OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to provide growth by tracking the capital performance of the FTSE World Europe ex UK Index, (the "Benchmark Index"). This objective is after the deduction of charges and taxation.
 - The Benchmark Index is comprised of shares in middle and large capitalisation companies that are incorporated or headquartered or which have their principal business activities in the developed and advanced emerging markets in Europe excluding the UK, in accordance with the index provider's methodology.
 - The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
 - The Fund will have at least 90% exposure to assets that are included in the Benchmark Index.
 - The Fund may also invest in shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index, money market instruments (such as treasury bills), cash, deposits and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
 - The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
 - reduce risk or cost; or
 - generate additional capital or income with no, or an acceptably low, level of risk.
- Other information:**
- The Fund is passively managed as it tracks the Benchmark Index.
 - Your units will be income units. Income from the Fund's investments will be paid out to you (as a dividend). This will reduce your capital growth accordingly.
 - You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
 - The Fund's base currency is denominated in sterling (British pounds).
 - This Fund may be suitable for investors looking for growth from an investment in shares of European companies (excluding the UK) as represented by the Index.
 - Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
 - This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.

RISK AND REWARD PROFILE

Lower risk ← Higher risk
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
 - The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
 - Even a fund in the lowest category is not a risk free investment.
 - The value of your investment and any income you take from it may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at www.legalandgeneral.com/reports.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.

- **Dilution Adjustment:** on any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'. This can vary but as an example for this Fund we estimate 0.15% for purchases and 0.07% for sales at 01 December 2020. The amount of the dilution adjustment may differ in future.
