## Investment Objectives

The objective of the Fund is to achieve long term capital growth and income delivering average annual investment returns (total returns, net of fees) of at least RPI + 1.5% over a five to seven year investment cycle. The Fund will have a diversified portfolio. Ordinarily the assets will be invested in direct and indirect investments with a balance between fixed income and equity investments. There is no specific limit in exposure to any sector or geographic area.

## Performance

### Cumulative Performance (%)\*

	1m	3m	6m	1yr	3yr	5yr	Since Launch
'D' Accumulation Shares (Platform)	0.94	1.23	4.75	8.08	12.64	24.36	106.69
RPI + 1.5%	-	-	-	3.60	14.67	21.40	90.47

### Standardised Performance (%)\*

	YTD	2018	2017	2016	2015	2014
'D' Accumulation Shares (Platform)	10.31	-5.59	6.46	8.18	3.74	5.13

Performance figures are based on the 'D' Accumulation Shares (Platform) which do not incur an initial charge.

RPI Data is the latest available, normally from a data point at least one month earlier. For example, performance for one year to end April will be shown against the latest RPI information available, i.e. 12 months to end March.

The Authorised Corporate Director (ACD) has selected this target benchmark as the ACD believes it best reflects the target of returns above inflation over a five to seven year investment cycle after costs.

You should remember that the value of investments and the income derived therefrom may fall as well as rise and you may not get back the amount you invest. Past performance is not a guide to the future.

## Managing Risk in the Fund

The SVS Cornelian Cautious Fund is managed within Cornelian risk level B on a risk scale of A to E (with A being the lowest and E being the highest risk). The Fund is one of a range of funds designed to achieve their RPI+ objectives whilst each being managed below an upper expected risk limit. This upper expected risk limit is expressed using the upper expected volatility of the Fund calculated by an independent third party and is based on the historical volatility of the asset classes held in the Fund. The upper expected volatility limit may change from time to time. The Fund's upper expected volatility is not the same as the Fund's actual (or historic) share price volatility.
