Objectives and Investment Policy

The investment objective of the Fund is to provide income whilst preserving capital over the medium to longer term.

The Fund seeks to meet its objectives by investing primarily in listed equities, whose primary activity or exposure is within the alternative income sector, which includes REITs and Investment Trusts which operate in areas such as Asset Lending, Direct Lending, Peer to Peer Lending, Infrastructure Debt and Equity, Property, Structured Credit Investments and Renewables.

In addition to investing in equities the fund may also invest in other transferable securities, bonds, money market instruments, deposits, cash or near cash.

The Fund will have a preference for investments denominated in sterling with issuers which have activities and assets within the UK, Europe, USA, Singapore or another OECD country. Other than as noted above, the sub-Fund has no particular emphasis on any geographical area or industry or economic sector.

Derivatives (that is sophisticated investments linked to the rise and fall of one or more underlying assets) may be used for efficient portfolio management purposes.

You can buy and sell shares in the Fund on any business day.

The Fund aims to distribute income every quarter.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	**3**	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 3 because simulated monthly historical performance data indicates that low to medium rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in `Practical Information` overleaf.
