Benchmark

Benchmark: Investment Association Flexible Investment Sector*

This is a Comparator Benchmark. Given its asset allocation the Fund's performance can be compared against the Benchmark. However, the Fund is actively managed and is not constrained by any benchmark.

* Many funds sold in the UK are grouped into sectors by the Investment Association (the trade body that represents UK investment managers), to facilitate comparison between funds with broadly similar characteristics.

Fund investment objective and policy

The objective of the Fund is to achieve long-term (5 years plus) capital growth. The Fund invests at least 80% of its assets in collective investment schemes (including funds managed by the Invesco group) which invest in a broad range of assets including shares of companies and corporate and government debt securities (which may be investment grade, non-investment grade and have no credit rating). The Fund may use derivatives (complex instruments) to manage the Fund more efficiently, with the aim of reducing risk, reducing costs and/or generating additional capital or income. The Fund invests in collective investment schemes (including funds managed by the Invesco group) which may use derivatives for investment purposes and/or to manage the fund more efficiently.

Fund strategy

A globally diversified fund-of-funds that allocates capital on behalf of clients and provides access to the Henley Investment Centre in one fund. It is managed by our Henley-based Multi Asset team which employs a robust, understandable and repeatable approach that brings together top-down asset allocation and the alpha potential of underlying investment teams. At the heart of this approach is a strong focus on fundamentals and a long-term investment horizon, which delivers a diversified mix of what the team believes are the most attractive capital growth investment opportunities across markets.

Past performance is not a guide to future returns. Performance figures are based on the Z Accumulation share class. As this was launched on 12 November 2012, for the periods prior to this launch date, performance figures are based on the accumulation share class, without any adjustment for fees. Performance figures for all share classes can be found in the relevant Key Investor Information Document. Fund performance figures are shown in sterling, inclusive of reinvested income and net of the ongoing charge and portfolio transaction costs to 30 April 2020 unless otherwise stated. Sector average performance is calculated on an equivalent basis. The standardised past performance information is updated on a quarterly basis. Source: Lipper.

Investment risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.
- The fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments, reduce the costs of investing and/or generate additional capital or income, although this may not be achieved. The use of such complex instruments may result in greater fluctuations of the value of the fund. The Manager, however, will ensure that the use of derivatives within the fund does not materially alter the overall risk profile of the fund.
- Although the Fund invests mainly in established markets, it can invest in emerging and developing markets, where there is potential for a decrease in market liquidity, which may mean that it is not easy to buy or sell securities. There may also be difficulties in dealing and settlement, and custody problems could arise.
- The Fund's underlying investments may contain emerging market, smaller company and concentrated funds, for which investors should be prepared to accept a higher degree of risk than for a Fund with a broader investment mandate.
