

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Architas MM Monthly High Income Fund

a Sub-Fund of **Architas Multi-Manager Investments ICVC II**
Share Class S Accumulation (GB00BCZW5S72)

This Fund is managed by Architas Multi-Manager Limited, part of the AXA Group

Objectives and Investment Policy

The Fund seeks to generate a monthly income.

The Fund is an actively managed fund of funds.

The Fund invests at least 70% of its assets in other funds (underlying funds) including funds which are traded on stock exchanges (investment trusts and exchange traded funds), other closed-ended funds and funds which are managed by Architas or its associates.

The underlying funds will primarily (meaning at least 70%) invest in debt instruments (bonds) issued by companies, governments and other institutions, and debt instruments which can easily be converted into cash (money market instruments).

Underlying funds are selected principally on the basis of our assessment of their consistency of investment returns, the risks related to their investment strategy, the strength of their investment process and the stability of the fund's management team.

The Fund may also invest directly or indirectly (through underlying funds) in a range of asset classes and financial instruments including shares, bonds including money market instruments, freely transferable rights to buy other investments at a future date (warrants), financial contracts that derive their values from those of other investment instruments or indices (derivatives) and deposits.

The Fund may also obtain indirect exposure to property through investment in Real Estate Investment Trusts (REITs) and shares in

property investment companies, and may engage in stock-lending and borrowing.

When investing directly in debt instruments, the Fund will favour investment grade securities (that is, securities with a credit rating of at least BBB- as rated by Standard and Poors, or Baa3 as rated by Moody's), but the Fund may also invest in non-investment grade securities.

When required to manage liquidity, or the Fund's risk, the Fund may hold its assets in cash or deposits and money market instruments.

The Fund may use derivatives to help achieve the investment objective (investment purposes) as well as to reduce risk or to manage the Fund more efficiently (often referred to as "efficient portfolio management"). Currently the Fund is not intending to use derivatives.

The Fund is not managed with reference to a benchmark.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

If you hold income shares, we will pay you any income earned from the Fund's investments on a monthly basis. If you hold accumulation shares, we will automatically include income earned in the value of your shares.

You may sell your investment on a daily basis.

The base currency of the Fund is GBP.

Risk and Reward Profile

This risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The lowest category does not mean risk free.

The risk and reward category may shift over time and is not guaranteed.

Your investment in the Fund is not guaranteed. The Fund is invested in financial assets and instruments and uses financial techniques that are subject to levels of variation, that may result in gains or losses.

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The shares of a fund of category 3 might be subject to low to medium price fluctuations based on the historical volatility observed.

The following are additional risks not covered by the risk and reward category:

Credit Risk - Bonds: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund primarily invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Credit Risk - Non-Investment Grade Bonds: The Fund may invest in bonds issued by entities considered to be more likely to default (non-investment grade). If an issuer does default this may result in the Fund and your investment suffering a loss.

Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Fund of Funds - Liquidity Risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

Derivatives Risk: Some of the underlying funds may invest in derivatives, which can, in some circumstances, create wider fluctuations in their prices over time.

Interest Rate Risk: Fluctuations in interest rates may affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	none
Exit charge	none

This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).

Charges taken from the Fund over a year

Ongoing charge	0.85%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	none
-----------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on the expenses for the twelve month period ending 31st December 2019. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another fund.

For more information about charges, please see the section entitled "Fees and Expenses" in the Fund's prospectus which is available on request free of charge from the manager.

Past Performance

A The Past Performance shown is from Share Class A, another share class within the Fund. This is because Share Class S has been recently launched and does not have any past performance for this period. Share Class S has annual charges which are 0.20% lower than Share Class A.

Past performance is not a reliable indicator of future performance.

The past performance shown here takes account of ongoing charges. The entry/exit fees are excluded from the calculation of past performance.

The Fund started to issue shares in November 2001.

Past performance has been calculated in GBP and is expressed as a percentage change of the Fund's net asset value per share at each year end.
