This document was published on 28-06-2024

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type: Ordinary shares in Riverstone Credit Opportunities Income Plc, a closed-ended investment company incorporated in England and Wales (the "Company"). The ordinary shares are traded in US Dollar on the Specialist Fund Segment of the London Stock Exchange. The Company has an unlimited life and there is no maturity date for the ordinary shares. There is no recommended holding period for the ordinary shares (although a holding period of 5 years has been used for the purpose of the calculations in this document). The Company may, but is under no obligation to, repurchase ordinary shares and investors should expect that the primary means of disposing of ordinary shares will be by sales on the secondary market. The price at which an investor may dispose of ordinary shares will depend on the prevailing secondary market price, which may, or may not, reflect the prevailing net asset value per ordinary share. Typically, at any given time on any given day, the price at which an ordinary share can be bought will be higher than the price at which an ordinary share can be sold.

Objectives: The Company will seek to generate consistent shareholder returns predominantly in the form of income distributions, principally by making senior secured loans to energy-related businesses. The Company will seek to achieve its investment objective through investing in a diversified portfolio of direct and indirect investments in loans, notes, bonds and other debt instruments, including convertible debt, issued by entities

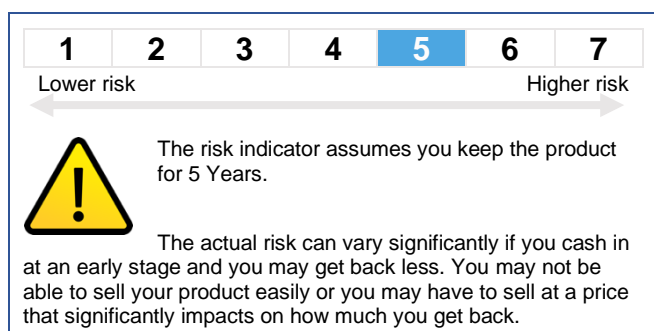

("Borrowers") operating in the energy sector ("Loans"). The Company may also invest in warrants or other equity interests or instruments received in connection with (for example, stapled instruments), or as a consequence of (for example, due to a workout, refinancing or restructuring or mezzanine financing), an investment in Loans. The Company may borrow to purchase investments, which may magnify any gains or losses made by the Company.

Intended retail investor: The Company is not specifically intended for retail investors. An investment in the Company is suitable only for investors that are capable of evaluating the merits and risks of such an investment with the objective of long-term capital growth and who understand the potential risk of capital loss and that there may be limited liquidity in the ordinary shares. In addition, their investment in the ordinary shares should constitute part of a diversified investment portfolio, and the investors should fully understand, and are willing to assume, the risks involved in investing in the Company and have sufficient resources to be able to bear losses (which may equal the whole amount invested) that may result from such an investment. Accordingly, typical investors in the Company are expected to be experienced investors, institutional investors, high net worth investors and other investors who have taken appropriate professional advice and understand the risks involved in investing in the Company.

Term: This product has no maturity date.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Investment performance information

The Company makes private, first-lien, floating-rate loans to small-to-mid market companies involved in energy infrastructure, infrastructure services and energy transition. The Company's objective is to lend to companies that build and operate the infrastructure used to generate, transport, store and distribute both renewable and conventional sources of energy, and companies that provide services to that infrastructure. The Company also lends to companies seeking to facilitate the energy transition by decarbonising the energy, industrial and agricultural sectors, building sustainable infrastructure and reducing or sequestering carbon emissions. The Company seeks to ensure that our investments are having a positive impact on climate change by structuring each deal as either a green loan or a sustainability-linked loan, documented using industry best practices. These loans require the borrower to pay fees and interest, to comply with certain affirmative and negative covenants and to repay the loan

by a date certain. In certain circumstances, the borrower will also issue warrants or other equity interests to us as consideration for making the loan. In certain extreme circumstances when there has been a default, we may elect to swap our loan for equity interests in the borrower and make follow on equity investments.

To the extent the Company is forced to liquidate during a period of weak energy and infrastructure market conditions, there is a possibility that net asset value will be below cost, and that the Company's positions would be sold for less than net asset value.

What could affect my return positively?

- Stable to positive energy and infrastructure market conditions that lead to portfolio companies performing under the terms of the loans we make, paying us fees and interest as expected
- Any equity interests (warrants, etc) issued as additional consideration having value in excess of cost
- Rising interest rates

What could affect my return negatively?

- Weak energy and infrastructure market conditions that lead to portfolio companies failing to perform under the terms of the loans we make, resulting in payment defaults
- To the extent these defaulted loans are converted to equity, these equity positions ultimately having value less than cost
- Declining interest rates

What happens if Riverstone Investment Group LLC is unable to pay out?

The Company is not required to make any payment to you in respect of your investment. If the Company were liquidated, you would be entitled to receive a distribution equal to your share of the Company's assets, after payment of all of its creditors. The Investment Manager has no obligation to make any payment to you in respect of the ordinary shares. There is no compensation or guarantee scheme in place that applies to the Company and, if you invest in the Company, you should be prepared to assume the risk that you could lose all of your investment.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods.

They include potential early exit penalties. The figures assume you invest USD 10 000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment USD 10 000			
Scenarios	If you cash in after 1 Year	If you cash in after 3 Years	If you cash in after 5 Years
Total costs	431	1 293	2 155
Impact on return (RIY) per year	4.31%	4.31%	4.31%

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	3.41%	The impact of the costs that we take each year for managing your investments and the costs presented in Section II.
Incidental costs	Performance fees	0.90%	The impact of the performance fee.
	Carried interests	0.00%	The impact of carried interests.

How long should I hold it and can I take my money out early?

Recommended holding period: 5 Years

This product has no required minimum holding period. It is designed for long term investment with investors being able to sell their investment at will on the London Stock Exchange. The recommended holding period in this document is for illustrative purposes only. The Company is not obliged to acquire any of the Company's shares. You may sell your shares in the Company on any day which is a dealing day on the London Stock Exchange. No fees or penalties are payable to the Company or the PRIIPs manufacturer on sale of your investment, but you may be required to pay fees or commissions to any person arranging the sale on your behalf

How can I complain?

If you have any complaints about the product or conduct of the product manufacturer, you may lodge your complaint on the Company's website at www.riverstonecoi.com or with the Company's Administrator, Ocorian Administration (UK) Limited, on +44 (0) 7824 547185. You do not have the right to complain to the UK Financial Ombudsman Service (FOS) about the management of the Company. If you have a complaint about a person who is advising on, or selling, the product you should pursue that complaint with the relevant person in the first instance.

Other relevant information

Further documentation, including the Company's annual and semi-annual reports and regulatory disclosures, is available on the Company's website at www.riverstonecoi.com. This documentation is made available in accordance with the Listing Rules and the Disclosure Guidance and Transparency Rules of the United Kingdom Listing Authority and the UK Alternative Investment Fund Managers Regulations. Your attention is particularly drawn to the risk disclosures in the Company's prospectus.
