

### BlackRock Global Multi Asset Income Fund

Class D Accumulating GBP

ISIN: GB00B8C0VJ97

Manager: BlackRock Fund Managers Limited

## Objectives and Investment Policy

- ▶ The aim of the Fund is to provide an above average income compared to the income produced by global bond and equity markets (as defined by the Bloomberg Barclays Global Aggregate Bond Index and MSCI All Country World Index respectively) without sacrificing the benefits of long-term capital growth.
- ▶ The Fund invests globally in equity securities (e.g. shares), fixed income securities (such as bonds), funds, cash, deposits and money market instruments (i.e. debt securities with short term maturities).
- ▶ The Fund's investments may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). These may include securities with a relatively low credit rating or which are unrated.
- ▶ In normal market conditions the intention is for the Fund to invest a larger proportion of its assets in income generating assets than in non-income generating assets.
- ▶ The assets held by the Fund may be denominated in a wide variety of currencies.
- ▶ The investment adviser (IA) will use derivatives (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. These may be used to gain indirect exposure to commodities (such as precious metals and agricultural produce) and to property.
- ▶ The Fund may, via derivatives, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ Where the Fund invests in assets denominated in a currency other than Sterling, the investment adviser will use derivatives in order to reduce the effect of fluctuations in the exchange rate between that other currency and Sterling.
- ▶ The Fund is actively managed and the IA has discretion to select the Fund's investments and in doing so may take into consideration the Bloomberg Barclays Global Aggregate Bond Index and the MSCI All Country World Index. The asset classes and the extent to which the Fund is invested in these may vary depending on market conditions and other factors at the IA's discretion.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 27 December 2019. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.92%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 1994. The unit class was launched in 2012.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

†150% Bloomberg Barclays Global Aggregate Bond Index & 50% MSCI All Country World Index (GBP)

\*The Fund was previously known as Blackrock Balanced Income Portfolio Fund. On 12 January 2015, the Fund adopted its present name and in addition changed its investment objective and policy.

Historic performance to 31 December 2019

During this period performance was achieved under circumstances that no longer apply.\*

## Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English.
