- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time.
- The lowest category does not mean 'risk free'.
- The Class I Shares above appear as a "5" on the scale. This is partly because the Fund invests in the shares of companies, whose values tend to vary more widely. Additionally, the Class I Shares (depending on their currency denomination) may be affected by currency exchange rates.
- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Counterparty Risk**—The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.

- **Portfolio Concentration Risk**—The Fund will hold a more concentrated portfolio of underlying assets than an average fund. Whilst increasing the potential reward, there may also be an increased risk. As such, the returns may be more volatile and will be impacted more by fluctuations in the value of the Fund's underlying assets.

- **Liquidity Risk**—Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.

- **Management Risk**—Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.

- **Exchange Rate Risk**—Fluctuations in exchange rates may cause the value of your investment to rise or fall.
