UK SMALLER COMPANIES FUND - Z INC GBP

ISIN: GB00B7JL4Y45
 Share Class Price: 2.2530
 Historic Yield: 0.6%
 Ongoing Charges: 0.89% (as at 07/03/20)
 ISA: Yes
 Performance Fee: No

The ongoing charges figure (OCF) is usually based on the last year's expenses and may vary from year to year. It includes charges such as the fund's annual management charge, registration fee, custody fees and distribution cost but excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). For a more detailed breakdown please visit www.columbiathreadneedle.com/fees. In some cases, the ongoing charges figure may be based on an estimate of future charges, either because the share/unit class is relatively new and has an insufficient track record to be calculated exactly, or if historic figures are unlikely to accurately reflect future ongoing costs.

Please see table of Share Classes available.

Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The Fund holds assets which could prove difficult to sell. The Fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.

Opportunities

- Has the flexibility to pursue investment opportunities wherever we believe they exist in the UK market.
- Smaller companies can be a source of long-term growth: seeking the industry leaders of tomorrow.
- Leverages the strength of one of the most experienced and largest UK equity teams in the industry.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

Fund Objective & Policy

The Fund aims to increase the value of your investment over the long term. It looks to outperform the Numis Smaller Companies excluding Investment Companies (ex ICs) Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and invests at least 90% of its assets in the shares of companies listed on the London Stock Exchange; predominantly smaller companies traded on the Alternative Investment Market (AIM) or included within the Numis Smaller Companies (ex ICs) Index, that are UK domiciled, or have significant UK business operations.

The Fund selects companies considered to have good prospects for share price growth, from any industry or economic sector, with smaller companies providing potential exposure to niche growth areas that often cannot be accessed by large companies.

The Fund typically invests in shares of fewer than 70 companies. The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Numis Smaller Companies (ex ICs) Index is a widely used benchmark for monitoring the performance of UK smaller companies. It consists of companies that make up the smallest 10% of the UK main listed market by value (excluding investment companies). It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.

The Share Class currency, unless indicated as a Hedged Share Class, is a translated price using exchange rates at the official valuation point of the fund. This is intended as a way to access a Share Class in your chosen currency and does not reduce your overall exposure to foreign currency. The fund currency indicates the highest currency exposure of the fund unless the currency breakdown is detailed in the Weightings % table on page 2.

*Past performance is not a guide to future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). Past performance before launch date includes data for another share / unit class or fund with similar characteristics (for details see Fund Changes, page 1). The Investment Association (IA) is the trade body representing the UK investment management industry.
