Class C Accumulation (ISIN GB00B51J2488)

The Fund is managed by FundRock Partners Limited

Objective:

The aim of the fund is to provide shareholders with medium to long term investment growth through investing across multiple asset classes targeted towards investors prepared to assume some market risk.

Policy:

- The Fund will seek to achieve its objective through investment either directly or indirectly to multiple asset classes including global equities, global fixed income, emerging market equities, emerging fixed income, global real estate, global commodities, managed futures and hedge funds. These asset classes will be accessed in the most cost efficient manner by, for example, investment in index tracking or replicating funds, derivatives (used for efficient portfolio management purposes), exchange traded funds, and funds of managed accounts.
- By combining investments across the range of asset classes available, a highly diversified, low volatility portfolio can be achieved and the Fund will also gain exposure across a range of geographical areas.
- The Fund may also invest, at the ACD's discretion, in other transferable securities, money market instruments, cash and near cash and deposits to meet the investment objective.

Other information:

- You can buy and sell shares on most business days where the London Stock Exchange is open for a full range of services.
- The Fund's base currency is Pounds Sterling.
- We carry out investors' requests, to buy, sell or switch, at 7am on each business day (which excludes UK public holidays). The cut off point for dealing requests is 5pm on the previous business day.
- Investment in the Fund should be regarded as long-term, which is upwards of three to five years.
- There can be no guarantee that the objective of the Fund will be achieved.
- On encashment, particularly in the short-term, you may receive less than the original amount invested.
- As you hold accumulation shares, income from investments in the Fund will be rolled up into the value of your shares.

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.
- The Class A Shares above appear as a "4" on the scale. This is because the Fund by its nature invests in a mixture of investments. The value of some of these investments may vary more widely than others.
- The Fund does not provide its investors with any guarantee on performance, nor on monies invested in it.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

- **Counterparty Risk**—The Fund could lose money if an entity with which it interacts becomes unwilling or unable to meet its obligations to the Fund.
- **Liquidity Risk**—Certain securities could become hard to value, sell at a desired time and price, or cease to trade altogether.
- **Management Risk**—Investment management techniques that have worked in normal market conditions could prove ineffective or detrimental at other times.
- **Exchange Rate Risk**—Fluctuations in exchange rates may cause the value of your investment to rise or fall.

- **Non-UCITS Retail Schemes (NURS)** - The Fund is classed as a NURS and can have wider investment and borrowing powers than a UCITS scheme with higher investment limits in various areas. It can also invest to a greater extent in areas such as property and unregulated schemes and have the option to borrow on a permanent basis. Such additional powers can increase potential reward, but may also increase risk.
- **Exchange Traded Funds** - The Fund may invest in Exchange Traded Funds which represent a basket of securities that are traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result, they may trade at a price that is above or below the value of the underlying portfolio. Exchange traded funds may not be backed by underlying physical positions and may be subject to counterparty risk.
- **Overseas bonds and currencies** - From time to time, a Fund may invest in overseas bonds and currencies. These markets may respond to different influences to those that affect the underlying funds and accordingly carry a higher degree of risk.
- **Derivatives and volatility** - Derivative instruments may be used in the Funds for the purposes of Efficient Portfolio Management (EPM). It is not the ACD's intention that such use of derivatives will cause the Funds to be more volatile than the general level of market volatility in the underlying investments of the individual Funds, or that the use of derivatives for EPM will cause an increase in risk to the Funds.
- For full details of the Fund's risks please see Section 5 of the Fund's Prospectus, which is available from the ACD at FundRock Partners Limited – Apollo, PO Box 10263, Chelmsford CM99 2AS or, during normal business hours on 01268 44 8046.
