Manager's Report

For the period ended 30th June 2019

Authorised Status

This Fund is an Authorised Unit Trust Scheme as defined in section 243 of the Financial Services and Markets Act 2000 and it is a UCITS Retail Scheme within the meaning of the FCA Collective Investment Schemes sourcebook. The unitholders are not liable for the debts of the Fund.

Investment Objective and Policy

The objective of the Fund is to replicate, as closely as possible, and on a "gross of fees" basis, the return of the Europe Ex UK equity market as represented by the FTSE Developed Europe Ex UK Index (the "Index") net of unavoidable withholding taxes.

The Manager will seek to achieve this objective principally by investing in the shares of certain companies included from time to time in the Index considered by the Investment Adviser to reflect accurately the performance of that Index. The Fund may also invest in transferrable securities, money market instruments, warrants, units in collective investment schemes, deposits and derivatives.

The Fund may invest in collective investment schemes managed or operated by companies in the same group as the Manager or the Investment Adviser. The Fund will seek to track the performance of the Index whilst seeking to minimise as far as possible the tracking error between the Fund's performance and that of the Index.

Strategy

The Fund is constructed to track, on a gross of fees basis, the performance of the FTSE Developed Europe ex-UK Index (the "Index"). The Fund is managed on a fully replicated basis, and typically has a portfolio of approximately 454 stocks. The emphasis is on maintaining tracking precision, and a combination of stocks is selected to minimise deviation from the Index. The Fund is managed to remain neutral on all factors contributing to risk.

Performance

The Fund returned 17.27% for six-month period ending on 30th June 2019, compared to the Index return of 16.71%. The size of the Fund's tracking difference for the six months ending on 30th June 2019 was 0.56%, the outperformance being largely attributable to uplift from beneficial tax rates versus the Index.

Market Review

Global markets had a strong start to the year, with equities gaining around the world. Stock markets priced in an expansionary monetary policy and hopes of progress in trade tensions by the end of June. Numerous issues surfaced during the first half of the reporting period: the US Federal Reserve affirmed a pause in its rate-hiking; the US partial government shutdown ended; and economic data, although mixed, was stronger than anticipated. However, global markets fell in May across all major regions amid jitters over growing US China trade tensions. But as May turned to June, liquidity returned to market and sent the S&P 500 Index to new all-time high. Another wave of central bank accommodation was the proximate source of the moves with both the European Central Bank (ECB) and the US Federal Reserve indicating that further policy tools and interest rate cuts would be used to support economic growth. On the trade front, the US increased tariffs on \$200 billion of Chinese goods imports from 10% to 25% and blacklisted Chinese telecoms company Huawei. It also threatened to levy tariffs on the remaining \$300 billion of goods imported from China. China retaliated by raising tariffs on \$60 billion of US goods imports from an existing 5-10% range to a maximum of 25%. However, following the G20 Osaka summit June, further tariff hikes have been paused. The US has also eased some export controls against Huawei.

Manager's Report (continued)

For the period ended 30th June 2019

European equities advanced in the reporting period, helped in particular by ECB President Mario Draghi's cautious stance and commitment to provide further support if required. The stock market advance mirrored that of other markets, with firm gains in first four months of the year, a sharp fall in May and then a rebound in June. At its meeting on April 10 the European Central Bank (ECB) reiterated that interest rates should remain at current levels throughout the year. Elsewhere on the policy front, investors were relatively unperturbed by acrimonious trade dialogue with the US. The US picked up its trade dispute with the European Union and warned that it was preparing \$11 billion in tariffs in response to subsidies given to Airbus. European stocks underperformed due to rising trade tensions between the US and China. However, some promising economic data as well as a postponement of the potential auto tariffs by the United States helped limit the damage to stocks on the continent. On the political front, Spain held general elections at the end of April, which saw the incumbent Socialist Party emerge victorious. In Italy, where increased political hostility to fiscal tightening was a cause for concern, the stock market slightly underperformed.

In the UK, equities started off in line with other European stock market averages but then began to steadily underperform for much of the second quarter. Areas of the market perceived to offer superior and defensive earnings growth extended their outperformance from the beginning of 2019. In contrast, many of the market's domestically focused sectors underperformed amid renewed Brexit and political uncertainty. The Conservative Party experienced losses in local elections and Prime Minister Theresa May announced that she would step down as party leader and prime minister in early June. Despite a further extension of the Article 50 Brexit deadline to 31 October, there remains considerable uncertainty over the path a new leader might take. The Bank of England held the bank rate steady at 0.75% throughout the reporting period and reaffirmed its pledge to make gradual and limited rate hikes over the forecast period, despite ongoing Brexit concerns and global trade tensions. The UK economy grew by 0.5% in the first quarter of 2019, compared to 0.2% in the previous three months.

US equities rebounded from a weak end to 2018, posting significant gains in the first half of 2019, fuelled mainly by apparent progress in trade negotiations between the US and China, and expectations of expansionary monetary policy. The S&P 500 overcame an escalation in the US-China trade fight to close June up 18.5% so far this year, its best first-half performance since 1997. Federal Reserve officials held interest rates steady over the reporting period but strongly suggested that they ease further if the economic outlook fails to improve. The Commerce Department stated that strong exports and inventory investment helped US GDP grow at a 3.1% annual rate in the first quarter. This marked a significant improvement from Q4 2018, when the economy grew at a 2.2% rate.

Asia-Pacific equities rebounded strongly from the sell-off in Q4 2018, rising 10.6% year to date to the end of June, but still trailing other developed markets. The Australian and Singaporean markets were the top performers in the region. Japanese shares underperformed the other main developed markets, notably in Q2 due to a weak May. Chinese stocks posted a strong 17.7% gain over the first quarter, despite a weak economic outlook. However, they declined in May due to renewed trade tensions including fresh tariffs and restrictions on Huawei.

Index Activity

A March review of the Index witnessed eight inclusions and seven exclusions. The largest inclusions were Castellum (Sweden), Amer Sports (Finland) and Galapagos Genomics NV (Netherlands). During a June review of the Index, there were no inclusions or exclusions.

Outlook

As the current cycle extends, it is tempting to get caught up in the latest swing in sentiment, often driven by incomplete information. Looking back over the past 12 months, the biggest lesson is to look through some of the temporary noise and consider where fundamentals might be taking us over the longer term. From an equity market standpoint, sentiment has switched from complacency to panic and back again in a pattern consistent with late-cycle dynamics. Rather than earnings, it is this swing in sentiment and the Fed's expansionary policy that has driven much of the rally in the first half of this year. However, with central banks capitulating on normalising policy and growth drivers still in place, we would expect to see some improvement in earnings in the latter part of 2019, at least in the US.

Manager's Report (continued)

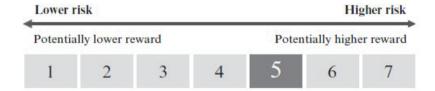

For the period ended 30th June 2019

With volatility flirting with 2018 lows in the face of very real geopolitical risks (notably the US-China trade dispute and Brexit), we are cautious on equities overall and are focused on building positions in markets that may offer value. In our view, although emerging markets are more exposed to risk-off sentiment and a stronger US dollar as the trade dispute escalates, we continue to see better value there in aggregate than in Europe or the US, given how far US markets have come and the fact that Europe continues to disappoint. We will seek to take advantage of any increases in short-term volatility around the trade conflict to find attractive entry points into emerging markets.

Risk and Reward Profile

Risk Disclaimer

The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e. category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category?

The Fund is in risk category 5 as its return has experienced medium rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Index Tracking Risk: The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses.

Liquidity Risk: It may be difficult for the Fund to buy or sell certain investments in difficult market conditions. Consequently the price obtained when selling securities may be lower than under normal market conditions.

Concentration Risk: A Fund that purchases a limited number of securities, or only securities of a limited number of countries or industries, may experience higher changes in value than a fund that does not limit its investments.

Counterparty Risk: Other financial institutions provide services to the Fund, acting as a counterparty to financial derivative transactions. There is a risk that these institutions may not be able to perform their obligations. This could reduce the value of the Fund's investments.

Manager's Report (continued)

For the period ended 30th June 2019

Derivatives Usage

Equity derivatives (index futures) are used in the Fund for efficient portfolio management purposes. The Fund invests in the EURO STOXX 50, Swedish OMXS30 Index, and Eurex Swiss Market New Index futures as these are the closest matches to the Index. The main application of futures is in managing client inflows and outflows and to hedge accrued income. At all times the futures exposure is covered entirely by cash or cash equivalents.

As at 30th June 2019, the Fund had a total notional exposure to futures of £62,301,136.

Tracking Error

The Tracking Error measures the standard deviation of the relative returns. It is the annualised standard deviation of the returns of a fund minus those of it's benchmark (relative returns) and not the standard deviation of each fund's unique returns. The lower the tracking error of a fund, the more the fund resembles it's benchmark or the market regarding risk and return characteristics.

The size of the Fund's tracking error for the twelve months ended 30th June 2019 was 0.28% which was within the targeted tolerance.

Distribution

There will be a distribution of 4.6932 pence per unit payable on 31st August 2019 (31.8.18: 4.4215).

In accordance with the requirements of the Collective Investment Schemes sourcebook of the Financial Conduct Authority's handbook of rules and guidance we hereby certify the report on behalf of the Directors of State Street Unit Trust Management Limited.

allo

A. Castle - Director, State Street Unit Trust Management Limited

V. Parry Director, State Street Unit Trust Management Limited

28 August 2019

Comparative Table

For the period ended 30th June 2019

	2019 (to 30.06)	2018	2017
Closing net asset value (£'000)	4,690,252	3,871,607	3,945,749
Closing number of units	2,285,056,271	2,209,294,521	2,040,006,996
Closing net asset value per unit (£)	2.0526	1.7524	1.9342
Change in net asset value per unit	17.13%	(9.40)%	16.53%
Operating charges	0.25%	0.25%	0.25%

General risk factors

The value of funds and the revenue from them is not guaranteed and may fall as well as rise. You may get back less than you originally invested. What you get back may depend on:

- (i) Investment performance is not guaranteed. Past performance is no guarantee of future performance. There may also be variation in performance between funds with similar investment objectives.
- (ii) The effect of an initial charge. If you sell your investment after a short period you may not get back what you originally invested, even if the price of your investment has not fallen.
 - The entire market of a particular asset class or geographical region may fall, having a greater effect on funds heavily invested in that asset class or region.
 - If you make regular withdrawals from your investment be aware that if the level of withdrawal exceeds the rate of investment growth of the Fund, your capital will be eroded.
 - Governments may change the tax rules which affect you or the funds in which you have invested.
 - · Inflation will reduce what you could buy in the future, i.e. it will reduce the real value of your investment.
 - There is no certainty that the investment objective of any fund will actually be achieved.

Statement of Total Return

Notes to the Financial Statements

For the period ended 30th June 2019

Accounting Policies

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice ("SORP") for Authorised Funds issued by the Investment Management Association in May 2014 and United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). The financial statements are also in compliance with FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland.

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31st December 2018 and are described in those financial statements.

Distribution Tables

For the period ended 30th June 2019

Dividend in pence per unit payable on 31st August 2019

Group 1: Units purchased prior to 1st January 2019

Group 2: Units purchased on or after 1st January 2019 to 30th June 2019

			Amount	Amount
	Net		payable	paid
	revenue	Equalisation	31.08.2019	31.08.2018
	pence per	pence per	pence per	pence per
	unit	unit	unit	unit
Accumulation Units				
Group 1	4.6932	-	4.6932	4.4215
Group 2	4.2287	0.4645	4.6932	4.4215

Corporate Unitholder Information

Franked Investment Income	100.00%
Unfranked Non Foreign Investment Income	0.00%
Unfranked Foreign Investment Income	0.00%

Equalisation applies only to units purchased during the distribution period (Group 2 units). It is the average amount of income included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital. Being capital, it is not liable to income tax but must be deducted from the cost of units for capital gains tax purposes.
