# Schroder Strategic Credit Fund

a sub-fund of Schroder Investment Fund Company

Class L Income GBP (GB00B11DP098)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

## Objectives and investment policy

### Objectives

The fund aims to provide income and capital growth in excess of 3 Month GBP LIBOR (or an equivalent reference rate) (after fees have been deducted) over a 3 to 5 year period by investing in bonds of UK and European companies but this cannot be guaranteed and your capital is at risk.

### Investment Policy

The fund is actively managed and invests at least 80% of its assets in bonds denominated in sterling (or in other currencies and hedged back into sterling) issued by companies in the UK and Europe. The fund may also invest in bonds issued by companies worldwide and by governments, government agencies and supra-nationals.

The fund may invest more than 50% of its assets in below investment grade bonds (as measured by Standard & Poor's or any other equivalent credit rating agencies) or in unrated bonds.

The fund may also invest directly or indirectly in other securities (including in

other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The Fund may use leverage and take short positions.

### Benchmark

The fund's performance should be assessed against its target benchmark of 3 month GBP LIBOR (or an equivalent reference rate) and compared against the Investment Association Strategic Bond sector average return.

### Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

### Distribution Policy

This share class pays income received from the fund's investments to you half yearly.

## Risk and reward profile

### The risk and reward indicator

The risk category is based upon the fund's risk target and there is no guarantee that the fund will achieve it.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

### Risk factors

ABS and MBS risk: The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Capital risk / Distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk: A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

# Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charges	0.66%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2020 and may vary from year to year. The ongoing charge figure excludes portfolio transaction costs. The charges are mostly, if not exclusively, the Schroders Annual Charge (as may be discounted for retail share classes depending on the size of the fund) but certain additional expenses may be charged as set out in the prospectus. The Schroders Annual Charge (without any discount) for this share class of the fund is 0.67%. The fund's annual report for each financial year will include details on the exact charges made including any discounts.

Please see the prospectus for more details about the charges.
