

Z Accumulation GBP | Data as at 31.01.2020

### Fund objectives and investment policy

The fund aims to provide capital growth in excess of the FTSE All Share (Gross Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of UK companies.

The fund is actively managed and invests at least 80% of its assets in a concentrated range of equities of UK companies. These are companies that are incorporated, headquartered or have their principal business activities in the UK. The fund typically holds 30 to 60 companies. 'Alpha' funds invest in companies in which the investment manager has a high conviction that the current share price does not reflect the future prospects for that business. The fund may also invest in companies headquartered or quoted outside the UK which derive a significant proportion of their revenues or profits from the UK. The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash. The fund may use derivatives with the aim of reducing risk and managing the fund more efficiently.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

### Share class performance

| Cumulative performance | 1 month | 3 months | YTD  | 1 year | 3 years | 5 years | 10 years |
|------------------------|---------|----------|------|--------|---------|---------|----------|

### Performance over 5 years (%)

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

Source: Morningstar, bid to bid, net income reinvested, net of fees.

**Benchmarks:** The fund's performance should be assessed against its target benchmark, being to exceed the FTSE All Share (Gross Total Return) index, and compared against the Investment Association UK All Companies sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark.

Please see the Benchmark section under Important information for more details. Alex Breese replaced Errol Francis and Ed Meier as Fund Manager for this fund on 16.07.2013. The fund is not managed with reference to a benchmark but its performance may be measured against one or more.

Please refer to the Important information section for the disclosure.

Z Accumulation GBP | Data as at 31.01.2020

### 5 year return of GBP 10,000

**Past Performance is not a guide to future performance and may not be repeated.**

**The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.**

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

### Risk considerations

**Concentration risk:** The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down, which may adversely impact the performance of the fund.

**Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

**Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

**Equity risk:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.

### Synthetic risk & reward indicator (SRRI)

#### LOWER RISK

Potentially lower rewards

#### HIGHER RISK

Potentially higher rewards

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk statistics & financial ratios

|                                   | Fund | Target |
|-----------------------------------|------|--------|
| <b>Annual volatility (%) (3y)</b> | 10.8 | 10.0   |
| <b>Alpha (%) (3y)</b>             | -1.5 | -      |
| <b>Beta (3y)</b>                  | 1.0  | -      |
| <b>Sharpe ratio (3y)</b>          | 0.4  | 0.6    |
| <b>Dividend Yield (%)</b>         | 4.1  | -      |
| <b>Price to book</b>              | 2.3  | -      |
| <b>Price to earnings</b>          | 18.8 | -      |

Target refers to the Benchmark listed in the Fund facts section and described under the Share class performance section on page 1. Source: Morningstar. The above ratios are based on bid to bid price based performance data. These financial ratios refer to the average of the equity holdings contained in the fund's portfolio and in the benchmark (if mentioned) respectively.

Please note this is an accumulation share class and as such the investor will not receive an income distribution. Any income will be reinvested into the fund.
