

Income GBP | Data as at 31.10.2020

Company Investment Objectives and Policy

The Company's principal investment objective is to achieve capital growth through investment primarily in equities of companies located in the continent of Asia (excluding the Middle East and Japan), together with the Far Eastern countries bordering the Pacific Ocean. It aims to achieve growth in excess of the MSCI All Countries Asia excluding Japan Index in sterling terms (Benchmark Index) over the longer term.

The latest Annual Report includes the investment policy which you should read in conjunction with the KIID before investing, these are available on our Schroders website.

Performance

Performance (%)	YTD	1 month	3 months	6 months

Benchmark	36.6	18.8	4.4	2.2	12.3

Performance over 5 years

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Source: Morningstar, net income reinvested, net of ongoing charges and portfolio costs and where applicable, performance fees, in GBP. The five year performance chart above reflects ex income performance. We have reflected cum income up to 10 years in the tables above. In January 2011 the MSCI AC Asia ex Japan (NDR) replaced the MSCI AC FE ex-Japan Net (TR). The full track record of the previous index has been kept and chainlinked to the new one

Where gearing is shown as negative, this reflects net cash.

Ratings and accreditation

Please refer to the Important information section for the disclosure. The above are external ratings and the internal ESG accreditation.

Income GBP | Data as at 31.10.2020

5 year return of GBP 10,000

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are based on the share price. Share price performance figures are calculated on a mid-market basis in GBP with income reinvested on the ex-dividend date.

Risk considerations

Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. The Company can be exposed to different currencies. Changes in foreign exchange rates could create losses. The Company may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the company, both up or down, which may adversely impact the performance of the company. The Company may borrow money to invest in further investments, this is known as gearing. Gearing will increase returns if the value of the investments purchased increase in value by more than the cost of borrowing, or reduce returns if they fail to do so. Investments such as warrants, participation certificates, guaranteed bonds, etc will expose the company to the risk of the issuer of these instruments defaulting on paying the capital back to the company.

Capital risk / Distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.
