PIMCO Euro Short-Term High Yield Corporate Bond Index Source UCITS ETF

A sub-fund of PIMCO Fixed Income Source ETFs plc
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00BD8D5H32
Share class: EUR Income

Objectives and Investment Policy

Objective The fund aims to provide the performance of the ICE BofAML 0-5 Year Euro Developed Markets High Yield 2% Constrained Index (the "Reference Index").

Investment Policy The fund invests a substantial portion of its assets in a diversified portfolio of EUR denominated fixed income instruments and securities (which are loans that pay a fixed or variable rate of interest) and EUR currency positions that as far as possible and practicable consist of the component securities of the Reference Index. The fund will invest in "non-investment grade" securities. These are generally considered to be riskier investments but may pay a higher income.

In order to achieve its investment objective, the fund may also use financial derivatives particularly where investment in the underlying bonds or currencies is difficult.

Accordingly, the fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying asset.

For full investment objectives and policy details please refer to the prospectus.

Distribution Policy This share class pays out a distribution of any investment income generated by the fund. You may elect for this to be reinvested into the fund.

Dealing Day The fund's net asset value is calculated daily and the fund is open for redemptions on each day the Deutsche Börse AG and banks in London are open for business. Please refer to the prospectus for further information. The fund shares are listed on one or more Stock Exchanges. As the fund is an exchange traded fund ("ETF"), in normal

market conditions typically only authorised participants may subscribe or redeem shares directly with the fund. Other investors can buy or sell shares daily through an intermediary directly or on stock exchanges on which then shares are traded, i.e. on the secondary market. In exceptional circumstances, other investors will be permitted to redeem their shares directly from the Company in accordance with the redemption procedures set out in the prospectus, subject to applicable laws and any relevant charges.

The Reference Index The Reference Index tracks the performance of short-term EUR denominated below investment grade corporate debt publicly issued in the Euro domestic market or Eurobonds markets including bonds and pay-in-kind securities including Toggle Notes.

Fund's Base Currency Euro.

Risk and Reward Profile

This rating is not a measure of the risk of capital loss, but a measure of the fund's price movement over time. This rating:

- is based on historical data, which may be comparative, and may not be representative of future rating.
- as a result, this risk estimation may not be a reliable indicator of future risk and may be subject to change over time.
- is classified in the category indicated above due to its past behaviour, which may be comparative. The lowest category does not mean risk free investment.
- is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment.
- does not provide its investors with any guarantee on performance, nor on the performance of monies invested in it.

Main risks not covered by the above indicator which could negatively affect the net asset value of the fund:

Credit and Default Risk A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

Risk of Using Derivatives In order to reach its investment objective, the fund may use futures, currency forwards and swaps. Such derivatives may result in gains or losses that are greater than the original amount invested.

Interest Rate Risk Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

Currency Risk Changes in exchange rates may cause the value of investments to decrease or increase.

Liquidity Risk Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.

Liquidity on Secondary Market Risk Lower liquidity means there are insufficient buyers or sellers to allow the fund to sell or buy the fund's Investments. On-exchange liquidity may be limited due to suspension of Reference Index pricing, a decision by one of the relevant stock exchanges, or a breach by one or more market makers of respective stock exchange requirements and guidelines.

For more information on risks, please see the fund prospectus, which is available at www.SourceETF.com (select your country and navigate to Library/Reports & Legal).

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00% *
Exit charge	3.00% *
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.44%
Charges taken from the fund under certain specific conditions	
Performance fee	None

*Because the fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. The entry and exit charges outlined here are not applicable to such secondary market investors. However, secondary market investors may incur brokerage and / or transaction fees in connection with their dealings. Secondary market investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your financial advisor or broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.

The entry charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial advisor.

The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. The PIMCO Fixed Income Source ETFs plc (the "Company") annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

The ongoing charges figure is inclusive of a fee waiver in the amount of 0.06% until 31 December 2018. The fee waiver will expire from 1 January 2019.

For more information on charges, please see the relevant charges section in the fund prospectus which is available at www.SourceETF.com (select your country and navigate to Library/Reports & Legal).

Past Performance

There is insufficient data to produce a useful indication of past performance for the share class.

- Past performance is not an indicator of future returns.
- The impact of charges and fees on the performance has been included.
- The performance of the class is calculated in euro.
- The fund launched in October 2017. This class started to issue shares in October 2017.
