#### **AUTHORISED STATUS AND GENERAL INFORMATION**

### **Authorised status**

IFSL Brooks Macdonald Fund (the Company) is an open-ended investment company with variable capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001 (OEIC Regulations). The Company is a UCITS Scheme as defined in the Collective Investment Schemes Sourcebook (COLL) and is also an umbrella company for the purposes of the OEIC Regulations. The Company is incorporated in England and Wales with the registered number IC000357. The Company was authorised by an order made by the Financial Conduct Authority (FCA) with effect from 30 November 2004 with the Product Reference Number (PRN) 413889.

The Company currently has five sub-funds: IFSL Brooks Macdonald Defensive Income Fund; IFSL Brooks Macdonald Balanced Fund; IFSL Brooks Macdonald Cautious Growth Fund; IFSL Brooks Macdonald Strategic Growth Fund; and IFSL Brooks Macdonald Defensive Capital Fund.

Shareholders of the sub-funds do not have any proprietary interest in the underlying assets of the Company and will not be liable for the debts of the Company. A sub-fund is not a legal entity. If the assets attributable to a sub-fund were insufficient to meet its liabilities the shortfall will not be met out of the assets attributable to one or more other sub-funds of the Company. The sub-funds are segregated by law under the Protected Cell Regime.

### Investment objectives and policies

### IFSL Brooks Macdonald Defensive Income Fund

The investment objective of the sub-fund is to generate income over the long term by gaining an exposure to a defensive mix of assets.

The sub-fund will be actively managed and primarily invested in a variety of collective investment schemes that will include both UK and international equity exposure and substantial fixed income and other defensive assets to provide an overall defensive investment mix of income generating assets.

The sub-fund may also invest in transferable securities, money market instruments, exchange-traded funds, cash and cash deposits, as permitted in the Prospectus.

The use of derivatives and hedging transactions is only permitted in connection with the efficient portfolio management of the sub-fund. Borrowing will be permitted on a temporary basis under the terms set out in the Prospectus, at the discretion of the Investment Manager.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characterisitics.

The sub-fund will be managed so it is eligible for inclusion in the IA Mixed Investment 0-35% Shares sector.

### IFSL Brooks Macdonald Balanced Fund

The investment objective of the sub-fund is to provide a combination of income and capital growth over the longer term by gaining an exposure to a balanced mix of asset classes.

The sub-fund will be actively managed and primarily invested in a variety of collective investment schemes that will include significant UK and international equity exposure together with fixed income and alternative investments to provide an overall balanced investment mix of growth assets.

The sub-fund may also invest in transferable securities, money market instruments, exchange traded funds, cash and cash deposits, as permitted in the Prospectus.

The use of derivatives and hedging transactions is only permitted in connection with the efficient portfolio management of the sub-fund. Borrowing will be permitted on a temporary basis under the terms set out in the Prospectus, at the discretion of the Investment Manager.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characterisitics.

The sub-fund will be managed so it is eligible for inclusion in the IA Mixed Investment 40-85% Shares sector.

### **AUTHORISED STATUS AND GENERAL INFORMATION**

### Investment objectives and policies (continued)

### IFSL Brooks Macdonald Cautious Growth Fund

The investment objective of the sub-fund is to provide capital growth over the longer term by gaining an exposure to a cautious mix of asset classes. The defensive nature of the asset classes used to provide a cautious mix is likely to provide some investment income, however this is of secondary importance.

The sub-fund will be actively managed and primarily invested in a variety of collective investment schemes that will include UK and international equity as well as fixed income exposure to provide an overall cautious investment mix.

The sub-fund may also invest in transferable securities, money market instruments, exchange-traded funds, cash and cash deposits, as permitted in the Prospectus.

The use of derivatives and hedging transactions is only permitted in connection with the efficient portfolio management of the sub-fund. Borrowing will be permitted on a temporary basis under the terms set out in the Prospectus, at the discretion of the Investment Manager.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characterisitics.

The sub-fund will be managed so it is eligible for inclusion in the IA Mixed Investment 20-60% Shares sector.

### IFSL Brooks Macdonald Strategic Growth Fund

The investment objective of the sub-fund is to provide long-term capital growth, primarily through investment in global equity markets.

The sub-fund will be actively managed and primarily invested in a variety of collective investment schemes investing in UK and international equities, with some exposure to fixed income as well as any other investments which carry a defined return such as preference shares, convertible bonds and other investment funds, some of which are designed to lessen the full equity market risk, in order to provide a mix of growth assets.

The sub-fund may also invest in transferable securities, money market instruments, exchange-traded funds, cash and cash deposits, as permitted in the Prospectus.

The use of derivatives and hedging transactions is only permitted in connection with the efficient portfolio management of the sub-fund. Borrowing will be permitted on a temporary basis under the terms set out in the Prospectus, at the discretion of the Investment Manager.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characterisitics.

The sub-fund will be managed so it is eligible for inclusion in the IA Flexible Investment Shares sector.

### IFSL Brooks Macdonald Defensive Capital Fund

The investment objective of the sub-fund is to achieve consistent long-term capital growth and positive absolute returns over rolling three year periods through a portfolio of defined return assets, such as preference shares, loan notes, convertibles, structured notes and other defined return investments, including collective investment schemes and transferable securities, that do not require market growth to provide a positive capital return and are supported by significant underlying asset cover. Returns are not guaranteed over any time period therefore capital is at risk.

The portfolio will be actively managed and will normally remain fully invested save for such operational liquidity as is required from time to time. However, it may include cash or near cash from time to time, but this will not normally exceed 30% of the value of the property of the sub-fund.

The sub-fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

Borrowing will be permitted on a temporary basis under the terms of the Regulations, at the discretion of the Investment Manager.

The sub-fund will not invest more than 10% of its property in aggregate in the units or shares of other UCITS Schemes or other collective investment schemes.

### **AUTHORISED STATUS AND GENERAL INFORMATION**

### Investment objectives and policies (continued)

### IFSL Brooks Macdonald Defensive Capital Fund

The sub-fund aims, but does not guarantee, to deliver positive returns (greater than zero) in any market conditions over rolling 3 year periods. The Investment Association (IA), the trade body for UK investment managers, publishes figures each month showing how many times the Fund failed to provide returns greater than zero for all available rolling 12 month periods over the preceding three years on its website. https://www.theia.org/industry-data/fund-sectors/tar-monitoring. As the sub-fund does not have a benchmark, investors may wish to use this information in order to measure the success of the sub-fund.

### Rights and terms attached to each share class

A share of each class represents a proportional entitlement to the assets of the sub-fund. The allocation of income and taxation and the rights of each share in the event that a sub-fund is wound up are on the same proportional basis.

### Changes in prospectus

No significant changes have been made since the last report.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any sub-fund or Company within the ACD's range, can be requested by the investor at any time.

### **Cross holdings**

IFSL Brooks Macdonald Defensive Income Fund held 328,779 shares valued at £755,000 in IFSL Brooks Macdonald Defensive Capital Fund as at 30 November 2020 (31 May 2020: 328,779 shares valued at £695,000).

IFSL Brooks Macdonald Balanced Fund held 1,237,661 shares valued at £2,844,000 in IFSL Brooks Macdonald Defensive Capital Fund as at 30 November 2020 (31 May 2020: 1,907,688 shares valued at £4,031,000).

IFSL Brooks Macdonald Cautious Growth Fund held 891,913 shares valued at £2,050,000 in IFSL Brooks Macdonald Defensive Capital Fund as at 30 November 2020 (31 May 2020: 1,467,840 shares valued at £3,102,000).

## **AUTHORISED INVESTMENT MANAGER'S REPORT - SUMMARY OF THE MARKETS**

for the six month period ended 30 November 2020

During the period, global equities recorded a new all-time high and in doing so, successfully erased, in narrow financial terms at least, the negative impact from the coronavirus pandemic earlier this year.

The speed of this move has been remarkable, but it has been driven by an even more remarkable pace of government and central bank policy intervention. Conventional and unconventional monetary policy (such as interest rates and quantitative easing respectively), alongside government spending, has been delivered. Because of this, investors have been encouraged to look further out along their investment horizons, and it is this which has arguably continued to drive risk appetite. Whereas economies are effectively contemporary, operating in the present, financial markets can travel forwards and discount future earnings growth back to the present at close to zero interest rates.

While global equities set new highs during the period, the story is very different when we look beneath the global index and consider the performances of individual countries and regions. Some of this is down to the composition of a country's index and sector weights, and some down to the differences in co-ordination and scale of policy support for markets brought about as a result of the coronavirus pandemic.

The period also saw some resolution to key US political risk. While the US election did not lead to the 'blue wave' predicted by the polls, the clear result and lack of any real post-election disruption was well received by markets. The result led to a wave of optimism washing over markets as investors welcomed the fall in short term political risk.

In addition, towards the end of the period markets were catalysed by hopes for a successful coronavirus vaccine. First to be announced was the collaboration between US company Pfizer and German company BioNTech, whose vaccine candidate delivered preliminary findings suggesting more than 90% efficacy rate in preventing COVID-19 in patients. This was followed by news from US company Moderna's vaccine candidate for which data suggests close to 95% efficacy, as well as the Oxford AstraZeneca trial. Hopes for a possible coronavirus vaccine game-changer drove a large rotation within the market, as investors moved away from more defensive assets in search of more economically sensitive companies which might stand to benefit most from any quicker resumption of economic activity. While it is too early to say whether the recent vaccine news is a genuine game-changer, it is still a salient reminder of how aggressively under-owned value and cyclical areas can snap back.

Brooks Macdonald Asset Management Limited 23 December 2020

### **AUTHORISED CORPORATE DIRECTORS' STATEMENT**

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

### NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 30 November 2020

### **Basis for preparation**

The interim financial statements have been prepared in compliance with FRS102 and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Association in May 2014 and amended in June 2017.

The interim financial statements are prepared in sterling, which is the functional currency of the sub-funds. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

## **Accounting policies**

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 May 2020 and are described in those annual financial statements.

The investments of the sub-funds have been valued at their fair value at 12.00pm on 30 November 2020.

### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 30 November 2020

Percentage change to 30 November 2020

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Brooks Macdonald Defensive Income Fund	4.23%	1.47%	7.55%	18.90%
IA Mixed Investment 0-35% Shares	5.01%	3.25%	8.73%	22.22%
External source of economic data: Morningstar (A Income - mid to mid, n	et income reinvested).			

The sub-fund delivered positive absolute performance as risk assets continued their strong performance. However, the sub-fund slightly underperformed the IA (Investment Association) 0-35% equity sector.

Risk assets were the main drivers of returns in the portfolio with US equities delivering the strongest performance. This also led to solid returns from the majority of the portfolio's International equities, although these positions were slightly hindered by a generally strengthening sterling.

After an extended period of underperformance, UK equities also delivered strong returns. Performance in this space was driven by assets that have a 'value' bias to their investment process.

These funds are overweight to cyclical companies which rallied very significantly towards the end of the period as vaccine progress led investors to positively reassess these positions.

The sub-fund's Alternatives also performed well, primarily driven by convertibles exposure which offer bond-like protection but capacity to participate in equity market movements. Structured return also continued its bounce from the lows of earlier in the year. Returns from fixed interest were also positive although tended to lag equity positions. The fund's underweight to areas such as gilts was a generally positive position.

The main changes over the period were to add small positions to our incumbent themes of technology and healthcare. We continue to feel that these themes will do well in a low inflation, low growth investment environment. We also added a third theme of 'Sustainability' in the form of the Ninety One Global Environment fund. This provides the portfolio with a dedicated exposure to a decarbonisation strategy which we feel provides long term low correlated returns to an area which is attracting significant investment.

<sup>&</sup>lt;sup>A</sup> These figures have been annualised.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

### SYNTHETIC RISK AND REWARD INDICATOR

Lower risk						Higher risk		
4	<del></del>							
	Typically lower rew	vards			Typic	ally higher rewards		
Ī	1	2	3	4	5	6	7	

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the sub-fund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a sub-fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.

### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 30 November 2020

Percentage change to 30 November 2020

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Brooks Macdonald Balanced Fund	10.70%	7.78%	16.72%	41.17%
IA Mixed Investment 40-85% Shares	9.20%	4.55%	13.69%	39.29%
External source of economic data: Morningstar (A Accumulation - mid to mid	).			

The sub-fund delivered positive absolute performance as risk assets continued their strong performance. The sub-fund outperformed the IA 40-85% equity sector.

Risk assets were the main drivers of returns in the portfolio with Asia and Emerging Markets driving very strong returns as these countries were less impacted by COVID-19 and their economies recovered quicker. US equities also delivered strong performance, as did our European position. International equities also performed well, primarily driven by smaller companies and themes such as Technology.

After an extended period of underperformance, UK equities also delivered strong returns. Performance in this space was driven by smaller and mid-sized companies as well as assets that adopt a 'value' bias to their investment process. These funds are overweight to cyclical companies which rallied very significantly towards the end of the period as vaccine progress led investors to positively reassess these positions.

The sub-fund's Alternatives also performed well, primarily driven by convertibles exposure which offer bond-like protection but capacity to participate in equity market movements.

The main change over the period was to add a third theme of 'Sustainability' in the form of the Ninety One Global Environment fund. This provides the portfolio with a dedicated exposure to a decarbonisation strategy which we feel provides long term low correlated returns to an area which is attracting significant investment.

Brooks Macdonald Asset Management Limited 23 December 2020

<sup>&</sup>lt;sup>A</sup> These figures have been annualised.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

## SYNTHETIC RISK AND REWARD INDICATOR

Lower risk	Higher ris					Higher risk
<del></del>						<del></del>
Typically lower rev	vards				Туріс	cally higher rewards
1	2	3	4	5	6	7

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the subfund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a sub-fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 5 because it has experienced moderate to high volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.

### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 30 November 2020

Percentage change to 30 November 2020

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Brooks Macdonald Cautious Growth Fund	6.99%	3.55%	10.75%	29.39%
IA Mixed Investment 20-60% Shares	7.48%	2.78%	9.10%	27.15%
External source of economic data: Morningstar (A Accumulation - mid to mid).	•			

The sub-fund delivered positive absolute performance as risk assets continued their strong performance. However, the sub-fund slightly underperformed the IA 20-60% equity sector.

Risk assets were the main drivers of returns in the portfolio with Asia and Emerging Markets driving very strong returns as these countries were less impacted by COVID-19 and their economies recovered quicker. US equities also delivered strong performance, as did our European position. International equities also performed well, primarily driven by smaller companies and themes such as Technology.

After an extended period of underperformance, UK equities also delivered strong returns. Performance in this space was driven by smaller and mid-sized companies as well as assets that adopt a 'value' bias to their investment process. These funds are overweight to cyclical companies which rallied very significantly towards the end of the period as vaccine progress led investors to positively reassess these positions.

The sub-fund's Alternatives also performed well, primarily driven by convertibles exposure which offer bond-like protection but capacity to participate in equity market movements. Returns from fixed interest were also positive although tended to lag equity positions with the portfolio's underweight to gilts being an overall positive impact on relative performance.

The main change over the period was to add a third theme of 'Sustainability' in the form of the Ninety One Global Environment fund. This provides the portfolio with a dedicated exposure to a decarbonisation strategy which we feel provides long term low correlated returns to an area which is attracting significant investment.

Brooks Macdonald Asset Management Limited 23 December 2020

<sup>&</sup>lt;sup>A</sup> These figures have been annualised.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

## SYNTHETIC RISK AND REWARD INDICATOR

Lower risk						Higher risk
<b>←</b>						<del></del>
Typically lower rev	vards				Туріс	cally higher rewards
1	2	3	4	5	6	7

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the subfund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a sub-fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.

#### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 30 November 2020

Percentage change to 30 November 2020

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Brooks Macdonald Strategic Growth Fund	13.42%	9.88%	20.77%	49.01%
IA Flexible Investment	10.71%	6.19%	13.93%	42.31%

External source of economic data: Morningstar (A Accumulation – mid to mid).

The sub-fund delivered positive absolute performance as risk assets continued their strong performance. The sub-fund significantly outperformed the IA Flexible equity sector.

Risk assets were the main drivers of returns in the portfolio with Asia and Emerging Markets driving very strong returns as these countries were less impacted by COVID-19 and their economies recovered quicker. US equities also delivered strong performance, as did our European position. International equities also performed well, primarily driven by smaller companies and themes such as Technology.

After an extended period of underperformance, UK equities also delivered strong returns. Performance in this space was driven by smaller and mid-sized companies as well as assets that adopt a 'value' bias to their investment process. These funds are overweight to cyclical companies which rallied very significantly towards the end of the period as vaccine progress led investors to positively reassess these positions.

The sub-fund's Alternatives also performed well, primarily driven by convertibles exposure which offer bond-like protection but capacity to participate in equity market movements.

The main change over the period was to add a third theme of 'Sustainability' in the form of the Ninety One Global Environment fund. This provides the portfolio with a dedicated exposure to a decarbonisation strategy which we feel provides long term low correlated returns to an area which is attracting significant investment.

<sup>&</sup>lt;sup>A</sup> These figures have been annualised.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

#### SYNTHETIC RISK AND REWARD INDICATOR

L	ower risk						Higher risk	
<b>+</b>							<del></del>	
T	ypically lower rew	<i>r</i> ards				Typic	ally higher rewards	
	1	2	3	4	5	6	7	

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the subfund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a sub-fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 5 because it has experienced moderate to high volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.

#### **AUTHORISED INVESTMENT MANAGER'S REPORT**

for the six month period ended 30 November 2020

Percentage change to 30 November 2020

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>
IFSL Brooks Macdonald Defensive Capital Fund	8.99%	2.18%	9.10%	23.23%
External source of economic data: Morningstar (A Accumulation – mid to mid	I).			

The past six months were marked by three distinct periods – positive returns for risk assets between June and August driven by signs of economic improvement, negative returns for the months of September and October due to new record numbers of Covid-19 infections as well as the return of lockdown measures, and finally a very strong November with the announcement of three vaccines effective against the virus.

November was a particularly eventful month starting with Joe Biden winning the US presidential election. Encouraging news on Pfizer's vaccine then overshadowed election results and sent markets soaring. While there are still many remaining questions (over efficacy, distribution, duration of immunity) we think the market's reaction was largely rational.

News of an effective vaccine sent cheaper stocks in particular surging, and "Value" stocks rose the most on record relative to faster-growing "Growth" stocks, as investors rotated out of expensive Covid beneficiaries and into depressed shares poised to gain from an economic recovery.

The sub-fund (class A Accumulation shares) had a total return of +9.0% over the period.

By asset class, Convertibles (+1.9%), Real Assets (+1.8%), Autocalls (+1.3%), Specialist Lending (+1.0%), Structured Credit (+0.9%) were the largest positive contributors. The main detractor, albeit rather small, was from our Hedges (-0.2%).

At the time of writing this report, a question that remains is the US Senate election in Georgia for which we will need to wait until early January 2021. For now, markets seem to stay encouraged about the prospects of a divided, and hence less interventional, government.

November's move in value stocks was extreme on many metrics. But it only partially reversed the move in growth stocks over the last decade, which is perhaps the best run for growth (and the worst for value) in a century. We have positioned the sub-fund to benefit further from the anticipated value rotation over the medium to long term.

Brooks Macdonald Asset Management Limited 15 December 2020

Lowest share price	211.30	180.60	209.20	207.50

<sup>&</sup>lt;sup>A</sup> These figures have been annualised.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the sub-fund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

#### SYNTHETIC RISK AND REWARD INDICATOR

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the sub-fund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a sub-fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the synthetic risk and reward indicator has changed from 5 to 4.
