# IFSL Sinfonia OEIC Authorised Status and General Information

### Authorised Status

IFSL Sinfonia OEIC (the Company) is an open-ended investment company with variable capital (ICVC) incorporated under the Open-Ended Investment Companies Regulations 2001 (OEIC Regulations). The Company is a UCITS Scheme as defined in the Collective Investment Schemes Sourcebook (COLL) and is also an umbrella company for the purposes of the OEIC Regulations. The Company is incorporated in England and Wales with registered number IC000624. The Company was authorised by an order made by the Financial Conduct Authority (FCA) with effect from 8th May 2008 with the Product Reference Number (PRN) 478014.

The Company currently has five sub-funds: IFSL Sinfonia Income Portfolio; IFSL Sinfonia Income and Growth Portfolio; IFSL Sinfonia Cautious Managed Portfolio; IFSL Sinfonia Balanced Managed Portfolio; and IFSL Sinfonia Adventurous Growth Portfolio.

Shareholders of the sub-funds do not have any proprietary interest in the underlying assets of the Company and will not be liable for the debts of the Company. A sub-fund is not a legal entity. If the assets attributable to a sub-fund were insufficient to meet its liabilities the shortfall will not be met out of the assets attributable to one or more other sub-funds of the Company. The sub-funds are segregated by law under the Protected Cell Regime.

### Rights and Terms Attached to Each Share Class

A share of each class represents a proportional entitlement to the assets of the sub-fund. The allocation of income and taxation and the rights of each share in the event that a sub-fund is wound up are on the same proportional basis.

#### Changes to Prospectus

From 27th April 2020, Tatton Investment Management Limited have taken over the responsibility from BNP Paribas Asset Management UK Limited of the investment management for the Company.

No other significant changes have been made since the last report.

Up to date Key Investor Information Documents, Prospectus' and ACD's Reports and Financial Statements for any sub-fund or Company within the ACD's range can be requested by the investor at any time.

### Cross Holdings

The sub-funds of the Company do not hold shares in other sub-funds of the Company.

## IFSL Sinfonia OEIC Authorised Corporate Director's Statement

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

Allan Hamer Joint Managing Director

Wayne D Green Joint Managing Director

### Investment Fund Services Limited (IFSL)

Authorised Corporate Director of IFSL Sinfonia OEIC

28th May 2020

## IFSL Sinfonia OEIC Investment Manager's Review – Summary of the Markets

for the period from 1st October 2019 to 31st March 2020

October 2019 opened with some nervousness in the markets as several economic indicators continued to point to areas of concern, however ultimately global risk markets moved higher towards the end of the year. Initial worries about global growth were relieved as it became apparent that business surveys had underestimated growth and, in particular, the resilience of domestic consumer driven demand. Central banks continued to add reassurance to investors with the US Federal Reserve (Fed), the European Central Bank (ECB) and the People's Bank of China (PBoC) providing support that was increasingly visible across the economy. Although monetary policy no longer appears to be a panacea, the Fed and the ECB made it clear that their monetary policies will remain accommodative in 2020, while the PBoC will continue to lower its key rates. The Bank of England remained on hold throughout the year and stayed patient as the Brexit situation continued to evolve and dominate local landscape. Political factors, of course, caught attention over the period. China's trade negotiations with the US seem to reach, at least temporarily, a successful conclusion with Phase 1 deal due for signature in early January and the tariff increases proposed for mid-December we suspended. Discussions between the United Kingdom and the European Union took a more constructive turn towards the 31st October deadline, which should have marked the official Brexit date, giving some relief to UK assets and the pound sterling. The EU agreed to postpone the deadline to 31st January 2020, and after some protracted deliberations in parliament, Boris Johnson won the eventual general election. The British Conservative Party's large victory on 12th December gives the prime minister considerable room for manoeuvre after months of parliamentary stalemate. Even if everything remains unsettled, the probability of Brexit without agreement has waned considerably, removing a risk that was weighing on European economies. Sterling was amongst the strongest performers on the currency stage in to year-end, gaining 7.7% versus the US dollar and 4.6% against the euro. In developed markets for the fourth quarter of 2019, the US indices, which closed at new highs, outperformed; the S&P 500 gained 8.5% and the NASDAQ 12.2%. Japanese equities performed in line with US peers (+8.7% for Nikkei 225) thanks to large gains by export-related stocks. European equities posted a slight underperformance compared with the other developed regions (+4.9% for the EURO STOXX 50 index). Bottom of the pile, hampered by Sterling strength, the FTSE100 only gained 1.81% during the quarter. Conversely, the smaller domestic companies in the UK have performed strongly with returns of +10.4% in Q4 2019.

The latter part of the period has clearly been defined by the global outbreak of the Covid-19 pandemic; however, 2020 opened on a more positive footing. US-China trade tensions had eased, Brexit was now a formality (for the short-term exit process as we move into a transition period at least, with still large issues requiring redress on the future relationship post-2020) and major central banks were happy to accommodate a period of slow growth and anaemic inflation. This black swan coronavirus event has since caused a massive shock to financial markets, economic prospects, and the lives of entire populations. The speed and depth of falls in many markets over February and March of this year have been monumental. However, equally the fiscal (government) and monetary policy have provide an unprecedented reaction, in both scope and scale to this extreme health crisis.

A few examples of the fiscal responses in key markets to highlight the scope and scale of the response to try to project jobs and economies. The UK government has guaranteed loans and lending facilities to business of up to 15% of GDP. Fiscal policy eased aggressively via income and business support programs with the deficit expected to be close to 9% of GBP for 2020. US passed a USD 2 trillion fiscal package aimed at income and corporate support along with additional support for states. Overall worth 10.3% of GDP! Germany also had an unprecedented response considering the usual adherence to strict fiscal discipline. China obviously earlier in the virus response cycle had already embarked on this course with aggressive fiscal packages primarily delivered through local authorities and some central tax cuts. Estimated central government deficit is 3.8% though overall fiscal deficit of the public sector is close to 9%. The central government is also in discussion to launch a second major fiscal package in terms of both local and central government initiatives to could boost the deficit close to 13-14% GDP (on a PSBR basis).

Emergency packages and interest rate cuts have added some stability to markets, yet global equities are nursing losses of -22% with the FTSE100 losing nearly a quarter of its value over the period. In developed markets, the Nikkei 225 and the S&P 500 lost 20% each over the first quarter. European stock markets underperformed, with the EURO STOXX 50 down by 25.6%. Broken down by sectors, the steep drop in oil prices (-66.5% for WTI, down to USD 20 per barrel) due to a free-fall in global demand and an oil price war between Saudi Arabia and Russia leading to considerable oversupply in the market, severely penalising energy prices. Healthcare, consumer non-cyclicals and technology outperformed, however even these sectors have suffered quarterly declines of more than 10%.

Volatility in the FX markets equally moved to extreme levels in this last month of the quarter. The pound sterling fell sharply both against the euro and the US dollar; with the latter pair in March dipping intra-month to levels not seen since the mid 1980's. More broadly, we saw in March the search for liquidity led to a widespread retreat towards the US dollar. This particularly penalised the currencies of many emerging countries, which had suffered capital outflows, and led the Fed to set up swap lines in dollars with several central banks. Compared to a basket of six developed currencies (DXY Index), the US dollar rose in March from its low point of the year to its highest in three years within a few days. It finished the quarter higher by 2.8%. As a comparison to 2019 as a whole, during that year this index had risen by only 0.2%.

Bond assets have not been immune with credit particularly suffering as cash flows vanish as economies freeze in March. UK gilts have offered some protection with the 10 year reference rate falling from 0.8% at the end of 2019 to close the quarter at 0.35% after the Bank of England cut rates initially by 50bps on 11th March and then a further 0.15% on 19th March as support packages were stepped up. After remaining on hold under the cloud of Brexit uncertainty, the bank rate now stands at historical low of 0.10%. The US 10-year T-Note yield fell by 125bp from the end of 2019 to 0.67% on 31st March, close to its all-time low of 0.54% posted on 9th March. This downward trend in yields began in the first days of January, becoming more pronounced as the virus situation worsened from mid-February. As equities fell amid fears of a global recession, expectations of a cut in key interest rates by the Fed duly rose. These expectations materialised, with two cuts in the federal funds target rate on 3rd and 15th March (a Sunday), for a total of 150bp bringing the US reference rate down to the 0%-0.25% range.

## IFSL Sinfonia OEIC Notes to the Interim Financial Statements

### **Basis for Accounting**

The interim financial statements have been prepared in compliance with FRS 102 and in accordance with the Statement of Recommended Practice (SORP) for UK Authorised Funds issued by The Investment Management Association (now known as the Investment Association (IA)) in May 2014 and amended in June 2017.

The interim financial statements are prepared in sterling, which is the functional currency of these sub-funds. Monetary amounts in these financial statements are rounded to the nearest thousand pounds.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

### **Accounting Policies**

The accounting policies applied are consistent with those of the annual financial statements for the year ended 30th September 2019 and are described in those annual financial statements.

The valuation point was 12 o'clock midday on 31st March 2020 being the last valuation point of the interim accounting period.

## IFSL Sinfonia Income Portfolio Fund Information

### Investment Objective

The investment objective of the sub-fund is to provide regular income with some potential for capital growth over the long term.

### Investment Policy

The sub-fund's investment objective will be achieved by investing in a diversified portfolio of equities, fixed interest securities, warrants and money market instruments primarily through investment in a portfolio of collective investment schemes. The sub-fund will typically be invested in a global portfolio of assets with a focus on UK assets.

Normally, the sub-fund will be fully invested except for an amount to enable redemption of shares, efficient management of the sub-fund in relation to its strategic objectives, and other purposes which may be reasonably regarded as ancillary to the investment objectives of the sub-fund. However, the sub-fund's investment policy may mean that at times, where it is considered appropriate, the scheme property will not be fully invested and that prudent levels of liquidity will be maintained.

It is intended that the sub-fund will be invested in a portfolio of assets which the Investment Manager considers to be mainly low and medium risk investments over the long term.

The asset classes in which the sub-fund may also invest includes transferable securities, money market instruments, cash and near cash and deposits as such asset classes are permitted for investment by UCITS Schemes and in accordance with the Company's general investment powers as provided in the Instrument of Incorporation, OEIC Regulations and COLL. The investment powers applicable to the sub-fund are summarised for your information in the Prospectus.

The sub-fund is permitted to invest in derivative instruments and forward transactions for investment purposes, however, it is the Investment Manager's intention that the sub-fund shall utilise derivative instruments and forward transactions for hedging purposes using efficient portfolio management techniques, as explained further in the Prospectus.

The Investment Association (IA), the trade body for UK investment managers, has created a number of sectors as a way of dividing funds into broad groups with similar characteristics. The sub-fund's investment policy puts it in the IA Mixed Investment 0-35% Shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

### Synthetic Risk and Reward Indicator (SRRI - all share classes)

The above SRRI aims to give you a measure of the price movement of the share classes based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the sub-fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

The sub-fund has been measured as 3 because it has experienced low to moderate volatility historically. During the period the SRRI has remained unchanged.

# IFSL Sinfonia Income Portfolio Investment Manager's Review

for the period from 1st October 2019 to 31st March 2020

### Percentage change to 31st March 2020

	6 Months	1 Year	3 Years	5 Years
IFSL Sinfonia Income Portfolio	-6.00%	0.00%	1.64%	12.24%
Benchmark: IA Mixed Investment 0-35% Shares	-7.59%	-3.54%	-0.76%	6.94%

External source of economic data: Morningstar (A Accumulation - mid to mid)

Looking back to the fourth quarter of 2019, from an asset allocation perspective, the sub-fund looked to trade equity exposure on a tactical basis with a "buy the dip" approach. With risk markets trending strongly during the period portfolio exposure to US equity and UK small caps has been increased which added value following strong returns in these markets.

In fixed income, a marginal underweight duration stance was maintained with government bond yields at very low level (with tilts towards short-term UK corporate and government bond exposures). The sub-fund remains diversified in this space as we seek out higher yielding opportunities with a small allocation to Aberdeen Emerging Market Debt in hard (\$) currency.

From a currency perspective, during those last months of 2019, strength in pound sterling had mitigated some of the gains in the international markets; however, our hedging strategy (US Equity in particular) has proven beneficial. Following the impressive rally of the pound in both the run up and wake of the convincing Conservative party election majority we have taken profits on this view with the currency near a value we consider to be approximately fair considering the Brexit road ahead. Looking at the underlying fund selections, Standard Life UK Smaller Companies has been the standout performer returning nearly 20% over the period. We also had good results from our alternative fixed income selections of Sequoia Economic Infrastructure and TCW Metwest Unconstrained bonds; both comfortably beating UK government bonds as gilt yield rose but also to a lesser extent investment grade bonds. The sub-fund exited the holding in Sequoia just prior to the coronavirus forced lockdown in European markets early in March that caused distress in many higher yielding debt assets.

Coming into 2020 the portfolio managers held a cautiously constructive outlook, valuations were a little elevated yet conditions were reasonably benign and supportive for many risk assets. Exposure to equity and credit was relatively neutral, a small bias to be short UK duration at low yield levels, preferring instead to capture higher returns from emerging market debt in hard currency (USD) remained active positions. On equites the premise was to look to "buy the dip" on weakness, and in early February emerging markets offered this opportunity as China and North Asia appeared to have taken substantive steps to contain this novel coronavirus outbreak. As the situation worsened with the spread of the virus to Italy and the enforced lockdown there, the portfolios began to adopt a more neutral approach as asset class volatility rocketed. On a relative basis during March the sub-fund had slight tilt towards US and emerging equities over UK and Europe, this helped dampen the drawdown as the tech heavy S&P500 fared marginally better against countries in the midst of the pandemic. This position was neutralised towards the end of the month with the risk of virus spread in the US gaining traction. The dislocations and fire sales in many markets has detracted from portfolio value over this period, however we do view this as a largely short-term external episode with potential for a considerable rebound in growth activity for the 2nd half of the year further supported by the massive policy stimulus.

Currency exposure has remained neutral with no strong bias amid highly volatile markets and even before Covid-19, an unpredictable Brexit path for the UK. The international exposure of the sub-fund in these last months combined with Sterling weakness has however proved beneficial. This is both from a diversification perspective and over the last month of the reporting period in period has helped counteract some of the local market losses.

# IFSL Sinfonia Income and Growth Portfolio Fund Information

### Investment Objective

The investment objective of the sub-fund is to provide income and capital growth for investors over the long-term.

### **Investment Policy**

The sub-fund's investment objective will be achieved by investing in a diversified portfolio of equities as well as fixed interest securities, warrants and money market instruments primarily through investment in a portfolio of collective investment schemes. The sub-fund will typically be invested in a global portfolio of assets with a focus on UK assets.

Normally, the sub-fund will be fully invested except for an amount to enable redemption of shares, efficient management of the sub-fund in relation to its strategic objectives, and other purposes which may be reasonably regarded as ancillary to the investment objectives of the sub-fund. However, the sub-fund's investment policy may mean that at times, where it is considered appropriate, the scheme property will not be fully invested and that prudent levels of liquidity will be maintained.

It is intended that the sub-fund will be invested in a portfolio of assets which the Investment Manager considers to be mainly medium and high risk investments with the intention of generating long term returns.

The asset classes in which the sub-fund may also invest includes transferable securities, money market instruments, cash and near cash and deposits as such asset classes are permitted for investment by UCITS Schemes and in accordance with the Company's general investment powers as provided in the Instrument of Incorporation, OEIC Regulations and COLL. The investment powers applicable to the sub-fund are summarised for your information in the Prospectus.

The sub-fund is permitted to invest in derivative instruments and forward transactions for investment purposes, however, it is the Investment Manager's intention that the sub-fund shall utilise derivative instruments and forward transactions for hedging purposes using efficient portfolio management techniques, as explained further in the Prospectus.

The Investment Association (IA), the trade body for UK investment managers, has created a number of sectors as a way of dividing funds into broad groups with similar characteristics. The sub-fund's investment policy puts it in the IA Mixed Investment 20-60% Shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

### Synthetic Risk and Reward Indicator (SRRI - all share classes)

The above SRRI aims to give you a measure of the price movement of the share classes based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the sub-fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the SRRI has remained unchanged.

### IFSL Sinfonia Income and Growth Portfolio Investment Manager's Review

for the period from 1st October 2019 to 31st March 2020

### Percentage change to 31st March 2020

	6 Months	1 Year	3 Years	5 Years
IFSL Sinfonia Income and Growth Portfolio	-14.31%	-8.44%	-5.04%	8.08%
Benchmark: IA Mixed Investment 20-60% Shares	-11.51%	-7.18%	-3.71%	6.19%

External source of economic data: Morningstar (A Accumulation - mid to mid)

Looking back to the fourth quarter of 2019, from an asset allocation perspective, the sub-fund looked to trade equity exposure on a tactical basis with a "buy the dip" approach. With risk markets trending strongly during the period portfolio exposure to US equity and UK small caps has been increased which added value following strong returns in these markets.

In fixed income, a marginal underweight duration stance was maintained with government bond yields at very low level (with tilts towards short-term UK corporate and government bond exposures). The sub-fund remains diversified in this space as we seek out higher yielding opportunities with a small allocation to Aberdeen Emerging Market Debt in hard (\$) currency.

From a currency perspective, during those last months of 2019, strength in pound sterling had mitigated some of the gains in the international markets; however, our hedging strategy (US Equity in particular) has proven beneficial. Following the impressive rally of the pound in both the run up and wake of the convincing Conservative party election majority we have taken profits on this view with the currency near a value we consider to be approximately fair considering the Brexit road ahead. Looking at the underlying fund selections, Standard Life UK Smaller Companies has been the standout performer returning nearly 20% over the period. We also had good results from our alternative fixed income selections of Sequoia Economic Infrastructure and TCW Metwest Unconstrained bonds; both comfortably beating UK government bonds as gilt yield rose but also to a lesser extent investment grade bonds. The sub-fund exited the holding in Sequoia just prior to the coronavirus forced lockdown in European markets early in March that caused distress in many higher yielding debt assets.

Coming into 2020 the portfolio managers held a cautiously constructive outlook, valuations were a little elevated yet conditions were reasonably benign and supportive for many risk assets. Exposure to equity and credit was relatively neutral; a small bias to be short UK duration at low yield levels, preferring instead to capture higher returns from emerging market debt in hard currency (USD) remained active positions. On equites the premise was to look to "buy the dip" on weakness, and in early February emerging markets offered this opportunity as China and North Asia appeared to have taken substantive steps to contain this novel coronavirus outbreak. As the situation worsened with the spread of the virus to Italy and the enforced lockdown there, the portfolios began to adopt a more neutral approach as asset class volatility rocketed. On a relative basis during March the sub-fund had slight tilt towards US and emerging equities over UK and Europe, this helped dampen the drawdown as the tech heavy S&P500 fared marginally better against countries in the midst of the pandemic. This position was neutralised towards the end of the month with the risk of virus spread in the US gaining traction. The dislocations and fire sales in many markets has detracted from portfolio value over this period, however we do view this as a largely short-term external episode with potential for a considerable rebound in growth activity for the 2nd half of the year further supported by the massive policy stimulus.

Currency exposure has remained neutral with no strong bias amid highly volatile markets and even before Covid-19, an unpredictable Brexit path for the UK. The international exposure of the sub-fund in these last months combined with Sterling weakness has however proved beneficial. This is both from a diversification perspective and over the last month of the reporting period in period has helped counteract some of the local market losses.

# IFSL Sinfonia Cautious Managed Portfolio Fund Information

### **Investment Objective**

The investment objective of the sub-fund is to provide long term returns, by a combination of both capital growth and income generation.

### **Investment Policy**

The sub-fund's investment objective will be achieved by investing in a diversified portfolio of equities as well as fixed interest securities, warrants and money market instruments primarily through investment in a portfolio of collective investment schemes. The sub-fund will typically be invested in a global portfolio of assets and may also focus on UK assets.

Normally, the sub-fund will be fully invested except for an amount to enable redemption of shares, efficient management of the sub-fund in relation to its strategic objectives, and other purposes which may be reasonably regarded as ancillary to the investment objectives of the sub-fund. However, the sub-fund's investment policy may mean that at times, where it is considered appropriate, the scheme property will not be fully invested and that prudent levels of liquidity will be maintained.

It is intended that the sub-fund will be invested in a portfolio of assets which the Investment Manager considers to be mainly medium risk investments with the intention of generating long term returns.

The asset classes in which the sub-fund may also invest includes transferable securities, money market instruments, cash and near cash and deposits as such asset classes are permitted for investment by UCITS Schemes and in accordance with the Company's general investment powers as provided in the Instrument of Incorporation, OEIC Regulations and COLL. The investment powers applicable to the sub-fund are summarised for your information in the Prospectus.

The sub-fund is permitted to invest in derivative instruments and forward transactions for investment purposes, however, it is the Investment Manager's intention that the sub-fund shall utilise derivative instruments and forward transactions for hedging purposes using efficient portfolio management techniques, as explained further in the Prospectus.

The Investment Association (IA), the trade body for UK investment managers, has created a number of sectors as a way of dividing funds into broad groups with similar characteristics. The sub-fund's investment policy puts it in the IA Mixed Investment 20-60% Shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

### Synthetic Risk and Reward Indicator (SRRI - all share classes)

Lower risk High			Higher risk		
Typically lower rewards Typically higher			er rewards		
1 2	3	4	5	6	7

The above SRRI aims to give you a measure of the price movement of the share classes based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the sub-fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the SRRI has remained unchanged.

## IFSL Sinfonia Cautious Managed Portfolio Investment Manager's Review

for the period from 1st October 2019 to 31st March 2020

### Percentage change to 31st March 2020

	6 Months	1 Year	3 Years	5 Years
IFSL Sinfonia Cautious Managed Portfolio	-10.79%	-4.56%	-1.61%	11.38%
Benchmark: IA Mixed Investment 20-60% Shares	-11.51%	-7.18%	-3.71%	6.19%

External source of economic data: Morningstar (A Accumulation - mid to mid)

Looking back to the fourth quarter of 2019, from an asset allocation perspective, the sub-fund looked to trade equity exposure on a tactical basis with a "buy the dip" approach. With risk markets trending strongly during the period portfolio exposure to US equity and UK small caps has been increased which added value following strong returns in these markets.

In fixed income, a marginal underweight duration stance was maintained with government bond yields at very low level (with tilts towards short-term UK corporate and government bond exposures). The sub-fund remains diversified in this space as we seek out higher yielding opportunities with a small allocation to Aberdeen Emerging Market Debt in hard (\$) currency.

From a currency perspective, during those last months of 2019, strength in pound sterling had mitigated some of the gains in the international markets; however, our hedging strategy (US Equity in particular) has proven beneficial. Following the impressive rally of the pound in both the run up and wake of the convincing Conservative party election majority we have taken profits on this view with the currency near a value we consider to be approximately fair considering the Brexit road ahead. Looking at the underlying fund selections, Standard Life UK Smaller companies has been the standout performer returning nearly 20% over the period. We also had good results from our alternative fixed income selections of Sequoia Economic Infrastructure and TCW Metwest Unconstrained bonds; both comfortably beating UK government bonds as gilt yield rose but also to a lesser extent investment grade bonds. The sub-fund exited the holding in Sequoia just prior to the coronavirus forced lockdown in European markets early in March that caused distress in many higher yielding debt assets.

Coming into 2020 the portfolio managers held a cautiously constructive outlook, valuations were a little elevated yet conditions were reasonably benign and supportive for many risk assets. Exposure to equity and credit was relatively neutral; a small bias to be short UK duration at low yield levels, preferring instead to capture higher returns from emerging market debt in hard currency (USD) remained active positions. On equites the premise was to look to "buy the dip" on weakness, and in early February emerging markets offered this opportunity as China and North Asia appeared to have taken substantive steps to contain this novel coronavirus outbreak. As the situation worsened with the spread of the virus to Italy and the enforced lockdown there, the portfolios began to adopt a more neutral approach as asset class volatility rocketed. On a relative basis during March the sub-fund had slight tilt towards US and emerging equities over UK and Europe, this helped dampen the drawdown as the tech heavy S&P500 fared marginally better against countries in the midst of the pandemic. This position was neutralised towards the end of the month with the risk of virus spread in the US gaining traction. The dislocations and fire sales in many markets has detracted from portfolio value over this period, however we do view this as a largely short-term external episode with potential for a considerable rebound in growth activity for the 2nd half of the year further supported by the massive policy stimulus.

Currency exposure has remained neutral with no strong bias amid highly volatile markets and even before Covid-19, an unpredictable Brexit path for the UK. The international exposure of the sub-fund in these last months combined with Sterling weakness has however proved beneficial. This is both from a diversification perspective and over the last month of the reporting period in period has helped counteract some of the local market losses.

#### IFSL Sinfonia Balanced Managed Portfolio Fund Information

#### **Investment Objective**

The investment objective of the sub-fund is to provide medium to long term capital growth.

#### **Investment Policy**

The sub-fund's investment objective will be achieved by investing in a diversified portfolio of fixed interest securities and equities, as well as warrants, and money market instruments, primarily through investment in a portfolio of collective investment schemes. The sub-fund will typically be invested in a global portfolio of assets but may focus on UK and European assets.

Normally, the sub-fund will be fully invested except for an amount to enable redemption of shares, efficient management of the sub-fund in relation to its strategic objectives, and other purposes which may be reasonably regarded as ancillary to the investment objectives of the sub-fund. However, the sub-fund's investment policy may mean that at times, where it is considered appropriate, the scheme property will not be fully invested and that prudent levels of liquidity will be maintained.

It is intended that the sub-fund will be invested in a portfolio of assets which the Investment Manager considers to be mainly medium to high risk investments over the long term.

The asset classes in which the sub-fund may also invest includes transferable securities, units in collective investment schemes, money market instruments, cash and near cash and deposits as such asset classes are permitted for investment by UCITS Schemes and in accordance with the Company's general investment powers as provided in the Instrument of Incorporation, OEIC Regulations and COLL. The investment powers applicable to the sub-fund are summarised for your information in the Prospectus.

The sub-fund is permitted to invest in derivative instruments and forward transactions for investment purposes, however, it is the Investment Manager's intention that the sub-fund shall utilise derivative instruments and forward transactions for hedging purposes using efficient portfolio management techniques, as explained further in the Prospectus.

The Investment Association (IA), the trade body for UK investment managers, has created a number of sectors as a way of dividing funds into broad groups with similar characteristics. The sub-fund's investment policy puts it in the IA Mixed Investment 40-85% Shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

#### Synthetic Risk and Reward Indicator (SRRI - all share classes)

The above SRRI aims to give you a measure of the price movement of the share classes based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the sub-fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

The sub-fund has been measured as 4 because it has experienced moderate volatility historically. During the period the SRRI has remained unchanged.

#### IFSL Sinfonia Balanced Managed Portfolio Investment Manager's Review

for the period from 1st October 2019 to 31st March 2020

#### Percentage change to 31st March 2020

	6 Months	1 Year	3 Years	5 Years
IFSL Sinfonia Balanced Managed Portfolio	-16.52%	-10.74%	-6.77%	7.18%
Benchmark: IA Mixed Investment 40-85% Shares	-13.24%	-7.72%	-2.12%	11.67%

External source of economic data: Morningstar (A Accumulation - mid to mid)

Looking back to the fourth quarter of 2019, from an asset allocation perspective, the sub-fund looked to trade equity exposure on a tactical basis with a "buy the dip" approach. With risk markets trending strongly during the period portfolio exposure to US equity and UK small caps has been increased which added value following strong returns in these markets.

In fixed income, a marginal underweight duration stance was maintained with government bond yields at very low level (with tilts towards short-term UK corporate and government bond exposures). The sub-fund remains diversified in this space as we seek out higher yielding opportunities with a small allocation to Aberdeen Emerging Market Debt in hard (\$) currency.

From a currency perspective, during those last months of 2019, strength in pound sterling had mitigated some of the gains in the international markets; however, our hedging strategy (US Equity in particular) has proven beneficial. Following the impressive rally of the pound in both the run up and wake of the convincing Conservative party election majority we have taken profits on this view with the currency near a value we consider to be approximately fair considering the Brexit road ahead. Looking at the underlying fund selections, Standard Life UK Smaller Companies has been the standout performer returning nearly 20% over the period. We also had good results from our alternative fixed income selections of Sequoia Economic Infrastructure and TCW Metwest Unconstrained bonds; both comfortably beating UK government bonds as gilt yield rose but also to a lesser extent investment grade bonds. The sub-fund exited the holding in Sequoia just prior to the coronavirus forced lockdown in European markets early in March that caused distress in many higher yielding debt assets.

Coming into 2020 the portfolio managers held a cautiously constructive outlook, valuations were a little elevated yet conditions were reasonably benign and supportive for many risk assets. Exposure to equity and credit was relatively neutral; a small bias to be short UK duration at low yield levels, preferring instead to capture higher returns from emerging market debt in hard currency (USD) remained active positions. On equites the premise was to look to "buy the dip" on weakness, and in early February emerging markets offered this opportunity as China and North Asia appeared to have taken substantive steps to contain this novel coronavirus outbreak. As the situation worsened with the spread of the virus to Italy and the enforced lockdown there, the sub-fund began to adopt a more neutral approach as asset class volatility rocketed. On a relative basis during March the sub-fund had slight tilt towards US and Emerging equities over UK and Europe, this helped dampen the drawdown as the tech heavy S&P500 fared marginally better against countries in the midst of the pandemic. This position was neutralised towards the end of the month with the risk of virus spread in the US gaining traction. The dislocations and fire sales in many markets has detracted from portfolio value over this period, however we do view this as a largely short-term external episode with potential for a considerable rebound in growth activity for the 2nd half of the year further supported by the massive policy stimulus.

Currency exposure has remained neutral with no strong bias amid highly volatile markets and even before Covid-19, an unpredictable Brexit path for the UK. The international exposure of the sub-fund in these last months combined with Sterling weakness has however proved beneficial. This is both from a diversification perspective and over the last month of the reporting period in period has helped counteract some of the local market losses.

#### IFSL Sinfonia Adventurous Growth Portfolio Fund Information

#### Investment Objective

The investment objective of the sub-fund is to provide long term capital growth.

#### Investment Policy

The sub-fund's investment objective will be achieved primarily by investing in a diversified portfolio of fixed interest securities and equities, as well as warrants, and money market instruments, through investment in a portfolio of collective investment schemes. The sub-fund will typically be invested in a global portfolio of assets but may also focus on UK assets.

Normally, the sub-fund will be fully invested except for an amount to enable redemption of shares, efficient management of the sub-fund in relation to its strategic objectives, and other purposes which may be reasonably regarded as ancillary to the investment objectives of the sub-fund. However, the sub-fund's investment policy may mean that at times, where it is considered appropriate, the scheme property will not be fully invested and that prudent levels of liquidity will be maintained.

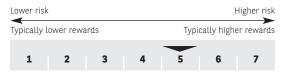

It is intended that the sub-fund will typically be invested in a portfolio of assets which the Investment Manager considers to be mainly medium to high risk investments over the long term.

The asset classes in which the sub-fund may also invest includes transferable securities, money market instruments, cash and near cash and deposits as such asset classes are permitted for investment by UCITS Schemes and in accordance with the Company's general investment powers as provided in the Instrument of Incorporation, OEIC Regulations and COLL. The investment powers applicable to the sub-fund are summarised for your information in the Prospectus.

The sub-fund is permitted to invest in derivative instruments and forward transactions for investment purposes, however, it is the Investment Manager's intention that the sub-fund shall utilise derivative instruments and forward transactions for hedging purposes using efficient portfolio management techniques, as explained further in the Prospectus.

The Investment Association (IA), the trade body for UK investment managers, has created a number of sectors as a way of dividing funds into broad groups with similar characteristics. The sub-fund's investment policy puts it in the IA Mixed Investment 40-85% Shares sector. You may want to assess the sub-fund's performance compared to the performance of this sector.

#### Synthetic Risk and Reward Indicator (SRRI - all share classes)

The SRRI above aims to give you a measure of the price movement of the share classes based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the sub-fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

The sub-fund has been measured as 5 because it has experienced moderate to high volatility historically. During the period the SRRI has remained unchanged.

#### IFSL Sinfonia Adventurous Growth Portfolio Investment Manager's Review

for the period from 1st October 2019 to 31st March 2020

#### Percentage change to 31st March 2020

	6 Months	1 Year	3 Years	5 Years
IFSL Sinfonia Adventurous Growth Portfolio	-17.58%	-11.99%	-7.96%	7.13%
Benchmark: IA Mixed Investment 40-85% Shares	-13.24%	-7.72%	-2.12%	11.67%

External source of economic data: Morningstar (A Accumulation - mid to mid)

Looking back to the fourth quarter of 2019, from an asset allocation perspective, the sub-fund looked to trade equity exposure on a tactical basis with a "buy the dip" approach. With risk markets trending strongly during the period portfolio exposure to US equity and UK small caps has been increased which added value following strong returns in these markets.

In fixed income, a marginal underweight duration stance was maintained with government bond yields at very low level (with tilts towards short-term UK Corporate Bonds in the iShares ETF). The sub-fund remains diversified in the credit space as we seek out higher yielding opportunities with a small allocation to Aberdeen Emerging Market Debt in hard (\$) currency.

From a currency perspective, during those last months of 2019, strength in pound sterling had mitigated some of the gains in the international markets; however, our hedging strategy (US Equity in particular) has proven beneficial. Following the impressive rally of the pound in both the run up and wake of the convincing Conservative party election majority we have taken profits on this view with the currency near a value we consider to be approximately fair considering the Brexit road ahead. Looking at the underlying fund selections, Standard Life UK Smaller Companies has been the standout performer returning nearly 20% over the period. We also had good results from our alternative fixed income selections of Sequoia Economic Infrastructure, which comfortably beat UK government bonds as gilt yield rose but also, albeit to a lesser extent, investment grade bonds. The sub-fund exited the holding in Sequoia just prior to the coronavirus forced lockdown in European markets early in March that caused distress in many higher yielding debt assets.

Coming into 2020 the portfolio managers held cautiously constructive outlook, valuations were a little elevated yet conditions were reasonably benign and supportive for many risk assets. Exposure to equity and credit was relatively neutral; a small bias to be short UK duration at low yield levels, preferring instead to capture higher returns from emerging market debt in hard currency (USD) remained active positions. On equites the premise was to look to "buy the dip" on weakness, and in early February emerging markets offered this opportunity as China and North Asia appeared to have taken substantive steps to contain this novel coronavirus outbreak. As the situation worsened with the spread of the virus to Italy and the enforced lockdown there, the portfolios began to adopt a more neutral approach as asset class volatility rocketed. On a relative basis during March the sub-fund had slight tilt towards US and Emerging equities over UK and Europe, this helped dampen the drawdown as the tech heavy S&P500 fared marginally better against countries in the midst of the pandemic. This position was neutralised towards the end of the month with the risk of virus spread in the US gaining traction. The dislocations and fire sales in many markets has detracted from portfolio value over this period, however we do view this as a largely short-term external episode with potential for a considerable rebound in growth activity for the 2nd half of the year further supported by the massive policy stimulus.

Currency exposure has remained neutral with no strong bias amid highly volatile markets and even before Covid-19, an unpredictable Brexit path for the UK. The international exposure of the sub-fund in these last months combined with Sterling weakness has however proved beneficial. This is both from a diversification perspective and over the last month of the reporting period in period has helped counteract some of the local market losses.

Lowest share price	136.20	153.60	162.30	147.50

<sup>A</sup> This represents the annualised operating charges to 31st March 2020.

<sup>B</sup> This represents the annualised direct transaction costs to 31st March 2020.

Operating charges are the same as the ongoing charges figure (OCF) and are the total expenses paid by each share class in the period. Direct transaction costs are the total charges for the period included in the purchase and sale of investments in the portfolio of the sub-fund.

## Statement of Change in Net Assets Attributable to Shareholders

for the period from 1st October 2019 to 31st March 2020

	31st March 2020		31st March 2019	
	£'000	£'000	£'000	£'000
Opening net assets attributable to shareholders		19,195 <sup>A</sup>		18,703
Amounts receivable on issue of shares	1,490		1,111	
Amounts payable on cancellation of shares	(2,252)		(953)	
		(762)		158
Change in net assets attributable to shareholders				
from investment activities (see above)		(3,320)		(596)
Retained distributions on accumulation shares		119		94
Closing Net Assets Attributable to Shareholders		15,232		18,359 <sup>A</sup>

<sup>A</sup> With respect to the Statement of Change in Net Assets Attributable to Shareholders, the comparative figures are from the prior period's interim and this is the reason why the Opening Net Assets Attributable to Shareholders for the current period does not equal the Closing Net Assets Attributable to Shareholders.

Other creditors	715	50
Total Liabilities	928	50
Net Assets Attributable to Shareholders	15,232	19,195

#### IFSL Sinfonia OEIC General Information

It is important to remember that the price of shares, and the income from them, can fall as well as rise and it is not guaranteed that investors will get back the amount originally invested. Past performance is not a guide to future performance. Changes in the rate of exchange of currencies, particularly where overseas securities are held, may also affect the value of your investment. The issue of shares may be subject to an initial charge and this is likely to have an impact on the realisable value of your investment, particularly in the short term. You should always regard an ICVC investment as long term.

#### Pricing and Dealing

Mid prices are always quoted for shares in the sub-funds.

Dealing in all ICVCs operated by IFSL may be carried out between 9 am and 5 pm on any business day. Applications can be made either by completing an application form and delivering it to the ACD at IFSL, Marlborough House, 59 Chorley New Road, Bolton BL1 4QP, or through approved agents.

The Company deals on a forward basis, which means that orders received will be dealt with at the price calculated at the next valuation point. Share prices are calculated daily at the valuation point of 12 o'clock midday, and applications for shares should be received by this time to ensure inclusion in the following valuation point.

#### **Publication of Prices**

The prices of shares in the sub-funds are currently quoted daily on the following web pages:

www.sinfonia.com www.ifslfunds.com www.fundlistings.com

Alternatively you can contact the ACD on 0808 178 9322 (9 am to 5 pm Monday to Friday, excluding bank holidays, and from 9 am to 12:30 pm on the last business day prior to Christmas Day) who will be happy to provide you with the most recent price of your shares.
