PORTFOLIO COMMENTARY⁷ / 31 DECEMBER 2023

Whilst this has been a challenging year for the UK economy, it is encouraging to report on the strategic progress and resilient performance achieved. Most of the earlier stage private companies have continued to deliver meaningful revenue growth and meet commercial milestones. Although there has been a modest reduction in NAV total return, this largely reflects the unsettled economic conditions which have impacted valuation multiples across public and private markets, particularly in AIM, which has seen very low levels of new IPOs and investors exercising caution towards smaller listed growth companies.

The VCT is focused on building a large and diverse portfolio of earlier stage companies with high growth potential. Notwithstanding the economic conditions, it is encouraging to note that there has been further portfolio expansion, with new investments completed in private companies across a range of dynamic and emerging markets. Maven has continued to see good demand for growth capital from SMEs across the UK, which highlights the benefits of its regional model providing introductions to a wide pool of investment opportunities. The Board believes that the VCT is well positioned to continue to progress its investment strategy in the year ahead.
