

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Fund's current Prospectus shall have the same meaning herein.

GAM UK Equity Income

hereafter the "Fund", a sub-fund of GAM Funds.

I1 - GBP (the "Share Class") **ISIN: GB00BD814M52**

ACD: GAM Sterling Management Limited part of GAM Group AG.

Objectives and investment policy

- The investment objective of the Fund is to provide income. The Fund also seeks to achieve capital appreciation.
- The Fund seeks to achieve this objective through investing at least two thirds of its assets in UK equities including ordinary shares and preference shares without restrictions either by company, size or industry. The Fund may also invest in non-UK equities, fixed interest securities, convertible bonds, units of collective investment schemes, money market instruments, warrants, cash, near cash and deposits.
- The collective investment schemes in which the Fund will invest may include schemes in the UK which are managed or operated by the ACD or an associate of the ACD.
- Shares in the Fund can be bought and sold daily (every Business Day of the Fund).
- Any income arising from this Share Class will be distributed. Other share classes of the Fund may accumulate income.
- The Fund is actively managed. The fund manager uses their expertise to pick investments to achieve the Fund's investment objective.
- The Fund may use derivatives and forward currency transactions for the purposes of efficient portfolio management. A forward currency contract is a binding contract that locks in the exchange rate for the purchase or sale of a currency on a future date. It is essentially a hedging tool that aims to protect against fluctuations in currency prices.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate.

- The Fund does not offer any capital guarantee or assurance that the investor will receive a fixed amount when redeeming.
- This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

Further risks that may have a significant effect on the net asset value of the Fund include:

- **Brexit Risk** : The regulatory regime to which certain of the Investment Managers are subject to in the UK could be materially and adversely affected. The decision to leave the EU could also result in substantial volatility in foreign exchange markets and a sustained period of uncertainty for the UK, the EU and the global markets in general.
- **Capital at Risk**: all financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed
- **Investment Positions**: positions may increase in size relative to the size of the Fund. The risk is monitored by regularly adapting positions.
- **Equity**: investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.

The "Investment Objectives and Policy" section of the Prospectus for this Fund give you more details about all the risks for the Fund – see under "Practical Information" for how to obtain a copy.
