

ASI Corporate Bond Fund

(From 7 August 2019 the fund name was amended from Aberdeen Corporate Bond Fund to ASI Corporate Bond Fund)

Class I Inc

Performance Data and Analytics to 31 August 2019

Objectives and investment policy

Objective: To generate income and some growth over the long term (5 years or more) by investing in Sterling denominated investment grade corporate bonds.

Please note: Our factsheets will be fully updated to reflect the 7 August 2019 changes to the Investment Objective and Policy, including benchmark use, shortly. In the interim, please see the KIID which can be found at <https://www.aberdeenstandard.com/en/uk/investor/fund-centre#literature> for full up to date information.

These figures do not include the initial charge; if this is paid it will reduce performance from that shown.

The comparator shown may be used for risk monitoring and portfolio construction purposes, as well as to provide a performance comparator; it is not an integral part of the Objective and Investment Policy for the fund and should not be considered as such.

⁴The Aberdeen Investment Funds ICVC Corporate Bond Fund was created by the transfer of the Aberdeen Investment Funds ICVC II Corporate Bond Fund into the Aberdeen Investments ICVC range on 17/07/2015. The historical track record shown prior to this date reflects that of the Aberdeen Investment Funds ICVC II Corporate Bond Fund.

Past performance is not a guide to future results.

Fund manager's report

Corporate bonds suffered in early August as risk-off sentiment returned. Spreads in the UK market were sharply wider across the curve early in the month, although the prospect of a monetary policy response calmed all markets and brought buyers back to the asset class. Although spreads were wider, corporate bonds delivered some strong returns as government bond yields fell to new lows. The widening of spreads was most acute in both lower-quality and longer-dated areas of the sterling market. In terms of sectors, telecoms and cyclical industrials were among the weakest.

The Fund's overweight duration times spread (DTS) stance cost performance, while the overweight duration stance was positive. The Fund is long US dollar and euro duration with a small short versus benchmark duration in the UK. The Fund holds overweight DTS positions in banks, real estate, insurance, electric utilities, housing associations, energy, high yield, asset-backed securities (ABS) and transport. Underweights are in capital goods, water utilities, auto finance, covered bonds, TMT, basic industries, hospitals and finance companies. The Fund's large underweight to GE added performance relative to benchmark.

Asset allocation among sectors added little. There were positive contributions from more defensive areas such as ABS and underweights in areas such as capital goods. These were offset by a hedge position of short Xover credit defaults swap index. This position was put in place to offset expected volatility due to the increasingly fractious global trade background and political developments in the UK. Sub-investment grade markets performed well, especially BB rated bonds. Investors reached down into this area for extra yield, meaning our many off-benchmark holdings performed well.

Risk factors should be read in conjunction with all warnings and comments given in the prospectus for the fund.

Average long term rating

rating	BBB+	A-
Cash includes cash at bank, outstanding settlements, call account cash, fixed deposits, cash used as margin and profit/losses on both derivative positions and forward currency contracts. Where bonds are split rated between two or more of S&P, Moody's and Fitch, the data shown takes a more conservative approach, splitting lower. This may not be consistent with the arrangement agreed in the prospectus, which may detail taking a higher rating where there is a split. In the absence of any agency ratings an internal Fund Manager rating may be applied. The benchmark shown reflects ratings from S&P, Moody's and Fitch only. This may differ from the ratings used by the benchmark provider detailed in the prospectus.

Deal closing time	12.00 noon (UK)
Daily valuation point	12.00 noon (UK)

Source: Simulated Ongoing charges Aberdeen Standard Investments as at 1 December 2018.

^bThe Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Funds. It is made up of the Annual Management Charge (AMC) of 0.50% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Funds. The Ongoing Charges figure can help you compare the annual operating expenses of different Funds.

^cThe Distribution Yield reflects the amounts that may be expected to be distributed over the next twelve months as a percentage of the mid-market share price of the fund as at the date shown. The Underlying Yield reflects the annualised income net of expenses and known irrecoverable withholding tax of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund as at the date shown. Both yields are based on a snapshot of the portfolio on the month-end date and are not guaranteed and actual distributions received (where a share class pays distribution) may be higher or lower than the amount stated. They do not include any initial charges and Investors may be subject to tax on distributions. The Distribution Yield is higher than the Underlying Yield because a portion of the fund's expenses are charged to capital. This has the effect of increasing distributions and constraining the fund's capital performance.

Important information

Risk factors you should consider before investing:

- The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested.
- Bonds: Bond valuations are affected by changes in interest rates, inflation and the creditworthiness of the bond issuer. There is a risk that a bond issuer may not be able to repay the money they borrowed nor make their required interest payments. This risk increases for bonds with lower credit ratings. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
- A full list of risks applicable to this Fund can be found in the Prospectus.

Other important information:

The Fund is a sub-fund of Aberdeen Standard OEIC I, an authorised open-ended investment company (OEIC). The Authorised Corporate Director is Aberdeen Standard Fund Managers Limited. Nothing herein constitutes investment, legal, tax or other advice and is not to be relied upon in making an investment or other decision. No recommendation is made, positive or otherwise, regarding individual securities mentioned. This is not an invitation to subscribe for shares in the Fund and is by way of information only. Subscriptions will only be received and shares issued on the basis of the current Prospectus, relevant Key Investor Information Document (KIID) and Supplementary Information Document (SID) for the Fund. These can be obtained free of charge from Aberdeen Standard Fund Managers Limited, PO Box 9029, Chelmsford, CM99 2WJ.

Aberdeen Standard Investments is a brand of the investment businesses of Aberdeen Asset Management and Standard Life Investments.

United Kingdom (UK): Issued by Aberdeen Standard Fund Managers Limited, registered in England and Wales (740118) at Bow Bells House, 1 Broad Street, London, EC4M 9HH. Authorised and regulated by the Financial Conduct Authority in the UK.
