WisdomTree USD Floating Rate Treasury Bond UCITS ETF-USD Acc

ISIN: IE00BJJYX67

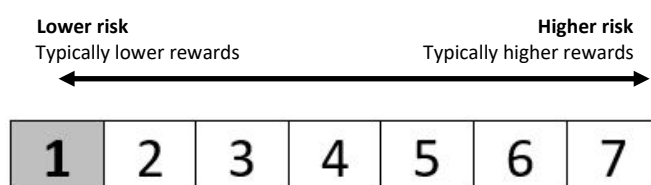

a share class of WisdomTree USD Floating Rate Treasury Bond UCITS ETF (the “Fund”)

which is a sub-fund of WisdomTree Issuer ICAV. Managed by WisdomTree Management Limited.

Objectives and Investment Policy

- The Fund seeks to track the price and yield performance, before fees and expenses of the Bloomberg Barclays US Treasury Floating Rate Bond Index (the “Index”).
- The Index is designed to measure the performance of floating rate U.S. Treasury bonds (“Floating Rate Notes” or “FRNs”). Unlike fixed-coupon-rate U.S. Treasury bonds, the coupon rates of the FRNs are expected to reset weekly based on the results of the most recent 13-week U.S. Treasury bill auction. The Index is rules-based, market value weighted, and rebalances on a monthly basis.
- The Fund will employ a “passive management” (or indexing) investment approach and will invest in a portfolio of bonds that, so far as possible and practicable, consists of a representative sample of the component securities of the Index. While the Fund will seek to invest all, or substantially all, of its assets in all the constituents of the Index, the use of a representative sampling strategy means that the Fund may invest in a sample of Index constituents whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.
- The Fund may from time to time use instruments which are not constituents of the Index, including short dated government bonds and government bonds that are not constituents of the Index. Such instruments may be fixed and/or floating rate. Such instruments will, at the time of purchase, meet the credit rating requirements of the Index, which is investment grade. While it is intended that the Fund’s investments will comprise investment grade issues, issues may be downgraded in certain circumstances from time to time. In such event the Fund may hold non-investment grade issues until such time as the non-investment grade issues cease to form part of the Fund’s Index and it is possible and practicable in the Investment Manager’s view to liquidate the position.
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer plc (the “Prospectus”).
- The Fund may enter into repurchase/reverse repurchase agreements and stock lending arrangements solely for the purposes of efficient portfolio management, subject to the conditions and within the limits set out in the prospectus for WisdomTree Issuer ICAV (the “Prospectus”).
- Shares of the Fund (“Shares”) are listed on one or more stock exchanges. Typically, only Authorised Participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.
- Distribution policy: Dividends will not be distributed to shareholders in respect of the shares of this class. Income and other profits will be accumulated and reinvested on behalf of the shareholders.
- Recommendation: This Fund may not be appropriate for short-term investment.
- Currency: The base currency of the Fund is US Dollar. The currency of denomination of this share class is US Dollar.
- For full investment objectives and policy details, please refer to the supplement to the Prospectus for the Fund (the “Supplement”).

Risk and Reward Profile

- The categorisation above is not guaranteed to remain unchanged and may shift over time.
- The lowest category (1) does not imply a risk-free investment.
- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- The categorisation above (1) is due to the nature of the Fund’s investments and risk associated with those investments, including:
 - The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
 - Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- Interest rate Risk. When interest rates rise, a bond value will generally fall. This risk will generally increase the longer the maturity of the bond. When interest rates rise, the market value of the bonds can be expected to decline.
- Credit Risk. Investment grade debt securities may still be subject to credit difficulties leading to the loss of some or all of the sums invested. Measures such as average credit quality may not accurately reflect the true credit risk of the Fund. This is especially the case if the Fund consists of securities with widely varying credit ratings.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
 - New / Small Fund Risk. A new or smaller fixed income Fund’s performance may not represent how the fixed income Fund is expected to or may perform in the long-term if and when it becomes larger and better able to implement its investment policy.
 - There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
 - It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions
- For a complete overview of all risks attached to this Fund, refer to the section entitled “Risk Factors” in the Supplement and the Prospectus
