FUND OVERVIEW

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) over the long term (5 or more consecutive years beginning at the point of investment). The Fund invests at least 70% of its total assets in global equity securities (e.g. shares) of companies which derive a significant proportion of their income from gold mining or commodities such as precious metals. The Fund has the flexibility to invest outside of the sector set out above.

Key Risks: The value of your investment and the income from it will vary and your initial investment amount is not guaranteed. Mining shares typically experience above average volatility when compared to other investments. Trends which occur within the general equity market may not be mirrored within mining securities. Overseas investments will be affected by movements in currency exchange rates. The Fund invests in a limited number of market sectors. Compared to investments which spread investment risk through investing in a variety of sectors, share price movements may have a greater affect on the overall value of this fund.

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
