Summary of Investment Objective

The fund's objective is to provide income from the USD fixed income market while seeking to preserve capital by investing primarily in U.S. dollar denominated corporate debt securities issued by U.S. and foreign companies. The Investment Manager allocates the fund's assets among a range of market sectors and will seek to invest at least 80% of the fund in fixed and floating rate investment grade corporate debt securities and investments.

All performance data shown in the fund's base currency. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV performance. **Past performance is not an indicator or a guarantee of future performance.** All dividends have been re-invested. The actual costs vary depending on the executing custodian. In addition, deposit costs may be incurred which could have a negative effect on the value development. Please find out the costs due from the respective price lists from the processing/custodian bank. Changes in exchange rates could have positive or negative effects on the development in this investment. Please visit franklintempleton.co.uk for current performance and see the prospectus for further details. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

What are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments.

There is no guarantee that the Fund will meet its objective.

The Fund invests primarily in U.S. dollar denominated corporate debt securities issued by U.S. and non-U.S. companies.

Such securities have historically been subject to price movements, generally due to interest rates or movements in the bond market. As a result, the performance of the Fund can fluctuate moderately over time.

Other significant risks include: counterparty risk, credit risk, derivatives risk, secondary market trading risk

For full details of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin LibertyShares ICAV.

Glossary

Average Duration: A measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years. The weighted average duration of a fund reflects the effective duration of the underlying issues, based on the size of each holding.

Average Weighted Maturity: An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings.

Yield to Maturity: Yield to Maturity ('YTM') also known as the 'Gross Redemption Yield' or 'Redemption Yield'. The rate of return anticipated on a bond if it is held until the maturity date. YTM is considered a long-term bond yield expressed as an annual rate. The calculation of YTM takes into account the current market price, par value, coupon interest rate and time to maturity. It is also assumed that all coupons are reinvested at the same rate.

Important Information

Source for data and information provided by Franklin Templeton Investments, as of the date of this document, unless otherwise noted.

This material is intended to be of general interest only and should not be construed as individual investment advice or a recommendation or solicitation to buy, sell or hold any security or to adopt any investment strategy. It does not constitute legal or tax advice. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. To the extent the fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, it may be subject to greater risks of adverse developments in such areas at focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments.

Franklin LibertyShares ICAV ("the ETF") investment returns and principal values will change with market conditions, and an investor may have a gain or a loss when they sell their shares. Please visit www.franklintempleton.co.uk for the Franklin LibertyShares ICAV standardised and most recent month-end performance. There is no guarantee that any strategy will achieve its objective.

Investment in Franklin LibertyShares ICAV is not riskless and investors can lose money.

All performance data shown is in the fund's base currency. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF.

Individual investors may realise returns that are different to the NAV performance. **Past performance is not an indicator or a guarantee of future performance.** The actual costs vary depending on the executing custodian. In addition, deposit costs may be incurred which could have a negative effect on the value. Please find out the costs due from the respective price lists from the processing/custodian bank. Changes in exchange rates could have positive or negative effects on this investment. Please visit www.franklintempleton.co.uk for current performance and see the latest prospectus or supplement for further details. Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change. An investment in Franklin LibertyShares ICAV entails risks which are described in the latest prospectus or supplement and in the relevant Key Investor Information Document.

Franklin LibertyShares ICAV (domiciled outside of the U.S. or Canada) may not be directly or indirectly offered or sold to residents of the United States of America or Canada. ETFs trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Indices are unmanaged, and one cannot invest directly in an index. They do not reflect any fees, expenses or sales charges.

Fund Overview:

Ongoing Charges: The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Product Structure: The Product Structure indicates whether an ETF is holding physical securities (i.e. Physical) or whether it is tracking the index performance using derivatives (swaps, i.e. Synthetic).

Fund Management: CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

Performance: Net Asset Value (NAV) represents an ETF's per-share-value. The NAV per share is determined by dividing the total NAV of the Fund by the number of shares outstanding.

Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable. The portfolio manager for the Fund reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings list. Issued by Franklin Templeton Investment Management Limited (FTIML), registered office: Cannon Place, 78 Cannon Street, London, EC4N 6HL. Tel+44 (0)20 7073 8500. Authorised and regulated in the United Kingdom by the Financial Conduct Authority.
