GLOBAL MULTI ASSET INCOME FUND - Z INC GBP

ISIN: GB00BNG64665
 Share Class Price: 1.1979
 Historic Yield: 2.8%
 Ongoing Charges: 0.88% (as at 25/05/19)
 ISA: Yes
 Performance Fee: No

The ongoing charges figure (OCF) is usually based on the last year's expenses and may vary from year to year. It includes charges such as the fund's annual management charge, registration fee, custody fees and distribution cost but excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). For a more detailed breakdown please visit www.columbiathreadneedle.com/fees. In some cases, the ongoing charges figure may be based on an estimate of future charges, either because the share/unit class is relatively new and has an insufficient track record to be calculated exactly, or if historic figures are unlikely to accurately reflect future ongoing costs.

Please see table of Share Classes available.

Fund Changes

Ratings/Awards

For more information on the methodology of the Morningstar rating please visit www.morningstar.com

Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund's assets may sometimes be difficult to value objectively and the actual value may not be recognised until assets are sold.
- The Fund may invest materially in derivatives. A relatively small change in the value of the underlying investment may have a much larger positive or negative impact on the value of the derivative.
- The value of a property is a matter of a valuer's opinion and the true value may not be recognised until the property is sold.

Opportunities

- The Fund actively invests in Columbia Threadneedle Investment's highly rated income strategies range across equities, fixed income and property.
- Growing capital over the long term is carefully balanced with the objective of providing a sustainable level of income.
- Diversification is embedded into the process with a focus on providing superior risk adjusted income and growth. The fund manager is able to supplement the yield of the portfolio with direct holdings.
- The fund will allocate globally between income producing assets, whilst looking to preserve and grow capital over the longer term.
- We invest on an unlevered long-only and transparent basis.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

Fund Objective & Policy

The aim of the Fund is to provide income with the potential to grow the amount you invested over the medium to long term.

The Fund will invest at least two-thirds of its assets so as to gain global exposure to company shares, bonds (which are similar to a loan and pay a fixed or variable interest rate) and property. The amount of the Fund that is invested in the different asset types will vary over time as the Fund seeks to achieve its aim.

The Fund will invest in shares and bonds indirectly through regulated and unregulated funds. The Fund may also invest in these assets directly or indirectly by using derivatives. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

The Fund's exposure to commodities and property will be gained indirectly through other funds, related securities, or by using derivatives. Commodities are physical materials such as oil, agricultural products, and metals.

Source: FactSet

The Share Class currency, unless indicated as a Hedged Share Class, is a translated price using exchange rates at the official valuation point of the fund. This is intended as a way to access a Share Class in your chosen currency and does not reduce your overall exposure to foreign currency. The fund currency indicates the highest currency exposure of the fund unless the currency breakdown is detailed in the Weightings % table on page 2.

*Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). All data: Source Copyright © 2019 Morningstar UK Limited.

The Investment Association (IA) is the trade body representing the UK investment management industry.

Important Information

Threadneedle Opportunity Investment Funds ICVC ("TOIF") is an open-ended investment company structured as an umbrella company, incorporated in England and Wales, authorised and regulated in the UK by the Financial Conduct Authority (FCA) as a Non - UCITS scheme.

This material is for information only and does not constitute an offer or solicitation of an order to buy or sell any securities or other financial instruments, or to provide investment advice or services. The dealing price may include a dilution adjustment where the fund experiences large inflows and outflows of investment. Further details are available in the Prospectus.

Subscriptions to a Fund may only be made on the basis of the current Prospectus and the Key Investor Information Document, as well as the latest annual or interim reports and the applicable terms & conditions. Please refer to the 'Risk Factors' section of the Prospectus for all risks applicable to investing in any fund and specifically this Fund. The above documents are available in English only and may be obtained free of charge on request from Threadneedle Investments at PO Box 10033, Chelmsford, Essex CM99 2AL.

Portfolio positions are based on gross asset valuations at global close (not official NAV time). Historic Yield reflects distributions declared over the past 12 months. Distribution Yield reflects the amount that may be expected to be distributed over the next 12 months. Underlying Yield reflects the annualised income net of expenses of the fund. Yields shown do not include any preliminary charge and investors may be subject to tax on their distributions.

Columbia Threadneedle Investments is the global brand name of the Columbia and Threadneedle group of companies.

Issued by Threadneedle Investment Services Limited. Registered in England and Wales, Registered No. 3701768, Cannon Place, 78 Cannon Street, London EC4N 6AG, United Kingdom. Authorised and regulated in the UK by the Financial Conduct Authority (FCA).
