

## Xtrackers II EUR High Yield Corporate Bond UCITS ETF

Share Class: 1D (ISIN: LU1109942653), (WKN: DBX0PR), (Currency: EUR)

a sub fund of Xtrackers II. The Fund is managed by Deutsche Asset Management S.A., part of the DWS Group.

### Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Markit iBoxx EUR Liquid High Yield Index (Index).

The Index reflects the performance of the largest liquid sub-investment grade corporate bonds denominated in Euro and issued by companies based both inside and outside of Europe.

For new bonds to be included in the Index, they must, on the relevant rebalancing date, have a minimum remaining time to maturity of at least two years and a maximum of up to ten and a half years. The bonds can have a fixed or floating rate of interest and must be rated less than Baa3/BBB- by major rating agencies.

The weight of an issuer in the Index is capped at 3% and the weight of a country in the Index is capped at 20% of the market value of the Index at the rebalancing date. The size of individual bonds from an issuer is capped in relation to their market value. There is no such cap applied to index constituents in relation to sector allocation.

The Index is sponsored by Markit Indices Limited and reviewed and rebalanced monthly.

To achieve the aim, the Fund will attempt to replicate the Index by buying a portfolio of securities that may comprise the constituents of the Index or unrelated investments as determined by the investment manager and the sub-portfolio manager, which are DWS Group entities.

The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contract(s) (derivative(s)). The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.

Dividends may be paid on your shares.

You may redeem your investment on demand on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the performance of the Index less costs, but your investment is not expected to match the performance of the Index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

DWS entities and related companies may act in several roles in relation to the Fund such as distributor and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. An investor may be negatively affected by, or may not benefit from, the lack of such adjustments.

The Fund may use derivatives in an attempt to efficiently manage the portfolio. It may be that the use of derivatives will not have the desired result and can cause share prices to fluctuate which may in turn result in the Fund and your investment suffering a loss.

Investors should be aware that, due to there being no sector allocation cap, the Index may become more concentrated to a particular sector and/or sectors.

The Fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations than investment grade bonds. This may affect the value of your investment.

The Fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest		<p>Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.</p> <p>The ongoing charges figure is based on expenses for the year ending October 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.</p> <p>More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.</p>
Entry charge	None	
Exit charge	None	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		
Charges taken from the Fund over a year		
Ongoing charges	0.35%	
Charges taken from the Fund under certain specific conditions		
Performance fee	None	

To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, Deutsche Asset Management (UK) Limited, as Sub-Portfolio Manager, will be allocated 15%, and Deutsche Bank AG, as securities lending agent, will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated from which Deutsche Asset Management (UK) Limited will receive its allocation. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

## Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2015 and the share class was launched in 2015.

Past performance has been calculated in EUR.
