

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Legg Mason IF Martin Currie Japan Alpha Fund

Class X Accumulation (Hedged)

ISIN: GB00BVZ6VC87

A sub-fund of: Legg Mason Funds ICVC (the "Company")

Managed by: Legg Mason Investment Funds Limited, part of the Legg Mason group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of your investment.

Investment Policy

- The fund will invest at least 80% in shares of companies based in or conducting most of their activities in Japan.
- The fund invests mainly in large and medium sized companies.
- The fund will usually invest in a concentrated portfolio, typically 40 to 60 companies.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging

transactions can expose the share class to additional risks which may result in loss to your investment.

Manager's Discretion: The fund manager has discretion in selecting investments within the fund's objective and investment policies.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 100,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of small cap Japanese companies from various sectors has historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in Japan, which means that it is more sensitive to local economic, market, political or regulatory events in Japan, and will be more affected by these events than other funds that invest in a broader range of regions.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The fund manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the share classes value and may cause the share class to lose as much as or more than the amount invested in the derivatives.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.03%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2018. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 26 June 2015 and the share class began issuing shares on 26 June 2015.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.
