\*Index returns for the "Since Fund Inception" period are based on the FGBL inception date (28 August 2015).

Past performance is not a reliable indicator of future results. Fund Performance is shown after fees including re-invested dividends in the base currency of the Fund and does not take into account any currency exposure that may exist against the trading currency of the Fund. Returns may fluctuate with currency fluctuations. Returns for periods less than one year are cumulative; all other performance figures are annualised. The NASDAQ Global High Equity Income Index launched 20 January 2016. Index performance shown from 20 January 2016 shows the actual performance since inception. Actual performance of the Fund may be materially lower than that of the index portfolios.

<sup>1</sup>The Fund is part of the Global Equity Income and was rated 4 stars/882 funds. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2019 Morningstar, Inc. ## Investment Objective

The Fund seeks to provide investors with investment results that correspond generally to the price and yield of an equity index called the NASDAQ Global High Equity Income Index (the "Index").

# Index Description

The NASDAQ Global High Equity Income Index is a modified market capitalisation weighted index designed by Nasdag to objectively identify and select stocks from the NASDAQ Global Index.

- The Index begins with the eligible companies in the NASDAQ Global Index, excluding mortgage REITs. Companies are selected based on factors such as liquidity, dividend yield and other quality screens
- To be eligible for inclusion in the Index, the companies must meet stringent eligibility criteria and exhibit the ability to increase dividends. The following quality screens are also applied:
  - Exclude stocks in the bottom quintile by return on assets.
  - Long term debt to assets less than 75%
  - Three-year dividend payout ratio less than 90%.
  - Positive free cash flow.
  - One security per issuer is permitted.
- Eligible securities that pass the above screens are selected for inclusion and are weighted by "net income minus dividends paid" or "plough-back," subject to a maximum weight of 3% for developed stocks and 1% for emerging stocks.
- The Index stocks are rebalanced and reconstituted semi-annually.
  - The Index is divided into six separate sub-portfolios, each of which receives 16.67% of the total Index weight. Each sub-portfolio is rebalanced and reconstituted on a separate semi-annual schedule so that one sub-portfolio is rebalanced each calendar month. The sub-portfolios are returned to their ideal weights of 16.67% once a year in December.

# Risks

- The Fund's shares may change in value and may go down as well as up. You could lose money by investing in the Fund. You may not get back all of the money you invest.
- The Fund is subject to Market Risk, which means that shares of the Fund may fall in value due to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices.
- There may be tracking difference between the Fund and the underlying index due to the impact of annual Fund management fees. Therefore the Fund's return may not match the return of the NASDAQ Global High Equity Income Index.
- The Fund's holdings may be issued by companies concentrated in a particular industry or country.
- The Fund may invest in small capitalisation and mid capitalisation companies. Such companies may experience greater price volatility than larger, more established companies.
- As the Fund's investments may be denominated in currencies other than the Fund's currency, an investment in this Fund may expose you to currency risk.
- This Fund's Net Asset Value (NAV) is likely to have high volatility due to the portfolio composition and/or the index replication technique. As such, potential investors should be aware that the Fund's shares may change in value, and may do so in a volatile fashion; potential investors could lose money by investing in the Fund.
- Neither First Trust Global Portfolios Limited ("FTGP") nor any of its affiliates, quarantees the performance or the future returns of the Fund.
- For more details relating to risks of investing in the Fund, please refer to the "Risk Factors" section of the Fund's prospectus.
- There is no guarantee that the Fund will declare dividends
