The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

JPM Europe Dynamic (ex-UK) Fund C - Net Accumulation (GBP Hedged) a Share Class of JPM Europe Dynamic (ex-UK) Fund a Fund of JPMorgan Fund ICVC

ISIN GB00BCV7MM92

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

Objective and Investment Policy

Investment Objective: To maximise long-term capital growth by investing primarily in continental European Equities.

Investment Approach:

- ▶ Uses the Behavioural Finance process that is based on investments in stocks with specific style characteristics, such as value, quality and momentum.
- ▶ Applies a disciplined, bottom-up investment approach to stock selection.
- ▶ Uses a best ideas approach to finding the most attractive investment ideas with minimal constraints.

Investment Policy: Continental European Equities are those issued by companies that are incorporated under the laws of, and have their registered office in, continental Europe, or that derive the predominant part of their economic activity from continental Europe, even if listed elsewhere. The Fund may invest in smaller companies.

This Equity based Fund invests in those stocks which the Investment Adviser believes will outperform irrespective of their Benchmark weighting.

The Fund may also use Financial Derivative Instruments (derivatives) for the purpose of Efficient Portfolio Management, including hedging, where appropriate.

The Fund may invest in assets denominated in any currency and non-Sterling currency exposure may be hedged back to Sterling.

Redemption and Dealing: Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Adviser has the discretion to buy and sell investments on behalf of the Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Fund is FTSE All-World Developed Europe ex UK Index (Net) Hedged to GBP.

The Benchmark is a performance comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

Distribution Policy: This Share Class will reinvest income.

Portfolio Transaction Costs: A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Fund's performance including portfolio transaction costs.

Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its Net Asset Value has shown medium to high fluctuations historically.

Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ The Fund invests in securities of smaller companies which may be more difficult to sell, more volatile and tend to carry greater financial risk than securities of larger companies.
- ▶ This Fund is aggressively managed, which may result in higher volatility of the Fund's performance and bigger differences between the performance of the Fund and its benchmark.
- ▶ Investors in GBP Hedged Share Classes should be aware that any currency hedging process may not give a precise hedge. Where currency hedging is undertaken, whilst it may protect an investor in Hedged Shares against a decrease in the value of the currency being hedged, it may also prevent the investor from participating in an increase in the value of that currency.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.
