#### **AUTHORISED STATUS AND GENERAL INFORMATION**

#### **Authorised status**

The Marlborough ETF OEIC (the Company) is an investment company with variable capital (ICVC) incorporated under the Open Ended Investment Company (OEIC) Regulations 2001. It is a non-UCITS retail scheme as defined in the Collective Investment Schemes Sourcebook (COLL) and the Investment Funds Sourcebook (FUND) and is an umbrella company for the purposes of the OEIC Regulations. The Company is incorporated in England and Wales with the registration number IC00396 and is authorised and regulated by the Financial Conduct Authority with effect from 28 June 2005. The shareholders are not liable for the debts of the Company.

The sub-funds of the Company are segregated by law under the Protected Cell Regime. In the event that one sub-fund in the Company is unable to meet its liabilities, the assets of another sub-fund within the Company will not be used to settle those liabilities.

The Company currently has two sub-funds; Marlborough ETF Commodity Fund and Marlborough ETF Global Growth Fund.

#### Investment objective and policy

#### Marlborough ETF Commodity Fund

The investment objective of the sub-fund is to achieve capital growth.

It is intended that this objective will be achieved by the sub-fund investing in a portfolio of global commodity Exchange Traded Funds and other global commodity collective investment schemes.

#### Marlborough ETF Global Growth Fund

The investment objective of the sub-fund is to prioritise capital growth.

It is intended that this objective will be achieved by the sub-fund investing primarily in either single country or regional market based Exchange Traded Funds.

Exchange Traded Funds are collective investment schemes whose shares are traded on investment exchanges worldwide.

The asset classes in which the sub-funds are permitted to invest includes units and shares in collective investment schemes, transferable securities, money market instruments and deposits as permitted for Non-UCITS Retail Schemes under COLL and in accordance with the Company's investment powers as summarised in the Prospectus. The sub-funds may invest in derivative instruments and forward transactions for limited purposes as set out in the Prospectus.

#### Rights and terms attaching to each share class

Each share of each class represents a proportional entitlement to the assets of the Company. The allocation of income and taxation and the rights of each share in the event the Company is wound up are on the same proportional basis.

#### Changes in prospectus

With effect from 1 April 2019, the initial service charge that applied to P class shares was removed. An initial service charge will still be applied to class A, class B and class C shares. Details of these charges can be found in the Prospectus.

On 22 October 2019, Marlborough ETF Global Growth Fund, a sub-fund of The Marlborough ETF OEIC, merged into VT IFunds Absolute Return Orange Fund, a sub-fund of VT iFunds OEIC, by scheme of arrangement, following receipt of the FCA's approval on 16 August 2019. It is anticipated that the termination of the sub-fund will be completed before 31 March 2020.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the manager's range can be requested by the investor at any time.

#### **Cross holdings**

The sub-funds of the Company do not hold shares in any other sub-funds of the Company.

#### **AUTHORISED STATUS AND GENERAL INFORMATION**

#### Leverage

In accordance with the Alternative Investment Fund Managers Directive (AIFMD) we are required to disclose the 'leverage' of the Fund. Leverage is defined as any method by which a sub-fund increases its exposure through borrowing or the use of derivatives. 'Exposure' is defined in two ways: 'gross method; and 'commitment method'. The sub-funds must not exceed maximum exposures under both methods. 'Gross method' exposure is calculated as the sum of all positions of a sub-fund (both positive and negative), that is, all eligible assets, liabilities and derivatives, including derivatives held for risk reduction purposes. 'Commitment method' is also calculated as the sum of all positions of the sub-fund (both positive and negative), but after netting off any derivative and security positions as specified by AIFMD rules.

Therefore, the total amount of leverage calculated as at 30 September 2019 is as follows:

#### Marlborough ETF Commodity Fund

Gross method: 94.79% Commitment method: 94.79%

#### Marlborough ETF Global Growth Fund

Gross method: 97.63% Commitment method: 97.63%

The maximum level of leverage which may be employed on behalf of the sub-funds when calculated in accordance with the gross method is 160%.

The maximum level of leverage which may be employed on behalf of the sub-funds when calculated in accordance with the commitment method is 110%.

#### **AUTHORISED CORPORATE DIRECTOR'S STATEMENT**

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

ALLAN HAMER
JOINT MANAGING DIRECTOR

G N Hitchin

G R HITCHIN INVESTMENT DIRECTOR

MARLBOROUGH FUND MANAGERS LTD 14 November 2019

#### NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 30 September 2019

#### **Basis for preparation**

The interim financial statements have been prepared in compliance with FRS 102 and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Association in May 2014.

The interim financial statements are prepared in sterling, which is the functional currency of the sub-funds. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

#### **Accounting policies**

The accounting policies applied are consistent with those of the annual financial statements for the year ended 31 March 2019 and are described in those annual financial statements.

The investments of the sub-funds have been valued at their fair value at 12 noon on 30 September 2019.

#### **AUTHORISED INVESTMENT ADVISER'S REPORT**

for the six month period ended 30 September 2019

#### Performance to 30 September 2019

	Six months	<u>1 year</u>	3 years	<u>5 years</u>	Since launch*
Marlborough ETF Commodity Fund	-1.92%	-10.09%	2.68%	-11.73%	-16.03%
Deutsche Bank LCI-OY Balanced TR Index	-5.38%	-12.20%	-6.72%	-30.61%	-33.90%

<sup>\*</sup> Launch period ended 28.07.2006 (Class A, B and C shares). Class P shares launched 31.12.2012.

Commodity markets have remained subdued as worries regarding the strength of the global economy continue to keep prices weak.

Tensions in the Arabian Gulf rose significantly as Iran was blamed for a missile and drone attack on the Saudis largest Oil processing plant which knocked out a significant portion of the world's Oil supply. However, even this event could not prop up the oil price for long, as repairs were quickly made, and the US stepped back from getting involved militarily. Attention soon returned to the demand outlook for oil as the world economy continued to slow.

Precious metals were a significant bright spot amongst the commodity sectors as Gold and Silver prices broke out of their range and moved sharply higher. Investors decided that holding real assets such as precious metals might be a good hedge against the continued low level of bond yields and the ever-increasing supply of paper money. The outlook for precious metals against a backdrop of economic uncertainty would appear to be favourable.

Industrial metals in general have reflected the slowing global economy except for Nickel and some other battery related metals, which are enjoying some increased interest as a result of the electric car sector growth.

The Sterling US Dollar exchange rate has added to the commodity sector volatility as the Brexit saga drags on. A resolution to the parliamentary deadlock would likely see Sterling rally.

The fund has remained largely neutral with regards to overall commodity exposure. Overweight positions in energy have been unwound as oil and related sectors have slipped lower. Precious metals are trying to hold on to recent gains and after sharp reversal would appear to be consolidating again.

Foodstuffs have finally started to rally after recent sharp sell-offs and the problems of African Swine Flu in China has put a floor under food import prices both for Hogs and other food substitutes.

A resolution of the trade dispute or at least a partial agreement would act as a catalyst to propel commodity prices higher; with President Trump increasingly under pressure domestically at home and abroad the prospect of settlement has probably increased.

Nigel Baynes iFunds Asset Management Limited 21 October 2019

External Source of Economic Data: Morningstar (Class P Acc - mid to mid).

Class P shares first priced on 02.01.2013. In the period to that date, the past performance information for the Class A shares has been used.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

#### SYNTHETIC RISK AND REWARD INDICATOR

Lower risk Highe				gher risk			
Typically lower rewards Typically higher			rewards				
	1	2	3	4	5	6	7

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the sub-fund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 5 because it has experienced moderate to high volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.

Performance to 30 September 2019

Six months1 year3 years5 yearsSince launch\*Marlborough ETF Global Growth Fund1.84%-2.06%7.04%26.50%77.24%

Class P shares first priced on 02.01.2013. In the period to that date, the past performance information for the Class A shares has been used.

The two key constants during the last 6 months has been the failure of the government to agree terms for a Brexit deal and the US and China failing to agree a trade deal suitable to both parties. Against this backdrop markets have oscillated from fear of recession to hope that both Brexit and trade wars will be resolved, and central bank interest rate cuts will propel equity markets higher.

The Fund started the period with significant holdings in both UK government bonds and precious metals. This defensive allocation was a result of the sharp downturn in risk assets witnessed in October and December of last year. However, the equity indices we monitor recovered and we saw their trends turn positive again. Consequently, the Fund saw some significant trading activity during April as asset allocation shifted back towards equities.

As we moved towards the end of the second quarter the trade war continued to dominate market activity, President Trump outlined his frustration at the lack of progress in trade talks and promptly declared a new round of tariffs on Chinese imports. China was quick to retaliate, imposing a new range of tariffs on imported US goods. On the back of this, US equities as measured by the S&P 500 fell just shy of 6.5%, whilst Japanese equities, as represented by the Nikkei 225, fell by a similar amount. Emerging market equities fared a little better with the MSCI Emerging Markets index falling just under 3% whilst in Europe, the Euro Stoxx 50 index fell by more than 4%.

UK inflation linked government bonds were the Fund's best performer, returning over 5% as the pound continues to come under pressure. Of the equity allocations, the biggest loser was US technology equities. They were hit by fears of retaliatory sanctions being applied on US tech companies by China following the US government's decision to restrict the sales of Chinese technology firm Huawei over security concerns.

The third quarter kicked off with global equity markets buoyed by more dovish talk from central banks during June. The US Federal Reserve hinted at the possibility of a rate cut before the year is out as it continues to express concerns about the impact of tariffs on consumer confidence and global trade. Other Central Banks have echoed these concerns although in the UK the Bank of England has less room to manoeuvre given the pressure that sterling is already under. Against this backdrop US equities rallied strongly with the S&P 500 and Nasdaq both up over 6%. European equities were also strong as they finished the month just under 6% better off. With allocations to US large cap stocks, US tech stocks and European large cap stocks, we benefited from this rally, with the bulk of positive performance coming from allocation to US equities. Looking closer to home, UK equities, whilst positive, lagged their overseas counterparts as political uncertainty continues to cast a large shadow over the UK economy. As a result of poor relative performance, we received a sell signal for UK large cap equities in favour of a new position in US property which has been one of the strongest performing assets year to date. As we head into the second half of the year, the Fund continued its steady recovery.

Bonds and equities were generally positive during July as Central Banks maintained their soothing words amid recessionary pressures brought on by slowing global growth. Most of the Fund's performance came from its allocation to overseas and non-sterling denominated equity assets with US and European large caps particularly strong. With the appointment of Boris Johnson as Prime Minister, the odds of a no deal Brexit have increased, and the pound has fallen as a result. At the start of the month the pound was trading at \$1.27; however, by the end of the month it had fallen to \$1.22, a drop of over 4%. This meant that US equities, which were up 1.4% in local terms, finished the month up over 5% in sterling terms. It was a similar story for sterling against other major currencies, with the Euro gaining 1.5% and the Japanese Yen 3.4%. Overall the Fund remains split between bonds, equities and alternatives such as commodities. UK equities remain out of favour as Brexit uncertainty continues to bite and overseas equities outperform.

Operating charges are the same as the ongoing charges and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the subfund. These amounts are expressed as a percentage of the average net asset value over the period and the average shares in issue for the pence per share figures.

#### SYNTHETIC RISK AND REWARD INDICATOR

	Lower ris	sk				Hi	gher risk
Typically lower rewards				Typically higher rewards			
	1	2	3	4	5	6	7

The synthetic risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the sub-fund. It is calculated based on the volatility of the sub-fund using weekly historic returns over the last five years. If five years data is not available for a fund, the returns of a representative portfolio are used.

The sub-fund has been measured as 5 because it has experienced moderate to high volatility historically. During the period the synthetic risk and reward indicator has remained unchanged.
