

BlackRock Global Income Fund Class D DIST GBP

NOVEMBER 2019 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 30-Nov-2019. All other data as at 09-Dec-2019.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to provide an income return on your investment that is above average when compared to the income produced by global equity markets (as defined by the MSCI All Countries World Index), without sacrificing capital growth (i.e. the value of the assets held by the Fund) over the long term (5 years or more). The Fund invests at least 70% of its total assets in equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, developed markets. The Fund has the flexibility to invest outside of the asset class and sector set out above, including in developing markets.

Key Risks: The value of your investment and the income from it will vary and your initial investment amount is not guaranteed. Investors should understand that capital growth is not a priority for the Fund and that income levels will vary and are not guaranteed. Overseas investments will be affected by movements in currency exchange rates. Compared to more established economies, the value of investments in Emerging Markets may be subject to greater volatility due to differences in generally accepted accounting principles or from economic or political instability. Some or all of the Manager's annual charge for the Fund is taken from capital rather than from income. This increases the income, but reduces the potential for capital growth.

BLACKROCK®

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
