Total Return” type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the index).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to “AAA” or similar by the three rating agencies Standard & Poor’s, Moody’s and Fitch. It is listed in EUR.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

FTSE MTS is a private company based in London and regulated by the FCA. It manages the FTSE MTS European electronic trading platform for benchmark bonds from the Euro zone. FTSE MTS is also responsible for calculating and publishing the value of the FTSE MTS indices.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998. As explained below, the initial index components were selected using the same criteria as those used for “FTSE MTS Eurozone Government Broad” indices (except for the credit-rating criterion):

The Benchmark Indicator comprises at least 5 issuers. If an issuer is downgraded, it will be replaced with another eligible issuer country, such that 5 issuers are maintained in the Benchmark Indicator.

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds.

The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;
- Listed on the FTSE MTS platform;
- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- Maturity exceeds one year;
- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

These indices composition is revised monthly.

The complete methodology is available at www.ftse.com

The performance tracked is the closing index price at 5:30 pm (CET).

Benchmark indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRB5=

Bloomberg code: FMMPHRB5

The Benchmark Indicator's closing price is available on the Internet: www.ftse.com.

Benchmark indicator revision and composition

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the FTSE MTS Administrator of the FTSE MTS Highest Rated Macro-Weighted Government Bond 3-5Y (Mid Price) Index is recorded in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 2 and 6
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

In the present case, the financial manager by delegation intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 20% of the assets of the Compartment.

Expected proportion of assets under management which may be subject to securities financing transactions: 0% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the "Agent") to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;

the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use FFI on an ancillary basis.

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed. Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to “AAA” or similar by the three rating agencies S&P, Moody’s and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MTS Mid Price Highest Rated Macro-Weighted 3-5 yrs EUR (Ticker: FMMPHRB5).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond 3-5Y (DR) UCITS ETF - Acc	FR0011146349	EUR	-0.47% ⁽¹⁾	-0.31%		12.20%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.0108% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
0	0	249	Scope 1 reported (vs estimated)	0%
			Scope2 reported (vs estimated)	0%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions(combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity,generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

1CO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

1CO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	0.0%	0.0%	0.0%
Limited efforts/Information	0.0%	0.0%	0.0%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:	
0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the Compartment)

In the course of the fiscal year, the Compartment did not perform financing operations subject to the Securities Financing Transactions Regulation, i.e. repos, securities or commodities lending/borrowing transactions, buy-sell back or sell-buy back transactions, margin lending transactions, or total return swaps (TRS).

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.165% per year
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;	The amount of the transaction	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the "Holders").

FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.

FTSE MTS and the names of the FTSE MTS index (FTSE MTS IndexTM) and of the FTSE MTS indices (FTSE MTS IndicesTM) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.

Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Highest Rated Macro-Weighted Government Bond 3-5Y (Mid Price) Index or of sub-indices or of registered trademarks.

Number of outstanding equities	3,146,000	524,000	283,000	345,000	398,000
Net asset value	112.2016	112.7359	112.7875	111.7117	110.472
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-1.51	0.06	1.57	2.51	1.68

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 25 November 2011.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment

Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 5070, 8021 Zürich.

Calculation of the Total Expense Ratio (in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct.

Average fortune of the fund for the period from 01/11/17 to 31/10/18: 169,109,392.88

Management commission of the fund: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report 31/10/2017	Half-yearly report 30/04/2018	Annual report 31/10/2018

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond 5-7Y (DR) UCITS ETF Compartment (see hereafter the “Compartment”) is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to be exposed, upwards and downwards, to the performance of the eurozone government bonds, while reproducing the evolution of the FTSE MTS Highest Rated Macro Weighted Government Bond 5-7Y (Mid Price) Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a “Total Return” type index (i.e. all coupons detached by the components of the index are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of eurozone Government bonds segment, weighted by country having at least two rating equal to “AAA” or similar by the three rating agencies S&P, Moody’s and Fitch. It is listed in EUR.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.ftse.com.

The Benchmark Indicator is calculated by FTSE MTS.

FTSE MTS is a private company based in London and regulated by the FCA. It manages the FTSE MTS European electronic trading platform for benchmark bonds from the Euro zone. FTSE MTS is also responsible for calculating and publishing the value of the FTSE MTS indices.

Methodology

The Benchmark Indicator is composed of bonds issued by the eurozone countries with the highest credit ratings. These bonds are weighted in the index on the basis of macroeconomic indicators. The Benchmark Indicator is provided with a history of index values dating back to 31 December 1998.

As explained below, the initial index components were selected using the same criteria as those used for “FTSE MTS Eurozone Government Broad” indices (except for the credit-rating criterion):

The Benchmark Indicator securities are therefore among the highest rated Eurozone sovereign bonds. The following bonds qualify:

- Nominal value and coupon are denominated in euros with no option or convertibility;
- Listed on the FTSE MTS platform;
- Issued by a sovereign eurozone government having at least two out of three AAA ratings from S&P, Moody's and Fitch, and selected by FTSE MTS from among the following countries as: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Slovenia and Spain;
- Maturity exceeds one year;
- With issuance of at least two billion euros.

The Benchmark Indicator must comprise at least five issuing countries. If an issuer is downgraded it will be replaced in the index, provided that there is another country that is eligible, such that the required minimum number of five issuers is maintained.

These indices composition is revised monthly.

The complete methodology is available at www.ftse.com

The performance tracked is the Benchmark Indicator's closing price at 5:30 pm (CET).

Benchmark indicator publication

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: FMMPHRC5=

Bloomberg code: FMMPHRC5

Benchmark indicator revision

The Benchmark Indicator's composition is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the FTSE MTS Administrator of the FTSE MTS Highest Rated Macro-Weighted Government Bond 5-7Y (Mid Price) Index is recorded in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a pure replication method, which means that the Compartment will invest mainly in bonds making up the Benchmark Indicator.

Information relative to the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio are available on the page dedicated to the Compartment on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD non-member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets.

The abovementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

Interest rate sensitivity range within which the compartment is managed:	Between 4 and 8
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios provided for by the regulation, international debt securities.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment’s management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 20% of the assets of the Compartment.

Expected proportion of assets under management which may be subject to securities financing transactions: 0% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the “Agent”) to provide the following services in connection with the Compartment’s temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment’s behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment’s behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Counterparty selection policy

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Credit risk

In case of the deterioration of the rating affecting one or more issuers of the bonds comprising the Benchmark Indicator, the Compartment could be affected. This deterioration could imply a heightened risk of default on the part of the issuer of the bond in question, and could result in a depreciation of this bond's value.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment may use FFI on an ancillary basis.

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment, the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure, downwards and upwards, to the performance of the eurozone government bonds segment, weighted by country having at least two rating equal to “AAA” or similar by the three rating agencies S&P, Moody’s and Fitch.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, your cash requirements at present and for three years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also recommended that you sufficiently diversify your investments so as not to be exposed solely to the risks of this Compartment.

Investors are therefore recommended to study their individual situations with their usual wealth management advisers. The minimum recommended investment period is 3 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The latest annual documents and asset composition are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy – 92987 Paris La Defense Cedex - France.*
- *Creation date of the Multi Units France Compartment: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 November 2011.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MTS Mid Price Highest Rated Macro-Weighted 5-7 yrs EUR (Ticker: FMMPHRC5).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor EuroMTS Highest Rated Macro-Weighted Govt Bond 5-7Y (DR) UCITS ETF - Acc	FR0011146356	EUR	-0.14% ⁽¹⁾	-0.01%		22.79%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.0143% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D.533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
0	0	249	Scope 1 reported (vs estimated)	0%
			Scope2 reported (vs estimated)	0%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gas	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO₂ using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO ₂ e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO ₂ e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	0.0%	0.0%	0.0%
Limited efforts/information	0.0%	0.0%	0.0%
No effort/No evidence	0.0%	0.0%	0.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution	
Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaitre/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the Compartment)

In the course of the fiscal year, the Compartment did not perform financing operations subject to the Securities Financing Transactions Regulation, i.e. repos, securities or commodities lending/borrowing transactions, buy-sell back or sell-buy back transactions, margin lending transactions, or total return swaps (TRS).

Adjustment of the fiscal year's earnings (V)	13,090.98	-9,091.90
Advances on result paid for the fiscal year (VI)	-	-
Earnings (I - II + III - IV +/- V - VI):	141,206.49	158,155.98

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

Transferable securities traded on a French or foreign regulated market are valued at the market price. The valuation at the reference market price is carried out according to the provisions decided upon by the board of the directors. The application provisions are stipulated in the notes to the annual financial statements.

However:

- Transferable securities for which the price is not determined on the valuation date or for which the price was corrected are valued at their probable trading value under the responsibility of the board of directors. These valuations and their justification are provided to the statutory auditor at the time of the latter's verifications.
- Marketable debt securities and similar securities that are not the subject of significant transactions are valued by application of an actuarial method, with the adopted rate being that of the issues of equivalent securities affected, as relevant, by a difference that is representative of the intrinsic characteristics of the security's issuer. However, marketable debt securities having a residual life span less than or equal to 3 months, and that are not particularly sensitive, can be valued using the straight line method. The application provisions for these rules are set by the board of directors. They are mentioned in the notes to the annual financial statements.
- Units or equities of UCITS will be valued at the last known net asset value.
- Securities that are not traded on a regulated market are valued at their probable trading value, under the responsibility of the board of directors.
- Securities that are the subject of temporary disposal or acquisition contracts are valued in compliance with the applicable regulations, with the application provisions being determined by the board of directors and stipulated in the notes to the annual financial statements.
- Operations relating to firm or conditional future financial instruments traded on French or foreign organised markets are valued at the market value according to the provisions determined by the board of directors. They are stipulated in the notes to the annual financial statements.
- Firm or conditional futures transactions or forex operations completed on over-the-counter markets authorised by the regulations applicable to UCITS are valued at their market value or a value estimated according to the provisions determined by the board of directors and stipulated in the notes to the annual financial statements.

Moreover, an instantaneous net asset value for information purposes will be calculated by NYSE Euronext if the compartments are accepted for listing.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

appendix

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.165% per year
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;	The amount of the transaction	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

appendix

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by FTSE TMX Global Debt Capital Markets (collectively referred to as the “Holders”). FTSE TMX Global Debt Capital Markets cannot be held liable for the promotion or marketing of the Compartment.

FTSE MTS and the names of the FTSE MTS index (FTSE MTS IndexTM) and of the FTSE MTS indices (FTSE MTS IndicesTM) are registered trademarks of FTSE TMX Global Debt Capital Markets. The FTSE MTS indices are calculated by FTSE TMX Global Debt Capital Markets, and marketed and distributed by MTSNext, a company owned by FTSE TMX Global Debt Capital Markets.

Neither FTSE TMX Global Debt Capital Markets nor MTSNext can be held liable for any losses or damages of any nature whatsoever (including, notably, investment losses) linked to all or part of the Compartment or to the supply of the FTSE MTS Highest Rated Macro-Weighted Government Bond 5-7Y (Mid Price) Index or of sub-indices or of registered trademarks.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

Net asset value	122.7948	122.9672	123.128	120.5785	117.815
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-0.86	-0.39	4.11	6.93	6.55

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 25 November 2011.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment

Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Compartment's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 5070, 8021 Zürich.

Calculation of the Total Expense Ratio (in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct.

Average fortune of the fund for the period from 01/11/17 to 31/10/18: 10,470,878.82

Management commission of the fund: 0.165 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report 31/10/2017	Half-yearly report 30/04/2018	Annual report 31/10/2018
Management commission of the fund	15,403.34	7,592.14	17,294.33
Performance fee to be paid to the manager of collective investments of capital	0.00	0.00	0.00
Custodian bank fee	0.00	0.00	0.00
Other expenses	0.00	0.00	0.00
Taxes	0.00	0.00	0.00
Total operating expenses	15,403.34	7,592.14	17,294.33

Calculation of the TER for 12 months from 01/11/17 to 31/10/18:

TER including performance fee

$$(17,294.33 / 910,470,878.82) * 100$$

0.165 %

Performance fee as a share in percentage of the net average assets:

- %

LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BOND 5-7Y (DR) UCITS ETF
 (compartment of the Multi Units France mutual fund) - Fiscal year closing on 31/10/2018

Performance of the Compartment

The details of the performance of the Compartment's units calculated in compliance with the principles of the Swiss Fund Association are given below:

	Annual performance from 31/10/2017 to 31/10/2018	Annual performance from 31/10/2016 to 31/10/2017	Annual performance from 30/10/2015 to 31/10/2016
<i>LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOV BOND 5-7Y (DR) UCITS ETF</i>	-0.14%	-0.13%	+2.11%
<i>MTS MID PRICE HIGHEST RATED MACRO WEIGHTED GOV BOND 5-7Y</i>	-0.01%	+0.01%	+2.28%

Past performances are no indicator of future performances. The performances indicated here do not take into account the impact of possible subscription and redemption commissions and costs of Compartment units.

Classification:

International equities.

At least 60% of the LYXOR CSI 300 A-SHARE UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

Class of C-EUR equities: Income capitalisation.

Class of D-EUR equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the incomes.

Class of C-USD equities: Income capitalisation.

Class of D-USD equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the incomes.

Management objective:

The management objective is to replicate the evolution, upwards or downwards, of the CSI 300 Net Total Return Index (“Benchmark Indicator”) listed in Chinese Yuan (“CNY”) and representative of the performance of the large capitalisations on the “A Shares” market, namely securities issued by companies founded in the people’s Republic of China, excluding Hong Kong, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.30%.

Benchmark indicator:

The Benchmark Indicator is a Total Return type index (i.e. all dividends detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator measures the performance of the “A Shares” market, i.e. securities issued by companies founded in People’s Republic of China, excluding Hong Kong, traded on the Shanghai and Shenzhen stock exchanges and listed in Chinese Yuan (“CNY”), by targeting, in general, the 300 largest capitalisations and the most important liquid equities among all A Shares.

The Benchmark Indicator is a weighted index by free-float market capitalisation.

The Benchmark Indicator is calculated by China Securities Index Co., Ltd. (“CSI”), a joint venture incorporated on 25 August 2005 between the Shanghai and Shenzhen stock exchange, specialising in the management of financial indices and in the delivery of services allocated with these indices.

Benchmark indicator revision and composition

The Benchmark Indicator is revised every six months, according to the methodology described in the Benchmark Indicator’s Rulebook, available on the Internet site of China Securities Index Co. Ltd. at: www.csindex.com.cn.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the Internet site: www.csindex.com.cn.

Benchmark indicator publication

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: CSIN00300

Bloomberg code: CSIN00300

The Benchmark Indicator's closing price is available at the Internet site: www.csindex.com.cn.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the administrator China Securities Index Co., Ltd. of the CSI 300 Net Total Return benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Benchmark Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets).

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the financial manager by delegation, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

Any counterparty chosen by the Compartment as counterparty to a contract on future financial instruments should be a first class financial institution authorised for matched principal trading.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None. The Compartment will not invest in securities comprising derivatives.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (“FFI”) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment’s equity price can deviate from its indicative net asset value. The liquidity of the Compartment’s equities on a place of listing can be affected by any suspension that could notably be due to:

- Suspension or stoppage of the calculation of the Benchmark Indicator, and/or;
- Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or;
- The impossibility for a given place of listing to obtain or calculate the Compartment’s indicative net asset value, and/or;
- A market maker’s violation of the rules applicable to this marketplace, and/or;
- A failure of this marketplace’s IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment’s assets by counterparty.

In case of a Counterparty’s default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment’s ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment’s management company and the FFI’s counterparty. The management company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment’s Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment’s net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution;
- ii) The Benchmark Indicator is definitively discontinued by the Benchmark Indicator;
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator;
- iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost;
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid;
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the C-EUR and D-EUR (EUR/CNY) equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

- Exchange risk linked to the C-USD and D-USD (USD/CNY) equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

- Risk related to the exposure to Emerging markets

The Compartment’s exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Specific risks linked to investment in People’s Republic of China:

Persons buying Compartment shares must be aware of the following risks inherent to any investment in People’s Republic of China (“PRC”):

- Economic, political and social risks

Any political change, social instability or insecurity and unfavourable diplomatic evolution which may occur in or in connection with the PRC could result in the introduction by the Chinese State of additional restrictions and limits, notably expropriation, excessive taxes or nationalisation of certain companies included in the Benchmark Indicator. Investor’s attention is also drawn to the fact that any change in the politics of the PRC could have an adverse impact on PRC stock exchange and on the performances of the Compartment and could result in the winding up of the Compartment by decision of the Board of Directors.

- Economic risks in the PRC

The economy of the PRC has recently grown very rapidly. It is, however, not certain that this growth will continue and it is possible that the growth will be uneven between the different sectors of the PRC economy. Moreover, the PRC government has from time to time put in place various measures to prevent the economy from overheating. Moreover, the transformation of the PRC’s economy from a socialist economy to a more market-oriented economy has resulted in economic and social tensions in this country such that no guarantee can be given that this transformation will continue or will remain a success. All these considerations could negatively affect the performances of the Compartment.

- Capital repatriation risks

The system for repatriating capital is subject to the approval by the Chinese SAFE (“State Administration of Foreign Exchange”) and there are restrictions required regarding the sums and frequency of such repatriation. The Compartment has recourse to swap contracts that are traded OTC outside the People’s Republic of China so the restrictions or suspension regarding the ability of entities having the capacity of qualified foreign institutional investor – “QFII” to repatriate amounts in foreign currencies should not affect the operation of the Compartment.

However, when the swap counterparty is also a QFII or if this swap counterparty enters into a hedge with an affiliated company with QFII status, any impossibility for such QFII to repatriate currencies could possibly result in liquidity problems for the swap counterparty, which could certainly have a negative impact on the Compartment.

Furthermore, the regulations or certain economic standards in PRC regarding the legal status of the repatriation to or convertibility of amounts in foreign currencies originating in the local Chinese market on other markets could be modified in a way that is detrimental, irrespective of the will of the mutual fund and the Management Company.

Where applicable, the regulatory developments and unfavourable situations described above, which disrupt or restrict the convertibility or transferability of foreign currencies could potentially, not only:

Negatively affect the ability of the Compartment to properly achieve its investment objective, and/or; adversely affect the performances of the Compartment, but could also;

Ultimately result in the winding up of the Compartment by decision of the Board of Directors.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Legal system in the PRC

The legal system in the PRC is based on statutory law. Nevertheless a major part of the legislation and regulations have not yet been tested and it is certain that they will be effectively applied. In particular, the PRC's regulations regarding the exchange rate controls are relatively recent and their application is still very uncertain. Moreover these regulations allow the China Securities Regulatory Commission – “CSRC” and the State Administration of Foreign Exchange – “SAFE” considerable discretion as to how they interpret the regulations, which is a source of uncertainty regarding how they are applied and used. All these considerations could have negatively repercussions of the Compartment's performances.

The Compartment's shareholders have no rights to the underlying “A shares”.

An investment in “A shares” (which include the securities made up to the Benchmark Indicator) and their trading by foreign companies, means that the latter must have received QFII status from the CSRC and a QFII quota from SAFE. Given that this Compartment does not have the QFII status, it will obtain its economic exposure to these securities through an OTC swap. OTC swaps do not confer any rights or interest, neither beneficial ownership nor equity rights, to the relevant A shares to which the OTC swaps relate. As a result, investors must be aware that an investment in the Compartment is not the equivalent of owning the A shares making up the benchmark Indicator. Investors will thus have no right to such A shares, neither as beneficial owners nor as owners. As an OTC swap represents an obligation of the swap Counterparty rather than a direct investment in A shares, the Compartment may suffer losses equal to the total value of the swap if the swap Counterparty fails to meet its obligations incumbent to it by virtue of the swap contract.

Investment quota allocated to investors with QFII status

The PRC's regulations governing QFII status can be modified at any time by the CSRC and/or SAFE which could have a prejudicial and negative impact on the Compartment's ability to achieve its investment objective and could result in the winding-up of the Compartment. In particular, the QFII status means that any increase in the investment quota is subject to authorisation from SAFE. If an investor with QFII status wishes to increase its own quota at any given time, it may take quite a long time for SAFE approval to be obtained. Any restriction placed on the amount of the quota made available to the swap Counterparty by the CSRC and SAFE could, over a certain period, prevent the latter from increasing the size of the transactions relating to OTC traded swaps, in which case the Board of Directors could decide to close the Compartment to all new subscriptions if it proves impossible to designate another swap counterparty for the Compartment. As a result, this restriction could affect the shares, which could trade at a price above their net asset value. Finally, if the swap Counterparty loses its QFII status or the related quota, it is lawful for the Board of Directors to wind up the Compartment, especially if it is impossible to find another swap counterparty.

State control of exchange rates and of future exchange rate variations

Since 1994, the conversion of CNY into USD has been at the rates fixed by the People's Bank of China; the rates are fixed daily based on the exchange rates observed the previous day on the interbank market in the PRC. On 21 July 2005, the government of the PRC introduced a floating exchange rate regime managed such that the value of the CNY fluctuates in line with supply and demand within a range fixed by the authorities as well as with reference to a basket of currencies. No guarantee can be given that in the future the CNY exchange rate will not fluctuate significantly against the USD or other currencies. Any appreciation of the CNY against the USD or the EUR will increase the performances of the Benchmark Indicator expressed in USD or in EUR which replicates the Compartment by means of an OTC swap, and therefore its net asset value, which will be expressed in USD or in EUR, and vice versa.

Dependence on the A shares market

The existence of a liquid market for the A shares can depend on the supply of and demand for A shares. It should be noted that the Shanghai and Shenzhen stock exchanges, on which the A shares are listed, are undergoing huge changes and that their market capitalisation and the volume of trades carried out on these exchanges is lower than on the stock exchanges of the developed countries. The volatility of the markets in A shares and the difficulties in settling trades in the same could result in not-insignificant fluctuations in the price of the securities traded on these markets, and ultimately in the net asset value of the Compartment.

Taxation in the PRC

Several tax reforms have been introduced by the government of the PRC in recent years, and it is possible that the current tax rules will be revised or modified in the future. Any change in tax policy could lead to a reduction in after-tax profits for companies in the PRC on which the Compartment's performance depend.

Moreover, even if the PRC's State Administration of Taxation has confirmed a withholding tax on income in the form of dividends, premiums and interest paid to investors with QFII status, it should be noted that it is impossible to know with certainty what obligations of these investors are in respect of tax deducted by the PRC on capital gains and profits (apart from dividend, premium and interest income). The OTC swap contracts concluded between the Compartment and the swap Counterparty will accordingly contain a specific clause in the section on contractual obligation under which the Compartment undertake to indemnify the swap Counterparty with any future or respective tax charge which could arise from the transactions carried out by the swap Counterparty on the A shares and the holding of such shares by the same for the purposes of hedging these OTC shares.

If the Valuation Agent for the swaps and the Compartment believes that the risk of a similar withholding tax being levied on the gains realised by QFII investors is becoming significant, they can at any moment adjust the valuation in order to take account of the expected amount of the tax liability. Any adjustment to the valuation of the OTC swaps thus made will remain in force until the position of the swap Counterparty in respect of the PRC taxes is known and the Valuation Agent for the swaps should then:

Decide either that any amount thus deducted from the value of these OTC swaps is sufficient to cover the corresponding tax liability of the swap Counterparty in which case the Valuation Agent for the swaps can decide to adjust the value of these OTC swaps upwards, in order to correct any over-adjustment that has been made, or

Decide that any amount thus deducted from the value of these OTC swaps is not sufficient to cover the corresponding tax liability of the swap Counterparty, on which case the Valuation Agent for the swaps can decide to further adjust the value of these OTC swaps.

Consequently, we would draw investors' attention to the fact that:

The net asset value of the Compartment may be diminished by any such adjustment made to the value of the OTC swaps;

The diminution in the performances of the Compartment which shareholders may experience following such adjustment will depend on the date on which they bought and/or sold the shares in the Compartment; and

The scale of this diminution on the performances of the Compartment may not be proportional to the number of equities that an investor holds in the Compartment due to a potential retrospective amendment to the tax due in the PRC and, in certain circumstances, this could amount to 100% of the net asset value of a share class.

According to the provisions of the PRC Corporate Income Tax law (effective from 1 January 2008), dividends, premiums, interest and capital gains originating in the PRC and paid to a company that is not resident in the PRC for tax purposes, are subject to a withholding tax of 10%. This withholding tax may be reduced by virtue of a double taxation treaty with China, provided that certain conditions are met and that the PRC's tax administration is in agreement. Although PRC's tax administration may apply a withholding tax to the dividends, premiums and interest paid by companies resident in China for tax purposes to investors with QFII status, it has not yet decided to tax the recovery of the withholding tax on the capital gains by the latter.

Although currently in the PRC, withholding tax is not yet charged on capital gains realised by QFII on the disposal of A shares, there is still a risk that the PRC's tax administration will try to impose a withholding tax on capital gains without any prior notice.

Moreover, there is a potential risk of this tax measure being applied retrospectively. Any withholding tax on capital gains charged to a QFII investor and owned by the latter can be passed onto the Compartment as set out above. The Management Company has decided that no provision will be set aside at this moment by the Compartment for such potential withholding tax. Consequently, any retrospective application of this tax could lead to a considerable, or even significant, fall in the Compartment's net asset value per share. As a result, it is possible that an investor will suffer losses due to the introduction of withholding tax on the capital gains payable to a QFII for periods before the investor's acquisition of his holdings in the Compartment and that these losses are inconsistent with the gain or loss resulting from the participation of this shareholder in the Compartment.

It should be noted further that where applicable dividends paid to shareholders by the Compartment derive from the receipt of corresponding amounts under the OTC swaps and that all amounts of this kind will be net of the withholding tax on dividends, premiums and interest prevailing in the PRC.

On top of the withholding tax on dividends, premiums, interests and capital gains referred to above, the PRC has, since 19 September 2008, deducted from the seller a stock exchange tax on the transfer of A shares equal to 0.1% of the value of the transferred shares.

Standards for accounting and communication of information:

The standards for accounting, audits and communication of financial data, as well as the practices applying to PRC companies in these areas may be different from those applying in countries where the financial markets are more developed. These disparities can affect areas such as the methods for valuing assets and the rules for communicating information to investors.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed upwards or downwards to performance of the large capitalisations on the “A shares” market, namely, securities issued by companies incorporated in People’s Republic of China, excluding Hong Kong.

The amount that it is reasonable to invest in this Compartment depends on each investor’s personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 August 2013.*
- *Compartment creation date: 10 September 2003.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of CSI 300 Net Return Index CNY (Ticker: CSIN0300).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
LYXOR CSI 300 A-SHARE UCITS ETF - C-USD	FR0011526904	USD	-23.71% ⁽¹⁾	-23.71% ⁽³⁾	5.23% ⁽²⁾	12.95%

⁽¹⁾ "Tracking error is nil."

⁽²⁾ "Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency."

⁽³⁾ "When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date)."

The Tracking Error is 0.1577% for the sub-fund. The Tracking Error target for the year was 0.3%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	1%
Orange Flag	1%
Yellow Flag	25%
Green Flag	73%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	90%
360	500	425	Scope 1 reported (vs estimated)	30%
			Scope2 reported (vs estimated)	13%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	4%
Thermal Coal	2%
Natural Gas	1%
Oil	1%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	5 118
Gas (MMBOE)	0.0004
Oil (MMBOE)	0.0003

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	896.7
Thermal Coal	9 347.3
Oil	129.1
Gas	132.5
Total	10 509.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	9 347.3
Oil Sands	0.0
Shale Oil or Shale Gas	3.9
Sum High Impact Reserves	9 351.1
Other	1 158.3

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	2.0%	1.1%	0.6%
Some efforts	28.2%	60.3%	11.0%
Limited efforts/information	7.4%	19.8%	0.0%
No effort/No evidence	62.2%	18.8%	88.2%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	17%
20-49.9%	3%
50-100%	3%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	8.4%
Energy Efficiency	21.1%
Green Building	4.9%
Pollution Prevention	3.1%
Sustainable Water	4.6%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.8%
Energy Efficiency	2.0%
Green Building	0.8%
Pollution Prevention	0.2%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	87,186.52

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

a) Exposure obtained through effective portfolio management techniques and derivative financial instruments

• Exposure obtained through effective management techniques:	-
- Securities lending:	-
- Securities borrowing:	-
- Reverse repurchase agreements:	-
- Repurchase agreements:	-

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value.

Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.40% per year
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR PEA AMERIQUE LATINE (MSCI EM LATIN AMERICA) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor PEA Amerique Latine (MSCI EM Latin America) UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several Euro zone countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of C-EUR equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s investment objective is to replicate, upwards or downwards, the evolution of the MSCI Emerging Markets Latin America Net Total Return (the “Benchmark Indicator”), listed in US dollars (USD), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of performances of large and mid-capitalisations of the 5 following countries: Brazil, Chili, Colombia, Mexico and Peru.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The Benchmark Indicator is the MSCI Emerging Markets Latin America Net Total Return index (net dividends reinvested).

The Benchmark Indicator measures the performance of the equities market of South America emerging markets.

The Benchmark Indicator is calculated and published by international index supplier MSCI.

MSCI Inc. is one of the leading providers of financial indices. MSCI’s products and services include not only financial indices, but also performance and risk portfolio analysis tools for investors. MSCI is based in New York, and has commercial and research offices across the entire world.

The Benchmark Indicator is an equity index calculated and published by international index supplier MSCI. The Benchmark Indicator comprises only Latin American emerging market stocks and boasts fundamental characteristics of MSCI indices, namely: adjustment of the market capitalisation of stocks in the Benchmark Indicator based on their free float and level of representation on the markets of each country such that it represents 85% of the free float-adjusted market capitalisation.

The emerging markets are those of Brazil, Chili, Colombia, Mexico and Peru.

The Benchmark Indicator is based on the methodology of MSCI Global Investable Market Indices (GIMI), a global and consistent Benchmark construction approach, whether on a world or regional scale, covering all sizes of market capitalisation, activity sectors or even investment styles. This methodology aims to provide comprehensive coverage of the investment universe with an emphasis on liquidity, investibility and replicability. The Benchmark Indicator is revised every quarter (February, May, August and November) to ensure it properly reflects the changes on the emerging market stock markets while limiting the portfolio turnover rate. During the reviews of May and November, the Benchmark Indicator is reweighted and the mid and large capitalisation limits are revised.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

Benchmark indicator revision and composition

The Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities. The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .dMILA00000NUS

Bloomberg code: NDUEEGFL

The Benchmark Indicator's closing price is available on the MSCI Internet site: www.msci.com

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited director of the MSCI Emerging Markets Latin America Net Total Return benchmark index is included in the register of directors and benchmark indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or termination of supply of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

At all times, the Compartment will invest at least 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the agreement on the European Economic Area and that has signed, with France, a tax convention that includes an administrative assistance clause for the purpose of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator.

This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the manager intends to primarily use the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- (i) Subordination to the main market indices or to the Benchmark Indicator,
- (ii) Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- (iii) rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- (i) Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- (ii) Geographical area,
- (iii) Sector.

For more information on the abovementioned eligibility and diversification criteria investors can visit the following Internet site: www.lyxoretff.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases.

The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;

(ii) Invested in government bonds of highest grade;

(iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;

(iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the index, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty.

The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets.

The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the index, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The Compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the reference Benchmark Indicator followed by the Compartment.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities market of Latin America.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 August 2013.*
- *Compartment creation date: 2 September 2013.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MSCI Daily TR Net Emerging Markets Latin America USD USD (Ticker: NDUEEGFL).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor PEA Amerique Latine (MSCI EM Latin America) UCITS ETF - Capi.	FR0011551019	EUR	-0.36% ⁽¹⁾	0.31% ⁽³⁾	-2.74% ⁽²⁾	10.41%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”

⁽²⁾ “Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency.”

⁽³⁾ “When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date).”

The Tracking Error is 0.0255% for the sub-fund. The Tracking Error target for the year was 0.1%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
355	318	287	Scope 1 reported (vs estimated)	57%
			Scope2 reported (vs estimated)	54%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	22%
Thermal Coal	10%
Natural Gas	10%
Oil	10%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	386
Gas (MMBOE)	0.0020
Oil (MMBOE)	0.0124

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	290.4
Thermal Coal	705.8
Oil	5 258.4
Gas	654.5
Total	6 914.5

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	705.8
Oil Sands	6.6
Shale Oil or Shale Gas	6.7
Sum High Impact Reserves	719.1
Other	6 195.4

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	13.9%	9.5%	9.0%
Some efforts	65.8%	81.6%	33.0%
Limited efforts/Information	4.2%	5.0%	2.0%
No effort/No evidence	16.2%	3.9%	52.7%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	7%
20-49.9%	1%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	16.0%
Energy Efficiency	6.4%
Green Building	0.3%
Pollution Prevention	0.4%
Sustainable Water	1.3%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.4%
Energy Efficiency	0.2%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.2%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	1,087,644.31
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	71,310.82

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.65% per year including tax

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

C-EUR equities: Capitalisation of all the amounts available for distribution.

appendix

LYXOR MSCI EM LATIN AMERICA PEA UCITS ETF (the "Compartment") is in no way sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), or by any MSCI subsidiary, or by any of the entities involved in the establishment of the MSCI indices. The MSCI indices are the exclusive property of MSCI and the MSCI indices are trademarks of MSCI or of its subsidiaries and have been the subject of a licence granted, for certain requirements, to Lyxor Asset Management. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment and calculation of the MSCI indices makes any declaration or issues any express or implicit guarantee relative to bearers of the Compartment's equities or more generally to the public, with regard to the timeliness of a transaction involving mutual fund equities in general or the Compartment's equities in particular, or regarding the ability of any MSCI index to replicate the performance of the overall equity market. MSCI or its subsidiaries are the owners of certain names, registered trademarks and of the MSCI indices that are determined, composed and calculated by MSCI without discussion with Lyxor International Asset Management or the Compartment. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices is required to take into consideration the needs of Lyxor International Asset Management or of the bearers of the Compartment's equities when determining, composing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices makes any decision regarding the launch date, the price, the quantity of the Compartment's equities, or even the determination and calculation of the formula used to establish the Compartment's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the establishment of the MSCI indices assumes any liability or obligation with regard to the administration, management or marketing of the Compartment.

THOUGH MSCI OBTAINS INFORMATION FOR INTEGRATION OR USE IN THE CALCULATION OF THE INDICES FROM SOURCES THAT MSCI CONSIDERS TO BE RELIABLE, NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OR CALCULATION OF THE MSCI INDICES GUARANTEES THE ACCURACY AND/OR EXHAUSTIVE NATURE OF THE INDICES OR OF ANY INCLUDED DATA. NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OF A CALCULATION FOR THE MSCI INDICES GIVES ANY EXPRESS OR IMPLICIT GUARANTEE REGARDING THE RESULTS THAT MAY BE OBTAINED BY THE HOLDER OF A MSCI LICENCE, THE CUSTOMERS OF THE SAID LICENSEE AS WELL AS THE COUNTERPARTS, BEARERS OF THE FUND OR ANY OTHER PERSON OR ENTITY, BASED ON THE USAGE OF THE INDICES OR OF ANY DATA INCLUDED WITH REGARD TO THE RIGHTS GRANTED BY LICENCE OR FOR ANY OTHER USAGE. NEITHER MSCI NOR ANY OTHER PARTY GIVES EXPRESS OR IMPLICIT GUARANTEES AND MSCI REJECTS ALL GUARANTEES REGARDING THE COMMERCIAL VALUE OR ADEQUACY FOR SPECIFIC USAGE OF THE INDICES OR INCLUDED DATA. NOTWITHSTANDING THE ABOVE, UNDER NO CIRCUMSTANCES MAY MSCI OR ANY OTHER PARTY BE HELD LIABLE WITH REGARD TO ANY DAMAGES, WHETHER DIRECT, INDIRECT OR OTHER (INCLUDING THE LOSS OF EARNINGS), EVEN IN CASE OF KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

2. Evolution of the net assets

	31.10.2018	31.10.2017
Currency	EUR	EUR
Net assets at the start of the fiscal year	953,424.26	1,080,598.85

LYXOR PEA AMERIQUE LATINE (MSCI EM LATIN AMERICA) UCITS ETF
(compartment of the Multi Units France mutual fund)

3.1.4 Breakdown of the off-balance sheet headings by market type (notably rates, equities)

	Rate	Equities	Exchange	Other
Hedging operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-
Other operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	985,080.69
Other commitments	-	-	-	-

3.2 Breakdown by rate types of the asset, liability and off-balance sheet items

	Fixed rate	Variable rate	Revisable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	0.06
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0.06	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	JPY	SEK	DKK	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	109,890.18	101,563.89	48,551.00	113,787.39
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	2,388.85
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	17,835.18
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	17,835.18
-	-
-	-
-	-
-	-
Other operations	-
Debts	18,468.92
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Account payable	12,177.28
Deferred settlement purchases	2,657.90
Accrued expenses	633.74
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	5,200	123,120.92	-	-
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.65
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and UCITS managed by these entities:	
- Equity	-
- Swaps	49,792.61

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	-	-	-	-

	31.10.2018	31.10.2017
Allocation of the earnings	EUR	EUR
Sums still to be allocated		
Carried forward	-	-
Earnings	-6,946.46	-6,011.38
Total	-6,946.46	-6,011.38
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	-6,946.46	-6,011.38
Total	-6,946.46	-6,011.38
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-
Tax credits linked to the allocation of the profit and loss	-	-

3.11. Allocation table of the amounts available for distribution related to the net capital gains and losses
(in the Compartment's currency of account)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	-	-

	31.10.2018	31.10.2017
Allocation of the net capital gains and losses	EUR	EUR
Sums still to be appropriated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	95,051.12	17,040.40
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	95,051.12	17,040.40
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-
Capitalisation	95,051.12	17,040.40
Total	95,051.12	17,040.40
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Distribution per unit	-	-

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	1,087,644.31	953,424.26	1,080,598.85	1,838,176.95	1,716,784.73
Number of outstanding equities	41,100	35,900	41,900	95,000	65,000
Net asset value	26.4633	26.5577	25.7899	19.3492	26.412
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	2.14	0.30	5.54	-7.20	-0.81

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 2 September 2013.

4. Inventory as of 31.10.2018

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor MSCI Select OECD Emerging Markets GDP UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to reproduce, upwards and downwards, the evolution of the MSCI Select OECD Emerging Markets GDP Weighted Index (Bloomberg code: M1EFOEGD) (the “Benchmark Indicator”) listed in US dollars (USD), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of the performances of the equities of mid-cap and large-cap equities of the emerging OECD countries.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark indicator is the MSCI Select OECD Emerging Markets GDP Weighed Index.

The Benchmark Indicator is derived from the MSCI Select OECD Index parent index (the “Parent Index”) and measures the performance of large-cap and mid-cap companies in the emerging OECD countries. These countries include: Chile, the Czech Republic, Hungary, Korea, Mexico, Poland and Turkey. Each country is weighted in proportion to the size of its economy (as measured by GDP) rather than by the size of its equity market.

The Benchmark Indicator is calculated and published by international index supplier MSCI.

MSCI Inc. is one of the leading providers of financial indices. MSCI’s products and services include not only financial indices, but also performance and risk portfolio analysis tools for investors. MSCI is based in New York, and has commercial and research offices across the entire world.

The Benchmark Indicator is a custom index calculated by MSCI which includes a group of OECD countries that are selected using an RSI approach. The Benchmark Indicator uses the same methodology used by the MSCI GDP Weighted Indices.

The Benchmark Indicator is composed of a static list of the countries that compose the Parent Index, which currently includes: Chile, the Czech Republic, Hungary, Korea, Mexico, Poland and Turkey. The index scope is fully reviewed by the licensee and notified to MSCI at least five business days before the effective rebalancing date.

Any change in the scope of the Parent Index will be replicated in the Benchmark Indicator.

MSCI GDP Weighted Indices are rebalanced annually, generally on the last business day of May, which is the annual rebalancing date of the Parent Index. A country added to the Parent Index will be added to the Benchmark Indicator upon the next annual rebalancing. In contrast, a country removed from the Parent Index will be simultaneously removed from the Benchmark Indicator.

The Benchmark Indicator is a Net Total Return index. A Net Total Return index includes dividends and all other types of income distribution in the calculation of the performance of the index's components.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the following Internet site: www.msci.com

Benchmark indicator revision and composition

The Benchmark Indicator is rebalanced annually.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.msci.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator is also calculated in real-time on each trading day. The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .dMGEF0000WNUS

Bloomberg code: M1EFOEGD

The Benchmark Indicator's closing price is available on the MSCI Internet site: www.msci.com

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited director of the MSCI Select OECD Emerging Markets GDP Weighted Index is listed on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used to describe the measures

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities and debt securities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets) including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,

- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation), rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent)

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties. As a result, the Management Company will not commit to a formal, traceable and verifiable procedure for open competition between the counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the index, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the fund and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Fund's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the index, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the class of Acc (EUR/USD) equities

The aforesaid equity class is exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity class can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed to the equities market of mid-cap and large-cap equities of the emerging OECD countries.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.
- Creation date of the Multi Units France mutual fund: 4 March 2002.
- Compartment approval date by the AMF (Financial Markets Authority): 29 November 2013.
- Compartment creation date: 12 December 2013.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MSCI SELECT EM OECD CUSTOM GDP USD NTR USD (Ticker: M1EFOEGD).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor MSCI Select OECD Emerging Markets GDP UCITS ETF - Acc	FR0011645605	EUR	-19.75% ⁽¹⁾	-19.03% ⁽³⁾	-2.74% ⁽²⁾	-3.40%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index"

⁽²⁾ "Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk.

The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency."

⁽³⁾ "When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date)."

The Tracking Error is 0.0266% for the sub-fund. The Tracking Error target for the year was 0.15%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy.
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products.
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy.
- MSCI and Sustainalytics ESG research to integrate ESG issues.
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	5%
Orange Flag	12%
Yellow Flag	28%
Green Flag	55%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
518	463	392	Scope 1 reported (vs estimated)	61%
			Scope2 reported (vs estimated)	62%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	13%
Thermal Coal	7%
Natural Gas	5%
Oil	5%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	1 328
Gas (MMBOE)	0.0008
Oil (MMBOE)	0.0006

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

TCO2e/\$M invested	
Metallurgical Coal	598.3
Thermal Coal	2 425.7
Oil	249.4
Gas	201.1
Total	3 526.8

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

TCO2e/\$M invested	
Thermal Coal	2 425.7
Oil Sands	0.0
Shale Oil or Shale Gas	105.8
Sum High Impact Reserves	2 531.5
Other	995.2

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.5%	2.0%	2.2%
Some efforts	64.0%	62.8%	43.4%
Limited efforts/Information	8.9%	5.1%	3.9%
No effort/No evidence	25.6%	10.2%	47.7%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	23%
20-49.9%	1%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	11.8%
Energy Efficiency	23.0%
Green Building	0.2%
Pollution Prevention	1.2%
Sustainable Water	4.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.3%
Energy Efficiency	1.1%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.2%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

a) Exposure obtained through effective portfolio management techniques and derivative financial instruments

• Exposure obtained through effective management techniques:	-
- Securities lending:	-
- Securities borrowing:	-

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.55% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Unit capitalisation *	-16.03	14.30	0.85	-4.64	13.80

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the Compartment. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR EURO STOXX BANKS (DR) UCITS ETF
(compartment of the Multi Units France mutual fund)

Compartments / feeder	LYXOR EURO STOXX BANKS (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities from Euro zone countries.

At least 60% of the Lyxor EURO STOXX Banks (DR) UCITS ETF Compartment, (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several Euro zone countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of this Compartment is to replicate the upwards or downwards evolution of the “EURO STOXX® Banks Index” (Bloomberg code: SX7T) (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of the performance of the largest banks in the Euro zone.

The anticipated level of the ex-post tracking error under normal market conditions is 0.40%.

Benchmark indicator:

The Benchmark Indicator is the EURO STOXX® Banks Index.

The Benchmark Indicator measures the performance of Euro zone banks, as defined by the Industry Classification Benchmark (ICB), and offers exposure to the following Euro zone countries: Austria, Finland, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal and Spain. The index is a sub-index of the EURO STOXX® Index (the “Parent Index”), which measures the performance of the large-cap, mid-cap and small-cap equities of the Euro zone’s developed economies.

The Benchmark Indicator is weighted by float-adjusted market capitalisation and measures the performance of Euro zone banks, as defined by the Industry Classification Benchmark (ICB). The ICB categorizes companies on the basis of their main source of income. 4 categories exist, from the largest to the most detailed: into 10 different industries, which are in turn broken down into 19 super-sectors, 41 sectors and 114 sub-sectors.

The Benchmark Indicator is rebalanced quarterly, in March, June, September and December.

The Benchmark Indicator is a “Net Total Return” index. A Net Total Return index includes dividends and all other types of income distribution in the calculation of index performance.

Benchmark indicator revision and composition

The Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by STOXX and are available on the Internet site: <https://www.stoxx.com/indices>

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator is also calculated in real-time on each trading day. The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .SX7T

Bloomberg code: SX7T.

The Benchmark Indicator's closing price is available on the Internet site: <https://www.stoxx.com/indices>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall STOXX of the EURO STOXX® Banks Index has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's Internet site at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

The Compartment will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

Investment in the assets of undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may use FFIs traded on a regulated market or over the counter.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment. Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the “Agent”) to provide the following services in connection with the Compartment’s temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment’s behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment’s behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment’s management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment’s gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment’s annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment’s overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment’s annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment’s counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases where the investment strategy used involves a counterparty risk for the Compartment, in particular in the event of temporary acquisition and sale of securities, the Compartment may receive securities that are considered as guarantees in order to reduce the counterparty risk associated with these transactions. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Counterparty risk

The Compartment may use FFI on an ancillary basis.

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the index, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework.

The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a FFI), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Currency risk linked to the Compartment listing

The Compartment may be listed on certain markets of multilateral trading facilities in a currency other than that of the Benchmark Indicator. Investors buying the Compartment in a currency other than that of the Benchmark Indicator are exposed to currency risk. Therefore, the value of the investment made in a currency other than that of the Benchmark Indicator may be reduced in spite of an increase of the value of the benchmark Indicator, due to exchange rate fluctuations.

- Risk of concentration

The Fund reproduces the performance of the Benchmark Indicator concentrated on a limited number of underlying securities. The exposure to such a low-diversified Benchmark Indicator may lead to a volatility higher than that of a more diversified index as well as a higher liquidity risk in the case of deterioration of the liquidity or a suspension of listing of one or more components of the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the eurozone equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 29 November 2013.*
- *Compartment creation date: 12 December 2013.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of DJ E.STOXXBANK R EUR (Ticker: SX7T).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor EURO STOXX Banks (DR) UCITS ETF - Acc	FR0011645647	EUR	-25.91% ⁽¹⁾	-26.20%		-14.22%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- income related to securities financial transactions;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.3924% for the sub-fund. The Tracking Error target for the year was 0.4%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on Lyxor website.

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

ESG score	Environmental	Social	Governance
5.4	7.2	5.4	5.0

Portfolio rated 100%
Nb Securities rated 26

Pillars	Corporate		Government		
	Themes	Score	Weight	Themes	Score Weight

Breakdown of companies according to their ESG rating

Sector	AAA	AA	A	BBB	BB	B	CCC	Not Rated	Leaders (AAA,AA)	Average (A, BBB, BB)	Laggards (B, CCC)
Financials	20.7%		63.2%	12.1%	4.0%				21%	79%	0%

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	0%
Orange Flag	33%
Yellow Flag	36%
Green Flag	31%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
6	4	4	Scope 1 reported (vs estimated)	98%
			Scope2 reported (vs estimated)	99%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gas	0%
Oil	0%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	0.0%	0.0%
Some efforts	97.5%	99.1%	88.2%
Limited efforts/Information	0.0%	0.9%	0.0%
No effort/No evidence	2.5%	0.0%	11.8%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	0%
20-49.9%	0%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.0%
Energy Efficiency	0.0%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

As at 31 October 2018, the CIU does not have a securities position subject to the SFTR regulations, i. e. a pension transaction, securities or commodities lending/borrowing, purchase/resale or sale/purchase transaction, margin lending transactions and total income swap (TRS). However, during the period, the CIU made transactions of financing on securities subject to SFTR regulations that generated revenues of €197,557.03 and costs of 106,376.86 euros.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

<

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;

Transaction commissions invoiced to the Compartment.

Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.30% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities	The amount of the transaction	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Unit capitalisation *	-0.72	17.01	-25.13	-4.14	8.35

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the Compartment. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Terms of determination and allocation of amounts available for distribution:

Class of Acc equity: Capitalisation of all the amounts available for distribution.

Class of Dist equity: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the US Treasury bonds market while reproducing the evolution of the “SGI Double Short 10y US Treasury” (Bloomberg Code: SGIXDSTY) index (the “Benchmark Indicator”) listed in US Dollar (USD), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the “SGI Double Short 10y US Treasury” index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.07%.

Benchmark indicator:

The Benchmark Indicator is the SGI Double Short 10y US Treasury strategy index.

The Benchmark Indicator is a strategy index prepared by the Société Générale research teams, using a proprietary methodology. The Benchmark Indicator is calculated and maintained by Standard & Poor’s.

The Benchmark Indicator is a total return strategy index that reflects the overall return over a period of time relative to the composite performance of a notional investment in the following: a series of “CBOT 10y US Treasury” futures and a US Federal Reserve’s effective money-market rate.

The Benchmark Indicator offers inverse exposure, with daily 200% inverse leverage, to increases and decreases on futures contracts on 10 years US Treasury bonds. The Benchmark Indicator is therefore correlated with the performance of:

A notional short position in CBOT 10y US Treasury futures that are closest to their expiry date, to which 200% leverage is applied,

And:

A long position in a daily investment that is representative of the interest earned on an overnight deposit that is indexed at the US Federal Reserve’s effective funds rate.

Therefore if the value of CBOT 10y US Treasury futures declines on a Calculation Date (as this term is defined below), the Compartment’s net asset value will increase by twice this amount on this Calculation Date and, inversely will decrease by twice as much if the price of CBOT 10y US Treasury futures rises, in which case shareholders will not benefit from the increase in the Benchmark Indicator.

The notional amount of the two investments in the CBOT 10y US Treasury futures and in the overnight deposit is revised daily in accordance with the Benchmark Indicator’s most recent performance.

The Benchmark Indicator’s daily performance is therefore equivalent to the inverse of twice the daily performance of CBOT 10y US Treasury futures plus the interest at the Fed Fund rate received daily on the value of the CBOT 10y US Treasury futures at the previous day’s fixing price at 5:30 pm.

The leveraged position in a series of suitable futures contracts is rolled over to the next series of futures contracts at each revision date (as this term is defined below). The series of futures contracts is not modified between Revision Dates.

A “Revision Date” is the first business day immediately before the expiry date of a given series of futures contracts. The Benchmark Indicator is calculated and published by Standard & Poor’s Financial services LLC (“S&P”) in accordance with the Benchmark Indicator methodology.

The composition of the Benchmark Indicator is revised quarterly. The complete methodology is available at www.sgindex.fr

The monitored performance is that of the Benchmark Indicator’s closing price at 5:30 p.m.

As the Benchmark Indicator’s calculation methodology is not based on a direct exposure to the 10 years US Treasury bonds, but is rather based on an indirect exposure via futures contracts, the Compartment’s performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment’s performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment’s equities.

Benchmark indicator revision and composition

The Benchmark Indicator is revised quarterly, in accordance with the methodology described in the Benchmark Indicator Rulebook, which is available on the SGIndex Internet site at: www.sgindex.fr.

The Benchmark Indicator’s leverage may also be adjusted intraday during trading hours if it falls by more than 40% on a Benchmark Indicator Calculation Day (i.e. if the absolute value of CBOT 10y US Treasury futures rises by more than 20%).

This frequency of the index rebalancing described above and the rolling over of the futures contracts at the Revision Dates could increase the Compartment’s costs and therefore adversely affect the Compartment’s performance.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the 5:30 pm fixing price for CBOT 10y US Treasury futures.

The Benchmark Indicator is also calculated in real time every business day in France provided that the stock markets on which the Benchmark Indicator underlying components are listed are open, hereinafter a “Benchmark Indicator Calculation Day”.

The Benchmark Indicator is available via Reuters and Bloomberg.

Reuters code: .SGIXDSTY

Bloomberg code: SGIXDSTY

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall Standard & Poor’s Financial services LLC of the SGI Double Short 10y US Treasury benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been entered in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment’s assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is inversely exposed with a daily amplifying x2 leverage, upward or downward, to the daily performance of the US Treasury bond market for which the Benchmark Indicator is a representative indicator.

LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

Interest rate sensitivity range within which the UCITS is managed:	Between 10 and 18
Currencies in which securities held by the Compartment are listed:	US: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets ⁽¹⁾
Geographical area of issuers of securities to which the Compartment is exposed:	US: from 0 to 100% of net assets

⁽¹⁾ The equity classes that are not denominated in USD may however be exposed to currency risk.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the regulatory ratios, bonds issued by an OECD member country or by a non-governmental issuer resident in an OECD country.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

- o Senior debt,
- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives guarantee in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.

- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment’s assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;

- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instruments ("FFI") traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator. When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly inversely exposed to the fluctuations affecting the price or level of the underlying CBOT 10y US Treasury futures at the Benchmark Indicator on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even higher depreciation of the Compartment's net asset value.

The daily readjustment of the exposure shown in the formula of the underlying "double short" Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the opposite of the performance of the underlying CBOT 10y US Treasury futures at the Benchmark Indicator. For example, if the underlying CBOT 10y US Treasury futures of the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the underlying CBOT 10y US Treasury futures of the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying CBOT 10y US Treasury futures of the Benchmark Indicator depreciate by 10% a given banking day then is appreciate by 6% the next banking day, they will have depreciated by a total of 4.6%, while the Compartment will be appreciated (before deduction of the applicable fees) by 5.6% over the same period.

Negative scenario 1: Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	10%	100	-20%	100	x-2
day 2	-5%	110	10%	80	x-2
		104.5		88	
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2: Case in which the resulting negative leverage is less than 2 within the scenario of a decrease of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	-10%	100	20%	100	x-2
day 2	6%	90	-12%	120	x-2
		95.4		105.6	
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show a decrease over this same period.

Inverted leverage scenario 3: Case in which the resulting leverage is positive over the period

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	5%	105	-10%	90	x-2
day 2	-5%	99.75	10%	99	x-2
Whole period	-0.25%		-1.00%		x4

- Risk that the Compartment's management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the US government and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of improvement of the issuer credit quality that could notably led to an improvement of the rating assigned by rating agencies to the issuer, which would have a positive impact on the price of the issuer's bonds and thus have a negative impact on the net asset value of the Compartment. The Compartment is exposed to the credit risk of the US government.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Eligible subscribers and typical investor profile: The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure with a daily amplifying x2 leverage, upward or downward, to the US government bonds market while reproducing the evolution of the Benchmark Indicator.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As this product is an arbitration product, this Compartment could not be suitable for investors that wish to make a medium or long-term investment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of SGI Double Short 10Y US Treasuries USD (Ticker: SGIXDSTY).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor 10Y US Treasury Daily (-2x) Inverse UCITS ETF - Acc	FR0011607084	USD	9.72% ⁽¹⁾	10.15%		-10.27%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index."

The Tracking Error is 0.0038% for the sub-fund. The Tracking Error target for the year was 0.07%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	34,456,060.66
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	2,070,747.15

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of holding an EMTN, it will be assessed on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.20% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in USD.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equity: Capitalisation of all the amounts available for distribution.

Class of Dist equity: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)*	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation *	12.78	-1.73	-4.51	15.65	-13.19

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the Compartment. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF
(compartment of the Multi Units France mutual fund)

Compartments / feeder	LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of eurozone countries.

At least 60% of the Lyxor FTSE Italia Mid Cap PIR (DR) UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several eurozone countries including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The management objective of this Compartment is to replicate the upwards or downwards evolution of the “FTSE Italia PIR Mid Cap Net Tax Index” (“Benchmark Indicator”) listed in euros (EUR) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

It is representative of the performance of the equities of medium-capitalisation listed on Borsa Italiana.

The maximum tracking error target between the evolution of the Compartment's net asset value and that of the Benchmark Indicator is 2%.

Benchmark indicator:

The Benchmark Indicator is the FTSE Italia PIR Mid Cap Net Tax Index.

The Benchmark Indicator is an index weighted by the adjusted market capitalisation of the free float representing the performance of the shares of the mid-market capitalization listed on Borsa Italiana.

The Benchmark Indicator includes the components of the FTSE Italia Mid Cap Index eligible for the "Piano Individuale di Risparmio a lungo termine" (PIR) according to the Italian Finance Law 2017 (Law N° 232 of 11 December 2016) as amended.

The FTSE Italia Mid Cap Index represents the 60 companies listed on Borsa Italiana that are ranked highest in terms of market capitalization and liquidity (based on daily trading volumes) and are not included in the FTSE MIB index.

Each component of the Benchmark Indicator is capped at 10% at each quarterly rebalancing of the Benchmark Indicator. Any component with a weighting greater than 10% will be reduced to a weighting of 10%.

The sum of the weights of components with a weight greater than 5% is capped at 40%.

The Benchmark Indicator is rebalanced quarterly, in March, June, September and December.

The Benchmark Indicator is a Net Dividends Reinvested Index, which includes the returns of index components, including net dividends and other distributions, in the calculation of the index's performance.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftserussell.com/.

Benchmark indicator revision and composition

The Benchmark Indicator is rebalanced quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by FTSE and available on the Internet site: www.ftserussell.com/. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities. The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg. The closing price of the Benchmark Indicator is available on the Internet site: www.ftserussell.com/.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall FTSE of the benchmark index FTSE Italia PIR Mid Cap Net Tax Index has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Benchmark Indicator has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

The Compartment's equities are included in the list of investments eligible for the "Piano Individuale di Risparmio a lungo termine" (PIR) scheme under the 2017 Italian Finance Law. (Law No. 232 of 11 December 2016).

The Compartment must invest at least 70% of its assets in financial instruments, whether or not traded on a regulated market or multilateral trading facility, issued by or entered into with companies domiciled in Italy, or in a Member State of the European Union or EEA with a permanent establishment in Italy.

At least 30% of these financial instruments, representing 21% of the total value of the Compartment's assets, must be issued by companies not included in the FTSE MIB Index or any other equivalent index.

The Compartment may not invest more than 10% of the total value of its assets in financial instruments issued by or entered into with a single company, or companies belonging to the same group, or in cash deposits.

The Compartment may not invest in companies domiciled in countries that do not have an adequate information exchange agreement with Italy. These investment restrictions will be respected for at least two thirds of each calendar year from 03/03/2017.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's Internet site at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site. As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may engage in transactions involving derivatives traded on a regulated market or over the counter.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment. Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the "Agent") to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating expenses and on the entities to which these expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs do not increase the Compartment's overall operating expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs or expenses.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depository. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Counterparty risk

The Compartment may use FFI on an ancillary basis.

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk of investing in mid-cap companies

The Compartment is exposed to mid-cap companies, which may increase market and liquidity risks. Market movements impacting the price of these securities are therefore more marked and faster than on large caps, both upward and downward. The net asset value of the Compartment may behave in the same way and therefore decline more quickly and significantly than a similar investment in large cap securities.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the index, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to the use of effective portfolio management techniques

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment's equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities market of medium-capitalisation listed on Borsa Italiana.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of FTSE Italia PIR Mid Cap Net Tax Index EUR (Ticker: ITPIRMCN).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor FTSE Italia Mid Cap PIR (DR) UCITS ETF - Acc	FR0011758085	EUR	-16.80% ⁽¹⁾	-16.56%		27.17%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques".

The Tracking Error is 0.0702% for the sub-fund. The Tracking Error target for the year was 2%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1-a)

As part of the SRI Policy, Lyxor has implemented a Shareholder Engagement for this fund. Lyxor has published its voting policy as an independent document available on [Lyxor website](http://Lyxor.com).

The scope for voting is the following: French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers. To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2*)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3*a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2*-d)

The results of our shareholder engagement are detailed in the Lyxor annual voting report published on the Website Lyxor.com.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	0%
Orange Flag	0%
Yellow Flag	3%
Green Flag	97%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	93%
219	236	147	Scope 1 reported (vs estimated)	98%
			Scope2 reported (vs estimated)	65%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gas	0%
Oil	0%

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	9.7%	0.0%	2.6%
Some efforts	37.8%	51.4%	14.8%
Limited efforts/Information	6.2%	4.2%	6.7%
No effort/No evidence	46.2%	44.4%	76.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	18%
20-49.9%	7%
50-100%	3%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	18.6%
Energy Efficiency	23.4%
Green Building	0.0%
Pollution Prevention	7.9%
Sustainable Water	15.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	2.4%
Energy Efficiency	3.1%
Green Building	0.0%
Pollution Prevention	0.3%
Sustainable Water	0.6%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	4.54

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	13,547,937.00	-	-	-	-
% of assets under management	4.54	-	-	-	-

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

1	Name	SODEXO

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	14,756,140.26

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU may use techniques for efficient management of portfolios, in compliance with the provisions of article R214-18 of the [French] Monetary and Financial Code, and in particular, temporary sales of securities.

- Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the CIU.

- Expected proportion of assets under management which may be subject to securities financing transactions: 20% of the assets of the CIU.

The revenues generated by the securities lending transactions (from which direct and indirect operational costs borne by the Agent and, as the case may be, by the management company, must be deducted) must be paid to the CIU in question. Insofar as these indirect or direct costs do not increase the operating costs of the Compartment, they were excluded from current expenses.

7.1. Earnings

	Securities lending	Securities borrowing	Repo operations	Reverse repo operations	TRS
CIU (absolute value)	698,221.58	-	-	-	-
CIU (% of total earnings)	65.00	-	-	-	-

Earnings (I - II + III - IV +/- V - VI):	2,991,242.10	7,530,211.65

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;

Transaction commissions invoiced to the Compartment.

Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.40% per year
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Cost of temporary purchases and disposals of securities	The amount of the transaction	20% maximum for the Management Company 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

appendix

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	298,159,118.21	639,479,639.46	40,681,011.83	48,091,556.69	42,514,266.27
Number of outstanding equities	2,514,867	4,487,762	414,391	437,000	521,500
Net asset value	118.5586	142.4941	98.1705	110.0493	81.523
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	2.50	2.30	1.85
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	7.34	37.29	-17.18	23.34	-16.95

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 28 March 2014.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR GERMAN MID-CAP MDAX UCITS ETF
(compartment of the Multi Units France mutual fund)

Compartments / feeder	LYXOR GERMAN MID-CAP MDAX UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of eurozone countries.

At least 60% of the Lyxor German Mid-Cap MDAX UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several eurozone countries including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of D-EUR equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of this Compartment is to replicate the upward or downward evolution of the “Mid Cap DAX Index” (Bloomberg code: MDAX) (the “Benchmark Indicator”), listed in euros (EUR) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of 50 German mid-cap companies listed on the first segment of the Deutsche Boerse.

The anticipated level of the ex-post tracking error under normal market conditions is 0.08%.

Benchmark indicator:

The Benchmark Indicator is the Mid Cap DAX Index.

The Benchmark Indicator represents the performance of the 50 mid-cap stocks listed on the first segment of the German stock exchange (Deutsche Boerse), which follow the 30 stocks that comprise the DAX 30 index, in terms of market capitalisation and liquidity.

The Benchmark Indicator is calculated by Deutsche Börse AG

The Benchmark Indicator is weighted by float-adjusted market capitalisation and is designed to measure the share price performance of the 50 mid-cap stocks listed on the first segment of the German stock exchange (Deutsche Boerse), which have the largest float-adjusted market capitalisation, after excluding the 30 stocks that comprise the DAX 30 index.

The Benchmark Indicator is a Net Dividends Reinvested Index, which includes the returns of index components, including dividends and other distributions, in the calculation of the index’s performance.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components is available on the Deutsche Börse AG Internet site: www.dax-indices.com

Benchmark indicator revision and composition

The composition of the Benchmark Indicator is reviewed quarterly.

Each Benchmark Indicator is weighted by its float-adjusted market capitalisation, with the weight of each component being capped at 10% when the index is rebalanced. The float-adjusted market capitalisation is the market value of the securities issued and available for trading.

The exact composition and the revision rules of the Benchmark Indicator are published by Deutsche Börse AG and available on the Internet site: www.dax-indices.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator is available in real-time via Reuters and Bloomberg.

Reuters code: .MDAXI

Bloomberg code: MDAX

The Benchmark Indicator's closing price is available on the Deutsche Börse AG Internet site: www.dax-indices.com

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall Deutsche Börse AG of the Mid Cap DAX Index has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the abovementioned eligibility and diversification criteria investors can visit the following Internet site: www.lyxoretff.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties. As a result, the Management Company will not commit to a formal, traceable and verifiable procedure for open competition between the counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of future financial instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk of conflicts of interest

A choice of counterparty, guided by reasons other than the sole interest of the Compartment and/or unequal treatment in the management of the equivalent portfolios could be the main sources of conflicts of interest. When Société Générale intervenes as counterparty to the FFI and/or in respect of any temporary sale of securities, conflicts of interest may arise between the Compartment's Management Company and the counterparty. The Management Company manages these risks of conflict of interest by the implementation of procedures to identify, limit and ensure their fair resolution where appropriate.

- Risk of investing in mid-cap companies

Le Compartment is exposed to medium-capitalisation companies and more specifically to the equity securities of medium and intermediate sized enterprises (ISC), which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and rapidly than those of large-cap stocks. The Compartment's net asset value could behave similarly and therefore fall more sharply and strongly than that of a similar investment in large-cap stocks.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instrument (“FFI”) negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment’s net asset value.

- Risk related to the conclusion of total return swap contracts

In the event that the counterparty to the OTC total return swap agreement entered into by the Compartment defaults, the Compartment may be exposed to a risk if the value of the Compartment's assets is lower than the value of the counterparty's commitment under this agreement. This risk could materialise in particular in the event of (i) a poor valuation of the securities covered by this contract and/or (ii) adverse market movements and/or (iii) a deterioration in the credit rating of the issuers of the securities received as collateral and/or (iv) illiquidity of the market on which the collateral received is admitted to listing. Holders' attention is drawn to the fact that over-the-counter total return swap contracts may be concluded with Société Générale, an entity of the same group as the Management Company. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Counterparty risk associated with investments in over-the-counter derivative financial instruments (including TRS), securities lending and borrowing transactions and repurchase and reverse repurchase agreements is generally limited by the transfer or commitment of a guarantee to the Compartment.

If a counterparty defaults, the Compartment may be forced to resell the received guarantee at the market price, possibly with loss at stake. The Compartment may also incur losses related to the potential reinvestment (if permitted) of guarantees by cash received as a result of a depreciation of the investments in question.

- Operational risk

Operational risk includes the risk of direct or indirect losses related to a number of factors (e. g. human error, fraud and malicious misconduct, information system failures and external events, etc.) that could have an impact on the Compartment and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment’s manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment’s underlyings can affect the Compartment’s tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment’s net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment’s underlyings, the Compartment’s net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment’s net asset value can also be affected.

If the event persists, the Compartment’s manager will decide on measures having to be adopted, which can have an impact on the Compartment’s net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,

- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities of German mid-cap companies.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 April 2014.*
- *Compartment creation date: 15 May 2014.*

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of DAX MID CAP INDEX EUR (Ticker: MDAX).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor German Mid-Cap MDAX UCITS ETF - Dist	FR0011857234	EUR	-9.56% ⁽¹⁾	-9.27%		45.06%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index".

The Tracking Error is 0.0283% for the sub-fund. The Tracking Error target for the year was 0.08%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy.
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products.
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy.
- MSCI and Sustainalytics ESG research to integrate ESG issues.
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	94%
237	238	97	Scope 1 reported (vs estimated)	98%
			Scope2 reported (vs estimated)	94%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gas	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.4%	2.1%	7.7%
Some efforts	78.3%	90.1%	43.3%
Limited efforts/Information	1.3%	2.8%	2.5%
No effort/No evidence	21.0%	5.0%	48.5%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	13%
20-49.9%	2%
50-100%	3%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	6.2%
Energy Efficiency	12.7%
Green Building	1.1%
Pollution Prevention	8.7%
Sustainable Water	7.2%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.1%
Energy Efficiency	2.7%
Green Building	0.2%
Pollution Prevention	0.2%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

	Securities lending
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending⁽¹⁾	Securities borrowing⁽²⁾	Repo operations⁽³⁾	Reverse repo operations⁽⁴⁾	TRS⁽⁵⁾
Absolute value	-	-	-	-	113,915,643.56
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed to the TRS corresponds to the market value of the basket of securities committed to the TRS at the balance sheet date, increased by the market value of the TRS at the balance sheet date.

2. Concentration data

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	2,491,305.87

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.2% per year*
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros (EUR).

Indication of the rights and conditions attached to each category of equities

Class of D-EUR equities: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

This financial instrument is not sponsored, recommended, distributed or otherwise supported by Deutsche Börse AG (the "Licensor"). The Licensor grants no guarantee and issues no statement, whether explicit or implicit, regarding the results arising from use of the index and/or the index's registered trademark, or the value of the index at any given time or date, or regarding any other matter. The Index is calculated and published by the Licensor. However, within the limits of the law, the Licensor shall not be liable to all and any third parties in the event of potential errors in the Index. Moreover, the Licensor is under no obligation to report potential errors in the Index to any third parties, including investors.

Neither the publication of the Index by the Licensor, nor the license granted for the Index and its registered trademark for use with the financial instrument or other securities or financial products arising from the index amount to a recommendation by the Licensor for capital investment, nor do they carry, in any way, a guarantee or opinion from the Licensor concerning the advisability of investing in this product.

In its capacity as sole holder of all the rights relating to the Index and the Index's registered trademark, the Licensor has only granted to the financial instrument's issuer the right to use the Index and the Index's registered trademark, together with all and any reference to the Index and its registered trademark in relation to the financial instrument.

Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	2,056,753.42
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	1,442,185.60
Account receivable	614,567.82
-	-
-	-
-	-
Other operations	-
Debts	2,077,413.29
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	2,056,753.42
Accrued expenses	20,659.87
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	1,176,510	171,902,757.96	1,007,800	149,589,594.78
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.20
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	1,175,029.49

3.10 Allocation of the earnings table *(in the Compartment's currency of account)*

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
11/07/18	2,844,110.50	3.41	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	2,844,110.50	3.41	-	-

	31.10.2018	31.10.2017
Allocation of the earnings	EUR	EUR
Sums still to be allocated		
Carried forward	-	-
Earnings	1,791,620.73	280,332.86
Total	1,791,620.73	280,332.86
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	1,791,620.73	280,332.86

LYXOR GERMAN MID-CAP MDAX UCITS ETF
(compartment of the Multi Units France mutual fund)

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

currency					
EUR	31.10.2018	31.10.2017	31.10.2016	30.10.2015	31.10.2014
Net assets	113,915,643.56	103,819,192.12	20,591,873.12	10,996,025.55	10,330,282.31
Number of outstanding equities	865,250	696,540	169,680	87,880	105,000
Net asset value	131.6563	149.0498	121.3571	125.1254	98.3836
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	3.41	3.14	2.73	3.10	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	1.52	6.47	-3.95	50.25	5.11

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 15 May 2014.

4. Inventory as of 31.10.2018

rapport
annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR FORTUNE SG MSCI CHINA A (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor Fortune SG MSCI China A (DR) UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of incomes:

Income capitalisation.

Management objective:

The Compartment’s management objective is to replicate the evolution, upward or downward, of the MSCI China A Onshore Net Total Return Index (the “Benchmark Indicator”) listed in RMB onshore (CNY), regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the MSCI China A Onshore Net Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 2%.

The attention of investors is drawn to the risks incurred specifically from investing in the People’s Republic of China (PRC), as described in greater detail in the Risk Profile section below.

It should in particular be noted that there are some uncertainties as to the capital gains on the sale of “A-shares”. On 14 November 2014, the PRC Ministry of Finance and tax authority issued circulars to clarify the tax treatment of share sales. These circulars specify in particular that:

Capital gains on sales before 17 November 2014 are taxable.

Capital gains on sales after 17 November 2014 are temporarily tax exempt.

Since the PRC tax authority has not made a definitive pronouncement on how the tax would be calculated or collected, nor on the duration of the exemption, investors should note that:

The Compartment’s Net Asset Value may be adversely affected by a change in PRC tax rules;

The adverse impact on the Compartment’s performance resulting from a change in PRC tax rules will depend on the date on which the Compartment’s equities are bought or sold; and

The magnitude of this adverse impact on the Compartment’s performance may not be proportional to the number of equities that an investor holds in the Compartment if tax obligations in the PRC are amended retroactively and, in certain circumstances, could amount to 100% of the Net Asset Value of a given equity class.

The investor is therefore urged to refer to the “Taxation in the PRC” section below for more detailed information.

Benchmark indicator:

The MSCI China A Onshore Net Total Return index. The Benchmark Indicator capitalisation-weighted index tracks the performance of the “A-Shares” market (equities in companies formed in the People’s Republic of China, excluding Hong Kong (hereinafter “PRC”), that are listed on the Shanghai and Shenzhen exchanges and traded in Chinese yuan (“CNY”). The Benchmark Indicator is generally composed of medium and large-sized companies that represent 85% of the PRC universe of investable equities, in terms of free-float market capitalisation. On 31 October 2013, the index was composed of 464 equities.

The MSCI China A Onshore Net Total Return Index is a capitalisation-weighted index, which means that the weight of each constituent index is proportional to its free-float market capitalisation.

The Benchmark Indicator is a “Total Return” index, i.e. the dividends from the constituent Benchmark Indicators are reinvested.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the Internet site: http://www.msci.com/products/indices/country_and_regional/domestic_equity_indices/china/

Benchmark indicator revision and composition

The Benchmark Indicator is revised every six months, according to the methodology described in the Benchmark Indicator’s Rulebook, available on the MSCI Internet site:

http://www.msci.com/products/indices/country_and_regional/domestic_equity_indices/china/.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy. Benchmark Indicator publication:

The Benchmark Indicator fixing price is provide daily by Reuters and Bloomberg. In CNY:

Reuters code: .MICNA0000NCN

Bloomberg code: M7CN1A

In USD:

Reuters code: .MDCNA0000GUS

Bloomberg code: MBCN1A

The Benchmark Indicator’s closing price is available at the Internet site: <http://www.msci.com>.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited director of the MSCI China A Onshore Net Total Return benchmark index is included in the register of directors and benchmark indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or termination of supply of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the highest possible correlation with the Benchmark Indicator’s performance, the Compartment will use a direct replication method, which means that the Compartment will primarily invest in the equities comprising the Benchmark Indicator.

As part of the optimisation of the Benchmark Indicator’s direct replication method, the Compartment, represented by its delegated asset manager, may decide to use a so-called “sampling” technique that involves investing in a selection of representative securities comprising the Benchmark Indicator, with the aim of limiting the costs related to the investment in the Benchmark Indicator’s various components and/or to take into account the operational constraints of investing in the various Benchmark Indicator constituents. A sampling-based replication strategy could notably prompt the Compartment to invest in a representative selection of securities (but not all securities) comprising the Benchmark Indicator, in different proportions than is the case within the Benchmark Indicator, or even to invest in securities other than the Benchmark Indicator’s components.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (“FFI”). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment’s tracking error.

To ensure that investors can benefit from transparency with regard to the adopted direct replication method (complete replication of the Benchmark Indicator or sampling in order to limit the replication costs) and to the consequences in terms of assets held by the Compartment, information on the updated composition of the basket of balance sheet equities held in the Compartment's portfolio is available on the page dedicated to the Compartment, accessible on the site www.lyxoretif.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

Investors are also informed of the fact of the Compartment's asset manager by delegation being in possession of a Renminbi Qualified Foreign Institutional Investor licence ("RQFII" or the "RQFII Licence") in the People's Republic of China ("PRC") and of obtaining a RQFII "quota" dedicated to the Compartment's investments (the "Quota"), will allow the aforesaid asset manager, acting in the name and on behalf of the Compartment, to implement the Investment strategy described above. More specifically, subject to the risks identified in the "Risk Profile" section below, it is indicated that the aforesaid RQFII Licence and Quota will notably allow the delegated asset manager:

To invest in the A-Shares in the Compartment's name and on its behalf, within the conditions and limits included in the said Quota and Licence, without a minimum holding period.

To repatriate, into and out of the PRC, the sums related to the Compartment's purchase/sale operations of A-Shares on each business day in the PRC, while performing, if relevant, the exchange operations needed for the conversion of the sums denominated in RMB into the currency of the relevant unit class.

In order to implement the investment strategy described above, the Compartment asset manager by delegation may also invest in A-Shares via the "Shanghai Hong-Kong Stock Connect", the common trading platform set up on 17 November 2014 between the Hong-Kong and Shanghai stock exchanges (the "Shanghai Hong-Kong Stock Connect"). The Shanghai Hong-Kong Stock Connect notably enables investors outside of PRC to invest in A-shares traded on the Shanghai exchange, without necessarily having to have an RQFII License and Quota.

Additional information on the conditions and limits governing operations performed by the delegated asset manager relative to Chinese A-shares, within the framework of the corresponding RQFII Licence and Quota, can also be provided to investors who make a written request for such information to the Management Company.

Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets).

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset of the Compartment. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the financial manager by delegation, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

2. Off-balance sheet assets (derivative instruments)

The Compartment will not have recourse to futures financial instruments, except, on an ancillary basis, and within limits set by regulations, to future contracts on indices or bonds that are listed on regulated markets.

With respect to FFI traded over-the-counter, in accordance with its best-execution policy the management company considers that Société Générale would be the counterparty that would generally provide the best possible execution for any hedging transactions the Compartment may enter into pursuant to its investment strategy. Accordingly, all or some of these derivatives (including index-linked swaps) may be traded with Société Générale without having to seek a competitive bid from another counterparty.

3. Securities with integrated derivatives

None.

4. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

5. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

6. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

7. Financial guarantees

No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Specific risks linked to investment in People's Republic of China:

Investors in the Compartment should be aware of the following risks inherent to investments in the People's Republic of China (PRC):

- RQFII risk

The Compartment's capacity to achieve its investment objective depends, amongst other things, on the RQFII quota allotted to it. If the Compartment's RQFII quota is too small, this could adversely affect the Compartment's operation. PRC regulations governing RQFII status may also be amended at any time by the China Securities Regulatory Commission (CSRC) and/or, with respect to foreign exchange, by the State Administration of Foreign Exchange ("SAFE") bureau, which could adversely affect the Compartment's capacity to achieve its investment objective and result in its dissolution. In particular, RQFII status means that any increase of the investment quota is subject to authorisation by the SAFE. If the Compartment wishes to increase its quota, it may take quite a long time to obtain approval from the SAFE. Any restriction involving the Compartment's granted quota may affect its investments. Such a restriction may therefore affect the trading of the Compartment's shares on an exchange, which could, in such circumstances and depending on the exchange's rules, trade above their Net Asset Value. Lastly, if the delegated asset manager loses its RQFII licence, if the RQFII quota is reduced, or if RQFII requirements are significantly increased, the Board of Directors may decide to dissolve the Compartment, subject to AMF approval.

- Shanghai Hong-Kong Stock Connect risks

The Compartment's capacity to achieve its investment objective depends among other things on whether or not A-shares can be traded via the Shanghai Hong- Kong Stock Connect. As of the date of this publication, the Shanghai Hong Kong Stock Connect imposes two quotas on the total net purchase orders that may be executed: a daily quota and an overall quota since 17 November 2014. If either of these quotas is exceeded, purchase orders on the Shanghai Hong-Kong Stock Connect will be automatically suspended (at least temporarily in the case of the daily quota), which could impair the Compartment capacity to achieve its investment objective.

- Economic, political and social risks

Any political change, social instability and/or unfavourable diplomatic, political, economic and/or social development that may occur in or in connection with the PRC (hereinafter a "Policy Change") could result in the imposition by the Chinese government of additional restrictions and limits, such as expropriation, confiscatory taxes or the nationalization of certain companies included in the Benchmark Indicator. Investors should also note that a Policy Change may have an adverse impact on PRC stock exchanges and on the Compartment's performance, and could ultimately result in the Compartment's dissolution by decision of the Board of Directors.

- Economic risks in PRC

The economy of the PRC has grown very rapidly. It is, however, not certain that this growth will continue and it may be irregular across the different sectors of the PRC economy. The PRC government has from time to time put in place various measures to prevent an excessively sharp acceleration of the business cycle, and the transition of the country's economy from a socialist economy to one that is more market-oriented has caused economic and social tensions that could stop this transition or compromise its success. Any of these risks could diminish the Compartment's performance.

- Capital repatriation risks

The system for repatriating capital is subject to the approval of the Chinese SAFE authorities and to the risk that the repatriation of capital may be restricted in terms of amount or frequency (as of the date of the Compartment's inception, however, RQFII regulations allow capital to be repatriated daily without requiring approval).

Furthermore, the regulations and standard economic practices in the PRC that govern the repatriation of funds from the domestic Chinese market to other markets and their conversion into a foreign currency could be modified in a way that adversely affects the Compartment.

The unfavourable regulatory developments and situations described above could suspend or restrict the conversion or transfer of foreign currencies and could possibly:

Diminish the Compartment's capacity to fully achieve its investment management objective and/or;

Diminish the Compartment's performance, and/or;

Ultimately result in the Compartment's dissolution, by decision of the Board of Directors.

PRC legal system risk

The legal system in the PRC is based on statutory law. However, some regulations have yet to be implemented and there is no assurance that they will actually ever be implemented in their entirety. In particular, PRC regulations on the control of exchange rates are relatively recent and their application is still quite uncertain. Moreover, these regulations give the Chinese authorities (and in particular CSRC and SAFE) broad discretion in their respective interpretation of the regulations, which leaves uncertainty as to how they might be applied and used. Any of these risks could diminish the Compartment's performance.

State control of exchange rates and of future exchange rate movements

Under the current RQFII system, offshore RMB (CNH) can be converted into onshore RMB (CNY) and vice-versa on a one-for-one basis. The CNH also serves as a pivot currency between the share class currencies (USD and EUR) and CNY. There is no guarantee that, in the future, an exchange rate will not be applied to the conversion of CNH into CNY or vice-versa.

Dependence on the A-shares market

The existence of a liquid market for A-shares depends on the supply of and demand for A-shares. It should be noted that the Shanghai and Shenzhen stock exchanges, on which the A-shares are listed, are undergoing huge changes and that their market capitalisations and trading volume are less than those of exchanges in developed countries. The volatility of A-share markets and any difficulty in trading A-shares or in settling A-share trades could result in significant fluctuations in the price of the securities traded in these markets, and ultimately in the Compartment's Net Asset Value.

Taxation in the PRC

The government of the PRC has implemented several tax reforms in recent years, and it is possible that the current tax legislation and regulations could be revised or modified in the future.

Furthermore the PRC's tax authority (the "State Administration of Taxation") has confirmed the 10% withholding tax on dividends, premiums and interest paid to investors with RQFII status (subsequent to the "PRC Corporate Income Tax Law", which came into effect on 1 January 2008) or who invest via the Shanghai Hong-Kong Stock Connect (subsequent to Caishui circular [2014] No. 81).

This withholding tax may be reduced by virtue of a double taxation treaty with China, provided that certain conditions are met and subject to the approval of PRC tax authorities.

It should also be noted that any dividends paid to shareholders by the Compartment will be obtained from the receipt of corresponding amounts from the investment in the A-shares and that all amounts of this kind will be net of the withholding tax on dividends, premiums and interest applicable in the PRC.

Concerning the taxation of share sales, on 14 November 2014, the PRC Ministry of Finance and tax authority issued circulars, which among other things specified the tax treatment to be applied to capital gains from the sale of "A-Shares" purchased subject to an RQFII quota or via the Shanghai Hong-Kong Stock Connect, the following should in particular be noted:

Capital gains on sales before 17 November 2014 are taxable,

Capital gains on sales as of 17 November 2014 are temporarily tax exempt.

The PRC tax authority has not made a definitive pronouncement on how the tax would be calculated or collected, nor on the duration of the exemption.

Accordingly, we attract the attention of investors to the following:

The Compartment's Net Asset Value may be adversely affected by a change in PRC tax rules;

The adverse impact on the Compartment's performance resulting from a change in PRC tax rules will depend on the date on which the Compartment's equities are bought or sold; and

The magnitude of this adverse impact on the Compartment's performance may not be proportional to the number of shares that an investor holds in the Compartment if tax obligations in the PRC are amended retroactively and, in certain circumstances, could amount to 100% of the Net Asset Value of a share class.

The asset manager by delegation has made 10% provision on Compartment's capital gains up to 14 November 2014. Furthermore, it should be noted that although the PRC tax authority has confirmed the temporary exemption of withholding tax on capital gains on share sales as of 17/11/2014, there is no way of knowing with certainty what investor obligations will be with respect to PRC's taxation of capital gains on share sales before 17/11/2014. Until further information is provided on the taxation and calculation of withholding tax on capital gains before 17 November 2014, there can be no assurance as to whether the aforementioned provision is sufficient or not, since it cannot currently be known with certainty what obligations may be imposed on investors with RQFII status in respect of the PRC's taxation of capital gains. If the provision made proves to be insufficient, this could adversely affect the Compartment's Net Asset Value.

However, and as is the case for any mutual fund that complies with Directive 2009/65/EC, the Compartment's shareholders can lose no more than the capital they invest and the expense of purchasing and selling shares.

Furthermore, since Chinese tax authorities have only confirmed a temporary exemption of the taxation of capital gains made as of 17 November, the asset manager by delegation may decide to make a provision if Chinese tax authorities specify the duration of the exemption or amend this temporary rule in part or in whole. In this event, such a provision would adversely affect all of the Compartment's net asset values calculated as of the date of the first provision. Such a provision would also reduce the Compartment's performance relative to that of the Benchmark Indicator.

In addition to the withholding tax on dividends, premiums, interest and capital gains referred to above, since 19 September 2008, the sellers of A-shares have been required to pay a stock market tax of 0.1 % of the share price. The PRC authorities may decide to modify this tax.

Accounting and reporting standards:

The standards and practices for accounting, auditing and the reporting of financial information that apply to PRC companies may differ from those of countries with more developed financial markets. Such differences can adversely affect certain practices such as asset valuation methods and the reporting of information to investors.

Order execution risk in the PRC

Under RQFII regulations, the delegated asset manager must select one or more intermediaries ("Brokers") in the PRC to execute stock market orders involving A-shares on the Shanghai Stock Exchange and the Shenzhen Stock Exchange. The delegated asset manager may select the same Broker for transactions on both of these exchanges. If a Broker defaults, the Compartment may have difficulty recovering its assets, which could adversely affect its valuation.

Générale and the delegated asset manager have procedures to identify and reduce such conflicts of interest and to resolve them equitably if necessary.

Custody risk in the PRC

Under RQFII regulations, a sub-custodian in the PRC must be selected. The sub-custodian selected is Bank of China Limited, which in this capacity holds the Compartment's onshore RMB and securities accounts in the PRC. Under RQFII regulations, these accounts must be registered jointly in the names of the delegated asset manager (which has the RQFII license) and the Compartment. There is therefore a risk that the assets held in PRC may not be as well protected as if they were registered in the Compartment's name only.

When, pursuant to the investment strategy, the delegated asset manager purchases and/or sells A-shares via the Shanghai Hong-Kong Stock Connect, the sub-custody in relation to these transactions may be entrusted to a sub-custodian other than Bank of China Limited (the "Third Party Sub-custodian"). In this case, the Compartment's accounts with the Third-Party sub-custodian will be opened in the joint name of the Depository and the Compartment.

- Risk that trading is suspended:

Trading in the Benchmark Indicator's constituents may be temporarily suspended, making it impossible for the Compartment to value these securities correctly and/or buy or sell them.

Other risks in investing in this Compartment:

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, sector or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Risks related to the absence of perfect replication

Replication of the Benchmark Indicator by means of an investment in all of the Benchmark Indicator's components could prove to be costly or operationally very difficult.

Also, the Compartment's manager may employ optimisation techniques, notably the sampling technique that involves investing in a representative selection of securities (but not all securities) comprising the Benchmark Indicator, in different proportions than is the case within the Benchmark Indicator, or even investing in securities other than the components of the index or future financial instruments. The use of these optimisation techniques could result in a greater ex-post tracking error and notably lead to differing performances between the Compartment and the Benchmark Indicator.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss that would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

Suspension or stoppage of the calculation of the Benchmark Indicator, and/or;

Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or;

The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or;

A market maker's violation of the rules applicable to this marketplace, and/or;

A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution;
- ii) The Benchmark Indicator is definitively discontinued by the Benchmark Indicator;
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator;
- iv) The supplier of the Benchmark Indicator makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost;
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid;
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the C-USD (USD/CNY) equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark index.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark index, as a result of exchange rate fluctuations.

- Exchange risk linked to the C-RMB (CNH/CNY) equity classes

The RMB can be divided into two categories: RMB offshore (CNH) and RMB onshore (CNY). The above share classes are denominated in offshore RMB (CNH) and can be exposed to currency risk since they are not denominated in the same currency as the Benchmark Indicator. Changes in the exchange rate may therefore cause the net asset value of these share classes to decrease, even if the value of the Benchmark Indicator increases.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed upwards or downwards to performance of the large capitalisations on the "A shares" market, namely, securities issued by companies incorporated in People's Republic of China, excluding Hong Kong.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.
- Creation date of the Multi Units France mutual fund: 4 March 2002.
- Compartment approval date by the AMF (Financial Markets Authority): 7 May 2014.
- Compartment creation date: 28 August 2014.

Management report of the board of directors

Ladies and Gentlemen,

We have convened this Ordinary General Meeting to inform you about your company's activity during the financial year ended 31 October 2018 and to submit for your approval the accounts and balance sheet for that financial year.

The investment objective of the sub-fund is to track the performance of MSCI China A Net Return Index USD (Ticker: MBCN1A).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Fortune SG MSCI China A (DR) UCITS ETF - Acc	FR0011720911	USD	-28.92% ⁽¹⁾	-32.75%		7.39%

⁽¹⁾ "The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques»

The Tracking Error is 2.1227% for the sub-fund. The Tracking Error target for the year was 2%.

The realized tracking error level is above the anticipated tracking error; however, it remains below the 15% annualized-volatility of the Benchmark index mark.

The tracking error over the period is mainly due to a difference in methodology on the valuation of suspended stocks between the sub-fund and its benchmark index. .

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D.533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions.

Portfolio ESG Rating as of October 2018

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.

Red Flag	1%
Orange Flag	1%
Yellow Flag	21%
Green Flag	71%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2018

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	76%
274	473	388	Scope 1 reported (vs estimated)	33%
			Scope2 reported (vs estimated)	13%
			Scope 1&2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions (combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio	
Fossil Fuel Reserves	3%
Thermal Coal	2%
Natural Gas	1%
Oil	1%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	2 602
Gas (MMBOE)	0.0003
Oil (MMBOE)	0.0002

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

tCO2e/\$M Invested	
Metallurgical Coal	387.4
Thermal Coal	4 752.8
Oil	96.0
Gas	99.0
Total	5 338.1

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

tCO2e/\$M Invested	
Thermal Coal	4 752.8
Oil Sands	0.0
Shale Oil or Shale Gas	2.8
Sum High Impact Reserves	4 755.7
Other	582.4

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	1.7%	1.3%	0.6%
Some efforts	27.2%	58.6%	11.6%
Limited efforts/Information	8.0%	21.2%	0.0%
No effort/No evidence	62.8%	18.9%	87.6%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	17%
20-49.9%	3%
50-100%	4%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	8.7%
Energy Efficiency	20.3%
Green Building	5.7%
Pollution Prevention	3.3%
Sustainable Water	3.9%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

Environmental Solutions Contribution

Alternative Energy	0.8%
Energy Efficiency	2.0%
Green Building	1.1%
Pollution Prevention	0.3%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€ fixed compensation	€ variable compensation	€ total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menu-corporate/nous-connaître/mentions-reglementaires/>

Lyxor's best selection and execution policy

Information on best selection and best execution policies is available on the Internet site www.lyxor.com.

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

In the course of the fiscal year, the CIU did not perform financing operations subject to the Securities Financing Transactions Regulation, i.e. repos, securities or commodities lending/borrowing transactions, buy-sell back or sell-buy back transactions, margin lending transactions, or total return swaps (TRS).

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The Board of directors nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The Board of directors nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The financial management delegatee independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the financial management delegatee's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Classes of equities and units of undertakings for collective investment in transferable securities operating under Italian law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.

appendix

- Classes of equities and units of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the financial management delegatee's responsibility.

The exchange rates used for the assessment of financial instruments denominated in Renminbi (RMB) is the WM Reuters fixing rate at 9:00 a.m. GMT published by Thomson Reuters on the day the Compartment's net asset value is determined.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the Board of directors when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.65% per year
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in USD.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Income capitalisation.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment

Société Générale, Paris, Zürich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Compartment, the KIIDs as well as the list of purchases and sales made by the Compartment during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zürich Branch, Talacker 50, P.O. Box 1928, 8021 Zürich.

Calculation of the Total Expense Ratio(in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct.

Average fortune of the fund for the period from 01/11/17 to 31/10/18: 56,173,037.71

Management commission of the fund: 0.65 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report 31/10/2017	Half-yearly report 30/04/2018	Annual report 31/10/2018
Management commission of the fund	352,038.40	199,654.32	364,850.84
Performance fee to be paid to the manager of collective investments of capital	0.00	0.00	0.00
Custodian bank fee	0.00	0.00	0.00
Other expenses	5,757.82	4,079.82	0.00
Taxes	0.00	0.00	0.00
Total operating expenses	357,796.22	203,734.14	364,850.84

Calculation of the TER for 12 months from 01/11/17 to 31/10/18:

TER including performance fee

$$(364,850.84 / 56,173,037.71) * 100$$

0.65 %

Performance fee as a share in percentage of the net average assets:

- %

LYXOR FORTUNE SG MSCI CHINA A (DR) UCITS ETF
(compartment of the Multi Units France mutual fund) - Fiscal year closing on 31/10/2018

Performance of the Compartment

The details of the performance of the Compartment's units calculated in compliance with the principles of the Swiss Fund Association are given below:

	Annual performance from 31/10/2017 to 31/10/2018	Annual performance from 31/10/2016 to 31/10/2017	Annual performance from 30/10/2015 to 31/10/2016
LYXOR FORTUNE SG MSCI CHINA A (DR) UCITS ETF			
Unit C-USD	-28.92%	+16.86%	-14.07%
MSCI CHINA A NET TOTAL RETURN (USD)			
Unit C-USD	-32.75%	+16.06%	-12.61%

Past performances are no indicator of future performances. The performances indicated here do not take into account the impact of possible subscription and redemption commissions and costs of Compartment units.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor Iboxx Germany 1-3Y (DR) UCITS ETF Compartment (the “Compartment”) is continuously exposed to rate securities listed in euros.

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to replicate, downwards and upwards, the evolution of the Markit Iboxx EUR Germany 1-3 Mid Price TCA index (the “Benchmark Indicator”), listed in euros (EUR) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of the performance of German government bonds having a residual maturity of 1 to 3 years.

The anticipated level of the ex-post tracking error under normal market conditions is 0.08%.

Benchmark indicator:

The Benchmark Indicator is a “Total Return” type index (i.e. all coupons detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Markit Iboxx EUR Germany 1-3 Mid Price TCA Benchmark Indicator is listed in euros.

The Benchmark Indicator is weighted by volume and provides exposure to German government bonds having a residual maturity of 1 to 3 years.

The Benchmark Indicator is calculated by Markit iBoxx Limited.

The Benchmark Indicator is composed of German government bonds having a residual maturity of 1 to 3 years. The weight of each index component depends on the corresponding bond's market value. The eligibility of each bond is based on the following criteria:

To be included in the Benchmark Indicator a bond must:

- be fixed rate
- have been issued by the German government
- have a minimum issuance size of two billion euros.

The settlement date for Markit indices is T+0 days. The index is calculated using the average price (or “mid price”) between the bid and ask prices. New bonds are included in the Benchmark Indicator at their mid price.

Benchmark indicator revision and composition:

The Benchmark Indicator's composition is revised monthly.

The complete Benchmark Indicator methodology is available on: <https://ihsmarkit.com/products/iboxx.html>

Benchmark indicator publication:

The Benchmark Indicator price is fixed daily and available through Reuters and Bloomberg.

Reuters code: .IBXXABXD

Bloomberg code: IBXXABXD

The Benchmark Indicator's closing price is available on the Internet site: <https://ihsmarkit.com/products/iboxx.html>

Benchmark indicator revision and composition:

The Benchmark Indicator is revised monthly.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available on the Markit iBoxx Limited Internet site: <https://ihsmarkit.com/products/iboxx.html>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall Markit iBoxx Limited of the benchmark index Markit Iboxx EUR Germany 1-3 Mid Price TCA has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's Internet site at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site.
