* These collectively comprise the Authorised Corporate Director's Report.

The Company

The Invesco Fixed Interest Investment Series is an investment company with variable capital ("ICVC"), incorporated in England and Wales on 8 May 2003.

The Company is a "UCITS Scheme" and an "Umbrella Company" (under the OEIC Regulations) and therefore new Funds may be formed by the Manager, subject to regulatory approval. Any changes to Funds or share classes will be included in an updated Prospectus.

The Company is a Financial Conduct Authority (FCA) authorised scheme complying with the FCA's Collective Investment Schemes sourcebook.

Terms used in this report shall have the same meaning as defined in the Prospectus.

At 31 October 2020, the Company consisted of eight Funds: Invesco Corporate Bond Fund (UK) Invesco Distribution Fund (UK) Invesco European High Income Fund (UK) Invesco Global Bond Fund (UK) Invesco Global Financial Capital Fund (UK) Invesco High Yield Fund (UK) Invesco Monthly Income Plus Fund (UK) Invesco Tactical Bond Fund (UK)

Accounting Periods

Annual accounting date Interim accounting date 30 April 31 October

Invesco Corporate Bond Fund (UK), Invesco Global Bond Fund (UK), Invesco Global Financial Capital Fund (UK) and Invesco Tactical Bond Fund (UK) will make distribution payments on 31 December (interim) and 30 June (final).

Invesco High Yield Fund (UK) will make distribution payments quarterly on 30 September, 31 December, 31 March and 30 June (final).

Invesco Distribution Fund (UK), Invesco European High Income Fund (UK) and Invesco Monthly Income Plus Fund (UK) will make monthly distributions, with the payment date being the last day of the month following the end of the distribution period.

Should expenses and taxation exceed revenue in a distribution period for a share class, no distribution will be payable for that class.

Securities Financing Transactions Regulation (Unaudited)

This Regulation requires the Manager to provide investors with information on the use of securities financing transactions (SFTs) and total return swaps (TRS) by the Company in all interim and annual reports for the Company.

During the period from 1 May 2020 to 31 October 2020, none of the Funds entered into any SFTs and/or TRS. Should this change in the future, the interim and annual reports for the Company will disclose all required information on the use of SFTs and TRS by the Company.

Please refer to the Prospectus for further details on SFTs and TRS.

Remuneration Policy (Unaudited)

On 18 March 2016, Invesco Fund Managers Limited (the "Manager") adopted a remuneration policy consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines, on sound remuneration policies under the UCITS Directive (the "Remuneration Policy").

The policy was revised in 2019, to include specificities for some Invesco EU regulated Management Companies. The Manager was not impacted by the changes.

The purpose of the Remuneration Policy is to ensure the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The Manager's summary Remuneration Policy is available from the corporate policies section of our website (www.invesco.co.uk). Paper copies of the full Remuneration Policy can be obtained for free from the registered office of the Manager, Invesco Fund Managers Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire, RG9 1HH, UK upon request.

The Remuneration Policy is reviewed annually by the Compliance, Human Resources and Risk Management functions, who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Manager are responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the Remuneration Policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The Manager does not employ any direct staff. The aggregate total remuneration of Invesco staff involved in UCITS related activities of the Manager in respect of performance year (1 January 2019 to 31 December 2019) is £80.14m of which £47.43m is fixed remuneration and £32.71m is variable remuneration. The number of beneficiaries is 379.

The Manager has identified individuals considered to have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff"), who include board members of the Manager, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers. Identified Staff of the Manager are employed by Invesco.

The aggregate total remuneration paid to the Identified Staff of the Manager for UCITS related activities for the performance year (1 January 2019 to 31 December 2019) is £11.79m of which £2.34m is paid to Senior Management and £9.45m is paid to other Identified Staff.

Brexit

The UK left the EU on 31 January 2020, an event commonly referred to as Brexit. At the date of this report, discussions remain ongoing as to the precise nature of the future relationship between the UK and EU27. The Authorised Corporate Director does not believe that Brexit will present significant issues that cannot be mitigated given that no Fund is passported into Europe, Shareholders are predominantly UK-based and core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. In addition, on 30 January 2019, EU27 national regulators and the UK's Financial Conduct Authority agreed Memoranda of Understanding in the event of a no-deal Brexit scenario on various matters related to the conduct of financial services and trading activities.

The Company's Manager, Invesco Fund Managers Limited "IFML", is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country will not change the group's focus or commitment to serve its clients across Europe. IFML is monitoring developments closely, through a Brexit Steering Committee, and will take advantage of the Memoranda of Understanding to ensure that the impact on clients and the Company is minimal.

Managing the risks presented by the outbreak of Coronavirus

The spread of a new coronavirus (COVID-19) disease has caused significant volatility within the global economy and financial markets. There has been no material impact to the Funds of the Company as a result of COVID-19 during the financial period ended 31 October 2020.

Managing the risks presented by the outbreak of Coronavirus continued

The directors of Invesco Fund Managers Limited are actively monitoring the situation and, with the support of the investment manager, continue to manage the Funds' assets within their investment and risk parameters that have been established. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

Risk Profile

Shareholders should be aware of the risks inherent in investing in securities and other financial instruments. Financial markets can be vulnerable to unpredictable price movements and are affected by a number of factors, both political and economic.

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Over time, inflation may erode the value of investments. The securities that the Funds invest in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds.

The Funds have the ability to make use of financial derivatives (complex instruments) – significant use in the case of the Invesco Tactical Bond Fund (UK) – which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. The leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested, resulting in the Fund being exposed to a greater loss than the initial investment.

The Funds may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss. The Funds' performance may be adversely affected by variations in interest rates. The performance of the Invesco European High Income Fund (UK), the Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) may be adversely affected by variations in the relative strength of world currencies or if Sterling strengthens against those currencies.

As one of the key objectives of the Invesco Distribution Fund (UK), the Invesco European High Income Fund (UK), the Invesco Global Financial Capital Fund (UK), the Invesco High Yield Fund (UK) and the Invesco Monthly Income Plus Fund (UK) is to provide income, the ongoing charge is taken from capital rather than income. This can erode capital and reduce the potential for capital growth.

As the Invesco Tactical Bond Fund (UK) can rapidly change its holdings across the fixed income and debt spectrum and cash, this can increase its risk profile. As the Invesco Global Financial Capital Fund (UK) is a theme-based Fund, which only invests in fixed interest and other debt securities and shares of banks and other financial institutions, investors should be prepared to accept a higher degree of risk than for a Fund that is more widely diversified across different sectors.

The Invesco Corporate Bond Fund (UK), Invesco Distribution Fund (UK), Invesco European High Income Fund (UK), Invesco High Yield Fund (UK), Invesco Monthly Income Plus Fund (UK) and Invesco Tactical Bond Fund (UK) may invest in contingent convertible bonds and the Invesco Global Financial Capital Fund (UK) can invest in contingent convertible bonds, which may result in significant risk of capital loss based on certain trigger events.

Although the Invesco Global Bond Fund (UK) invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.

The Invesco Global Bond Fund (UK) and the Invesco Tactical Bond Fund (UK) have the ability to invest more than 35% of its value in securities issued by a single government or public international body.

As a result of COVID-19, markets have seen a noticeable increase in volatility as well as, in some cases, lower liquidity levels; this may continue and may increase these risks in the future. In addition, some companies are suspending, lowering or postponing their dividend payments, which may cause funds which have an income objective to pay a lower income during this period.

A more detailed description of risk factors that apply to these Funds is set out in the Prospectus.

Holdings in other Funds of the Company

As at 31 October 2020, no Funds held shares in any other Fund of the Company.

Liability

The Company is structured by having different Funds. The assets and liabilities of each Fund are segregated in accordance with the law of England and Wales. As a consequence the assets of a Fund will not be available to meet the liabilities of another Fund within the Company. The Shareholders are not liable for the debts of the Company.

ISA Eligibility

All the Company's Funds qualify for stocks and shares ISA investment. None of the Funds qualify for cash ISA investment.

Certification of the Interim Report by the Manager

In accordance with the requirements of the Open-Ended Investment Companies Regulations 2001, we hereby certify these financial statements on behalf of the Directors of Invesco Fund Managers Limited.

- ¹ The risk category for the Fund changed from 3 to 4 on 1 July 2020.
- ² The risk category for the Fund changed from 3 to 4 on 1 August 2020.
- ³ The risk category for the Fund changed from 4 to 5 on 1 August 2020.
- ⁴ The risk category for the Fund changed from 2 to 4 on 1 August 2020.

The risk categories shown are not a measure of capital losses or gains, but of how significant the rises and falls in the share class prices have been historically. For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas a share class whose price has experienced less significant rises and falls will be in a lower risk category. As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile. Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

A share class in risk category 1 indicates its price has experienced very low rises and falls historically.

A share class in risk category 2 indicates its price has experienced minor rises and falls historically.

A share class in risk category 3 indicates its price has experienced very moderate rises and falls historically.

A share class in risk category 4 indicates its price has experienced moderate rises and falls historically.

A share class in risk category 5 indicates its price has experienced significant rises and falls historically.

A share class in risk category 6 indicates its price has experienced very significant rises and falls historically.

A share class in risk category 7 indicates its price has experienced major rises and falls historically.

For more information on our Funds' risk and reward profiles, please refer to the most up to date relevant Fund and share class specific Key Investor Information Documents (KIIDs), which are available at www.invesco.co.uk or by contacting us.

Invesco Fixed Interest Investment Series (the "Company") Notes applicable to the unaudited financial statements of all Funds

1 Accounting Policies

The financial statements have been prepared on a going concern basis, under the historical cost convention as modified by the revaluation of certain financial assets and liabilities held at fair value through profit and loss. The financial statements have also been prepared in accordance with the United Kingdom Generally Accepted Accounting Practice (UK GAAP), as defined within the UK Financial Reporting Standard (FRS 102) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' (the "SORP"), issued by the Investment Management Association (now known as the Investment Association) in May 2014 and updated in June 2017, the COLL and the Company's Instrument of Incorporation and Prospectus.

All other accounting policies used to prepare the interim financial statements are as per the audited financial statements for the year ended 30 April 2020.

Invesco Fixed Interest Investment Series (the "Company") Notes applicable to the unaudited financial statements of all Funds

2 Shareholders' Funds continued

The net assets attributable to each share class, the net assets value per share and the number of shares in issue of each share class are shown in the comparative tables of each Fund. These can be found on:

Invesco Corporate Bond Fund (UK)	page 11
Invesco Distribution Fund (UK)	page 25
Invesco European High Income Fund (UK)	page 43
Invesco Global Bond Fund (UK)	page 56
Invesco Global Financial Capital Fund (UK)	page 69
Invesco High Yield Fund (UK)	page 81
Invesco Monthly Income Plus Fund (UK)	page 95
Invesco Tactical Bond Fund (UK)	page 112

Each share class has the same rights on a winding up of the Company.

3 Investment Objective and Policy

The investment objective and policy of each Fund can be found on:

Invesco Corporate Bond Fund (UK)	page 09
Invesco Distribution Fund (UK)	page 23
Invesco European High Income Fund (UK)	page 41
Invesco Global Bond Fund (UK)	page 54
Invesco Global Financial Capital Fund (UK)	page 67
Invesco High Yield Fund (UK)	page 79
Invesco Monthly Income Plus Fund (UK)	page 93
Invesco Tactical Bond Fund (UK)	page 110

The Funds may also hold cash and near cash assets only to the extent that this may reasonably be regarded as necessary for the pursuit of the Fund's investment objective, to fund redemptions of shares in that Fund, for the efficient management of the Fund in accordance with its investment objective or for other purposes which may reasonably be regarded as ancillary to the investment objectives of the Fund. They may also borrow, providing such borrowing is on a temporary basis and does not exceed the limits laid down in the regulations.

4 Post Balance Sheet Events

The net asset value in pence per share at the balance sheet date and the latest practicable date prior to the publication of the report has been shown in the table below. The % increase/(decrease) is a reflection of market fluctuations during this period. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

	Net Asset Value 31.10.20 (pence per share)	Net Asset Value 16.12.20 (pence per share)	Increase/ Decrease %
Invesco Corporate Bond Fund (UK)	219.92	225.00	2.31
Invesco Distribution Fund (UK)	163.84	177.10	8.09
Invesco European High Income Fund (UK)	194.86	209.95	7.75
Invesco Global Bond Fund (UK)	201.52	203.95	1.21
Invesco Global Financial Capital Fund (UK)	160.85	180.81	12.41
Invesco High Yield Fund (UK)	176.92	188.03	6.28
Invesco Monthly Income Plus Fund (UK)	197.37	208.29	5.53
Invesco Tactical Bond Fund (UK)	163.15	169.06	3.62

The Investment Objective and Policy of the Invesco Corporate Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in investment grade corporate debt securities. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including government, unrated and non-investment grade corporate debt securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

Performance				Perce	ntage growth
to 31 October 2020	Since 30.4.20 %	Since 31.10.19 %	Since 31.10.17 %	Since 31.10.15 %	Since 31.10.10 %

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 5.1% over the six months to the end of October 2020. This placed the Fund in the first quartile of its peer group, the IA \pounds Corporate Bond Sector NR, which returned 4.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets enjoyed positive returns over the period as they continued to recover from the lows of late March. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets.

At the start of the period we thought valuations across much of the bond market were attractive. We therefore continued to build exposure with positions added across sectors. As markets rallied, we took profits on some of these bonds. However, this profit taking does not represent a wholesale reduction of risk. We are happy to maintain many of the bonds that we added earlier in the year.

Financials remain the Fund's largest allocation by sector and interest rate sensitivity (duration) remains low relative to the broader sterling bond market. A relatively high allocation is retained in cash and government bonds. This helps to mitigate against periods of market weakness and should mean the Fund is well placed to exploit future opportunities.

The positive market backdrop meant that all but one sector added to Fund performance. The highest contributions came from the Fund's holdings in utilities, insurance, telecoms and subordinated bank bonds. The only sector to detract was industrials, which our analysis shows cost 0.2 basis points of gross returns.

As we look ahead, we are cognisant that a lot of the deep value available in investment grade markets at the height of concerns in March, has now been realised. That being said, we continue to look for, and find, investment opportunities

As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Corporate Bond Fund (UK) had risen 2.31% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

On 31 August 2020 Senior Credit Analyst Tom Hemmant expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Michael Matthews.

Paul Causer, Michael Matthews and Tom Hemmant, Fund Managers

Where Paul Causer, Michael Matthews and Tom Hemmant have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

The Investment Objective and Policy of the Invesco Distribution Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets globally in corporate and government debt securities (including investment grade, non investment grade and unrated) and up to 40% of its assets in shares or other equity related securities of companies globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money-market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 5.2% over the six months to the end of October 2020. This placed it in the second quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 4.3%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets enjoyed strong returns over the period as they continued to recover from the lows reached in late March. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation within bond markets.

Against this positive market backdrop, gains from the Fund's bond allocation easily offset a small loss from the Fund's equity exposure. Corporate bond exposure made the highest contribution to returns with subordinated financials and high yield bonds adding the most to returns. The three biggest detractors from the equity portfolio were GlaxoSmithKline, RELX and Smith and Nephew.

At the start of the period, we used some of the Fund's liquidity (cash, government bonds and bonds maturing within 1-year) to build exposure to bonds we thought attractively priced. Bonds were added across sectors and markets. As markets rallied, we took profits on some positions. However, this profit taking does not represent a wholesale reduction of risk. We are happy to maintain many of the bonds that we added earlier in the year. The Fund's equity exposure is focused on the UK market with a further small allocation to global equity markets.

As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Distribution Fund (UK) had risen 8.09% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes. On 31 August 2020 Senior Credit Analyst and Fund Manager, Edward Craven expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Ciaran Mallon. Although Paul Read is no longer a named manager on the Fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range.

Paul Causer, Edward Craven and Ciaran Mallon, Fund Managers

Where Paul Causer, Edward Craven and Ciaran Mallon have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice.

Invesco European High Income Fund (UK)

Investment report for the period

The Investment Objective and Policy of the Invesco European High Income Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund may invest up to 80% of its assets in European government and corporate debt securities (including investment grade, non-investment grade and unrated) and up to 60% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in Europe. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including non European securities), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 5.6% over the six months to the end of October 2020, placing it in the second quartile of its peer group, the IA Mixed Investment 20-60% Shares Sector NR, which returned 4.3%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets enjoyed positive returns over the period as they continued to recover from the lows of late March. The catalyst for these returns was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. European markets were given a boost by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly important for peripheral European issuers which rallied as a result. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation of returns across bond markets.

At the start of the period we thought valuations across much of the bond market were attractive. We therefore continued to build exposure with positions added across sectors. As markets rallied, we took profits on some of these bonds. However, this profit taking does not represent a wholesale reduction of risk. We are happy to maintain many of the bonds that we added earlier in the year.

The Fund's high yield bond exposure is focused on higher quality companies that we consider have a lower risk of default. We also have significant exposure to subordinated bonds within the financial sector. These are junior bonds within a company's capital structure that may have some equity like features. The Fund's overall interest rate sensitivity (duration) remains low. Around 31% of the Fund is currently invested in equity. Our focus for this allocation is on stocks with strong cash flow generation, which we believe can maintain or grow dividends. The Fund currently has a high allocation to cash and other highly liquid assets. As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco European High Income Fund (UK) had risen 7.75% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Invesco Global Bond Fund (UK)

Investment report for the period

The Investment Objective and Policy of the Invesco Global Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in debt securities (including investment grade, non-investment grade and unrated) issued by governments, supranational bodies, other public entities as well as by companies, globally. The Fund will take active currency positions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund uses derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 6.9% over the six months to the end of October 2020. This placed it in the second quartile of its peer group, the IA Global Bonds Sector NR, which returned 4.4%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Bond markets enjoyed positive returns over the period. Across many markets, government bond yields (which move inversely to prices) reached record lows and corporate bond markets delivered some of their best returns for many years.

The catalyst for the strong returns was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. In the US, the Federal Reserve began an asset purchase programme. Unlike programmes elsewhere, the Fed includes within the scheme bonds downgraded to high yield since the onset of the pandemic. The Fed also adjusted its inflation target. From now on the US will target inflation of 2% as a long-term average rather than as an annual rate.

European markets were given a boost by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly significant for peripheral European sovereign bonds, which rallied as a result. The success of Italian Prime Minister Giuseppe Conte in the Italian regional elections was a further strong catalyst for Italian government bonds and in turn Italian corporate bonds.

The Fund is mainly invested in government bonds (both developed and emerging markets). Currently this exposure includes both conventional and inflation linked government bonds. Additional exposure is held in investment grade corporate bonds and some corporate emerging market bonds where we can benefit from the extra yield available. Currency markets provide a further source of potential return for the Fund. As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Global Bond Fund (UK) had risen 1.21% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Invesco Global Financial Capital Fund (UK)

Investment report for the period

The Investment Objective and Policy of the Invesco Global Financial Capital Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in capital instruments which include debt securities (including noninvestment grade, unrated and contingent convertible bonds), shares and other equity related securities issued by banks and other financial institutions globally. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), government debt securities, deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions. Total return swaps will be used by the Fund. The expected proportion of total assets subject to total return swaps is 30%. Such level might be exceeded or might be subject to changes in the future.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Invesco Composite Index² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. The Benchmark is a blend of indices that represent the type of bonds and equities that the Fund may invest in and therefore, the Fund's performance can be compared against it. However, the Fund is actively managed and is not constrained by any benchmark. The Invesco Composite Index is calculated by reference to 50% ICE BofAML Global Financial Index GBP-Hedged (Total Return), 30% ICE BofAML Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

Strategy, review and outlook

The Fund returned 7.4% over the six months to the end of October 2020. This compares to a return of 5.9% for the Fund's comparator benchmark Invesco Composite Index¹.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. Invesco Composite Index¹ data source: Lipper, total return, in Sterling.

Past performance is not a guide to future returns.

Both bonds and equities made a positive contribution to Fund returns over the period. Given the overall risk-on tone to markets, performance was skewed toward more junior bonds with the highest contribution to returns coming from the Fund's holdings in contingent capital (CoCo) bonds.

Bank and insurance bonds continued to rebound from the lows of March 2020. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation of bond market returns.

As part of the package of measures to help the eurozone economy during the pandemic the ECB announced some regulatory changes for banks. Banks are now able to hold a higher proportion of their regulatory capital in subordinated bonds rather than equity, which is typically more expensive for the banks.

We took advantage of the re-pricing in markets during the spring to increase exposure to additional tier 1 bonds. As value was realised, we took some profits. Equity exposure was kept at 33% of the Fund. The Fund is invested across the capital structure of banks, insurers and other financials, but has a focus on subordinated bonds. To fully exploit opportunities in the sector the Fund also invests in equities.

As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Global Financial Capital Fund (UK) had risen 12.41% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

¹ The Invesco Composite Index is calculated by reference to 50% ICE BofAML Global Financial Index GBP-Hedged (Total Return), 30% ICE BofAML Contingent Capital Index GBP-Hedged (Total Return) and 20% FTSE All World Financials Index GBP-Hedged (Total Return).

The Investment Objective and Policy of the Invesco High Yield Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets in corporate and government debt securities which are either non-investment grade or unrated. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including investment grade debt securities), equities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 11.3% over the six months to the end of October 2020. This placed the Fund in the second quartile of its peer group, the IA \pounds High Yield Sector NR, which returned 9.8%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

The highest contribution to Fund performance came from exposure to subordinated financials. Outside of the financial sector, leisure, food and oil made the highest contribution.

Corporate bond markets enjoyed positive returns over the period as they continued to recover from the lows of late March. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. In the US, the Federal Reserve (Fed) began directly purchasing corporate bonds. Unlike other central bank asset purchase schemes, the programme included bonds downgraded to high yield since the onset of the pandemic.

European markets were given a boost by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly important for peripheral European issuers which rallied as a result. However, as autumn began, a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation in returns across bond markets.

The core of the Fund is invested in companies that we think are dominant within their industry or sector and that have predictable cash flows. Typically, but not always these bonds will be at the higher quality end of the high yield spectrum. Looking at the Fund by sector, the largest allocation is currently bonds issued by banks. Outside of the financial sector, our largest allocations are to bonds within the food, telecoms and auto sectors. On 31 August 2020 Senior Credit Analyst, Tom Hemmant expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Thomas Moore.

As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco High Yield Fund (UK) had risen 6.28% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Thomas Moore and Tom Hemmant, Fund Managers

Invesco Monthly Income Plus Fund (UK)

Investment report for the period

The Investment Objective and Policy of the Invesco Monthly Income Plus Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund invests at least 80% of its assets globally in corporate and government debt securities (including investment grade, non-investment grade and unrated) and shares or other equity related securities of companies. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

- ¹ Effective 18 April 2016, the primary share class changed from Income share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Income share class, without any adjustment for fees.
- ² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 9.1% over the six months to the end of October 2020. This placed it in the first quartile of its peer group, the IA \pounds Strategic Bond Sector NR, which returned 5.7%.

Fund and sector average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class.

Past performance is not a guide to future returns.

Corporate bond markets enjoyed positive returns over the period as they recovered from the lows of late March. The catalyst was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. The rally continued until the autumn when a resurgence of Covid-19 cases in Europe, as well as rising US political uncertainty, led to some consolidation.

Against this backdrop, gains from the Fund's bond allocation helped to offset losses from the Fund's equity exposure. Corporate bond exposure made the highest contribution to returns with subordinated financials and high yield bonds the best performing. The three biggest detractors from the equity portfolio were GlaxoSmithKline, RELX and Smith and Nephew.

At the start of the period, credit spreads (the premium over government bonds that companies need to pay to borrow) were at their widest level since 2012. We used the Fund's liquidity (cash, government bonds and bonds maturing within 1-year) to add exposure to some of these bonds. Exposure was added across sectors and markets. As credit spreads narrowed, we took profits on some positions. However, this profit taking does not represent a wholesale reduction of risk. We are happy to maintain many of the bonds that we added earlier in the year. The Fund's equity exposure is focused on the UK market and was retained at around 7% over the period.

On 31 August 2020 Senior Credit Analyst and Fund Manager, Rhys Davies expanded his responsibilities to become a Co-Fund Manager on the Fund alongside Paul Causer and Ciaran Mallon. Although Paul Read is no longer a named manager on the Fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range. As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Monthly Income Plus Fund (UK) had risen 5.53% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Paul Causer, Rhys Davies and Ciaran Mallon, Fund Managers

The Investment Objective and Policy of the Invesco Tactical Bond Fund (UK)

The Fund aims to achieve income and capital growth over the medium to long term (3 to 5 years plus). The Fund has a flexible allocation to corporate and government debt securities (including investment grade, non-investment grade and unrated) and cash. Depending on market conditions the Fund may invest up to 100% of its net assets in cash, cash equivalents, short-term debt securities and money market instruments. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities, collective investment schemes (including funds managed by the Invesco group) and deposits. The Fund may use derivatives for investment purposes to meet the Fund's investment objective and for efficient portfolio management purposes to reduce risk, reduce costs and/or generate additional capital or income. They may include derivatives on currencies, interest rates and credit, and may be used to obtain exposure to long and short positions.

The investment objectives and policies currently shown within these financial statements are those that were in place as at 31 October 2020.

This standardised past performance information is updated on a quarterly basis. Should you require up to date past performance information, this is available on our website www.invesco.co.uk or by contacting us.

Fund average performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. UK 3 Month Treasury Bills² data source: Lipper, total return, in Sterling.

The value of investments and any income from them will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Past performance is not a guide to future returns. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

¹ Effective 18 April 2016, the primary share class changed from Accumulation share class to Z Accumulation share class. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the years prior to this launch date, performance figures are based on the Accumulation share class, without any adjustment for fees.

² This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

Strategy, review and outlook

The Fund returned 7.5% over the six months to the end of October 2020. This compares to a return of 0.0% for the Fund's comparator benchmark, UK 3 Month Treasury Bills.

Fund performance data source: Lipper, in Sterling, with income reinvested and net of the ongoing charge and portfolio transaction costs. Fund performance figures are based on the Z Accumulation share class. UK 3 Month Treasury Bills data source: Lipper, total return, in Sterling

Past performance is not a guide to future returns.

Bond markets enjoyed positive returns over the period as they recovered from the lows of late March. Government bond yields (which move inversely to prices) in many countries reached record lows and corporate bond markets delivered some of their best returns for many years.

The catalyst for the strong returns was the extraordinary monetary and fiscal policy response to the virus from central banks and governments. In the US, the Federal Reserve (Fed) began an asset purchase programme. Unlike programmes elsewhere, the Fed includes within its scheme bonds downgraded to high yield since the onset of the pandemic. The Fed also adjusted its inflation target. From now on, the US will target inflation of 2% as a long-term average rather than as an annual rate.

European markets were given a boost by the first ever agreement between eurozone governments for a mutualisation of debt through a €750bn joint recovery fund. This was particularly significant for peripheral European sovereign bonds, which rallied as result. The success of Italian Prime Minister Giuseppe Conte in the Italian regional elections was a further strong catalyst for Italian government bonds.

At the start of the period, credit spreads (the premium over government bonds that companies need to pay to borrow) were at their widest level since 2012. We used the Fund's liquidity (cash, government bonds and bonds maturing within 1-year) to add exposure to some of these bonds. Bonds were added across sectors and markets. As markets rallied and credit spreads narrowed, we took profits on some positions. However, this profit taking does not represent a wholesale reduction of risk. We are happy to maintain many of the bonds that we added earlier in the year.

The purchases made in Q2 reduced the Fund's liquidity from 29% at the 31 March 2020 to 14% at the end of June. As we have taken some profits, liquidity has increased back to 19% by 31 October 2020. Investment grade bonds and senior bank bonds now represent 30% of the Fund. The allocation to higher credit risk bonds (including subordinated financials and high yield) was increased to 56%. Within this last category, the highest allocation is subordinated banks at 27%. Reflective of the new interest rate environment, the Fund's overall interest rate sensitivity (duration) has been increased to around 5, as at 31 October 2020. On 31 August 2020 Fund Manager, Stuart Edwards and Deputy Fund Manager and Senior Macro Analyst, Jack Parker expanded their responsibilities to become a Co-Fund Managers on the Fund. Although Paul Read is no longer a named manager on the fund, he remains Co-Head of the team and an important part of the wider strategy adopted by the team, he also continues to manage a number of other funds, particularly on the Invesco offshore fund range.

As at 16 December 2020 the Net Asset Value (pence per share) of the Invesco Tactical Bond Fund (UK) had risen 3.62% since the balance sheet date 31 October 2020. It is likely markets will continue to be much more volatile than normal over the next few months until the coronavirus impact passes.

Paul Causer, Stuart Edwards and Jack Parker, Fund Managers
