Report of the Authorised Corporate Director (the "Manager")

The Company

The Invesco Perpetual Smaller Companies and Markets Investment Series is an investment company with variable capital, incorporated in England and Wales on 8 May 2003.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Sub-Funds may be formed by the Manager, subject to regulatory approval. Any changes to Sub-Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 July 2018, the Company consisted of six Sub-Funds:

Invesco Perpetual Emerging European Fund Invesco Perpetual European Smaller Companies Fund Invesco Perpetual Global Emerging Markets Fund Invesco Perpetual Global Smaller Companies Fund Invesco Perpetual Japanese Smaller Companies Fund Invesco Perpetual UK Smaller Companies Equity Fund

Accounting Periods

Annual accounting date 31 July Interim accounting date 31 January Distribution payable on 30 September

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Securities Financing Transactions Regulation

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the year from 1 August 2017 to 31 July 2018, none of the Sub-Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

Remuneration Policy

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2017, to include a detailed process for the determination of Identified Staff and align it with the requirements of the UCITS Directive.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invescoperpetual.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2017 to 31 December 2017) is £102.87m of which £56.09m is fixed remuneration and £46.78m is variable remuneration. The number of beneficiaries is 455.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2017 to 31 December 2017) is £24.01m of which £4.88m is paid to Senior Management and £19.13m is paid to other Identified Staff.

The prices of shares will appear on our website (www.invescoperpetual.co.uk). This is the primary method of price publication. The prices of shares may also be obtained by calling 0800 085 8677 during the Manager's normal business hours.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The Sub-Funds may use derivatives (complex instruments) in an attempt to reduce the overall risk of their investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the Sub-Funds. The Manager, however, will ensure that the use of derivatives within the Sub-Funds does not materially alter the overall risk profile of the Sub-Funds.

The Invesco Perpetual Emerging European Fund and the Invesco Perpetual Global Emerging Markets Fund invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The Invesco Perpetual Global Emerging Markets Fund and the Invesco Perpetual Global Smaller Companies Fund may invest to a limited extent in certain securities listed in China, which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the Sub-Fund. The Invesco Perpetual Emerging European Fund will invest directly in Russia, which can involve significant risks to capital. Although the Invesco Perpetual Emerging European Fund does not actively pursue a concentrated portfolio, it may have a concentrated number of holdings on occasions. Accordingly, the Sub-Fund may carry a higher degree of risk than a Sub-Fund which invests in a broader range of companies or takes smaller positions in a relatively large number of holdings. Although the Invesco Perpetual Global Smaller Companies Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The performance of the Invesco Perpetual Emerging European Fund, Invesco Perpetual European Smaller Companies Fund, Invesco Perpetual Global Emerging Markets Fund, Invesco Perpetual Global Smaller Companies Fund and Invesco Perpetual Japanese Smaller Companies Fund may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The Invesco Perpetual European Smaller Companies Fund, Invesco Perpetual Global Smaller Companies Fund, Invesco Perpetual Japanese Smaller Companies Fund and Invesco Perpetual UK Smaller Companies Equity Fund are smaller companies Sub-Funds. Smaller company Sub-Funds are higher risk than Sub-Funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

All risks are contained within the Prospectus.

Report of the Authorised Corporate Director (the "Manager")

Holdings in other Sub-Funds of the Company

As at 31 July 2018, no Sub-Funds held shares in any other Sub-Fund of the Company.

Liability

The Company is structured by having different Sub-Funds. The assets and liabilities of each Sub-Fund are segregated by UK Law. As a consequence the assets of a Sub-Fund will not be available to meet the liabilities of another Sub-Fund within the Company.

The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Sub-Funds qualify for stocks and shares ISA investment. None of the Sub-Funds qualify for cash ISA investment.

Certification of the Annual Report by the Manager In accordance with the requirements of the Financial Services (Open-Ended Investment Companies) Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Sub-Funds' risk and reward profiles, please refer to the most up to date relevant Sub-Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invescoperpetual.co.uk or by contacting us.

Notes applicable to the financial statements of all Sub-Funds

1 Accounting policies

a) Basis of accounting

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014.

b) Recognition of revenue

- Dividends on quoted ordinary shares and preference shares are recognised when the securities are quoted ex-dividend. Where such securities are not quoted, dividends are recognised when they are declared.
- ii) Interest on bank balances and deposits is recognised on an accruals basis.
- Revenue arising on debt securities is accreted or amortised over the life of such securities and recognised at a consistent rate over the life of the instrument (effective yield accounting). Future cash flows on all debt securities are considered when calculating revenue on an effective yield basis and where purchase costs are considered to reflect incurred credit losses, such losses are taken into account so that interest is recognised at a reasonably expected commercial rate. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital cost of these securities and dealt with as part of the revenue of the Company.
- iv) All revenue is recognised at a gross amount that includes any withholding taxes but excludes any other taxes, such as attributable tax credits.

c) Stock dividends

Ordinary stock dividends are recognised wholly as revenue and are based on the market value of the shares on the dates they are quoted ex-dividend. Where an enhancement is offered, the amount by which the market value of the shares on the date they are quoted ex-dividend exceeds the cash dividend is taken to capital.

d) Special dividends and share buy-backs

The underlying circumstances behind both special dividends and the proceeds from share buybacks are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature. Amounts recognised as revenue will form part of the Company's distribution. Any tax treatment thereon will follow the accounting treatment of the principal amount.

e) Underwriting commission

Underwriting commission is wholly recognised as revenue when the issue takes place, except where the Company is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission received is deducted from the cost of those shares.

f) Expenses

All expenses, except for those relating to the purchase and sale of investments, are charged initially against revenue and are accounted for on an accruals basis.

g) Revenue allocation to share classes

Revenue is allocated each day pro rata to the capital value of assets attributable to each class and taxation is computed by reference to the net revenue after expenses and tax attributable to each class.

h) Measurement basis

The measurement basis used in preparing the financial statements is fair value for investments and historical cost for all other assets and liabilities.

Notes applicable to the financial statements of all Sub-Funds

1 Accounting policies continued

i) Basis of valuation of investments

All investments are valued at their fair value as at the balance sheet date.

All investments have been valued on the last business day of the year at bid market value net of any accrued revenue, at close of business. Where there is no price source from an active market for an investment, the Manager will assess any information available from internal and external sources in order to arrive at an estimated fair value. The fair value is established by using measures of value such as the price of recent transactions, earnings multiple and net assets. The Manager of the Company also makes judgements and estimates based on their knowledge of recent investment performance, historical experience and other assumptions that are considered reasonable under the circumstances. The estimates and the assumptions used are under continuous review by the Manager with particular attention paid to the carrying value of the investments.

j) Exchange rates

Assets and liabilities in foreign currencies are translated into Sterling at the exchange rates ruling at close of business on the last business day of the period. Revenue items denominated in foreign currencies are translated into Sterling at the exchange rates ruling at the times of the transactions.

k) Taxation and deferred taxation

Provision is made for corporation tax at the current rate on the excess of taxable revenue over allowable expenses. Provision is made on all material timing differences arising from the different treatment of items for accounting and tax purposes. A deferred tax asset is recognised only to the extent that there will be taxable profits in the future against which the asset can be offset.

I) Efficient portfolio management

Where appropriate, certain permitted transactions such as derivatives or forward currency transactions are used for efficient portfolio management. Where such transactions are used to protect or enhance revenue, the revenue and expenses derived therefrom are included in 'Revenue' or 'Expenses' in the Statement of Total Return. Where such transactions are used to protect or enhance capital, the gains and losses derived therefrom are included in 'Net capital gains/losses' in the Statement of Total Return. Any positions on such transactions open at the year end are reflected in the Balance Sheet at their marked to market value.

m) Dilution adjustment

The need to apply a dilution adjustment will depend on the volume of sales (where they are issued) or redemptions (where they are cancelled) of shares. The Manager may apply a dilution adjustment on the issue and redemption of such shares if, in its opinion, the existing Shareholders (for sales) or remaining Shareholders (for redemptions) might otherwise be adversely affected, and if applying a dilution adjustment, so far as practicable, is fair to all Shareholders and potential Shareholders. In particular, the dilution adjustment may be applied in the following circumstances for all Sub-Funds in the Invesco Perpetual Smaller Companies and Markets Investment Series:

- where over a dealing period a Sub-Fund has experienced a large level of net issues or redemptions relative to its size. For these purposes a large level of net dealing is defined as 1% or more of the net asset value of the Sub-Fund in question (as calculated at the last valuation point); or
- where the Manager considers it necessary to protect the interests of the Shareholders of the Company.

On the occasions that the dilution adjustment is not applied there may be an adverse impact on the total assets of the Sub-Fund which may otherwise constrain the future growth of the Sub-Fund in question.

Please refer to Appendix 6 of the Prospectus which shows the size of typical dilution adjustments by Sub-Fund and an indication of the frequency of application of such adjustments.

2 Distribution policies

The Sub-Funds will distribute all revenue disclosed in the annual financial statements (less expenses and taxation). The ordinary element of stock dividends is treated as revenue and forms part of the Company's distribution. Should expenses and taxation exceed revenue for a share class, there will be no distribution for that share class and the shortfall will be met from capital. All Sub-Fund accumulations and distributions are paid as dividend distributions.

Distributions which have remained unclaimed by Shareholders for more than six years are credited to the capital property of the Sub-Fund.

Notes applicable to the financial statements of all Sub-Funds

3 Dealing Charges and Research Payments

The cost of the execution service provided by brokers may be included as part of the spread between the bid and offer price or paid through a separate dealing commission. Dealing commissions are used in the equity securities market, whilst the fixed income market includes the cost of execution in the spread. Prior to 3 January 2018, it was market practice for investment managers to enter into dealing commission arrangements under which as well as paying for execution, part of the commission would be used to pay for research services. This was in accordance with regulation.

The European Union legal framework governing financial markets, known as the Markets in Financial Instruments Directive (MiFID I), has been replaced by a revised Directive (the recast MiFID) and new Regulation (MiFIR) – referred to together as MiFID II. MiFID II became effective on 3 January 2018, part way through the period covered by this Report. MiFID II changes the way investment managers operate their businesses. In particular, under MiFID II firms can either pay for research material/services out of their own resources or from a separate research payment account (RPA). From 3 January 2018, the Manager, the Investment Adviser and any sub-adviser pay for all external research materials/services procured for the Sub-Funds out of their own resources across equity, fixed income, derivatives and currency securities. They do not operate a RPA.

4 Shareholders' Sub-Funds

The Manager's entry charge and Fund Management Fee (FMF) are as follows:

		Entry Charge %	Fund Management Fee %
Invesco Perpetual Emerging European Fund	- Trail classes	5.0	1.92
	 No Trail classes 	0.0	1.42
	- Z classes	0.0	1.17
	- Y classes	0.0	1.12
Invesco Perpetual European Smaller Companies Fund	- Trail class	5.0	1.70
	- No Trail class	0.0	1.20
	- Z class	0.0	0.95
	- Y class	0.0	0.90
Invesco Perpetual Global Emerging Markets Fund	- Trail classes	5.0	1.75
	 No Trail classes 	0.0	1.25
	- Z classes	0.0	1.00
	- Y classes	0.0	0.95
Invesco Perpetual Global Smaller Companies Fund	- Trail classes	5.0	1.70
	 No Trail classes 	0.0	1.20
	- Z classes	0.0	0.95
	- Y classes	0.0	0.90
Invesco Perpetual Japanese Smaller Companies Fund	- Trail class	5.0	1.74
	- No Trail class	0.0	1.24
	- Z class	0.0	0.99
	- Y class	0.0	0.94
Invesco Perpetual UK Smaller Companies Equity Fund	- Trail classes	5.0	1.67
	 No Trail classes 	0.0	1.17
	- Z classes	0.0	0.92
	- Y classes	0.0	0.87

With effect from 2 July 2018, the entry charge was removed from the No Trail, Z and Y share classes.

The net assets attributable to each share class, the net assets value per share and the number of shares in issue of each share class are shown in the comparative tables of each Sub-Fund. These can be found on:

Invesco Perpetual Emerging European Fund	pages 18 to 21
Invesco Perpetual European Smaller Companies Fund	pages 36 to 37
Invesco Perpetual Global Emerging Markets Fund	pages 55 to 58
Invesco Perpetual Global Smaller Companies Fund	pages 74 to 77
Invesco Perpetual Japanese Smaller Companies Fund	pages 99 to 100
Invesco Perpetual UK Smaller Companies Equity Fund	pages 114 to 117

Each share class has the same rights on a winding up of the Company.

Notes applicable to the financial statements of all Sub-Funds

5 Generic Risk factors

In pursuing its investment objectives, the Company holds a number of financial instruments that may comprise securities and other investments, cash balances and debtors and creditors that arise directly from its operations.

Political and economic events in the major economies of the world, such as the United States, Japan and the European Union, will influence stock and securities markets worldwide.

The main risks from the Company's holding of financial instruments are set out below together with the Manager's policy for managing these risks.

Investing in Financial Derivative Instruments

There are certain investment risks which apply in relation to the use of derivatives. Derivatives may be used to provide protection for an investment or as a cheaper or more liquid alternative for an investment. However, should the Manager's expectations in employing such techniques and instruments be incorrect, a Sub-Fund may suffer a substantial loss, having an adverse effect on the net asset value of shares. Such instruments may cause greater fluctuations of the net asset value of the Sub-Fund concerned. Transactions in derivatives are used in the Sub-Funds for efficient portfolio management. Derivatives exposure is managed within the investment limits set by the Manager to ensure that the use of derivatives does not materially alter the overall risk profile of the Sub-Fund.

Market price risk

The Company is exposed to the risks normally associated with investment in stocks and shares such as general economic conditions, market events or the performance of underlying stocks. As such the prices of and the income generated by the Company's securities may go down as well as up and an investor may not get back the full amount invested.

Adhering to investment guidelines and avoiding excessive exposure to one particular issuer can mitigate market risk.

Currency exchange risk

The Company may invest in securities denominated in currencies other than Sterling. As a result, changes in exchange rates may adversely affect the value of any investment, which will have a related effect on the price of shares.

Currency exchange risk may be mitigated by hedging the exposure through the use of forward currency contracts.

Liquidity risk

The Company may be affected by a decrease in market liquidity for the securities in which it invests, which may mean that the Company may not be able to sell some securities at a fair price within a timely manner.

In order to mitigate this risk, a substantial proportion of the Company's assets consist of readily realisable assets.

Counterparty risk

The Company may enter into derivative transactions or place cash in bank deposits with counterparties who may not be able to fulfil their responsibility by completing their side of the transactions. As a result, the Company could experience delays in liquidating positions and significant losses, including declines in the value of the investment during the period in which the Company seeks to enforce its rights or inability to realise any gain on investments.

In order to mitigate this risk, the Company conducts trades through reputable counterparties.

Notes applicable to the financial statements of all Sub-Funds

5 Generic Risk factors continued

Investing in a Concentrated Portfolio

Certain Sub-Funds may have concentrated portfolios (holding a limited number of investments and/or large positions in relatively small number of stocks). If one or more of those investments decline or are otherwise adversely affected, it may have a more pronounced effect on the Sub-Fund's net asset value than if a larger number of investments were held or if the Sub-Fund had fewer larger positions. Accordingly they may carry a higher degree of risk and NAV volatility than a Sub-Fund which invests in a broad range of companies and/or does not take large positions in a relatively small number of stocks.

Investment in Emerging Markets

Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets. The following is a brief summary of some of the more common risks associated with emerging markets investment:

Lack of Liquidity

The acquisition and disposal of securities may be more expensive, time consuming and generally more difficult than in more developed markets. Many emerging markets are small, have low trading volumes, low liquidity and significant price volatility.

- Settlement and Custody Risks

Settlement and custody systems in emerging markets are not as well developed as those in developed markets. Standards may not be as high and supervisory and regulatory authorities not as sophisticated. As a result there may be a risk that settlement could be delayed and that cash or securities could be disadvantaged.

Investment and Remittance Restrictions

In some cases, emerging markets may restrict the access of foreign investors to securities. As a result, certain equity securities may not always be available to a Sub-Fund because the maximum permitted number of or investment by foreign Shareholders has been reached. In addition, the outward remittance by foreign investors of their share of net profits, capital and dividends may be restricted or require governmental approval and there can be no guarantee that additional restrictions will not be imposed.

Accounting

Accounting, auditing and financial reporting standards, practices and disclosure requirements applicable to companies in emerging markets differ from those applicable in more developed markets in respect of the nature, quality and timeliness of the information disclosed to investors and, accordingly, investment possibilities may be difficult to properly assess.

Investment in Smaller Companies

Sub-Funds investing in smaller companies invest in transferable securities which may be less liquid than the securities of larger companies, as a result of inadequate trading volume or restrictions on trading. Securities in smaller companies may possess greater potential for capital appreciation, but also involve risks, such as limited product lines, markets and financial or managerial resources and trading in such securities may be subject to more abrupt price movements than trading in the securities of larger companies.

Notes applicable to the financial statements of all Sub-Funds

5 Generic Risk factors continued

Calculation methods of the Risk Exposure

Following the assessment of the investment policy of each Sub-Fund of the Company, Invesco Fund Managers Limited has decided to use Value at Risk (VaR) for the assessment of the global exposure of each Sub-Fund.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not just derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on a two years historical simulation methodology. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself.

Under the relative VaR approach, the VaR of the Sub-Fund is compared to that of a benchmark or reference portfolio. With this approach the choice of benchmark is important and hence the Manager will choose a leverage free benchmark with similar risks to the Sub-Fund.

The calculation standards used for the VaR model are in compliance with the provisions in box 15 of ESMA Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS (Ref: 10-788) ("ESMA Guidelines").

The Absolute VaR of a UCITS cannot be greater than 20% of its NAV. The Relative VaR of a UCITS cannot be more than two times the VaR of the reference portfolio. Invesco Fund Managers Limited monitors that the (VaR of the UCITS)/(2* VaR of the reference portfolio) is not greater than 100%.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to one month (i.e. 20 business days);
- effective observation period (history) of risk factors of 500 business days (ESMA Guidelines require at least 250 business days);
- daily calculation.

In line with box 25 of ESMA Guidelines, as the Sub-Funds use the VaR approach to monitor the global exposure, Invesco Fund Managers Limited calculates the leverage for each Sub-Fund on a daily basis, as the sum of the absolute value of the notionals of the derivatives used. With respect to financial derivative instruments which do not have a notional value attached to them, the calculation of the value is based upon the market value of the equivalent position of the underlying asset that is attached to the financial derivative instrument and applied consistently and appropriately.

The average level of leverage figures provided below does not take into account any netting and hedging arrangements that the Sub-Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purpose.

Notes applicable to the financial statements of all Sub-Funds

5 Generic Risk factors continued

Calculation methods of the Risk Exposure continued

The table below details the VaR approach for each Sub-Fund and, for those Sub-Funds utilising the relative VaR methodology, it details the reference portfolio. The table also details the minimum, maximum and average daily VaR utilisation that occurred during the one year period ending 31 July 2018, as well as the daily average level of leverage for each Sub-Fund during the one year period ending 31 July 2018.

			Global Exposure						Leverage

6 Investment objective and policy

The investment objective and policy of each Sub-Fund can be found on:

Invesco Perpetual Emerging European Fund	page 16
Invesco Perpetual European Smaller Companies Fund	page 34
Invesco Perpetual Global Emerging Markets Fund	page 53
Invesco Perpetual Global Smaller Companies Fund	page 72
Invesco Perpetual Japanese Smaller Companies Fund	page 97
Invesco Perpetual UK Smaller Companies Equity Fund	page 112

The Sub-Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Sub-Fund's investment objective, to fund redemptions of shares in that Sub-Fund, for the efficient management of the Sub-Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Sub-Fund. They may also borrow, provided such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

7 Base currency

The base currency of the Company is Sterling and is taken to be the 'functional currency' of the Company.

8 Bank balances and overdrafts

Bank balances and overdrafts are held by the Custodian, and are subject to the Custodian's variable credit and debit interest rates respectively.

9 Borrowings

The borrowing facilities available to the Company as at 31 July 2018 comprise a bank overdraft facility of up to 10% of the value of the Company (31 July 2017 - 10%).

Notes applicable to the financial statements of all Sub-Funds

10 Transactions and balances with related parties

Invesco Fund Managers Limited (and its associates), as Manager, is a related party and acts as principal in respect of all transactions in the shares of the Company.

Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4, within each Sub-Fund. Management fee rebates are disclosed in notes 2 and 3 within each Sub-Fund. Amounts due at the end of the accounting year for Fund Management Fees are disclosed in note 10 within accrued expenses, within each Sub-Fund.

Invesco Fund Managers Limited and its associates (including other authorised investment companies managed by Invesco Fund Managers Limited) held the following shareholdings in the Sub-Funds:

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual Emerging European Fund

The Sub-Fund aims to achieve long-term capital growth from investment primarily in shares of companies in emerging European countries, which includes Russia. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 19 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 19 is based on the close of business bid price. MSCI Emerging Markets Eastern Europe Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Sub-Fund increased by 12.0% over the twelve months to the end of July 2018, compared to a 17.4% gain in the benchmark MSCI Emerging Markets Eastern Europe Index TR¹.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI Emerging Markets Eastern Europe Index TR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Emerging European equity markets registered healthy gains over the review period. The advance was supported by an improving growth outlook and encouraging corporate earnings results. The biggest driver of Sub-Fund performance came from our holdings in Russia, particularly oil and gas companies, which benefited from higher energy prices - Brent crude rose to US\$80 a barrel, a three and half-year high. LUKOIL and Novatek were our biggest stock contributors. Sberbank of Russia, Russia's largest bank also did reasonably well. Performance outside of Russia was more mixed with our holdings in Poland and Turkey generating disappointing returns. Materials and industrials were other sectors that contributed significantly towards performance.

Sentiment towards emerging equity markets has been knocked in recent months by a tightening in financial conditions brought about by a firmer US dollar and the US Federal Reserve reducing its balance sheet when the US government is faced with funding a bigger budget deficit, accentuated in part by President Trump's tax cuts. This has put emerging countries with a significant reliance on external funding in the spotlight. However, public finances in Russia are in good health and the economies in central Europe remain underpinned by strong growth rates and low interest rates.

Russia now boasts one of the lowest levels of external debt and one of the best current account and fiscal balances of any large emerging market economy. With inflation of 2.5% running well below the Central Bank's target, real interest rates are attractively high. GDP growth has been low but is likely to pick up on the back of the recent strength in the oil price and more stimulative policy efforts. Furthermore, the country offers the best dividend yield of any major emerging market.

The Sub-Fund's largest country exposure is in Russia. We also invest in healthy companies elsewhere in the region, including those based in countries with strong economic ties with Western Europe, for example Poland and Hungary - these countries offer some excellent growth stocks in our view - as well as in off-index countries such as Kazakhstan, thus enhancing the diversification benefits of the portfolio.

As valuation-driven active stock pickers we used a recent period of market weakness to start a position in Yandex, Russia's most popular search engine provider and a rare example of a company that has managed to compete effectively with Google. Like the US tech giant, Yandex currently earns most of its revenue from advertising, a market underpinned by robust dynamics and recovering consumer activity.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Total expenses	636	526

Total audit fees of £6,866 (2017 - £6,866) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Taxation	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
a) Analysis of charge for the year		
Overseas tax	124	129
Total tax charge	124	129

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 ε′000	01.8.16 to 31.7.17 £'000
Net revenue before taxation	1,342	1,081
Corporation tax at 20% (2017 - 20%)	268	216
Effects of: Movement in excess expenses Overseas tax ¹ Relief for overseas tax treated as an expense Revenue not subject to tax	(116) 124 (27) (125)	(122) 129 (26) (68)
Total tax charge	124	129

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end there is a potential deferred tax asset of £78,000 (2017 - £193,000) due to tax losses of £391,000 (2017 - £963,000). It is considered unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these amounts therefore no deferred tax asset has been recognised (2017 - Nil).

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £54,000 (2017 - £49,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As the Sub-Fund invests in emerging and developing markets, investors should be prepared to accept a higher degree of risk than for a Sub-Fund with a broader investment mandate as there is the potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise. The Sub-Fund has a large exposure to Russia, which can involve significant risks to capital as a result from current or potential economic sanctions from the US or the EU, in addition to other risks associated with emerging and developing markets. As the Sub-Fund has a concentrated number of holdings, investors should be prepared to accept higher risks.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	43,963	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	43,963	-
31.7.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	37,908	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	37,908	-

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

14	Portfolio	transaction costs	

for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	11,373	14	0.12	5	0.04
Total purchases	11,373	14		5	
Total purchases including transaction costs	11,392				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	8,901	11	0.12	0	0.00
Total sales	8,901	11		0	
Total sales net of transaction costs	8,890				
Derivative transaction costs		-		-	
Total transaction costs		25		5	
Total transaction costs as a % of average net assets		0.06%		0.01%	

Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 August 2016 to 31 July 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	18,133	32	0.18	5	0.03
Total purchases	18,133	32		5	
Total purchases including transaction costs	18,170				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	11,438	21	0.18	-	-
Total sales	11,438	21		_	
Total sales net of transaction costs	11,417				
Derivative transaction costs		-		-	
Total transaction costs		53		5	
Total transaction costs as a % of average net assets		0.15%		0.02%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.16% (2017 - 0.20%).

Group 1 Group 2	8.2506 5.3553	- 2.8953	8.2506 8.2506	6.8803 6.8803

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Perpetual European Smaller Companies Fund

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual European Smaller Companies Fund
The Sub-Fund aims to achieve capital growth through a portfolio of investments primarily in smaller European
companies, excluding the United Kingdom. In pursuing this objective, the fund managers may include investments
that they consider appropriate which include transferable securities, money market instruments, warrants,
collective investment schemes, deposits and other permitted investments and transactions as detailed in
Appendix 2 of the most recent Prospectus.

Performance	1			Percentage growth

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 37 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 37 is based on the close of business bid price. EMIX Smaller European Companies Ex UK Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² Reference benchmark for performance comparison purposes only.

Invesco Perpetual European Smaller Companies Fund

Investment report for the year

Strategy, review and outlook

The Sub-Fund returned 5.2% in the twelve months ending 31 July 2018, while the EMIX Smaller European Companies Ex UK Index TR^1 benchmark returned 7.3%, and the IA European Smaller Companies Sector NR averaged a return of 9.2%, placing the Sub-Fund in the fourth quartile of its peer group.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. EMIX Smaller European Companies Ex UK Index TR¹ source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

European smaller companies' equity markets rose over the twelve month period as the Eurozone economy continued to grow. A number of issues more recently have questioned the cohesiveness and durability of Europe – a populist party taking the reins of power in Italy, Spain ejecting its Prime Minister, building tension over immigration and political squabbling within Germany's coalition government. Ultimately, we do not believe that the eurozone is teetering on the edge of a currency break-up. There are in reality limits to what the new populist government in Italy will be able to achieve and in any case recent polls have shown that a majority of Italians want to retain the Euro. The market has done a lazy read-across from Italy to Spain: the Spanish situation is totally different. The new Socialist Prime Minister is from a mainstream pro-EU and pro-Euro party. The minority government may not be long-lived, but current polls show strong support for centrist and other pro-EU parties, meaning that new elections would not be a market-unfriendly event.

Thus, we believe that the market's reaction to political events has been substantially overdone. Today, Europe is institutionally much better equipped to intervene and deal with any financial distress compared with the past. Moreover, financial conditions in Europe are very supportive for both consumers and corporates, and the banking system is much better capitalized and in a significantly healthier shape than a few years ago. In addition, sound fundamentals continue to support the European economy as falling unemployment underpins domestic demand. As such, despite the higher risks, we maintain our constructive view on Europe and do not see the recent events as in any way equivalent to the sovereign debt crisis witnessed in 2011-2012.

The key underperforming sector over the twelve month period was energy, as stock selection proved to be a drag on relative performance. Names including Africa Oil, Navios Maritime Acquisition and Ocean Yield were the key laggards here and only partly mitigated by Norwegian energy holding Spectrum. Elsewhere there was relative weakness from Corestate Capital, within the real estate sector along with health care name Celyad.

On the positive side was strong stock selection within the technology and materials sectors. Cancom, the German software company, was the standout performer benefiting from strong earnings growth which beat analysts' expectations, while speciality metals company AMG Advanced Metallurgical, benefitted from higher commodity prices and exposure to end-markets with strong growth dynamics.

Our investment approach is based on individual stock picking and driven by valuation. We continue to look for robust businesses that can withstand any volatility in global activity levels and possess strong fundamentals. We favour companies which have good growth prospects and have what we view as competitive advantages relative to peers. Many of the companies we hold in the Sub-Fund are considered to be disruptive and innovative in their sectors, offering an attractiveness which is not priced into valuations in our view.

Adrian Bignell and Matthew Perowne, Fund Managers

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Total expenses	2,724	2,593

Total audit fees of £6,206 (2017 - £6,206) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Taxation	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
a) Analysis of charge for the year		
Overseas tax	132	172
Total tax charge	132	172

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Net revenue before taxation	926	819
Corporation tax at 20% (2017 - 20%)	185	164
Effects of: Movement in excess expenses Overseas tax ¹ Relief for overseas tax treated as an expense Revenue not subject to tax	509 132 (6) (688)	470 172 (8) (626)
Total tax charge	132	172

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £32,436,000 (2017 - £29,889,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £6,487,000 (2017 - £5,978,000) has not been recognised.

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £223,000 (2017 - £228,000) are disclosed in note 10 within accrued expenses.

Notes to the financial statements

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices within level 1:	168,899 -	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	168,899	-
31.7.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	181,907	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	181,907	_

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

Invesco Perpetual European Smaller Companies FundNotes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2016 to 31 July 2017

	Transaction				
Purchases (excluding derivatives)	Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Debt instruments (direct)	124,646 260	165 -	0.13	34 -	0.03
Total purchases	124,906	165		34	
Total purchases including transaction costs	125,105				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Debt instruments (direct)	138,907 313	219	0.16	-	-
Total sales	139,220	219		_	
Total sales net of transaction costs	139,001				
Derivative transaction costs		34		-	
Total transaction costs		418		34	
Total transaction costs as a % of average net assets		0.24%		0.02%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-Fund utilised derivative instruments including options covering different underlying asset classes. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivatives positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.60% (2017 - 0.43%).

Invesco Perpetual European Smaller Companies FundDistribution table

Distribution table

for the year 1 August 2017 to 31 July 2018

Distribution payable 30 September 2018	Net revenue p	Equalisation p	Net distribution payable 30.9.18 p	Net distribution paid 30.9.17 p
Accumulation shares Group 1 Group 2	0.6074 0.6074	0.0000	0.6074 0.6074	0.4353 0.4353
Accumulation shares (No Trail) Group 1 Group 2	2.3850 2.3850	0.0000	2.3850 2.3850	1.9627 1.9627
Z Accumulation shares Group 1 Group 2	4.7197 4.7197	0.0000	4.7197 4.7197	3.9365 3.9365
Y Accumulation shares Group 1 Group 2	3.0933 3.0933	0.0000	3.0933 3.0933	2.5826 2.5826

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual Global Emerging Markets Fund

The Sub-Fund aims to achieve capital growth primarily through a portfolio of shares in companies established and/or operating in countries where, in the opinion of the Manager, there is an emerging market. Exposure to such markets will partially be obtained through indirect investment in securities traded on other markets. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 56 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 56 is based on the close of business bid price. MSCI Emerging Markets Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² Reference benchmark for performance comparison purposes only.

Investment report for the year

Strategy, review and outlook

The Sub-Fund increased by 1.7% over the twelve months to the end of July 2018, compared to a 5.3% gain for the benchmark MSCI Emerging Markets Index TR¹. This placed the Sub-Fund in the third quartile of its peer group, the IA Global Emerging Markets Sector NR, which rose by an average of 2.8%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI Emerging Markets Index TR¹ source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Global emerging equity markets enjoyed a healthy start, drawing support from improving economic fundamentals and encouraging corporate earnings results. However, positive sentiment started to fade from February onwards as the asset class encountered headwinds in the form of higher US interest rates, a stronger US Dollar and rising concerns over trade protectionism.

There was a divergence in Sub-Fund performance at both a country and sector level. Asian tech stocks, led by our holdings in Taiwan's Yageo and China's Alibaba performed relatively well although gains here were partially offset by disappointing returns from Turkey and Brazil. Political concerns had a negative impact on the latter while a growing currency crisis dampened enthusiasm for Turkish stocks. Despite the imposition of fresh US sanctions on Russia, our holdings here showed resilience by contributing positively towards performance. From a sector perspective, energy generated positive gains, whereas our holdings in consumer-related stocks experienced more challenging conditions.

Global trade is an important driver for many emerging markets so actions by the US and how China responds have to be monitored closely. While the trade escalation is a concern, there is also a pattern with President Trump that the rhetoric can get very strident before he ultimately seeks out a deal and declares victory. This still seems like a plausible outcome, especially considering that Trump and his team have tended to soften their tone in the aftermath of US market volatility caused by trade war anxiety.

While growth in China may slow a little over coming months as the authorities tighten the reins on regulations - both financial and environmental – we believe there are areas of the economy that can continue to strengthen. One key sector is technology, where we have significant exposure, through our holdings in Alibaba, Baidu and NetEase.

Given the official campaign to tackle excessive debt and financial risk in the country, we have an underweight position versus the reference benchmark in Chinese banks. However, we do favour banking stocks elsewhere in the emerging world, particularly in the EMEA region, where we believe valuations are compelling.

We remain constructive on Russia - the country has a headline inflation rate below that of the US, low levels of external debt and is on track to achieve a budget surplus this year for the first time since 2011 - yet its equity market trades at a big discount to peers in both the emerging and developed world. Furthermore, the country offers the best dividend yield of any major emerging market. While sanctions are hard to price, there is a possibility that this risk will fade over time.

Prices			
Highest share price	334.68	307.82	246.11
Lowest share price	296.41	236.91	177.36

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Notes to the financial statements

Refer to pages 06 to 15 for notes applicable to the financial statements of all Sub-Funds.

1 Accounting policies

The Sub-Fund's accounting and distribution policies are set out on pages 06 to 07.

2 Net capital gains	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Derivative securities	-	1,652
Foreign currency contracts	-	2
Foreign currency losses	(335)	(131)
Non-derivative securities	5,159	77,913
Net capital gains	4,824	79,436
3 Revenue	01.8.17 to 31.7.18	01.8.16 to 31.7.17
Bank interest	£'000	£'000
Non-taxable overseas dividends	7,426	6,967
Stock dividends	158	367
Taxable overseas dividends	1,259	1,499
UK dividends	301	365
	9,146	9,198
4 Expenses	01.8.17 to 31.7.18 £′000	01.8.16 to 31.7.17 £′000
Payable to the Manager, associates of the Manager and agents of either of them:		
Fund Management Fee ¹	4,521	4,213
	4,521	4,213
Other expenses: VAT recoverable	_	(4)
VALLECOVERABLE	-	(4)
Total company	4 5 2 1	
Total expenses	4,521	4,209

Total audit fees of £6,423 (2017 - £6,423) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Taxation	01.8.17 01.8.16 to 31.7.18 to 31.7.17 £'000 £'000
a) Analysis of charge for the year	
Overseas tax	998 942
Total tax charge	998 942

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Net revenue before taxation	4,624	4,988
Corporation tax at 20% (2017 - 20%)	925	998
Effects of:		
Movement in excess expenses	681	571
Overseas tax ¹	998	942
Relief for overseas tax treated as an expense	(29)	(29)
Revenue not subject to tax	(1,577)	(1,540)
Total tax charge	998	942

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £17,839,000 (2017 - £14,432,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £3,567,000 (2017 - £2,886,000) has not been recognised.

6 Interest payable and similar charges	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Interest	1	1

7 Distributions	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Accumulations and distributions payable 30 September 2018 Amounts deducted on redemption of shares Amounts received on issue of shares	3,713 98 (185)	3,995 389 (335)
	3,626	4,049
The distributable amount has been calculated as follows: Net revenue after taxation Equalisation on conversions	3,626 -	4,046 3
	3,626	4,049

Notes to the financial statements

8 Debtors	31.7.18 £'000	31.7.17 £'000

Net distribution payable	339	294
	339	294
b) Other creditors		
Accrued expenses	355	381
Amounts payable for redemption of shares	171	74
Foreign currency contracts awaiting settlement	54	-
Purchases awaiting settlement	178	_
	758	455

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £355,000 (2017 - £381,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As the Sub-Fund invests in emerging and developing markets, investors should be prepared to accept a higher degree of risk than for a Sub-Fund with a broader investment mandate as there is the potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	377,817	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	377,817	-
31.7.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	376,762	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	376,762	_

All financial investments are classified as level 1: Unadjusted quoted price in an active market for an identical instrument.

Total sales net of transaction costs Derivative transaction costs	142,200	-		_	
Total transaction costs		564		147	
Total transaction costs as a % of average net assets		0.16%		0.04%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.19% (2017 - 0.17%).

Group 1	3.7360	-	3.7360	3.8979
Group 2	2.1500	1.5860	3.7360	3.8979

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual Global Smaller Companies Fund

The Sub-Fund aims to achieve capital growth through a portfolio of investments in international securities. The Sub-Fund intends to invest mainly in shares of smaller companies, which are quoted on the world's stock markets. In pursuing this objective, the fund managers may include investments that they consider appropriate which include transferable securities, money market instruments, warrants, collective investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2 of the most recent Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 75 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 75 is based on the close of business bid price. MSCI AC World Small Cap Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Reference benchmark for performance comparison purposes only.

Investment report for the year

Strategy, review and outlook

The Sub-Fund returned 5.7% over the twelve months to the end of July 2018, compared to a return of 13.5% for the benchmark MSCI AC World Small Cap Index TR¹. This placed the Sub-Fund in the fourth quartile of its peer group, the IA Global Sector NR, which returned an average of 10.5%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. MSCI AC World Small Cap Index TR¹ source: Lipper, total return, in Sterling terms.

Past performance is not a guide to future returns.

Global equity markets ended 2017 near all-time highs amid solid corporate earnings and accelerating economic growth. The year 2018 got off to an equally strong start for global equity markets. Strength in corporate earnings, synchronised economic growth and optimism over US tax cuts helped drive up prices in many markets across the world to their highest on record. Nevertheless, volatility, however, made a return in the first quarter as signs of a pick-up in inflation prompted an upward move in US bond yields.

Despite growing concerns over the possibility of a US-China trade war, global equity markets ended the second quarter in positive territory. Markets had focused on simmering trade tensions but would need more clarity from the White House on its plans, however, before the outlook for trade and its impact on global growth could be assessed. By July, relief over the agreement reached by the US and the EU on defusing trade tensions extended to reports of efforts by the US and China to re-engage in negotiations.

Our underperformance was primarily driven by stock selection. Over the past twelve months markets have become more expensive, and as long-term valuation focussed investors we have tended to gravitate towards cheaper stocks and sectors in the market. In technology, for example, our exposure has been more tilted to hardware companies rather than the much more expensive e-commerce names.

However investors' willingness to pay up for companies with robust revenue growth remained resolute throughout the year. For many technology stocks, particularly e-commerce-related, we cannot make the valuation work or at least the risk/reward we see of owning them just now is so negatively skewed we do not want to commit capital to them.

In terms of regional exposure, stock selection in Europe and Asia Pacific ex-Japan, in contrast to previous years, was a drag on performance. In Europe in particular we experienced some stock specific issues, most notably in Q2 2018.

Meanwhile in recent months US small cap stocks rallied on strong profits growth driven in large part by tax cuts, but also domestic economic growth. As such, the US small cap market produced one of the strongest set of returns over the twelve months of all the major regions. However, the Sub-Fund's underweight exposure, driven by our view of the high level of valuation in that market, had a negative impact on returns.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Total audit fees of £6,423 (2017 - £6,423) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Taxation	01.8.17 01.8. to 31.7.18 to 31.7. ε'000 ε'0	17
a) Analysis of charge for the year		
Overseas tax	1,148 1,06	56
Total tax charge	1,148 1,06	56

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2017 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Net revenue before taxation	4,558	4,176
Corporation tax at 20% (2017 - 20%)	912	835
Effects of: Movement in excess expenses Overseas tax ¹ Relief for overseas tax treated as an expense Revenue not subject to tax	1,808 1,148 (8) (2,712)	1,605 1,066 (9) (2,431)
Total tax charge	1,148	1,066

Includes amounts for the recovery of excess withholding tax suffered on dividends received in prior accounting periods.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £74,120,000 (2017 - £65,079,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £14,824,000 (2017 - £13,016,000) has not been recognised.

6 Interest payable and similar charges	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Interest	1	1

7 Distributions	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000

Purchases awaiting settlement	2,146	3,676
	7,171	8,118

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of \$874,000 (2017 - \$822,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than for a Sub-Fund with a broader investment mandate. Although the Sub-Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	813,315	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	1,908	-
	815,223	-
31.7.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	754,483	-
within level 1;	_	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	754,483	-

The majority of financial investments are classified as level 1: Unadjusted quoted prices in an active market for an identical instrument. Investments classified as level 3: Valuation techniques using unobservable inputs mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis Management assess the investment company's progress against milestones expected
 at the time of investment in order to determine whether an adjustment is required to the transaction price
 to determine fair value.
- Multiples Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets Management determine the fair value based on the net asset value of the underlying portfolio company.

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company.
- Consideration of seniority of the securities held and terms of repayment upon realisation.
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding.
- Consideration of any outstanding payments to be made by Invesco.
- Industry statistics or events (such as mergers and acquisitions).

Invesco Perpetual Global Smaller Companies Fund Notes to the financial statements

14 Portfolio transaction costs for the year 1 August 2017 to 31 July 2018

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	346,351	207	0.06	269	0.08

Total sales net of transaction costs	330,071				
Derivative transaction costs		-		-	
Total transaction costs		428		332	
Total transaction costs as a % of average net assets		0.05%		0.04%	

Invesco Perpetual Global Smaller Companies Fund Notes to the financial statements

14 Portfolio transaction costs continued

for the year 1 August 2016 to 31 July 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	412,881	504	0.12	238	0.06
Total purchases	412,881	504		238	
Total purchases including transaction costs	413,623				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	437,339	633	0.14	58	0.01
Total sales	437,339	633		58	
Total sales net of transaction costs	436,648				
Derivative transaction costs		-		-	
Total transaction costs		1,137		296	
Total transaction costs as a % of average net assets		0.16%		0.04%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.28% (2017 - 0.29%).

Notes to the financial statements

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Perpetual Japanese Smaller Companies Fund

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual Japanese Smaller Companies Fund
The Sub-Fund aims to achieve capital growth, primarily through a portfolio of investments in smaller
Japanese companies. In pursuing this objective, the fund managers may include investments that they
consider appropriate which include transferable securities, money market instruments, warrants, collective
investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2
of the most recent Prospectus.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invescoperpetual.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 100 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 100 is based on the close of business bid price. Russell Nomura Small Cap Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

² Reference benchmark for performance comparison purposes only.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Invesco Perpetual Japanese Smaller Companies Fund

Investment report for the year

Strategy, review and outlook

The Sub-Fund gained 21.4% over the twelve months in Sterling terms to the end of July 2018, outperforming the benchmark Russell Nomura Small Cap Index TR¹ which returned 12.2%. This placed the Sub-Fund in the second quartile of its peer group, the IA Japanese Smaller Companies Sector NR, which rose by an average of 20.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. Russell Nomura Small Cap Index TR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Stock selection added the most value over the review period. The largest positive contributor was Japan Material, a gas management system provider for semiconductor factories, which has been successfully capitalising on strong secular growth in demand. Holdings in staffing service companies, Fullcast and En-Japan, outperformed benefitting from strong demand for their services given the generally labour shortage and the difficulty of finding staff in Japan. On the other hand, Gunosy, an internet content service provider was the largest detractor as a decline in the number of active users of its main application weighed on its stock performance. Finally, Nissha, an electronics component manufacturer, underperformed as recent weakness in smartphone shipments dampened markets' enthusiasm for its touch film business.

The Japanese mid to small-cap equity markets rose until the beginning of 2018 thanks to strong earnings results, solid global economic growth and some easing of tensions between the US and North Korea. In addition, on the domestic front, the landslide victory of Prime Minister Shinzo Abe's ruling coalition government at a snap election bolstered the hope that ongoing structural reforms would gain further momentum. However, since late January, risk aversion triggered by fears surrounding global political risks, namely the US trade frictions, negatively impacted the Japanese equity markets, especially high-growth mid to small sized stocks. Increased concerns over a slowdown in growth momentum in the current global economic cycle also overshadowed market sentiment. In contrast, Japanese companies posted healthy earnings growth for the year ending March 2018.

Looking ahead, we are carefully monitoring global political developments including lingering global trade tensions, the policies of central banks and the receded risk appetite which has been curbing money flows into high-growth small-cap markets in Japan. Meanwhile, our approach as a bottom-up stock picker remains the same, focusing on high growth companies in the small cap-space. The Sub-Fund continues to emphasise stocks that fit within our investment themes: the fourth industrial revolution, ageing society & labour scarcity, social infrastructure, Abenomics de-regulation and growth strategies and renewable energy. Examples of such stocks include PeptiDream (a biopharmaceutical company), D.A.Consortium (an online advertising company) and Fullcast (a leading recruiting solution provider).

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

	1,079	770
Total expenses	1,079	770

Total audit fees of £6,206 (2017 - £6,206) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Invesco Perpetual Japanese Smaller Companies Fund

Notes to the financial statements

5 Taxation	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
a) Analysis of charge for the year		
Overseas tax	75	50
Total tax charge	75	50

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is higher (2017 - higher) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Net expenses before taxation	(321)	(265)
Corporation tax at 20% (2017 - 20%)	(64)	(53)
Effects of:		
Movement in excess expenses	215	154
Overseas tax	75	50
Revenue not subject to tax	(151)	(101)
Total tax charge	75	50

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £18,451,000 (2017 - £17,375,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £3,690,000 (2017 - £3,475,000) has not been recognised.

6	Interest payable and similar charges	01.8.17 to 31.7.18	01.8.16 to 31.7.17

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £100,000 (2017 - £69,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Invesco Perpetual Japanese Smaller Companies Fund

Derivative transaction costs		-		-	
Total transaction costs		110		_	
Total transaction costs as a % of average net assets		0.21%		0.00%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.30% (2017 - 0.28%).

Invesco Perpetual Japanese Smaller Companies FundDistribution table

Distribution table

for the year 1 August 2017 to 31 July 2018

Distribution payable 30 September 2018	Net revenue p	Equalisation p	Net distribution payable 30.9.18 p	Net distribution paid 30.9.17 p
Accumulation shares Group 1 Group 2	0.0000 0.0000	0.0000	0.0000	0.0000
Accumulation shares (No Trail) Group 1 Group 2	0.0000	0.0000	0.0000	0.0000
Z Accumulation shares Group 1 Group 2	0.0000 0.0000	0.0000	0.0000	0.0000
Y Accumulation shares Group 1 Group 2	0.0000 0.0000	0.0000	0.0000	0.0000

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Investment report for the year

The Investment Objective and Policy of the Invesco Perpetual UK Smaller Companies Equity Fund
The Sub-Fund aims to achieve capital growth in the UK. The Sub-Fund intends to invest primarily in shares of
smaller companies in the UK. In pursuing this objective, the fund managers may include investments that they
consider appropriate which include transferable securities, money market instruments, warrants, collective
investment schemes, deposits and other permitted investments and transactions as detailed in Appendix 2
of the most recent Prospectus.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. This may differ from the performance figure shown on page 115 for Z Accumulation shares as the figure above is based on the quoted 12pm price and the figure shown on page 115 is based on the close of business bid price. Numis Smaller Companies Extended ex Investment Companies Index TR² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

Investment report for the year

Strategy, review and outlook

The Sub-Fund delivered a return of 11.6% over the twelve months to the end of July 2018, compared to a rise of 5.0% by the Numis Smaller Companies Extended ex Investment Companies Index TR¹. This placed the Sub-Fund in the third quartile of its peer group, the IA UK Smaller Companies Sector NR, which rose by an average of 13.6%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Performance figures are based on the Z Accumulation share class. Numis Smaller Companies Extended ex Investment Companies Index TR¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

The UK Equity market delivered positive returns over the twelve month period under review, despite notable volatility towards the beginning of 2018. The period was characterised by ongoing 'Brexit' negotiations, as well as two interest rate rises from the Bank of England's Monetary Policy Committee. Sterling has been broadly weak versus the Euro and Dollar, despite a notable rally in the first few months of the year. The UK Government lifted the cap on pay rises for many public sector workers, including teachers, doctors and the police.

The most notable positive contributor to Sub-Fund performance over the period was Dechra Pharmaceuticals. The speciality veterinary company delivered strong share price growth over the period, as it released results that confirmed continued organic growth, which was further boosted by the integration of recent acquisitions.

The portfolio's holding in Softcat and Keywords Studios also supported performance. Softcat, an Information Technology reseller, released a strong full year update for 2017 prompting some industry analysts to upgrade their estimates of the company's value. Meanwhile Keywords Studios, which outsources services to games studios, continued to perform well during the period following exceptional results for the first half of the year in 2017.

Conversely, Sub-Fund performance was held back by the performance of Financial Services Provider Arrow Global. Shares fell sharply in May following a negative trading update, which prompted some industry analysts to downgrade their estimates of the company's value. The Sub-Fund's holding in Ultra Electronics also weighed on returns. Shares in the manufacturing company fell dramatically in November, as the Chief Executive Officer resigned and full year profit guidance was cut. At the time the company noted increasing pressures from cuts to the UK Defence budget. The shares have recovered well over subsequent months but remain lower than highs seen before the fall.

The manager believes that the outlook for the UK economy continues to be clouded by political uncertainty, particularly around Brexit. Earnings expectations for UK smaller companies look reasonable in the manager's view, with earnings per share growth expected over the next year. The manager continues to favour businesses with self-help potential, successful roll-out strategies and those exposed to secular growth trends.

Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there are other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which will also have reduced the Sub-Fund and share class returns before operating charges.

Highest and lowest share prices are based upon quoted prices.

Notes to the financial statements

Refer to pages 06 to 15 for notes applicable to the financial statements of all Sub-Funds.

1 Accounting policies

The Sub-Fund's accounting and distribution policies are set out on pages 06 to 07.

2 Net capital gains	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Foreign currency gains	-	1
Non-derivative securities	60,971	170,373
Net capital gains	60,971	170,374

3 Revenue	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Bank interest	11	-
Management fee rebates	55	73
Non-taxable overseas dividends	526	727
UK dividends	13,028	10,387
UK REIT dividends	521	396
	14,141	11,583

4 Expenses	01.8.17 to 31.7.18 £′000	01.8.16 to 31.7.17 £'000
Payable to the Manager, associates of the Manager and agents of either of them: Fund Management Fee ¹	9,309	8,267
	9,309	8,267
Total expenses	9,309	8,267

Total audit fees of £9,423 (2017 - £6,423) exclusive of VAT payable to the auditors for the year ended 31 July 2018 are borne out of the Fund Management Fee.

Notes to the financial statements

5 Taxation	01.8.17 01.8.16 to 31.7.18 to 31.7.17 ε'000 ε'000
a) Analysis of charge for the year	
Overseas tax	
Total tax charge	

There is no corporation tax charge for the year (2017 - Nil).

b) Factors affecting the tax charge for the year

The tax assessed for the year is lower (2017 - lower) than the standard rate of corporation tax in the UK for an authorised investment company with variable capital. The differences are explained below:

	01.8.17 to 31.7.18 £′000	01.8.16 to 31.7.17 £'000
Net revenue before taxation	4,832	3,316
Corporation tax at 20% (2017 - 20%)	966	663
Effects of: Movement in excess expenses Revenue not subject to tax	1,745 (2,711)	1,560 (2,223)
Total tax charge	-	-

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the above reconciliation.

c) Deferred tax

At the year end the Sub-Fund had surplus management expenses of £116,514,000 (2017 - £107,792,000). It is unlikely that the Sub-Fund will generate sufficient taxable profits in the future to utilise these expenses and therefore a deferred tax asset of £23,303,000 (2017 - £21,558,000) has not been recognised.

6	Interest payable and similar charges	01.8.17 to 31.7.18	01.8.16 to 31.7.17
		£'000	£′000
Inte	erest	-	-

7 Distributions	01.8.17 to 31.7.18 £'000	01.8.16 to 31.7.17 £'000
Accumulations and distributions payable 30 September 2018 Amounts deducted on redemption of shares Amounts received on issue of shares	4,762 178 (99)	3,315 266 (150)
	4,841	3,431
The distributable amount has been calculated as follows: Net revenue after taxation Equalisation on conversions	4,832 9	3,316 115
	4,841	3,431

Notes to the financial statements

8 Debtors	31.7.18 £'000	31.7.17 £′000
Accrued revenue	889	666
Amounts receivable for issue of shares	31	106
Sales awaiting settlement	-	113
	920	885
9 Cash and bank balances	31.7.18 £'000	31.7.17 £'000
Cash and bank balances	19,238	7,521
10 Creditors	31.7.18 £'000	31.7.17 £'000
a) Distribution payable		
Net distribution payable	703	485
	703	485
b) Other creditors		
Accrued expenses	807	752
Amounts payable for redemption of shares	457	272
Purchases awaiting settlement	_	1,456
	1,264	2,480

11 Contingent assets, liabilities and outstanding commitments

There were no commitments or contingent liabilities at the balance sheet date (2017 - Nil).

12 Related parties

Related party interests in the Sub-Fund are disclosed in note 10 of the notes applicable to the financial statements of all Sub-Funds on page 15. Amounts received in respect of sales in the accounting year of £3,647,000 (2017 - £244,000) are included within the figures disclosed in note 14. Amounts payable to Invesco Fund Managers Limited in respect of Fund Management Fees are disclosed in note 4. Amounts due at the end of the accounting year for Fund Management Fees of £807,000 (2017 - £752,000) are disclosed in note 10 within accrued expenses.

13 Generic Risk factors

As this is a smaller companies fund, investors should be prepared to accept a higher degree of risk than funds that can invest in larger company sizes. Market conditions, such as a decrease in market liquidity, may mean that it is not easy to buy or sell securities.

The Sub-Fund's performance may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

The risk factors relating to the Sub-Fund are discussed more fully in note 5 of the notes applicable to the financial statements of all Sub-Funds on pages 09 to 13.

a) Counterparty risk

The Sub-Fund was not exposed to any counterparty risk as at the balance sheet date (2017 - Nil).

Notes to the financial statements

13 Generic Risk factors continued

b) Valuation of financial investments

The categorisation of financial investments in the tables below reflect the basis of valuation of investments used to measure their fair value.

	Assets £'000	Liabilities £'000
31.7.18		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	655,516	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	6,421	-
	661,937	-
31.7.17		
Level 1: Unadjusted quoted price in an active market for an identical instrument; Level 2: Valuation techniques using observable inputs other than quoted prices	639,881	-
within level 1;	-	-
Level 3: Valuation techniques using unobservable inputs.	-	-
	639,881	-

The majority of financial investments are classified as level 1: Unadjusted quoted prices in an active market for an identical instrument. Investments classified as level 3: Valuation techniques using unobservable inputs mainly comprise non-market traded and unquoted securities.

Generally for the non-market traded and unquoted securities, where there is no price source from an active market for an investment, the Manager has applied judgement in determining the fair value. The Manager has used several valuation methodologies as prescribed in the International Private Equity and Venture Capital valuation guidelines to arrive at their best estimate of fair value. Valuation techniques used by the Manager are set out in Accounting Policies Note 1 (i). The fair value is established by using measures of value such as:

- Price of recent transactions Management determine the fair value based on the price of recent transactions made by management or a third party.
- Milestone analysis Management assess the investment company's progress against milestones expected
 at the time of investment in order to determine whether an adjustment is required to the transaction price
 to determine fair value.
- Multiples Earnings or Revenue multiples are selected from comparable public companies based on geographic location, industry, size, risk profile, earnings growth prospects, target markets and other factors that management consider reasonable. A discount for lack of liquidity may then be applied to represent the adjustment to comparable company multiples to reflect the illiquidity of the portfolio companies relative to the comparable peer group. Management determines the discount for lack of liquidity based on its judgement, after considering market liquidity conditions and company specific factors such as the development stage of the portfolio company. One of the most common forms of multiples used for cash generating companies are EV/EBITDA multiples as EBITDA is generally seen to represent a good proxy for free cash flow. These are applied where appropriate based on the development of underlying portfolio companies but other multiples such as EV/Revenue may also be considered.
- Net assets Management determine the fair value based on the net asset value of the underlying portfolio company.

In applying the above valuation techniques in arriving at the fair value the Manager has assessed any further information available from internal and external sources to arrive at an estimated fair value, which includes but is not limited to the following:

- Reference to listed securities of the same company.
- Consideration of seniority of the securities held and terms of repayment upon realisation.
- Consideration of any trading restrictions on the investment company's shares that would limit Invesco's ability to realise its holding.
- Consideration of any outstanding payments to be made by Invesco.
- Industry statistics or events (such as mergers and acquisitions).

Invesco Perpetual UK Smaller Companies Equity Fund Notes to the financial statements

14 Portfolio transaction costs

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	121,148	69	0.06	317	0.26
Total purchases	121,148	69		317	
Total purchases including transaction costs	121,534				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	154,134	117	0.08	0	0.00
Debt instruments (direct) Collective investment schemes	3 3,651	- 4	0.11	- 0	0.00
Total sales	157.788	121	0.11	0	0.00
Total sales net of	131,100	121		<u> </u>	
transaction costs	157,667				
Derivative transaction costs		-		-	
Total transaction costs		190		317	
Total transaction costs as a % of average net assets		0.03%		0.05%	

Invesco Perpetual UK Smaller Companies Equity FundNotes to the financial statements

14 Portfolio transaction costs continued for the year 1 August 2016 to 31 July 2017

Purchases (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct)	135,090	204	0.15	479	0.35
Total purchases	135,090	204		479	
Total purchases including transaction costs	135,773				
Sales (excluding derivatives)	Transaction Value £'000	Commissions £'000	%	Taxes £'000	%
Equity instruments (direct) Collective investment schemes	156,173 244	263 -	0.17	_ _	-
Total sales	156,417	263		-	
Total sales net of transaction costs	156,154				
Derivative transaction costs		-		-	
Total transaction costs		467		479	
Total transaction costs as a % of average net assets		0.08%		0.08%	

The above analysis covers any direct transaction costs suffered by the Sub-Fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instruments types.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the Sub-Fund's purchase and sale of equity shares. Additionally for equity shares, there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-Fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-Fund's daily liquidity position are excluded from the analysis.

For the Sub-Fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However, additionally there are indirect transaction costs suffered in those underlying Sub-Funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-Fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.92% (2017 - 0.86%).

Group 1: shares purchased prior to 1 August 2017 Group 2: shares purchased on or after 1 August 2017

Equalisation applies only to shares purchased during the distribution period (Group 2). It is the average amount of revenue included in the purchase price of all Group 2 shares and is refunded to holders of these shares as a return of capital. Being capital it is not liable to income tax. Instead, it must be deducted from the cost of shares for capital gains purposes.

Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company")

Regulatory statements

Statement of the Manager's Responsibilities in relation to the Financial Statements

The Collective Investment Schemes sourcebook ("COLL") requires the Manager to prepare financial statements for each annual accounting period which give a true and fair view of the financial position of the Company as at the end of the year and of the net revenue or expense and the net capital gains or losses on the scheme property of the Company for the year then ended. In preparing the financial statements the Manager is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;
- comply with the disclosure requirements of the Statement of Recommended Practice relating to Financial Statements of Authorised Funds;
- follow applicable accounting standards; and
- keep proper accounting records which enable it to demonstrate that the accounts as prepared comply with the above requirements.

The Manager is responsible for the management of the Company in accordance with the Prospectus and the OEIC Regulations.

The Manager is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Depositary's Responsibilities in relation to the Financial Statements

The Depositary is responsible for the safekeeping of all of the property of the Company (other than tangible moveable property) which is entrusted to it.

It is the duty of the Depositary to take reasonable care to ensure that the Company is managed in accordance with the COLL, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) ("the OEIC Regulations") and the Company's Instrument of Incorporation in relation to the pricing of, and dealings in, the shares of the Company, the application of the revenue of the Company, and the investment and borrowing powers of the Company.

Depositary's Report to Shareholders

Having carried out such procedures as we considered necessary to discharge our responsibilities and duties as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the Manager:

- (i) has carried out the issue, sale, redemption and cancellation of shares in the Company, the calculation of the price of the Company's shares and the application of the Company's revenue in accordance with the COLL and, where applicable, the OEIC Regulations and the Instrument of Incorporation of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Citibank Europe plc, UK Branch

London 27 September 2018

Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company")

Independent Auditors' Report to the Shareholders of Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company")

Report on the audit of the financial statements

Opinion

In our opinion, Invesco Perpetual Smaller Companies and Markets Investment Series' financial statements:

- give a true and fair view of the financial position of the Company and each of the Sub-Funds as at 31 July 2018 and of the net revenue/expenses and the net capital gains/(losses) on the scheme property of the Company and each of the Sub-Funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company") is an Open Ended Investment Company ('OEIC') with six Sub-Funds. The financial statements of the Company comprise the financial statements of each of the Sub-Funds. We have audited the financial statements, included within the Annual Report Including Long Form Financial Statements (the "Annual Report"), which comprise the Balance Sheets as at 31 July 2018; the Statement of Total Return and the Statement of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution tables; the notes applicable to the financial statements of all Sub-Funds and the notes to the financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you when:

- the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Authorised Corporate Director has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's or any of the Sub-Funds' ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's or any of the Sub-Funds' ability to continue as a going concern.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Director's Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company")

Independent Auditors' Report to the Shareholders of Invesco Perpetual Smaller Companies and Markets Investment Series (the "Company") continued

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 131, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the Sub-Funds' ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual Sub-Fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.
