Index description

The MSCI Switzerland 20/35 100% hedged to GBP index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of Switzerland. The impact of currency fluctuations between any foreign currency to the index currency is reduced by selling foreign currency forwards at the one-month forward rate. The index represents companies within this country that are available to investors worldwide.

Benefits

Clients benefit from the flexibility of an exchange-traded investment.
 Provides access to this segment of the market with a single transaction.
 Optimised risk/return profile thanks to a broad diversification across a range of sectors.
 The fund offers a high degree of transparency and cost efficiency.
 UCITS compliant fund.
 Reduced foreign currency risk with currency hedging in fund format.

Risks

This UBS Exchange Traded Fund invests primarily in equities and currency hedge derivatives, which are included in the MSCI Switzerland 20/35 100% hedged to GBP. Investors require a corresponding risk tolerance and capacity. All investments are subject to market fluctuations. Every fund has specific risks, which may significantly increase under unusual market conditions. The fund's assets are passively managed. As a result, the net asset value of the fund is directly dependent on the performance of the underlying index. Losses that could be avoided via active management will not be offset. For funds with "hedged" in their name, currency and forward currency transactions may be carried out in order to extensively hedge the net asset value of the funds against the CHF.

Important information

Past performance is not a guide to future performance. You should remember that the value of investments and the income from them can go down as well as up and are not guaranteed. Changes in rates of exchange may cause the value of investments to fluctuate. The Fund will use derivatives as part of its investment capabilities. However, such instruments are inherently volatile and the Fund could be potentially exposed to additional risk and costs should the market move against it. Whilst we assess the credit worthiness of each counterparty we enter into an agreement with, the Fund is at risk if that counterparty does not fulfil its obligations under the agreement. The UBS ETF Sicav is a recognized scheme under section 264 of the Financial Services and Markets Act 2000. It does seek UK Reporting Fund Status. The protections offered by the UK's regulatory system, and compensation under the Financial Services Compensation Scheme, will not be available. The information mentioned herein is not intended to be construed as advice and is therefore not a recommendation to buy or sell shares.
