

# ASI Multi-Manager Multi-Asset Distribution Portfolio

(From 7 August 2019 the fund name was amended from Aberdeen Multi-Manager Multi-Asset Distribution Portfolio to ASI Multi-Manager Multi-Asset Distribution Portfolio)

Class I Accumulation GBP

29 February 2020

## Objective

To generate income and some growth over the long term (5 years or more) by investing in a diversified range of actively managed funds.

**Performance Target:** To exceed the IA Mixed Investment 20-60% Shares Sector Average return over one year (after charges). The fund also targets a yield in excess of the income that would be delivered by a representative basket of assets (composed 22.5% FTSE All-Share, 22.5% MSCI World ex UK Index and 55% ICE BofAML Sterling Non-Gilts Index). The Performance Target is the level of performance the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The Manager believes this is an appropriate target/comparator for the fund based on the investment policy of the fund.

## Portfolio securities

- The fund will invest at least 60% in actively managed funds, to obtain broad exposure to a range of diversified investments from a range of managers.
- It may invest up to 40% in passively managed funds from a range of managers.
- At least 30% of the fund will be invested in bonds (loans to a company or government) and cash or money market instruments.
- The rest of the fund may be invested in a selection of other assets such as equities (company shares including property shares), commercial property and funds that can use a combination of traditional assets (such as equities and bonds) and investment strategies based on derivatives.

## Performance

## Cumulative and annualised performance

	1 month	6 months	Year to date	1 year	3 years (p.a.)	5 years (p.a.)
Fund (Net) (%)	-2.74	0.63	-3.32	6.53	2.79	4.19
Performance target (%)	-3.25	-0.84	-3.29	4.56	2.55	3.66

## Discrete annual returns - year to 29/2

	2020	2019	2018	2017	2016
Fund (Net) (%)	6.53	-0.69	2.66	15.63	-2.24
Performance target (%)	4.45	-0.13	3.41	14.61	-3.17

Performance Data: Share Class I Acc. Source: Lipper, Basis: Total Return, NAV to NAV, UK Net Income Reinvested. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the performance target / performance comparator / portfolio constraining benchmark.

These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

Past performance is not a guide to future returns and future returns are not guaranteed.

Base currency	GBP
Sedol	B834037
ISIN	GB00B8340374
Bloomberg	ABMDBIA LN
Domicile	United Kingdom

## Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

## Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

## Management process

- The management team use their discretion (active management) to identify investments, focusing on selecting funds within each asset class and ensuring that the asset allocation meets the fund's objectives.
- The fund will be subject to constraints which are intended to manage risk such as the fund must not hold more than 60% of its assets in equities. Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the IA Mixed Investment 20-60% Shares Sector Average.

### Composition by asset (%)

Bonds	40.7	<div></div>
United Kingdom	21.4	<div></div>
Europe	9.9	<div></div>
United States	8.5	<div></div>
Global	7.9	<div></div>
Asia Pacific	3.9	<div></div>
Japan	3.1	<div></div>
Emerging Markets	2.0	<div></div>
Cash and Other	2.6	<div></div>

- (e) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- (f) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- (g) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- (h) The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.
- (i) Commercial property is less liquid than other asset classes such as bonds or equities. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.
- (j) Commercial property transaction charges are higher than those which apply in other asset classes. Investors should be aware that a high volume of transactions would have a material impact on fund returns.
- (k) Property valuation is a matter of judgment by an independent valuer and is therefore a matter of the valuers opinion rather than fact.

## Derivative usage

- The fund is not expected to invest in derivatives directly however it may invest in other funds which use derivatives more extensively.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website [www.aberdeenstandard.com](http://www.aberdeenstandard.com) The Prospectus also contains a glossary of key terms used in this document.

<sup>1</sup>The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 0.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

<sup>2</sup>The Historic Yield as at 31/01/2020 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. The fund charges 100% of the annual management charge to capital. This has the effect of increasing distributions for the year and constraining the fund's capital performance to an equivalent extent.

<sup>3</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

---

The funds Manager is Aberdeen Standard Fund Managers Limited.

The fund is a sub-fund of Aberdeen Standard Unit Trust I, an authorised Unit Trust.

The information contained in this document should not be considered as an offer, solicitation or investment recommendation to deal in the shares of any securities or financial instruments.
