iShares € Corp Bond Interest Rate Hedged UCITS ETF

A sub-fund of iShares V plc

EUR (Dist) Share Class

ISIN: IE00B6X2VY59 Exchange Traded Fund (ETF)

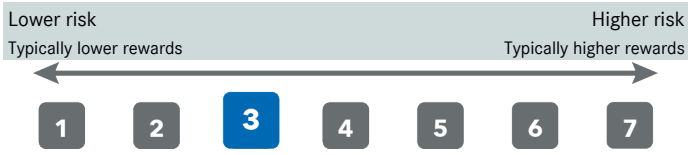

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Bloomberg Barclays EUR Corporate Interest Rate Hedged Index, the Fund's benchmark index (Index).
- The Index aims to measure the total return of Euro denominated corporate bonds in the Bloomberg Barclays Euro Corporate Bond Index (Underlying Index) while hedging against underlying interest rate risk of Euro corporate bonds in the form of German government bond yield risk. The Underlying Index measures the performance of Euro-denominated, investment grade fixed income (FI) securities (such as bonds) which pay income according to a fixed rate of interest and are issued by industrial, utility and financial companies.
- The Index hedges against underlying interest rate risk by subtracting from the total return of the Underlying Index, the return on a basket of German government bond futures contracts on a monthly basis. The hedge aims to minimise exposure to movements in the yield of German government bonds.
- The Share Class, via the Fund is passively managed and aims to invest so far as possible and practicable in the FI securities that make up the Underlying Index and comply with its credit rating requirements, as well as in German government bond futures contracts that, as far as possible track the hedging methodology of the Index. If the credit ratings of the FI securities are downgraded, the Fund may continue to hold these until they cease to form part of the Index and it is practicable to sell the position.
- The German government bond futures contracts are weighted appropriately according to the duration of the FI securities held in the Index on a monthly basis. No adjustment is made to the hedge during the month to account for price movements of FI securities of the Index.
- The Fund uses optimising techniques to achieve a similar return to its Index. These may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. These may also include the use of FDIs (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes. Apart from hedging German government bond yield exposure, the use of FDIs is expected to be limited for this Share Class.
- The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- Your shares will be denominated in Euro, the Fund's base currency.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded.

Risk and Reward Profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Derivatives may be highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund.
  - Interest rate hedging aims to mitigate, but will not eliminate, interest rate risk, and may affect the performance of the Fund.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. "bail-in") by relevant authorities to rescue the institution.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

The benchmark is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Fund's prospectus for full disclaimer.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
