

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## VanEck Vectors™ Video Gaming and eSports UCITS ETF (the “Fund”)

a sub-fund of VanEck Vectors™ UCITS ETFs plc (the “Company”)

Share Class: USD A (ISIN: IE00BYWQWR46)

This Fund is managed by VanEck Investments Limited, a subsidiary of Van Eck Associates Corporation.

## Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the MVIS Global Video Gaming and eSports Index (the “Index”).

In order to seek to achieve its investment objective, the investment manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index, being the stock, American depository receipts (ADRs), and global depository receipts (DGRs). Such equity securities must be issued by companies who generate at least 50% of their revenues from video gaming and/or eSports listed or traded on the markets referred to in appendix II of the prospectus.

The Fund may hold the equity securities of companies whose predominant economic activity is in developing video games and related software or hardware such as computer processors and graphics cards used in video gaming systems and related hardware such as controllers, headsets and video gaming consoles. Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Investment Manager may utilise an optimised sampling methodology. The Fund may invest more than 20% of its net asset value in emerging markets.

The Fund may also (or alternatively) invest in of financial derivative instruments (FDI), for efficient portfolio management and/or hedging purposes only, which relate to the Index or constituents of the Index.

The FDI which the Fund may use are futures, swaps, contracts for difference, currency forwards and non-deliverable forwards (a

forward contract that does not require settlement on maturity) and are dealt on any of the regulated markets set out in the list of markets in appendix II of the prospectus.

The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the markets referred to in appendix II of the prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short term basis and in anticipation of participation in a rights offering. Furthermore, the Fund may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.

## Risk and Reward Profile

The risk and reward indicator is calculated using simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

This Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

A typical investor is expected to be an informed investor who has taken professional advice, is able to bear capital and income risk, and should view investment in the Fund as a medium to long term investment.

Investments in underlying equity securities of the Index are subject to sector-specific risks which include competitive pressure, technology risks and legal risks.

Particular Risks not adequately captured by the risk indicator include:

- Risk of Investing in Video Gaming and eSports Companies: the Fund will be sensitive to the overall condition of video gaming and eSports companies. These companies, among other factors, are heavily dependent on the protection of patent and intellectual property rights. Pure-play companies may be dependent on a small number of products or product franchises for a significant portion of their revenue and profits. They may also be subject to shifting consumer preferences, e.g. with respect to gaming

consoles and changes in discretionary spending. These companies are also subject to regulatory constraints, particularly with respect to cybersecurity and privacy. Unintended disclosure of confidential information could adversely affect the value of these companies. Also the companies may be subject to intellectual property infringement, particularly in foreign markets. Combatting such schemes may require significant expenses.

- Risk of Investing in the Information Technology Industry: the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, may have limited product lines, markets, financial resources, or personnel, may have products that face rapid obsolescence, due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel and are heavily dependent on the protection of patent and intellectual property rights.
- Risk of Investing in Small- and Medium-Capitalization Companies: the securities of small- and medium-capitalization companies may be more volatile and less liquid than the securities of large companies and a Fund investing in these companies may reflect this volatility. These companies may have a shorter history of operations, fewer financial resources, less competitive strength, a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities. Investment in these companies may involve comparatively higher investment costs.
